3. The results of tests of instrument transformers will be kept on record and available for use.
- (c) Phase shifting transformers will have secondary voltages under balanced line voltage conditions within 1.0% plus or minus of the voltage impressed on the primary.

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

B-6.6 (cont'd.)

transformers are tested separately, the meters shall also be checked to see that the overall accuracy of the installation is within the prescribed accuracy requirements.

- (d) The results of tests of instrument transformers shall be kept on record and shall be available for use.
- (e) Phase shifting transformers shall have secondary voltages under balanced line voltage conditions within plus or minus 1.0% of the voltage impressed on the primary side of the transformer.

B-6.7 **PORTABLE INDICATING VOLTMETERS:**

All portable indicating voltmeters that are used for determining the quality of service voltage to customers shall be checked against a suitable secondary reference standard at least once every 6 months. The accuracy of these voltmeters shall be rated so that the error of the indication is not more than plus or minus 1% of full scale. If the portable indicating voltmeter is found to be in error by more than the rated accuracy at commonly used scale deflections, it shall be adjusted.

B-6.8 **METER TESTING EQUIPMENT:**

- (a) The Company shall maintain sufficient laboratories, meter testing shops, secondary standards, instruments, and facilities to determine the accuracy of all types of meters and measuring devices used by the Company. The Company may, if necessary, have all or part of the required tests made or its portable testing equipment checked by another utility or agency approved by the commission and having adequate and sufficient testing equipment to comply with these rules.
- (b) At a minimum, The Company shall keep all of the following testing equipment available:
 - (1) One or more portable standard watthour meters of a capacity and voltage range adequate to test all watthour meters used by the Company.
 - (2) Portable indicating instruments that are necessary to determine the accuracy of all instruments used by the Company.
 - (3) One or more secondary standards to check each of the various types of portable standard watthour meters used for testing watthour meters. Each secondary standard shall consist of an approved portable standard watthour meter kept permanently at 1 point and not used for fieldwork. Standards shall be well compensated for both classes of temperature errors, shall be practically free from errors due to ordinary voltage variations, and shall be free from erratic registration due to any cause.
 - (4) Suitable standards, which are not used for fieldwork, to check portable instruments used in testing.
- (c) The Company shall provide and use primary standards with accuracies traceable to the United States national bureau of standards.

Issued: August 17, 1983
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after January 5, 1983, under authority of Order of the Michigan Public Service Commission dated August 9, 1983, in Case U-7702.

METERING AND METERING EQUIPMENT-Continued

B-6.7 PORTABLE INDICATING VOLTMETERS:

All portable indicating voltmeters used for determining the quality of service voltage to customers will be checked against a suitable secondary reference standard at least once in each six months. The accuracy of these voltmeters will be rated so that the error of the indication is no greater than $\pm 1\%$ of full scale. If the portable indicating voltmeter is found in error by more than the rated accuracy at commonly used scale deflections, it will be adjusted.

B-6.8 TESTING EQUIPMENT:

- (a) The Company will maintain sufficient laboratories, meter testing shops, secondary standards, instruments, and facilities to determine the accuracy of all types of meters and measuring devices used by the Company. The Company may, if necessary, have all or part of the required tests made or its portable testing equipment checked by another utility or agency approved by the Michigan Public Service Commission and having adequate and sufficient testing equipment to comply with these rules.
- (b) The following testing equipment constitutes minimum requirements which will be kept available by the Company:
 1. One or more portable standard watthour meters of capacity and voltage range adequate to test all watthour meters used by the Company.
 2. Portable indicating instruments of such various types as are required to determine the accuracy of all instruments used by the Company.
 3. One or more secondary standards to check each of the various types of portable standard watthour meters used for testing watthour meters. Each secondary standard will consist of an approved portable standard watthour meter kept permanently at one point and not used for field work. Standards will be well compensated for both classes of temperature errors, practically free from errors due to ordinary voltage variations, and free from erratic registration due to any cause.
 4. Suitable standards which are not used for field work to check portable instruments used in testing.
- (c) The Company will provide and use primary standards with accuracies traceable to the United States National Bureau of Standards.

B-6.9 ACCURACY OF TEST STANDARDS:

- (a) The accuracies of all primary reference standards will be certified as traceable to the National Bureau of Standards, either directly or through other recognized standards laboratories. These standards will be certified at the time of purchase and at subsequent intervals.

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226
AUG 9 - 1983
REMOVED BY gja

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

B-6.9 ACCURACY OF TEST STANDARDS:

- (a) The accuracies of all primary reference standards shall be certified as traceable to the national bureau of standards, either directly or through other recognized standards laboratories. These standards shall have their accuracy certified at the time of purchase. Standard cells shall be intercompared regularly and shall have at least 1 of them checked by a standardizing laboratory at intervals of not more than 2 years. Reference standards of resistance, potentiometers, and volt boxes shall be checked at intervals of not more than 3 years.
- (b) Secondary watthour meter standards shall not be in error by more than plus or minus 0.3% at loads and voltages at which they are to be used, and shall not be used to check or calibrate working standards, unless the secondary standard has been checked and adjusted, if necessary, within the preceding 6 months. Each secondary standard watthour meter shall have calibration data available and shall have a history card.
- (c) Secondary standards indicating instruments shall not be in error by more than plus or minus 0.5% of indication at commonly used scale deflection and shall not be used to check or calibrate portable indicating instruments, unless the secondary standard has been checked and adjusted, if necessary, within the preceding 12 months. A calibration record shall be maintained for each standard.
- (d) Regularly used working portable standard watthour meters shall be compared with a secondary standard at least once a month. Infrequently used working standards shall be compared with a secondary standard before they are used.
- (e) Working portable standard watthour meters shall be adjusted so that their percent registration is within 99.7% and 100.3% at 100% power factor and within 99.5% and 100.5% at 50% lagging power factor at all voltages and loads at which the standard may be used. A history and calibration record shall be kept for each working standard.
- (f) The meter accuracies required in this rule for all primary, secondary, and working standards shall be referred to 100%. Service measuring equipment shall be adjusted to within the accuracies required assuming the portable test equipment to be 100% accurate with the calibration correction taken into consideration.

B-6.10 METERING EQUIPMENT TESTING REQUIREMENTS:

- (a) The testing of any unit of metering equipment shall consist of a comparison of its accuracy with a standard of known accuracy. Units which are not properly connected or which do not meet the accuracy or other requirements of these meter and metering equipment rules at the time of testing shall be reconnected and rebuilt to meet such requirements and shall be adjusted to within the required accuracy and as close to zero error as practicable or else their use shall be discontinued.
- (b) Self-contained, single-phase meters, except combination meters (meters which include demand devices or control devices), shall meet all of the following requirements:

METERING AND METERING EQUIPMENT-Continued

B-6.9 (cont'd.)

- (b) Secondary watthour meter standards will not be used to check or calibrate working standards unless the secondary standard has been checked and adjusted, if necessary, within the preceding six months. Each secondary standard watthour meter will have calibration data available and a history card.
- (c) Secondary standard indicating instruments will be of suitable accuracy to check or calibrate portable indicating instruments. The secondary standard will be on an appropriate calibration schedule (not to exceed 12 months between checks). Calibration and history records will be kept for each standard.
- (d) For parts (a), (b), and (c) above, the accuracy requirements and test schedules will be determined by accepted good metering practices as described in publications of recognized organizations, such as: National Bureau of Standards (NBS), American National Standards Institute (ANSI) and Institute of Electrical and Electronics Engineers (IEEE).
- (e) 1. All working portable standard watthour meters, when regularly used, will be compared with a secondary standard at least once a month. Working standards infrequently used will be compared with a secondary standard before they are used.
- 2. Working portable standard watthour meters will be adjusted so that their percent registration will be within 99.7 percent and 100.3 percent at 100 percent power factor and within 99.5 percent and 100.5 percent at 50 percent lagging power factor at all voltages and loads at which the standard may be used. A history and calibration record will be kept for each working standard.
- (f) The meter accuracies herein required as to all primary, secondary, and working standards will be referred to 100 percent. Service measuring equipment will be adjusted to within the accuracies required, assuming the portable test equipment to be 100 percent accurate.

B-6.10 TESTING OF METERING EQUIPMENT:

- (a) The test of any unit of metering equipment will consist of a comparison of its accuracy with a standard of known accuracy. Units not properly connected or not meeting the accuracy or other requirements of these meters and metering equipment rules at the time of the test will be reconnected and rebuilt to meet such requirements and adjusted to within the required accuracy and as close to 100 percent accurate as practicable or their use discontinued.
- (b) Self-contained, single-phase meters except combination meters (meters which include demand devices or control devices).
 - 1. Will be checked for accuracy at unity power factor at the point where they are installed or at a central testing point, or in a mobile testing laboratory:

AUG 9 - 1983

REMOVED BY JEA

B-6.10 (cont'd.)

- (1) Be checked for accuracy at unity power factor at the point where a meter is installed, at a central testing point, or in a mobile testing laboratory within a period of from 12 months before to 60 days after a meter is placed in service, except as provided for in B-6.1 (a), and not later than 6 months after 192 months of service for a surge-resistant meter and not later than 6 months after 96 months of service for a non-surge-resistant meter.
- (2) Notwithstanding subdivision (1) of this subrule, upon application to the commission and upon receipt of an order granting approval, the testing of self-contained, single-phase meters in service shall be governed by a quality control plan as follows:
 - a. Meters shall be divided into homogeneous groups by manufacturers' types, except as follows:
 1. Certain manufacturers' types shall be further subdivided into separate groups by manufacturers' serial numbers as follows: General Electric type I-30 shall be divided at serial number 20,241,829; Westinghouse type C shall be divided at serial number 16,350,000; Duncan type MF shall be divided at serial number 2,650,000; and Sangamo type J meters shall be divided starting with serial number 10,000,000.
 2. Non-surge-resistant meters that are installed in non-urban areas shall be treated as separate groups by manufacturers' type.
 - b. The meters in each homogeneous group shall then be further subdivided into lots of not less than 301 nor more than 10,000 meters each, except that meters of the most recent design may be combined into the aforementioned lots regardless of manufacturers' type, except that where the number of meters of a single type is 8,001 or more, such number of meters shall be segregated by types for the formation of lots.
 - c. From each assembled lot, a sample of the size specified in table A-2, page 4, military standard 414, June 11, 1957, shall be drawn annually using inspection level IV. The sample shall be drawn at random.
 - d. The meters in each sample shall be tested for accuracy pursuant to the provisions of these rules.
 - e. The test criteria for acceptance or rejection of each lot shall be based on the test at heavy load only and shall be that designated for double specification limits and 2.50 acceptable quality level (normal inspection) as shown in table B-3, page 45, military standard 414, June 11, 1957.
 - f. The necessary calculations shall be made pursuant to the illustration on page 43 of military standard 414. The upper and lower specification limits, U and L, shall be 102% and 98%, respectively.

METERING AND METERING EQUIPMENT-Continued

B-6.10 (cont'd.)

- a. Within 12 months before to 60 days after they are placed in service.
- b. Subsequently, the testing of these meters in service will be governed by a quality control plan as follows:
 - (1) Meters will be divided into homogeneous groups by manufacturer's types, except as follows:
 - (aa) Certain manufacturer's types will be further subdivided into separate groups by manufacturer's serial numbers as follows: General Electric type I-30 will be divided at serial number 20,241,829; Westinghouse type C at serial number 16,350,000; Duncan type MF at serial number 2,650,000 and Sangamo type J meters starting with serial number 10,000,000.
 - (bb) Non-surge resistant meters, installed in non-urban areas will be treated as separate groups by manufacturers' type.
 - (2) The meters in each group will then be further subdivided into lots of not less than 301 meters nor more than 10,000 meters each, except as follows:
 - (aa) Meters of the most recent designs may be combined into the aforementioned lots regardless of manufacturer's type, except where the number of meters of a single type is 8,001 or more, such shall be segregated by types for the information of lots.
 - (3) From each such lot so assembled, there shall be drawn annually a sample of the size specified in Table A-2, page 4, Military Standard 414, June 11, 1957, using Inspection Level IV. Due care shall be exercised that the sample be drawn at random.
 - (4) The meters in each sample shall be tested for accuracy in accordance with the provisions of these rules.
 - (5) The test criterion for acceptance or rejection of each lot shall be based on the test at heavy load only and shall be that designated for Double Specification Limits and 2.50 Acceptable Quality Level (normal inspection) as shown in Table B-3 on Page 45 in Military Standards 414, June 11, 1957.
 - (6) The necessary calculations shall be made in accordance with the illustration on Page 43 of Military Standard 414. The upper and lower specification limits, U and L, shall be 102% and 98% respectively.
 - (7) A lot shall be rejected if the Total Estimated Percent Defective (p), exceeds the appropriate Maximum Allowable Percent Defective (M) as determined from Table B-3 as specified in paragraph (5) above.

B-6.10 (cont'd.)

- g. A lot shall be rejected if the total estimated percent defective (p), exceeds the appropriate maximum allowable percent defective (m) as determined from table B-3 as specified in paragraph (e) of this subdivision.
 - h. All meters in a rejected lot shall be tested within a maximum period of 48 months and shall be adjusted pursuant to B-6.4 or shall be replaced with meters which meet the requirements of B-6.4.
 - i. During each calendar year, new meter samples shall be drawn as specified in this subdivision from all meters in service, with the exception that lots that have been rejected shall be excluded from the sampling procedure until all meters included in the rejected lots have been tested.
 - j. The Company may elect to test all of the meters included in any lot on a 48-month test schedule without following the sampling procedure described in this subdivision.
 - k. This plan does not alter the rules under which customers may request special tests of meters.
- (3) Be checked for accuracy in all of the following situations:
- a. When a meter is suspected of being inaccurate or damaged.
 - b. When the accuracy of a meter is questioned by a customer.
 - c. Before use if a meter has been inactive for more than 1 year after having been in service.
 - d. When a meter has been removed from service and has not been tested within the previous 48 months.
- (4) Be inspected for mechanical and electrical faults when the accuracy of the device is checked.
- (5) Have the register and the internal connections checked before the meter is first placed in service and when the meter is repaired.
- (6) Have the connections to the customer's circuits checked when the meter is tested on the premises or when removed for testing.
- (7) Be checked for accuracy at 50% power factor when purchased and after rebuilding.
- (8) A meter need not be tested or checked for any reason, except on complaint, if the device was tested, checked, and adjusted, if necessary, within the previous 12 months.
- (c) All single-phase meters that are not included in subrule (b) of this rule, together with associated equipment, such as demand devices, control devices, and instrument transformer rated meters, shall meet all of the following requirements:
- (1) Be checked for accuracy at unity power factor at the point where a meter is installed, at a central testing point, or in a mobile testing laboratory as follows:

B-6.10 (cont'd.)

adopted by reference and is available from the Michigan Public Service Commission, or from American National Standards Institute, and are of the 0.3 accuracy class, and unless the meter adjustment limits do not exceed plus or minus 1.5% at 50% power factor.

- c. Not later than 6 months after 48 months of service.
- d. When a meter is suspected of being inaccurate or damaged.
- e. When the accuracy is questioned by a customer. (See B-6.10(h))
- f. When a meter is removed from service.

- (2) Be inspected for mechanical and electrical faults when the accuracy is checked.
- (3) Have the register and internal connections checked before the meter is first placed in service and when the meter is repaired.
- (4) Have the connections to the customer's circuits and multipliers checked when the equipment is tested for accuracy on the premises or when removed for testing and when instrument transformers are changed.
- (5) Be checked for accuracy at 50% power factor when purchased and after rebuilding.

(f) Instrument transformers shall be tested in all of the following situations:

- (1) When first received, unless a transformer is accompanied by a certified test report by the manufacturer.
- (2) When removed from service.
- (3) Upon complaint.
- (4) When there is evidence of damage.
- (5) When an approved check, such as the variable burden method in the case of current transformers, made when the meter is tested indicates that a quantitative test is required.

(g) Demand meters shall meet both of the following requirements:

(1) Be tested for accuracy in all of the following situations:

- a. Before a meter is placed in service.
- b. When an associated meter is tested and the demand meter is a block interval nonrecording type or a thermal type.
- c. After 2 years of service if the meter is of the recording type, but it is not required if the meter is of the pulse-operated type and the demand reading is checked with the kilowatthour reading each billing cycle.
- d. When a meter is suspected of being inaccurate or damaged.
- e. When the accuracy is questioned by a customer. (See B-6.10(h))
- f. When a meter is removed from service.

(2) Be inspected for mechanical and electrical faults when a meter is tested in the field or in the meter shop.

(3) Military standard 414, June 11, 1957, is hereby adopted by reference and is available from the Michigan Public Service Commission, or from the Naval Publications and Forms Center.

(h) Customer-requested meter tests.

- (1) Upon request by a customer to the Company, the Company shall make a test of

B-6.10 (cont'd.)

- b. On the customer's premises within 60 days after installation unless the transformers conform with specifications outlined in American National Standards Institute ANSI C-57.13 and are of the 0.3 accuracy class, and the meter adjustment limits do not exceed ± 0.5 at unity factor, or exceed $\pm 1.5\%$ at 50% power factor.
 - c. Within a maximum nominal period of 48 months, not to exceed 54 months.
 - d. When they are suspected of being inaccurate or damaged.
 - e. When the accuracy is questioned by a customer. (See B-6.10, Testing of Metering Equipment, paragraph h).
 - f. Before use when they have been inactive for more than one year.
 - g. When they are removed from service.
2. Shall be inspected for mechanical and electrical faults whenever the accuracy is checked.
 3. Shall have the register and internal connections checked before the meter is first placed in service and whenever the meter is repaired.
 4. Shall have the connections to the customer's circuits and multipliers checked when the equipment is tested for accuracy on the premises or removed for testing, and when instrument transformers are changed.
 5. Shall be checked for accuracy at 50% power factor when purchased and after rebuilding.

(f) Instrument transformers will be tested:

1. When first received unless they are accompanied by a certified test report by the manufacturer.
2. When removed from service.
3. Upon complaint.
4. When there is evidence of damage.
5. Whenever an approved check, such as the variable burden method in the case of current transformers, made whenever the meter is tested, indicates that a quantitative test is required.

(g) Demand Meters:

1. Will be tested for accuracy:
 - a. Before the meter is placed in service.
 - b. When the associated meter is tested and the demand meter is a block-interval non-recording type or a thermal type.
 - c. After two years of service if they are of the recording type, but it is not required if they are of the pulse operated type and the demand reading is checked with the kilowatthour reading each billing cycle.
 - d. When they are suspected of being inaccurate or damaged.

B-6.10 (cont'd)

the meter serving the customer. Any charge to the customer shall conform with the Company's filed and approved rates and rules. Provided, however, that the Company need not make more than 1 test in any 12-month period.

- (2) The customer, or his or her representative, may be present when his or her meter is tested.
- (3) A report of the results of the test shall be made to the customer within a reasonable time after the completion of the test, and a record of the report, together with a complete record of each test, shall be kept on file at the office of the Company.

B-6.11 CHECK OF STANDARDS BY THE COMMISSION:

- (a) Upon request of the commission, the Company shall submit 1 of its portable standard watt-hour meters and 1 portable indicating voltmeter, ammeter, and wattmeter to a commission-approved standards laboratory for checking of their accuracy.
- (b) The Company shall normally check its own working portable standard watt-hour meters or instruments against primary or secondary standards and shall calibrate these working standards or instruments before they are submitted with a record of such calibration attached to each of the working standards or instruments.

B-6.12 METERING EQUIPMENT RECORDS:

- (a) A complete record of the most recent test of all metering equipment shall be maintained. The record shall show all of the following information:
 - (1) Identification and location of unit.
 - (2) Equipment with which the device is associated.
 - (3) The date of test.
 - (4) Reason for the test.
 - (5) Readings before and after the test.
 - (6) A statement as to whether or not the meter creeps and, in case of creeping, the rate.
 - (7) A statement of meter accuracies before and after adjustment sufficiently complete to permit checking of the calculations employed.
 - (8) Indications showing that all required checks have been made.
 - (9) A statement of repairs made, if any.
 - (10) Identification of the testing standard and the person making the test.
- (b) The Company shall also keep a record for each unit of metering equipment which shows all of the following information:
 - (1) When the unit was purchased
 - (2) The unit's cost.
 - (3) The Company's identification.
 - (4) Associated equipment.
 - (5) Essential nameplate date.
 - (6) The date of the last test.

(Continued on next sheet)

Issued: August 17, 1983
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after January 5, 1983, under authority of Order of the Michigan Public Service Commission dated August 9, 1983, in Case U-7702.

METERING AND METERING EQUIPMENT-Continued

B-6.10 (cont'd.)

- e. When the accuracy is questioned by a customer. (See B-6.10, Testing of Metering Equipment, paragraph h.)
 - f. Before use when they have been inactive for more than one year.
 - g. When they are removed from service.
2. Will be inspected for mechanical and electrical faults whenever they are tested in the field or in the meter shop.
- (h) The Company will make a test of any metering installation upon request of the customer if 12 months or more have elapsed since the last test of the meter in the same location. The test will consist of a test for accuracy, a check of the register, and a check of the meter connections on the customer's premises.
 - (i) Upon application by any customer and payment to the Michigan Public Service Commission of a fee of five dollars (\$5.00) in the case of a watthour meter and ten dollars (\$10.00) in the case of a demand meter, the Commission will make or supervise a test of the metering equipment covering the accuracy of the installation, check of connections, and any other check or test which appears desirable. The Company will reimburse the customer for the fee if the device tested is fast beyond the allowable accuracy limits as set forth in these meter and metering equipment rules, if improper connections or auxiliary equipment results in overregistration, or if improper measuring equipment is used.

B-6.11 CHECK OF STANDARDS BY COMMISSION:

- (a) The Company will submit to a Michigan Public Service Commission approved standards laboratory for checking of accuracy one of its portable standard watthour meters, and one portable indicating voltmeter, ammeter, and wattmeter. This will be done upon request of the Commission.
- (b) The Company will normally check its own working portable standard watthour meters or instruments against primary or secondary standards and will calibrate these working standards or instruments before they are submitted and attach to them a record of such calibration.

B-6.12 METERING EQUIPMENT RECORDS:

- (a) A complete record of the most recent test of all metering equipment will be maintained. This record will show information to identify the unit and its location; equipment with which the device is associated; the date of test; reason for the test; readings before and after the test; a statement as to whether or not the meter creeps and in case of creeping; the rate; a statement of "as found" and "as left" accuracies sufficiently complete to permit checking of the calculations employed; indications showing that all required checks have been made; a statement of repairs made, if any, and identification of the testing standard and the person making the test.

By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

CANCELLED BY
ORDER U-7702

AUG 9 - 1983

REMOVED BY REA
Effective on service rendered on
and after July 23, 1981 under
authority of Order of the Michigan
Public Service Commission dated
July 21, 1981 in Case U-6488.

METERING AND METERING EQUIPMENT-Continued

B-6.12 (cont'd.)

- (b) The Company will also keep a record for each unit of metering equipment showing when the unit was purchased; its cost; the Company's identification; associated equipment; essential name plate data, and the date of the last test. The record will also show either the present service location with the date of installation or, if removed from service, the service location from which the unit was removed with the date of removal.

B-6.13 DETERMINATION OF AVERAGE METER ERROR:

Whenever a metering installation is found upon any test to be in error by more than 2% at any test load, the average error will be determined in one of the following ways:

- (a) If the metering installation is used to measure a load which has practically constant characteristics, such as a street lighting load, the meter will be tested under similar conditions of load and the accuracy of the meter "as found" will be considered as the average accuracy.
- (b) If a single-phase metering installation is used on a varying load, the average error will be the weighted algebraic average of the error at light load and the error at heavy load, the latter being given a weighting of 4 times the former.
- (c) If a polyphase metering installation is used on a varying load, the average error will be the weighted algebraic average of its error at light load given a weighting of 1, its error at heavy load and 100% power factor given a weighting of 4, and at heavy load and 50% lagging power factor given a weighting of 2.
- (d) If a load, other than the light, heavy, and low power factor load specified for routine testing, is more representative of the customary use of the metering equipment, its error at that load will also be determined. In this case the average error will be computed by giving the error at such load and power factor a weighting of 3 and each of the errors at the other loads (light, heavy, and 50% lagging power factor) a weighting of 1. Each error will be assigned its proper sign.

B-6.14 ADJUSTMENT OF BILLS BECAUSE OF METER ERRORS:

- (a) Whenever a meter creeps or whenever a metering installation is found upon any test to have an average error of more than 2.0%, or a demand metering installation more than 1.5% from the errors allowed under B-6.5, Accuracy of Demand Meters, an adjustment of bills for service for the period of inaccuracy shall be made in the case of overregistration and may be made in the case of underregistration. The amount of the adjustment shall be calculated on the basis that the metering equipment should be 100% accurate with respect to the testing equipment used to make the test.

AUG 9 - 1983
REMOVED BY REA

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

METERING AND METERING EQUIPMENT-Continued

B-6.14 (cont'd.)

- (b) 1. If the date when the error in registration began can be determined, such date shall be the starting point for determination of the amount of the adjustment.
2. If the date when the error in registration began cannot be determined, it shall be assumed that the error has existed for a period equal to one-half of the time elapsed since the meter was installed or one-half of the time elapsed since the last previous test, whichever is later, except as otherwise provided in paragraph 4 below, covering error in registration due to creep.
3. Recalculation of bills shall be on the basis of actual monthly consumption except that if service has been measured by self-contained meters and involves no billing other than for kilowatthours, the recalculation of bills may be based on the average monthly consumption determined from the most recent 36 months consumption data.
4. The error in registration due to creep shall be calculated by timing the rate of creeping and assuming that this creeping affected the registration of the meter for 25.0% of the time since the meter was installed or since the last previous test, whichever is later.
5. When the average error cannot be determined by test because of failure of part or all of the metering equipment, it shall be permissible to use the registration of check metering installations, if any, or to estimate the quantity of energy consumed based on available data. The customer must be advised of the failure and of the basis for the estimate of quantity billed. The same periods or error shall be used as defined in paragraphs above.
- (c) 1. Refunds shall be made to the two most recent consumers who received service through the meter found to be in error. In the case of a previous consumer who is no longer a customer of the Company, a notice of the amount due shall be mailed to such previous consumer at his last known address, and the Company shall upon demand made within three months thereafter refund the same.
2. If the recalculation of billing for an existing customer or for a previous consumer no longer a customer of the Company, indicates that the amount due such existing or previous customer is equal to or in excess of an average of \$.10 per month for the recalculated billing period, the full amount of the refund shall be made; except that no refund less than \$1.00 shall be made to an existing customer and no refund less than \$2.00 shall be made to a previous consumer who is no longer a customer of the Company.
- (d) 1. If the recalculation of billing indicates that an amount due the Company is equal to or in excess of amounts set forth in paragraph (c) 2 above as minimum refunds, the Company may bill the customer for the amount due.

authority of Order of the Michigan
Public Service Commission dated
July 21, 1981 in Case U-6488.

METERING AND METERING EQUIPMENT-Continued

B-6.14 (cont'd)

2. The Company may establish a policy whereby the minimum sum above which it will commence billing for amounts due to underregistration is in excess of the amounts set forth in paragraph (c) 2 above as minimum refunds. In such cases the minimum sum established as the amount above which the Company will commence billing shall determine in all cases of underregistration whether the customer will be billed for the amount due to the Company because of underregistration.
- (e) Records of all consumption data and other data necessary for the administration of this rule shall be maintained for a minimum period of 36 months.

B-6.15 REPORTS TO THE MICHIGAN PUBLIC SERVICE COMMISSION:

- (a) The Company will file with the Commission on or before the first day of January of each year, a statement certified to by one of its officers, that it has complied with all of the requirements set forth in these rules relating to meter standardizing equipment.
- (b) For all meters, not included in Paragraph (b) under Testing of Meter Equipment, the Company will file with the Commission on or before the first day of March of each year, its annual tabulation of all "as found" meter tests covering the 12-months period ending December 31. The Company will summarize, by meter type, all individual meters and over-all light and heavy load "as found" tests at the power factors as required by these rules. This summary will be divided into heavy load 100% power factor, light load 100% power factor, and heavy load 50% power factor tests; and according to the length of meter test period and types of single-phase and poly-phase meters. The summary will show the number of meters or over-all tests found within each of the following accuracy classifications: Not recording, creeping, at or under 94.0%, 94.1 to 96.0%, 96.1 to 97.0%, 97.1 to 98.0%, 98.1 to 99.0%, 99.1 to 100.0%, 100.1 to 101.0%, 101.1 to 102.0%, 102.1 to 103.0%, 103.1 to 104.0%, 104.1 to 106.0%, and over 106.0%.
- (c) For all meters, included in Paragraph (b) under B-6.10, Testing of Meter Equipment, the Company will file with the Commission on or before the first day of March the following:
 1. A summary of all samples of meter lots that pass the Acceptability Criterion, including complete data on the type of meter, number of meters in lot, size of sample, average months in service since last test and the computed p (Total Estimated Percent Defective in Lot) and the corresponding M (Maximum Allowable Percent Defective) as determined from Table B-3 in Military Standard 414, June 11, 1957.

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

B-6.15 (cont'd.)

- (11) 102.1 to 103.0%.
- (12) 103.1 to 104.0%.
- (13) 104.1 to 106.0%.
- (14) Over 106.0%.

When the Company is subject to multiple state jurisdiction, these accuracy classifications may be modified upon approval of the commission.

- (c) For all meters that are included in B-6.10 (b) (2) the Company shall file with the commission, on or before the first day of April, all of the following:
- (1) A summary of all samples of meter lots that pass the acceptability criterion as set forth in military standard 414, including complete data on the type of meter, number of meters in lot, size of sample, average months in service since last test, and the computed p (total estimated percent defective in lot) and the corresponding M (maximum allowance percent defective) as determined from table B-3 in military standard 414, June 11, 1957.
 - (2) The necessary calculations made pursuant to the illustrations on page 43 of military standard 414 shall be retained for each sample drawn. In addition to the actual computation, the data should include the type of meter, number of meters in lot, meter numbers of sample meters, actual prior-to-adjustment test data of each meter tested, and months since last test for each meter in sample. A sample of the aforementioned calculations and data for a lot that passes the acceptability criterion shall be included in the report to the commission.
 - (3) A copy of the complete data, as outlined in subdivision (c) of this subrule, shall be included for each meter lot that fails to pass the acceptability criterion as set forth in military standard 414.
 - (4) A report summarizing the testing of all meters in rejected lots. The heavy load preadjustment tests only shall be recorded and the accuracy classifications as established in subrule (b) of this rule shall be used. Each rejected lot shall be reported separately and shall be separated into groups by the number of months since the last test as follows:
 - a. 0 to 48 months.
 - b. 49 to 72 months.
 - c. 73 to 96 months.
 - d. Over 96 months.

B-6.16 GENERATING AND INTERCHANGE STATION METER TESTS:

- (a) Generating and interchange station and watt-hour meters shall be tested in conjunction with their associated equipment as follows:
- (1) At least once every 24 months for generating station meters.
 - (2) At least once every 12 months for interchange meters.
- (b) The accuracy limits for any particular device shall not be greater than the accuracy limits required elsewhere in these rules.

RULES AND REGULATIONS-Continued

B-7.0 UTILITY PROCEDURES:

These procedures shall be applicable to all customer inquiries and residential complaints made to the Company regarding residential utility service and charges therefore.

B-7.1 COMPLAINT PROCEDURES:

The Company will establish procedures which will insure the prompt, efficient and thorough receipt, investigation and where possible, resolution of all customer inquiries, service requests and complaints regarding residential utility service and charges therefore.

The Company will obtain Commission approval of any substantive changes in the procedures prior to implementation.

B-7.2 PERSONNEL PROCEDURES REQUIRED:

The Company will establish personnel procedures which as a minimum insure that:

- (a) Qualified personnel shall be available and prepared at all times during normal business hours to receive and respond to all customer inquiries, service requests and complaints. The Company will make necessary arrangements to insure that customers unable to communicate in the English language receive prompt and effective assistance.
- (b) Qualified personnel responsible for and authorized to enter into written settlement agreements on behalf of the Company will be available at all times during normal business hours to respond to customer inquiries and complaints.
- (c) Qualified personnel will be available at all times to receive and initiate response to customer contacts regarding any discontinuance of service and emergency conditions occurring within the Company's service area.
- (d) Names, addresses, and telephone numbers of personnel designated and authorized to receive and respond to the requests and directives of the Commission regarding customer inquiries, service requests and complaints are current and on file with the Consumers Services Division of the Commission.

B-7.3 UTILITY HEARING OFFICERS:

The Company will employ or contract with competent utility hearing officers who will be notaries public and qualified to administer oaths and other supporting personnel as necessary to comply with B-8.0.

The Company's hearing officers so employed or contracted to function exclusively in this capacity shall not engage in any other activities for or on behalf of the Company.

The Company's hearing officers and procedures shall be subject at all times to investigation and review by the Commission to insure the impartiality and integrity of the hearing process.

RULES AND REGULATIONS--Continued

B-7.4 PUBLICATION OF PROCEDURES:

- (1) The Company will prepare a pamphlet that, in easily understood terms, summarizes the rights and responsibilities of all its customers in accordance with these rules and other applicable provisions of statutes, rules, and tariffs.
- (2) The Company shall display the pamphlet prominently and make it available at all of its Company office locations open to the general public. The Company shall transmit the pamphlet to each new customer upon the commencement of service and shall make it available at all times upon request. Where substantial revisions to or new information required by the provisions of subrule (3) of this rule occur, the Company shall provide the changes to all current customers by a bill insert, revised pamphlet, or a publication that is transmitted to all customers, with a copy to the Commission. The form of this transmittal shall be at the discretion of the Company.
- (3) The pamphlet shall contain all of the following information:
 - (a) Billing procedures and estimation standards.
 - (b) Methods for customers to verify billing accuracy.
 - (c) Explanation of the Power Supply Cost Recovery program.
 - (d) Customer payment standards and procedures.
 - (e) Security deposit and guarantee standards.
 - (f) Shutoff and restoration of service
 - (g) Inquiry, service and complaint procedures.
- (4) Each pamphlet will indicate conspicuously that the pamphlet is being provided in accordance with the rules of the Commission.

B-7.5 PUBLIC ACCESS TO RULES AND RATES:

- (1) The Company shall provide to each customer, within 60 days of commencing service, within 60 days after issuance of a new rate case order, and at least once each year, the following information: a clear and concise explanation of all rates for which that customer may be eligible, a notice that complete rate schedules are available upon request, a notice of the availability of Company assistance in determining the most appropriate rate if the customer is eligible to receive service under more than 1 rate.
- (2) The Company shall provide to each customer, within 60 days after the utility has filed a general rate case application with the commission, the following information: a notice that the utility has requested that the commission change its rates, a notice that copies of the utility's application are available for inspection at all offices of the utility, a notice that an explanation of the proposed changes to the utility's rates is available from the utility upon request.
- (3) The Company shall provide the notice required by the provisions of this rule either through a publication that is transmitted to each of its customers or by a bill insert.

RULES AND REGULATIONS--Continued

B-7.4 PUBLICATION OF PROCEDURES:

- (1) The Company will prepare a pamphlet which in layman's terms summarizes the rights and responsibilities of its customers in accordance with these rules and other applicable provisions.
- (2) The pamphlet will be displayed prominently and available at all Company office locations open to the general public and will be mailed to each residential customer of the Company. The pamphlet will be delivered or mailed to each new residential customer of the Company upon the commencement of service and shall be available at all times upon request. When a utility revises the pamphlet to reflect substantial revisions to or new information required by the provisions of subrule (3) of this rule, it shall provide the changes to all current customers by a bill insert or a publication that is mailed to all customers, with a copy to the commission.
- (3) The pamphlet shall contain all of the following information:
 - (a) Billing procedures and estimation standards.
 - (b) Methods for customers to verify billing accuracy.
 - (c) Explanation of operation of fuel clauses.
 - (d) Customer payment standards and procedures.
 - (e) Security deposit and guarantee standards.
 - (f) Shutoff and restoration of service
 - (g) Inquiry, service and complaint procedures.
 - (h) Public Service Commission consumer procedures.
- (4) The cover of each pamphlet will indicate conspicuously that the pamphlet is being provided in accordance with the rules of the Commission.

B-7.5 PUBLIC ACCESS TO RULES AND RATES:

- (1) The Company shall provide to each customer, within 60 days of commencing service, within 60 days after issuance of a new rate case order, and at least once each year, a clear and concise explanation of all rates for which that customer may be eligible, a notice that complete rate schedules are available upon request, and a notice of the availability of Company assistance in determining the most appropriate rate if the customer is eligible to receive service under more than 1 rate.
- (2) The Company shall provide to each customer, within 60 days after the utility has filed a general rate case application with the commission, a notice that the utility has requested that the commission change its rates, a notice that copies of the utility's application are available for inspection at all offices of the utility, and a notice that an explanation of the proposed changes to the utility's rates is available from the utility upon request.
- (3) The Company shall provide the notice required by the provisions of this rule either through a publication that is mailed to each of its customers or by a bill insert.

authority of order of the Michigan
Public Service Commission dated
October 2, 1992 in Case U-9754.

RULES AND REGULATIONS-Continued

B-7.4 PUBLICATION OF PROCEDURES:

- (1) The Company will prepare a pamphlet which in layman's terms summarizes the rights and responsibilities of its customers in accordance with these rules and other applicable provisions.
- (2) The pamphlet will be displayed prominently and available at all Company office locations open to the general public and will be mailed to each residential customer of the Company. The pamphlet will be delivered or mailed to each new residential customer of the Company upon the commencement of service and shall be available at all times upon request.
- (3) The pamphlet shall contain information concerning, but not limited to:
 - (a) Billing procedures and estimation standards.
 - (b) Methods for customers to verify billing accuracy.
 - (c) Explanation of operation of fuel clauses.
 - (d) Customer payment standards and procedures.
 - (e) Security deposit and guarantee standards.
 - (f) Discontinuation and reconnection of service.
 - (g) Inquiry, service and complaint procedures.
 - (h) Public Service Commission consumer procedures.
- (4) The cover of each pamphlet will indicate conspicuously that the pamphlet is being provided in accordance with the rules of the Commission and shall indicate in Spanish that the pamphlet or a translation thereof is available in Spanish. Upon request, the Company will provide the pamphlet or a translation thereof in the Spanish language.

B-7.5 PUBLIC ACCESS TO RULES AND RATES:

The Company will keep on file and provide public access to a copy of these rules, all other rules of the Company as filed with the Commission regarding customer service and a schedule of all residential rates and service charges together with an explanation of the operation of any applicable fuel clause at all offices of the Company. Suitable signs shall be posted conspicuously at each such location calling attention to the public that the rules, regulations and rate schedules are so filed and available for inspection. Upon request, the Company will provide one copy of these rules or schedules to a customer without charge.

B-7.6 REPORTING REQUIREMENT:

- (1) The Company will file a quarterly report within 20 days after the end of each calendar quarter with the Consumer Services Division of the Commission, which in detail contains information concerning:
 - (a) The payment performance of its customers in relation to established due and payable periods.
 - (b) The number and general description of all complaints registered with the Company.

Changes (bold, italics, underline) reflect Order 11397 dated 2/9/2000

RULES AND REGULATIONS--Continued

B-8.0 HEARING PROCESS AND PROCEDURE: (Applicable to residential customers only.)

B-8.1 HEARING:

If the parties are unable to resolve the dispute in a mutually satisfactory manner, the Company will afford a customer the opportunity for a hearing before a utility hearing officer. If the customer fails to request a hearing within three days from the date that the opportunity for hearing is offered or if the customer fails to pay the amount which represents that part of the bill not in dispute within three days of the date that the hearing is requested, the Company may exercise its right to shut off service pursuant to the rules approved by the Commission.

B-8.2 COMPLAINTS AND DISPUTED CLAIMS:

- (1) If a customer advises the Company, before the date of the proposed shutoff of service, that all or part of a bill is in dispute, then the Company shall do all of the following:
 - (a) Immediately record the date, time and place the the customer made the complaint and transmit verification to the customer.
 - (b) Investigate the dispute promptly and completely.
 - (c) Advise the customer of the results of the investigation.
 - (d) Attempt to resolve the dispute informally in a manner that is satisfactory to both parties.
 - (e) Provide the opportunity for the customer to settle the disputed claim or to satisfy any liability that is not in dispute.
- (2) A customer may advise the Company that a claim is in dispute in any reasonable manner, such as by written notice, in person or by a telephone call directed to the Company.
- (3) The Company, in attempting to resolve the dispute, may employ telephone communication, personal meetings, on-site visits or any other technique that is reasonably conducive to dispute settlement.

B-8.3 PAYMENT OF AMOUNT NOT IN DISPUTE:

- (1) If a customer requests a hearing before a utility hearing officer, the customer shall cooperate in the Company's investigation and shall pay to the Company the part of the bill that is not in dispute.
- (2) The amount that is not in dispute shall be mutually determined by the parties. The parties shall consider the customer's prior consumption history, weather variations, the nature of the dispute and any other pertinent factors.
- (3) If the parties are unable to mutually determine the amount that is not in dispute, the customer shall pay to the Company 50% of the bill in dispute, but not more than \$100.00 per billing period. If the bill in dispute includes usage that has not been previously billed, such as a backbilling, the customer shall pay, to the utility, the amount that is not in dispute for usage not previously billed or 50% of the amount in dispute for usage not previously billed, but not more than \$100.00 for the amount not previously billed.

B-8.0 HEARING PROCESS AND PROCEDURE: (Applicable to residential customers only.)

B-8.1 HEARING:

If the parties are unable to resolve the dispute in a mutually satisfactory manner, the Company will afford a customer the opportunity for a hearing before a utility hearing officer. If the customer fails to request a hearing within three days from the date that the opportunity for hearing is offered or if the customer fails to pay the amount which represents that part of the bill not in dispute within three days of the date that the hearing is requested, the Company may exercise its rights pursuant to the rules approved by the Commission.

B-8.2 COMPLAINTS AND DISPUTED CLAIMS:

- (1) When a customer advises the Company prior to the date of the proposed discontinuation of service that all or any part of any billing as rendered is in dispute, the Company will:
 - (a) Immediately record the date, time and place the complaint is made and mail postcard verification to the customer.
 - (b) Investigate the dispute promptly and completely.
 - (c) Advise the customer of the results of the investigation.
 - (d) Attempt to resolve the dispute informally in a manner mutually, satisfactory to both parties.
 - (e) Provide the opportunity for the customer to settle the disputed claim or to satisfy any liability that is not in dispute.
- (2) A customer may advise the Company that a claim is in dispute in any reasonable manner such as by written notice, in person or by a telephone call directed to the Company.
- (3) The Company, in attempting to resolve the dispute in a mutually satisfactory manner, may employ telephone communication, personal meetings, on-site visits or any other technique reasonably conducive to dispute settlement.

B-8.3 PAYMENT OF AMOUNT NOT IN DISPUTE:

- (1) If a customer requests a hearing before a utility hearing officer, he shall pay to the Company an amount equal to that part of the bill not in dispute.
- (2) The amount not in dispute shall be mutually determined by the parties. The parties shall consider the customer's prior consumption history, weather variations, the nature of the dispute and any other pertinent factors in determining the amount not in dispute.
- (3) If the parties are unable to mutually determine the amount not in dispute, the customer shall pay to the Company 50% of the bill in dispute, but not more than \$100.00 per billing period. If the bill in dispute includes usage that has not been previously billed, such as a backbilling, the customer shall pay, to the utility, the amount that is not in dispute for usage not previously billed or 50% of the amount in dispute for usage not previously billed, but not more than \$100.00 for the amount not previously billed.

Changes (in bold, italics, underline) reflect Order U-11397 dated 2/9/2000

RULES AND REGULATIONS--Continued

B-8.3 (cont'd.)

- (4) The amount that is not in dispute shall be subject to review at the hearing before the utility hearing officer in accordance with the provisions of B-8.5.
- (5) Failure of the customer to pay to the Company the amount not in dispute within three days of the date that the hearing is requested shall constitute a waiver of the customer's right to the hearing, and the Company may then proceed to shut off service as provided in Section B-2.5.
- (6) If the dispute is ultimately resolved in favor of the customer in whole or in part, any excess moneys paid by the customer shall be refunded promptly with interest at a rate specified in rule B-4.1 (5)(f).

B-8.4 NOTICE OF HEARING:

- (1) The Company shall transmit or personally serve the customer with written notice of the time, date and place of the hearing not less than ten days before the hearing.
- (2) The notice shall describe the hearing procedures as contained in these rules.
- (3) Failure of the customer or the Company to attend the hearing without a good reason or without having requested an adjournment constitutes a waiver of the right of that party to the hearing.

B-8.5 HEARING PROCEDURES:

- (1) A utility shall establish hearing procedures which, at a minimum, provide the customer and the utility with all of the following rights:
 - (a) The right to represent themselves, to be represented by counsel, or to be assisted by persons of their choice.
 - (b) The right to examine, not less than 2 days before a scheduled hearing, a list of all witnesses who will testify and all documents, records, files, account data, and similar material which may be relevant to the issues to be raised at the hearing.
 - (c) The right to present evidence, testimony and oral and written argument.
 - (d) The right to confront and question witnesses appearing on behalf of the other party.
- (2) A hearing shall be held during normal business hours. A utility shall take reasonable steps to ensure that a customer who is unable to attend a hearing due to physical incapacity is not denied the right to a hearing.
- (3) The utility has the burden of proof by a preponderance of the evidence.
- (4) All witnesses appearing for either party shall testify under oath.
- (5) All hearings will be informal and the proceedings need not be recorded or transcribed. All relevant evidence shall be received and the formal rules of evidence shall not apply.

- (6) For each hearing, the Company hearing officer shall compile a record that contains all of the following:
- (a) A concise statement, in writing, of the position of the Company.
 - (b) A concise statement, in writing, of the position of the customer. If the customer has not put his or her position in writing, then the hearing process shall provide a method for accomplishing this writing with the opportunity for proper acknowledgment by the customer.
 - (c) Copies of all evidence submitted by the parties.
- (7) At the conclusion of the hearing, the Company hearing officer may orally state his or her findings and the decision or adjourn the hearing and inform the parties that the decision will be transmitted within seven days. At the request of the customer, the Company hearing officer shall adjourn the hearing and transmit the decision within seven days. In all cases, the Company hearing officer shall issue a complaint determination in a form that is approved by the commission.
- The complaint determination shall contain both of the following:
- (a) A concise summary of the evidence and arguments presented by the parties.
 - (b) The decision, and the reasons for the decision, of the Company hearing officer based solely upon the evidence received.
- (8) At the conclusion of the hearing and again upon the issuance of a complaint determination, the Company hearing officer shall orally advise the customer and the Company of all of the following:
- (a) That each party has a right to make an informal appeal to the Commission staff by mail, telephone or in person, within seven days of issuance of the complaint determination.
 - (b) That, if appealed, the decision of the Company hearing officer, including a finding that service may be shut off, cannot be implemented until review by the Commission staff.
 - (c) The address and telephone number where the customer or the utility may make an informal appeal to the Commission staff.
- (9) Before issuance of a complaint determination, the Company hearing officer may propose a settlement to the parties. If both parties accept the settlement, it shall be reduced to writing and signed by both parties.

RULES AND REGULATIONS--Continued

B-8.5 (cont'd.)

- (6) For each hearing held, the utility hearing officer shall compile a hearing record which contains all of the following:
- (a) A concise statement in writing of the position of the utility relative to the dispute.
 - (b) A concise statement, in writing, of the position of the customer relative to the dispute. If the customer has not reduced, or is unable to reduce, his or her position to writing, the hearing process shall provide a method for accomplishing this with the opportunity for proper acknowledgment by the customer.
 - (c) Copies of all evidence submitted by the parties.
- (7) At the conclusion of the hearing, the utility hearing officer may orally state his or her findings and the decision or adjourn the hearing and inform the parties that the decision will be mailed within 7 days. At the request of the customer, the utility hearing officer shall adjourn the hearing and mail the decision within 7 days. In all cases, the utility hearing officer shall issue a complaint determination in a form that is approved by the commission.
- The complaint determination shall contain both of the following:
- (a) A concise summary of the evidence and arguments presented by the parties.
 - (b) The decision, and the reasons therefor, of the utility hearing officer based solely upon the evidence received.
- (8) Upon the issuance of a complaint determination, the utility hearing officer shall orally advise the customer and the Company of all of the following:
- (a) That each party has a right to file by mail, telephone or in person, within five days after the date of issuance of the complaint determination, an informal appeal with the Consumer Services Division of the Commission.
 - (b) That, if appealed, the decision of the utility hearing officer, including a finding that service may be shut off, is stayed pending review by the Consumer Services Division of the Commission.
 - (c) Of the address and telephone number where the customer may file an informal appeal with the Commission.
- (9) Before issuance of a complaint determination, the utility hearing officer may propose a settlement to the parties. If both parties accept the settlement, it shall be reduced to writing and signed by both parties.

Changes (in bold, italics, underline) reflect Order U-11397 dated 2/9/2000

RULES AND REGULATIONS--Continued

B-8.5 (cont'd.)

- (10) Within seven days of the conclusion of the hearing, the Company hearing officer shall serve the parties with all of the following:
- (a) A copy of the complaint determination.
 - (b) Appeal information as provided in subrule (8) of this rule.
 - (c) If applicable, a copy of the signed settlement agreement.
- (11) The complaint determination and a copy of the signed settlement agreement, if any, shall be made part of the hearing record. The Company hearing officer shall certify the hearing record.
- (12) The complaint determination is binding upon the parties unless appealed, as provided in these rules. (B-9.0).

B-8.6 SETTLEMENT AGREEMENT:

- (1) If the Company and the customer arrive at a mutually satisfactory settlement of a claim in dispute or the customer does not dispute liability to the Company but claims inability to pay the outstanding bill in full, then the Company will offer the customer the opportunity to enter into a settlement agreement.
- (2) A settlement agreement shall be in writing and signed by the customer or his or her authorized representative and an authorized representative of the Company. The Company shall confirm, in writing, a settlement reached by telephone and shall transmit the settlement to the customer with instructions to sign a conforming copy and return it in a postage-paid, self-addressed envelope. The Company shall retain the original settlement agreement for 2 years.
- (3) In negotiating a settlement agreement due to the customer's inability to pay an outstanding bill in full, the Company shall not require the customer to pay more than a reasonable amount of the outstanding bill upon signing the agreement and not more than reasonable installments until the remaining balance is paid.
- (4) For purposes of determining reasonableness under these rules, the parties shall consider all of the following factors:
- (a) The size of the delinquent account.
 - (b) The customer's ability to pay.
 - (c) The time that the debt has been outstanding.
 - (d) The reasons that the customer has not paid the bill.
 - (e) The customer's payment history.
 - (f) Any other relevant factors concerning the circumstances of the customer.
- (5) A settlement agreement that is offered by the Company shall state immediately preceding the space provided for the customer's signature and in bold print that is not less than two sizes larger than any other print that is used on the form: "IF YOU ARE NOT SATISFIED WITH THIS AGREEMENT, DO NOT SIGN. YOU MAY FILE AN INFORMAL COMPLAINT AND HAVE A HEARING BEFORE A COMPANY HEARING OFFICER BEFORE YOUR SERVICE MAY BE SHUT OFF. IF YOU DO SIGN THIS AGREEMENT, YOU GIVE UP YOUR RIGHT TO AN INFORMAL HEARING BEFORE A COMPANY HEARING OFFICER ON ANY MATTER INVOLVED IN THIS DISPUTE EXCEPT THE COMPANY'S FAILURE OR REFUSAL TO FOLLOW THE TERMS OF THIS AGREEMENT."

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS--Continued

B-8.7 DEFAULT OF SETTLEMENT AGREEMENT:

- (1) If a customer fails to comply with the terms and conditions of a settlement agreement, the Company may shut off service after notifying the customer in writing by personal service or first-class mail of all of the following:
 - (a) That the customer is in default of the settlement agreement.
 - (b) The nature of the default.
 - (c) That unless full payment of the claim is made within ten days from the date of mailing, the Company will discontinue service.
 - (d) The date on or upon which, service will be discontinued.
 - (e) That the customer has a right to request a hearing before a utility hearing officer only if the customer alleges that the Company has failed or refused to follow the terms of the settlement agreement.
 - (f) The address and telephone number where the customer may file the request for hearing with the Company.
- (2) The Company is not required to enter into any subsequent settlement agreement with a customer until the terms of any previous settlement agreement have been fully executed.
- (3) The Company is not required to enter into a subsequent settlement agreement with a customer who defaulted on the terms and conditions of an agreement within the last 2 years.
- (4) If a settlement agreement is reached, following a notice of shutoff, the failure of the customer to abide the terms of the settlement agreement during the first 60 days after the agreement is made constitutes a waiver of notice required by subrule (1) of this rule. The Company may shutoff service after notice as described in rule B-2.5(6).

B-8.8 RES JUDICATA:

The Company may treat a customer complaint or dispute involving the same question or issue based upon the same facts as res judicata and is not required to comply with these rules more than once before shutoff of service.

RULES AND REGULATIONS--Continued

B-9.0 COMMISSION APPEAL PROCEDURE: (Applicable to Residential customers only.)

B-9.1 INFORMAL APPEAL:

Within seven days from the date of service of a complaint determination of a utility hearing officer, either party may file an informal appeal with the Consumer Services Division of the Commission.

B-9.2 FILING PROCEDURE:

- (1) An informal appeal may be filed in any reasonable manner. The informal appeal need not be in writing and may be initiated by telephone or in person at the offices of the Commission.
- (2) A written appeal need not be verified.
- (3) The appealing party shall provide the following information to the Commission:
 - (a) Name and address of the customer.
 - (b) Name of the Company involved.
 - (c) The nature of the original complaint in a clear and concise manner.
 - (d) The relief requested.

B-9.3 EXHAUSTION OF REMEDIES:

The Commission may require the customer to pursue remedies directly with the Company as provided in these rules prior to the acceptance for filing of an informal appeal. The Commission specifically reserves the right to waive this rule when in equity and good conscience circumstances so require.

B-9.4 INFORMAL APPEAL PROCEDURE:

- (1) Upon filing, the appeal will be assigned to a complaint and information officer of the Consumer Services Division, or other officer or employee of the Commission as the Commission may designate, who shall reduce the appeal to writing and shall be responsible for:
 - (a) Advising the appealing party of the procedures of the Commission by telephone or in writing.
 - (b) Advising the other party that an informal appeal has been filed.
 - (c) Issuing interim determinations as may be necessary in the proceedings.
 - (d) Reviewing or investigating the appeal as provided in these rules.
 - (e) Issuing an informal appeal decision.

 - (b) Name of the Company involved.
 - (c) The nature of the original complaint in a clear and concise manner.
 - (d) The relief requested and whether the customer has pursued the remedies available with the Company complained of pursuant to these provisions.

B-9.3 EXHAUSTION OF REMEDIES:

The Commission may require the customer to pursue remedies directly with the Company as provided in these rules prior to the acceptance for filing of an informal appeal. The Commission specifically reserves the right to waive this rule when in equity and good conscience circumstances so require.

B-9.4 INFORMAL APPEAL PROCEDURE:

- (1) Upon filing, the appeal will be assigned to a complaint and information officer of the Consumer Services Division, or other officer or employee of the Commission as the Commission may designate, who shall reduce the appeal to writing and shall be responsible for:
 - (a) Advising the appealing party of the procedures of the Commission by telephone or in writing.
 - (b) Advising the other party that an informal appeal has been filed.
 - (c) Issuing interim determinations as may be necessary in the proceedings.
 - (d) Reviewing or investigating the appeal as provided in these rules.
 - (e) Issuing an informal appeal decision.

REMOVED BY: *gob*

RULES AND REGULATIONS-Continued

B-9.4 (cont'd.)

- (f) Upon notification by the Commission that an informal appeal has been filed, the utility hearing officer shall forthwith file with the Consumer Services Division the certified hearing record concerning the matter in dispute. The parties shall be bound by the evidence presented at the hearing and contained in the hearing record. The complaint and information officer shall not be required to receive or consider any additional evidence or information submitted by a party in arriving at the informal appeal decision.

- (2) In all appeals filed pursuant to these rules, the Company has the burden of proof.

B-9.5 INTERIM DETERMINATIONS:

- (1) After the receipt of the hearing record and pending the final resolution of an informal appeal, the complaint and information officer may issue an interim determination upon such terms and conditions as he deems appropriate. In the case of appeals regarding bills or deposits, the complaint and information officer may require a customer to pay the undisputed portion of a claim in order to continue the prohibition against the discontinuance of service as provided in these rules. The complaint and information officer may consider such amounts as reasonably appear to reflect the cost of utility service in determining the undisputed portion of a claim.
- (2) If a customer fails to abide by the terms and conditions of an interim determination within ten days of the date of personal service or mailing thereof by first class mail, the utility may discontinue service as provided in these rules.

B-9.6 APPEAL REVIEW:

- (1) The complaint and information officer will review the informal appeal thoroughly, and when necessary conduct further investigation. New evidence may be offered by any party if the complaint and information officer determines that it is relevant and could not have been offered at the hearing before the utility hearing officer through the exercise of due diligence by the offering party. When further investigation is necessary, the complaint and information officer may request additional evidence or upon his own motion may hold an informal conference with the parties or their representatives at a time and place designated by the officer. If either party fails to appear at the informal conference without good cause shown or prior request for adjournment, the right of the absent party to appear at the conference will be waived. At any informal conference, each party shall have the right to:
- (a) Represent himself or to be represented by counsel or other person of his choice.
 - (b) Present oral and documentary evidence.
 - (c) Refute in a reasonable manner the evidence of the other party.
 - (d) Submit an oral or written statement of position.

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS--Continued

B-9.7 SHUTOFF PENDING DECISION:

The Company will not shut off residential service nor issue a notice of shutoff relative to the matter in dispute pending the decision of the Consumer Services Division unless pursuant of the terms of an interim determination.

B-9.8 INFORMAL APPEAL DECISION:

The complaint and information officer or other employee so designated by the Commission shall, within 30 days after the filing of the certified record, issue a written informal appeal decision affirming, modifying or reversing the complaint determination. In reversing or modifying the complaint determination, the decision will set forth the terms and conditions for continued service, discontinuation or a proposed settlement agreement as required by the facts and circumstances. The decision shall state the relevant findings of fact and the reasons for the decision.

B-9.9 FAILURE TO COMPLY:

A copy of the informal appeal decision will be served personally or be sent by first class mail to the parties. Failure of either party to comply with the decision within ten days from the date of service of mailing thereof will permit the action or remedy as provided therein.

B-9.10 RES JUDICATA:

The Consumer Services Division of the Commission may treat an informal appeal involving the same question of issue based upon same facts as res judicata and may dismiss without following every procedure set forth in these rules.

B-9.11 FORMAL APPEAL:

Either party may appeal the decision of the complaint and information officer by filing a formal complaint in accordance with the rules of practice and procedure before the Commission. A party may proceed in accordance with the terms of the informal appeal decision unless otherwise ordered by the presiding officer assigned to the formal complaint.

B-9.12 OTHER REMEDIES:

Nothing in these provisions shall be construed to prevent a party from pursuing appropriate legal and equitable remedies at any time prior to or after the issuance of any informal appeal decision.

Changes (in bold, italics, underline) reflect Order U-11397 dated 2/9/2000

DEFINITIONS

C-2.1 DEFINITIONS.

As Used in These Rules:

- (1) "Billing error" means an undercharge or overcharge that is caused by any of the following: an incorrect actual meter read; an incorrect remote meter read; an incorrect calculation of the applicable rate; an incorrect connection of the meter; an incorrect application of the rate schedule; another similar act or omission by the utility in determining the amount of a customer's bill. An undercharge or overcharge that is caused by a nonregistering meter, a meter error, or the use of an estimated meter read or a customer read is not a billing error.
- (2) "Billing month" means a utility service consumption period of not less than 26, nor more than 35, days.
- (3) "Charges for tariff service" means the rates for tariff service and other charges authorized by the commission as an integral part of utility service.
- (4) "Commission" means the Michigan public service commission.
- (5) "Complaint" means a matter that requires follow-up action or investigation by the utility or the commission to resolve the matter.
- (6) "Complaint and information officer" means a member of the Commission staff who is designated to perform responsibilities in accordance with these rules.
- (7) "Complaint determination" means the written decision of a utility hearing officer with respect to an informal hearing.
- (8) "Customer" means a purchaser of electricity or natural gas that is supplied by the company for residential purposes.
- (9) "Cycle billing" means a system that renders bills for utility service to various customers on different days of a calendar month.
- (10) "Delinquent account" means any charges for utility service that remain unpaid at least five days after the due date.
- (11) "Energy usage" means the consumption of electricity or natural gas.
- (12) "Estimated bill" means a bill for energy usage that is not calculated by employing an actual reading of a meter or other measuring device.
- (13) "In Dispute" means that a matter is the subject of an unresolved disagreement, claim or complaint.

DEFINITIONS

C-2.1 DEFINITIONS: Per U-9754

- (1) "Billing error" means an undercharge or overcharge that is caused by an incorrect actual or remote meter read, an incorrect calculation of the applicable rate, an incorrect connection of the meter, an incorrect application of the rate schedule, or another similar act or omission by the utility in determining the amount of a customer's bill. An undercharge or overcharge that is caused by a nonregistering meter, a meter error, or the use of an estimated meter read or a customer read is not a billing error.
- (2) "Billing month" means a utility service consumption period of not less than 26 nor more than 35 days.
- (3) "Charges for utility service" means the rates for utility service and other charges authorized by the commission as an integral part of utility service.
- (4) "Commission" means the Michigan public service commission.
- (5) "Complaint" means a matter that requires follow-up action or investigation by the utility or the commission to resolve the matter.
- (6) "Complaint and information officer" means a member of the Commission staff who is designated to perform responsibilities in accordance with these rules.
- (7) "Complaint determination" means the written decision of a utility hearing officer with respect to an informal hearing.
- (8a) "Customer" means a purchaser of electricity supplied by the company for residential purposes.
- (8b)* "Customer" means any person, firm, association, or corporation or any agency of the federal, state, county, or municipal government which is supplied with electric service by the company, as provided in the Commission's Regulations Governing Service Supplied by Electric Utilities; 1979 Michigan Administrative Code, R 460.3102(b), as amended 1983, for all matters governed by those Commission rules.
- (9) "Cycle billing" means a system that renders bills for utility service to various customers on different days of a calendar month.
- (10) "Delinquent account" means a bill for utility service that remains unpaid at least five days after the due date.
- (11) "Energy usage" means the consumption of electricity.
- (12) "Estimated bill" means a bill for energy usage that is not calculated by employing an actual reading of a meter or other measuring device.
- (13)* "Farm" (Residential) means a single or double occupancy dwelling unit which premises have produced, or would normally produce, agricultural products of a value of \$5,000 or more annually, as reported on IRS Form 1040, Schedule F.
- (14) "Fuel Clause" means the adjustment in rates that is approved by the commission to recognized variations in the cost of fuel for electric generation, purchased power, or purchased gas from a base level.
- (15) "In Dispute" means that a matter is the subject of an unresolved disagreement, claim or complaint.

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

Changes (in bold, italics, underline) reflect Order U-11397 dated 2/9/2000

DEFINITIONS--Continued

C-2.1 (cont'd.)

- (14) "Informal appeal" means an appeal of a complaint determination of a utility hearing officer to the Commission Staff.
- (15) "Informal appeal decision" means the written decision of the complaint and information officer with respect to an informal appeal.
- (16) "Inquiry" means a matter that is resolved upon the initial contact between the customer and the utility or the customer and the commission.
- (17) "Late payment charge" means a finance, service, carrying or penalty charge that is assessed by a utility because a balance due on a bill is delinquent.
- (18) "New customer" means a customer who has not received the utility's service within the previous 6 years.
- (19) "Positive identification information" means a social security number and an identification containing a photograph.
- (20) "Power supply cost recovery" means the adjustment in rates that is approved by the commission to recognize variations in the cost of purchased power and fuel for electric generation.
- (21) "Previous customer" means a customer who has received the company's service within the previous 6 years.
- (22) "Residential service or use" means the provision of or use of electricity or natural gas for residential purposes.
- (23) "Seasonally billed customer" means a customer who is billed on a seasonal basis in accordance with a utility tariff that is approved by the commission.
- (24) "Settlement agreement" means a written agreement that is entered into by a customer and a utility and that resolves any matter in dispute or provides for the payment of amounts not in dispute over a reasonable period of time.
- (25) "Shutoff of service" means a discontinuance of utility service that is not voluntarily requested by the customer.
- (26) "Space Heating Season" means the period between December 1 and March 31.
- (27) "Termination of service" means a cessation of utility service that is voluntarily requested by a customer.
- (28) "Transmit" means to convey or dispatch.
- (29) "Utility" means a person, firm, corporation, cooperative, association or other agency that is subject to the jurisdiction of the Commission and that distributes and sells electricity or natural gas for residential use.

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 1, 1983, under authority of Order of the Michigan Public Service Commission dated March 31, 1983, in Case U-6949.

Rate Schedule No. D1.4

Optional Residential Service Rate
(Time-of-Day Farm and Space Heating Rate)

AVAILABILITY OF SERVICE: Available to customers for full time farm and/or space heating use for individual single family dwellings, or separately metered apartments and in the usual appurtenant buildings served through the residential meters. The customer must contract to receive service under this rate for a *minimum of 12 months*. To qualify for the farm and/or space heating rate, the prospective customer must conform to the eligibility requirements as established on tariff sheets D1a or D2, respectively.

This rate is available only to installations being served on this rate prior to January 22, 1994.

CURRENT, PHASE AND VOLTAGE: Same as Residential Space Heating Rate D2.

RATE PER MONTH:

Service Charge:

\$6.51 per customer per month

Energy Charge:

9.939¢ per kWh for all on-peak kWh

5.109¢ per kWh for all off-peak kWh

On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-peak, all other kWh used.

POWER SUPPLY COST RECOVERY FACTOR: The energy charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months. Terminable on three days' notice after initial 12 months by either party. Where special services are required, the term will be specified on the applicable contract rider.

WATER HEATING SERVICE: Customers with electric water heating can take water heating service under either Option I or Option III of Water Heating Service Rate D5.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

OPTIONAL RESIDENTIAL SERVICE RATE
(Time-of-Day Farm and Space Heating Rate)

AVAILABILITY OF SERVICE: Available to customers for full time farm and/or space heating use for individual single family dwellings, or separately metered apartments and in the usual appurtenant buildings served through the residential meters. The customer must contract to receive service under this rate for a minimum of 12 months. To qualify for the farm and/or space heating rate, the prospective customer must conform to the eligibility requirements as established on tariff sheets D1a or D2, respectively.

This rate is available only to installations being served on this rate prior to January 22, 1994.

CURRENT, PHASE AND VOLTAGE: Same as Residential Space Heating Rate D2.

RATE PER MONTH:

Service Charge:

\$6.51 per customer per month

Energy Charge:

10.24¢ per kWh for all on-peak kWh

5.41¢ per kWh for all off-peak kWh

On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-peak, all other kWh used.

BASE RATE REDUCTION: A credit of 0.24182¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The energy charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months. Terminable on three days' notice after initial 12 months by either party. Where special services are required, the term will be specified on the applicable contract rider.

WATER HEATING SERVICE: Customers with electric water heating can take water heating service under either Option I or Option III of Water Heating Service Rate D5.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

OPTIONAL DOMESTIC SERVICE RATE
(Time-of-Day Farm and Space Heating Rate)

AVAILABILITY OF SERVICE: Available to customers for full time farm and/or space heating use for individual single family dwellings, or separately metered apartments and in the usual appurtenant buildings served through the residential meters. The customer must contract to receive service under this rate for a minimum of 12 months. To qualify for the farm and/or space heating rate, the prospective customer must conform to the eligibility requirements as established on tariff sheets D1a or D2 respectively.

CURRENT, PHASE AND VOLTAGE: Same as Domestic Space Heating Rate D2.

RATE PER MONTH:

Service Charge:

\$5.50 per customer per month

Energy Charge:

9.95¢ per kWh for all on-peak kWh

4.96¢ per kWh for all off-peak kWh

On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-peak, all other kWh used.

INTERIM SURCHARGE ADJUSTMENT: .604¢ per kWh for all kWh.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: Same as Domestic Rate D1.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months. Terminable on three days' notice after initial 12 months by either party. Where special services are required, the term will be specified on the applicable contract rider.

WATER HEATING SERVICE: Customers with electric water heating can take water heating service under either Option I or Option III of Water Heating Service Rate D5.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

M/100a

Issued: January 1, 1990
By: B. H. Schneider
Senior Vice President
Energy Marketing and Distribution
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 1, 1990, under authority of order of the Michigan Public Service Commission dated December 21, 1989 in Case U-8789.

RESIDENTIAL SUPPLEMENTAL SPACE HEATING SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for Supplemental Electric Space Heating for that portion of the home which is heated with permanently installed separately metered electric space heating unit(s) totalling 3 kW or more.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER MONTH: For separately metered supplemental space heating service.

Service Charge:

\$1.90 per customer per month, plus

Energy Charge:

7.26¢ per kWh for all kWh

NUCLEAR DECOMMISSIONING SURCHARGE: .00719¢ per kWh all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

Rate Schedule No. D1.7

**Space Conditioning, Water Heating,
Electric Vehicle Time-of-day Rate**

AVAILABILITY OF SERVICE: Available on an optional basis to no more than 5,000 residential customers desiring separately metered service for approved space conditioning and/or water heating. The rate will not be administered to discriminate in favor of Company personnel. To qualify for the rate the water heater must be for sanitary purposes with the tank size, design and method of installation approved by the company. The space conditioning equipment must be permanently installed.

This rate is also available to customers desiring service to a separately metered circuit for which the sole purpose is the charging of licensed electric vehicles. Customers taking service under this provision are not subject to the 5,000 customer limitation. A statistically significant sample of participants will receive demand meters.

HOURS OF SERVICE: 24 Hours

CURRENT, PHASE AND VOLTAGE: Same as D1 and D3 Rates

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months terminable on three days notice after the initial 12 months by either party. Where special services are required, the term will be specified on the applicable contract rider.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

MINIMUM CHARGE: The Service Charge.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

RATE PER DAY:

Full Service Customers:

Residential Power Supply Charges:

Energy Charge (June through September):

7.225¢ per kWh for all On-peak kWh

2.000¢ per kWh for all Off-peak kWh

Energy Charge (October through May):

2.000¢ per kWh for all On-peak kWh

2.000¢ per kWh for all Off-peak kWh

On-Peak Hours: All kWh used between 1100 and 1900 hours Monday through Friday.

Off-Peak Hours: All other kWh used.

Residential Delivery Charges:

EFFECTIVE FOR BILLS RENDERED ON
AND AFTER FEBRUARY 1, 2006
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED DECEMBER 22, 2005
IN CASE NO. U-14399

Rate Schedule No. D1.7

**Space Conditioning, Water Heating,
Electric Vehicle Time-of-day Rate**

AVAILABILITY OF SERVICE: Available on an optional basis to no more than 5,000 residential customers desiring separately metered service for approved space conditioning and/or water heating. The rate will not be administered to discriminate in favor of Company personnel. To qualify for the rate the water heater must be for sanitary purposes with the tank size, design and method of installation approved by the company. The space conditioning equipment must be permanently installed.

This rate is also available to customers desiring service to a separately metered circuit for which the sole purpose is the charging of licensed electric vehicles. Customers taking service under this provision are not subject to the 5,000 customer limitation. A statistically significant sample of participants will receive demand meters.

HOURS OF SERVICE: 24 Hours

CURRENT, PHASE AND VOLTAGE: Same as D1 and D3 Rates

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months terminable on three days notice after the initial 12 months by either party. Where special services are required, the term will be specified on the applicable contract rider.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

MINIMUM CHARGE: The Service Charge.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

RATE PER DAY - RESIDENTIAL:

Service Charge:
6.7¢ per customer per day, plus

Energy Charge:
For the billing months of June through September:

12.634¢ per kWh for all on-peak kWh

2.994¢ per kWh for all off-peak kWh

For the billing months October through May:

5.984¢ per kWh for all on-peak kWh

2.044¢ per kWh for all off-peak kWh

On-peak hours: all kWh used between 1000 and 1900 hours Monday through Friday, including holidays.

Off-peak hours: all other kWh used.

Power Supply Cost Recovery Factor:

The energy charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

Surcharges and Credits: As approved by the Commission. See Schedule Designation B-4.9.

Effective for service rendered on and after January 1, 1992, under authority of order of the Michigan Public Service Commission dated December 19, 1991 in Case U-8789.

**EXPERIMENTAL SPACE CONDITIONING AND
WATER HEATING TIME OF DAY SERVICE RATE**

AVAILABILITY OF SERVICE: Available on an optional basis to no more than 1000 residential customers desiring separately metered service for approved space conditioning and/or water heating. The rate will not be administered to discriminate in favor of Company personnel. The 1000 customers will be distributed approximately as follows: Air Conditioning 460, Water Heating 340 and Space Heating 200. To qualify for the rate the water heater must be for sanitary purposes with the tank size, design and method of installation approved by the Company. The space conditioning equipment must be permanently installed. Customers electing service under this rate must do so on or before December 31, 1993. A statistically significant sample of participants will receive demand meters. This rate terminates on December 31, 1999.

HOURS OF SERVICE: 24 Hours

CURRENT, PHASE AND VOLTAGE: Same as Residential Service Rate D1.

RATE PER DAY:

Service Charge:
7.0¢ per customer per day, plus

Energy Charge:

For the billing months of June through September:

10.77¢ per on-peak kWh for the first:

- a) 2 on-peak kWh/day for customers with electric central air conditioning
- b) 3 on-peak kWh/day for customers with electric water heating
- c) 5 on-peak kWh/day for customers with both electric central air conditioning and water heating
- d) 0 on-peak kWh/day for customers with only electric space heating

20.0¢ per kWh for all excess on-peak kWh
4.0¢ per kWh for all off-peak kWh

Rate Schedule No. D2

Residential Space Heating Rate

AVAILABILITY OF SERVICE: Available on an optional basis to customers desiring service for all residential purposes to a single or double occupancy dwelling unit including farm dwellings. All of the space heating must be total electric installed on a permanent basis and served through one meter. This rate also available to customers with add-on heat pumps and fossil fuel furnaces served on this rate prior to July 16, 1985. The design and method of installation and control of equipment as adopted to this service are subject to approval by the Company. This rate is also available to customers with electric heat assisted with a renewable heat source.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally. In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER DAY:

For billing months of June through October:

~~7.885¢~~ per kWh for the first 17 kWh/day

~~9.295¢~~ per kWh for the excess over 17 kWh/day

For billing months of November through May:

~~7.885¢~~ per kWh for the first 20 kWh/day

~~6.168¢~~ per kWh for the excess over 20 kWh/day

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6. Applies only to actual consumption and not to the minimum charge.

MINIMUM CHARGE: The energy charge for 60 kWh.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

CONTRACT TERM: Open order, terminable on three days' notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

For billing months of November through May:

8.34c per kWh for the first 20 kWh/day

6.53c per kWh for the excess over 20 kWh/day

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

BASE RATE REDUCTION: A credit of 0.26303c per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

MINIMUM CHARGE: The energy charge for 60 kWh.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

CONTRACT TERM: Open order, terminable on three days' notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

Public Service Commission in Case
No. U-12478 dated November 2, 2000.

(To reflect 5% rate reduction as authorized by Order No. U-12464 dated June 5, 2000)

RESIDENTIAL SPACE HEATING RATE

AVAILABILITY OF SERVICE: Available on an optional basis to customers desiring service for all residential purposes to a single or double occupancy dwelling unit including farm dwellings. All of the space heating must be total electric installed on a permanent basis and served through one meter. This rate also available to customers with add-on heat pumps and fossil fuel furnaces served on this rate prior to July 16, 1985. The design and method of installation and control of equipment as adopted to this service are subject to approval by the Company. This rate is also available to customers with electric heat assisted with a renewable heat source.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally. In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER DAY:

For billing months of June through October:

8.71¢ per kWh for the first 17 kWh/day

10.12¢ per kWh for the excess over 17 kWh/day

For billing months of November through May:

8.71¢ per kWh for the first 20 kWh/day

6.90¢ per kWh for the excess over 20 kWh/day

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

BASE RATE REDUCTION: A credit of 0.26303¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

MINIMUM CHARGE: The energy charge for 60 kWh.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

CONTRACT TERM: Open order, terminable on three days' notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

Issued: February 2, 1987
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after February 1, 1987, commencing with February billing units, under authority of order of the Michigan Public Service Commission dated January 27, 1987 in Case U-7930.

RESIDENTIAL SPACE HEATING RATE

AVAILABILITY OF SERVICE: Available on an optional basis to customers desiring service for all residential purposes to a single or double occupancy dwelling unit including farm dwellings. All of the space heating must be total electric installed on a permanent basis and served through one meter. Customers with add-on heat pumps and fossil furnaces not served on this rate prior to July 16, 1985 must take service on Rate D1.6. The design and method of installation and control of equipment as adopted to this service are subject to approval by the Company. This rate is also available to customers with electric heat assisted with a renewable heat source.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER DAY:

For billing months of June through October:
See Residential Service Rate Sheet D1

For billing months of November through May:
8.97¢ per kWh for the first 20 kWh/day
7.34¢ per kWh for the excess over 20 kWh/day

Residential Space Heating Rate

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

AUXILIARY POWER PROVISION: Residential customers desiring electric service as an auxiliary source of power for wind or solar powered generating equipment shall take service under this rate schedule under special agreement with the Company.

Parallel operation of private electric generation is not permitted except by written permission of the Company.

The customer having auxiliary power shall pay all direct costs of controlling and protective equipment necessitated by the presence of a source of power on his premises.

The customer shall pay the charges set forth above. The customer may elect to sell energy back to the Company at the rate of 3.1¢ per kWh delivered.

Customers selling energy to the Company shall pay a service charge of 12.4¢ per day in addition to their standard monthly billing.

FARM SERVICE PROVISION: Customers taking service under this rate schedule who, in addition to normal household requirements, use energy purchased for various farm operations may elect to take service under this provision. To qualify for this provision, a customer must certify in writing that he is an operator of a farm which utilized household electricity for agricultural purposes. Customers who qualify and elect this provision will be charged **as follows:**

FARM SERVICE PROVISION RATE PER DAY:

Full Service Customers:

Power Supply Charges:

Energy Charge: (June through October): 5.118¢ per kWh for all kWh

Energy Charge: (November through May): 5.118¢ per kWh for the first 20 kWh per day
4.465¢ per kWh for over 20 kWh per day

Delivery Charges:

Service Charge: 12.4¢ per day for each bill issued

Distribution Charge: (June through October): 4.102¢ per kWh for the first 20 kWh per day

Distribution Charges: (November through May): 4.102¢ per kWh for the first 20 kWh per day
2.330¢ per kWh for over 20 kWh per day

Surcharges and Credits: As approved by the Commission. See Schedule Designations B-4.8 and B-4.9.

Retail Access Service Customers:

Delivery Charges:

Service Charge: 12.4¢ per day for each bill issued

Distribution Charge: (June through October): 4.102¢ per kWh for all kWh

Distribution Charges: (November through May): 4.102¢ per kWh for the first 20 kWh per day
2.330¢ per kWh for over 20 kWh per day

Surcharges and Credits: As approved by the Commission. See Schedule Designation B-4.9.

MINIMUM CHARGE: The applicable per kWh charges listed above for 60 kWh plus the service charge.

Effective for bills rendered on and after September 1, 2001 under authority of order of the Michigan Public Service Commission in Case No. U-12478 dated November 2, 2000.

(To reflect reduction of energy charges due to implementation of securitization charges.)

RESIDENTIAL SPACE HEATING RATE--Continued

AUXILIARY POWER PROVISION: Residential customers desiring electric service as an auxiliary source of power for wind or solar powered generating equipment shall take service under this rate schedule under special agreement with the Company.

Parallel operation of private electric generation is not permitted except by written permission of the Company.

The customer having auxiliary power shall pay all direct costs of controlling and protective equipment necessitated by the presence of a source of power on his premises.

The customer shall pay the charges set forth above. The customer may elect to sell energy back to the Company at the rate of 3.1¢ per kWh delivered.

Customers selling energy to the Company shall pay a service charge of 12.4¢ per day in addition to their standard monthly billing.

FARM SERVICE PROVISION: Customers taking service under this rate schedule who, in addition to normal household requirements, use energy purchased for various farm operations may elect to take service under this provision. Customers who qualify for and elect this provision will be charged 8.73¢ per kWh for all kWh during the billing months of June through October. For the billing months of November through May the customer will be charged 8.73¢ per kWh for the 1st 20 kWh per day. Usage in excess of 20 kWh per day will be billed at 6.53¢ per kWh. In addition to the aforementioned rates, a customer charge of 12.4¢ per customer per day will be applied to each bill issued. To qualify for this provision, a customer must certify in writing that he is an operator of a farm which utilized household electricity for agricultural purposes.

DOMESTIC LIFELINE SPACE HEATING RATE - Continued

AUXILIARY POWER PROVISION: Domestic customers desiring electric service as an auxiliary source of power for wind or solar powered generating equipment shall take service under this rate schedule under special agreement with the Company.

The customer having auxiliary power shall pay all direct costs of controlling and protective equipment necessitated by the presence of a source of power on his premises.

The customer shall pay the charges set forth above. The customer may elect to sell energy back to the Company at the rate of 2.6¢ per kWh delivered.

Customers selling energy to the Company shall pay a service charge of 10.0¢ per day in addition to their standard monthly billing.

FARM SERVICE PROVISION: Customers taking service under this rate schedule who, in addition to normal household requirements, use energy purchased for various farm operations may elect to take service under this provision. Customers who qualify for and elect this provision will be charged 7.6¢ per kWh for all energy purchased plus a customer charge of 10.0¢ per customer per day for each bill issued. To qualify for this provision, a customer must certify in writing that he is an operator of a farm which utilizes household electricity for agricultural purposes.

LIFE SUPPORT SYSTEM PROVISION: Customers taking service under this rate schedule who, in addition to normal household requirements, use energy purchased for various life support systems may elect to take service under this provision. Customers who qualify for and elect this provision will be charged 7.6¢ per kWh for all energy purchased and subject to the minimum charge. To qualify for this provision, a licensed physician must certify in writing that the customer or a member of his household is dependent on electric energy for the operation of a life support system. For application of this provision, life support systems are considered to be such devices as a respirator, an iron lung or a kidney dialysis machine.

ALTERNATE RESIDENTIAL CUSTOMER PROVISION: (See Schedule Designation C-2.1)

All alternate residence customers shall take service under the following schedule:

For billing months of June through October:

Service Charge:

20.0¢ per customer per day, plus

Energy Charge:

Same as Domestic Service Rate D1, except the above service charge will also apply.

For billing months of November through May:

Service Charge:

20.0¢ per customer per day, plus

Energy Charge:

Same as Domestic Lifeline Space Heating Rate D2, except the above service charge will also apply.

Water Heating Rate D5, and Auxiliary Power Provision is applicable to Alternate Residence customers. The minimum charge is the service charge.

EXPERIMENTAL DOMESTIC SPACE HEATING RATE

THIS RATE IS CANCELLED

Issued: April 1, 1983
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on
and after April 1, 1983 under
authority of Order of the Michigan
Public Service Commission dated
March 31, 1983 in Case U-6949.

EXPERIMENTAL DOMESTIC SPACE HEATING RATE

AVAILABILITY OF SERVICE: Available on a voluntary basis for the first 100 customers desiring service for domestic purposes only to a single or double occupancy unit including farm dwellings. All of the space heating must be supplied by electric service through the same meter, and installed on a permanent basis. This service is also available to the first 500 customers desiring service for domestic purposes only to a single or double occupancy unit including farm dwellings in which all of the space heating is supplied by solar assisted electric heat.

HOURS OF SERVICE: Same as Domestic Space Heating Rate D2.

CURRENT, PHASE AND VOLTAGE: Same as Domestic Space Heating Rate D2.

RATE PER MONTH:

Service Charge:

\$10.00 per customer per month

Demand Charge:

\$6.15 per kW of on-peak billing demand

Energy Charge:

4.0¢ per kWh for all kWh used on-peak

3.65¢ per kWh for all kWh used off-peak

INTERIM SURCHARGE ADJUSTMENT: .435¢ per kWh for all kWh.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: Same as Domestic Rate D1.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: \$10.00 per month.

CONTRACT TERM: Same as Domestic Space Heating Rate D2.

WATER HEATING SERVICE: Customers with electric water heating can take water heating service under either Option I or Option III of Water Heating Service Rate D5.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand is the highest 60 minute integrated reading of the demand meter, during the on-peak hours, established during the billing period.

INSULATION STANDARDS FOR ELECTRIC HEATING: See Schedule Designation B-2.12.

**INTERRUPTIBLE RESIDENTIAL SPACE HEATING RATE
(EXPERIMENTAL)**

AVAILABILITY OF SERVICE: Available to not more than 500 selected customers desiring interruptible service for built-in space heaters (where electricity is not the primary source of heating) and metered through a separate meter to a single or double occupancy dwelling unit including farm dwellings.

HOURS OF SERVICE: 24 hours.

HOURS OF INTERRUPTION: Built-in space heating units only will be turned off by the Company by remote control on selected days for no longer than eight hours in any one day.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER MONTH: For separately metered secondary space heating service.

Service Charge:

\$2.05 per customer per month, plus

Energy Charge:

For billing months of November through May:

5.50¢ per kWh

For billing months of June through October:

11.09¢ per kWh

NUCLEAR DECOMMISSIONING SURCHARGE: .00376¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

Issued: January 1, 1991
By: W. R. Holland
Senior Vice President
Energy Marketing and Distribution
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 1, 1991, under authority of order of the Michigan Public Service Commission dated December 20, 1990 in Case U-8789.

**INTERRUPTIBLE RESIDENTIAL SPACE HEATING RATE
(EXPERIMENTAL)**

AVAILABILITY OF SERVICE: Available to not more than 500 selected customers desiring interruptible service for built-in space heaters (where electricity is not the primary source of heating) and metered through a separate meter to a single or double occupancy dwelling unit including farm dwellings.

HOURS OF SERVICE: 24 hours.

HOURS OF INTERRUPTION: Built-in space heating units only will be turned off by the Company by remote control on selected days for no longer than eight hours in any one day.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER MONTH: For separately metered secondary space heating service.

Service Charge:

\$1.95 per customer per month, plus

Energy Charge:

For billing months of November through May:

5.33¢ per kWh

For billing months of June through October:

10.51¢ per kWh

NUCLEAR DECOMMISSIONING SURCHARGE: .00376¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

Rate Schedule No. D1

Residential Service Rate

AVAILABILITY OF SERVICE: Available to customers desiring service for all residential purposes through one meter to a single or double occupancy dwelling unit including farm dwellings. A dwelling unit consists of a kitchen, bathroom, and heating facilities connected on a permanent basis. Service to appurtenant buildings may be taken on the same meter.

This rate is not available for common areas of separately metered apartments and condominium complexes, nor to a separate meter which serves a garage, boat well or other non-dwelling applications.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire service may be taken.

RATE PER DAY:

Energy Charge:

7.885¢ per kWh for the first 17 kWh/day

9.295¢ per kWh for excess over 17 kWh/day

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

MINIMUM CHARGE: The energy charge for 60 kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6. Adjustment applies only to actual consumption and not to the minimum charge.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

CONTRACT TERM: Open order, terminable on three days' notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

This rate is not available for common areas of separately metered apartments and condominium complexes, nor to a separate meter which serves a garage, boat well or other non-dwelling applications.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire service may be taken.

RATE PER DAY:

Energy Charge:

8.221¢ per kWh for the first 17 kWh/day

9.631¢ per kWh for excess over 17 kWh/day

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

MINIMUM CHARGE: The energy charge for 60 kWh.

BASE RATE REDUCTION: A credit of 0.29574¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6. Adjustment applies only to actual consumption and not to the minimum charge.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

CONTRACT TERM: Open order, terminable on three days' notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

SUPPLEMENTAL SPACE HEATING PROVISION: Rate D1.5 is available on an optional basis.

Public Service Commission in Case
No. U-12478 dated February 6, 2002.

(To reflect reduction of energy charges due to implementation of securitization charges.)

RESIDENTIAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for all residential purposes through one meter to a single or double occupancy dwelling unit including farm dwellings. A dwelling unit consists of a kitchen, bathroom, and heating facilities connected on a permanent basis. Service to appurtenant buildings may be taken on the same meter.

This rate is not available for common areas of separately metered apartments and condominium complexes, nor to a separate meter which serves a garage, boat well or other non-dwelling applications.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire service may be taken.

RATE PER DAY:

Energy Charge:

8.24¢ per kWh for the first 17 kWh/day

9.65¢ per kWh for excess over 17 kWh/day

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

MINIMUM CHARGE: The energy charge for 60 kWh.

BASE RATE REDUCTION: A credit of 0.29574¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6. Adjustment applies only to actual consumption and not to the minimum charge.

AVAILABILITY OF SERVICE: Available to customers desiring service for all residential purposes through one meter to a single or double occupancy dwelling unit including farm dwellings. Service to appurtenant buildings may be taken on the same meter.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER DAY:

Energy Charge:

8.78¢ per kWh for the first 17 kWh/day
10.26¢ per kWh for excess over 17 kWh/day

SURCHARGE ADJUSTMENT: .0415¢ per kWh for all kWh.

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

MINIMUM CHARGE: The energy charge for 60 kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6. Adjustment applies only to actual consumption and not to the minimum charge.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

CONTRACT TERM: Open order, terminable on three days' notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

INTERRUPTIBLE AIR-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

SUPPLEMENTAL SPACE HEATING PROVISION: Rate D1.5 is available on an optional basis.

INTERRUPTIBLE HEAT PUMP PROVISION: Rate D1.6 is available on an optional basis.

Residential Service Rate

SUPPLEMENTAL SPACE HEATING PROVISION: Rate D1.5 is available on an optional basis.

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

AUXILIARY POWER PROVISION: Residential customers desiring electric service as an auxiliary source of power for wind or solar powered generating equipment shall take service under this rate schedule under special agreement with the Company.

Parallel operation of private electric generation is not permitted except by written permission of the Company.

The customer having auxiliary power shall pay all direct costs of controlling and protective equipment necessitated by the presence of a source of power on his premises.

The customer shall pay the charges set forth above. The customer may elect to sell energy back to the Company at the rate of 3.1¢ per kWh delivered.

Customers selling energy to the Company shall pay a service charge of 12.4¢ per day in addition to their standard daily billing.

FARM SERVICE PROVISION: "Farm" (Residential) means a single or double occupancy dwelling unit which has produced, or would normally produce, agricultural products of a value of \$5,000 or more annually, as reported on IRS Form 1040, Schedule F.

Customers taking service under this rate schedule who, in addition to normal household requirements, use energy purchased for various farm operations may elect to take service under this provision. To qualify for this provision, a customer must certify in writing that he is an operator of a farm which utilized household electricity for agricultural purposes. Customers who qualify and elect this provision will be charged **as follows:**

FARM SERVICE PROVISION RATE PER DAY:

Full Service Customers:

Power Supply Charges:

Energy Charge: 5.118¢ per kWh for the first 17 kWh per day

Delivery Charges:

Service Charge: 12.4¢ per day for each bill issued

Distribution Charge: 4.102¢ per kWh for all kWh

Surcharges and Credits: As approved by the Commission. See Schedule Designations B-4.8 and B-4.9. Applies only to actual consumption and not to the minimum charge.

Retail Access Service Customers:

Delivery Charges:

Service Charge: 12.4¢ per day for each bill issued

Distribution Charge: 4.102¢ per kWh for all kWh

Surcharges and Credits: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

MINIMUM CHARGE: The applicable per kWh charges listed above for 60 kWh plus the service charge.

Issued: August 24, 2001
By: L.G. Garberding
Executive Vice President
2000 Second Avenue
Detroit, Michigan 48226

Effective for bills rendered on and after September 1, 2001 under authority of order of the Michigan Public Service Commission in Case No. U-12478 dated November 2, 2000.

(To reflect reduction of energy charges due to implementation of securitization charges.)

RESIDENTIAL SERVICE RATE--Continued

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

AUXILIARY POWER PROVISION: Residential customers desiring electric service as an auxiliary source of power for wind or solar powered generating equipment shall take service under this rate schedule under special agreement with the Company.

Parallel operation of private electric generation is not permitted except by written permission of the Company.

The customer having auxiliary power shall pay all direct costs of controlling and protective equipment necessitated by the presence of a source of power on his premises.

The customer shall pay the charges set forth above. The customer may elect to sell energy back to the Company at the rate of 3.1¢ per kWh delivered.

Customers selling energy to the Company shall pay a service charge of 12.4¢ per day in addition to their standard daily billing.

FARM SERVICE PROVISION:

"Farm" (Residential) means a single or double occupancy dwelling unit which has produced, or would normally produce, agricultural products of a value of \$5,000 or more annually, as reported on IRS Form 1040, Schedule F.

Customers taking service under this rate schedule who, in addition to normal household requirements, use energy purchased for various farm operations may elect to take service under this provision. Customers who qualify and elect this provision will be charged 8.73¢ per kWh for all energy purchased plus a customer charge of 12.4¢ per customer per day for each bill issued. To qualify for this provision, a customer must certify in writing that he is an operator of a farm which utilized household electricity for agricultural purposes.

Rate Schedule No. D1.1

Interruptible Space-Conditioning Service Rate

AVAILABILITY OF SERVICE: Available on an optional basis to Residential and Commercial customers desiring separately metered interruptible service for central air conditioning and/or central heat pump use. Customers who have more than one heat pump and/or air-conditioning unit which serves their business or home, will not be permitted to have only a portion of their load on the rate, all units will be interrupted upon the signal from the Company. Installations must conform with the Company's specifications. This rate is not available to commercial customers being billed on a demand rate.

HOURS OF SERVICE: 24 hours.

HOURS OF INTERRUPTION: Central air-conditioning and/or heat pump units only will be turned off by the Company by remote control on selected days for intervals of no longer than thirty minutes in any hour for no more than eight hours in any one day. Company interruptions may include interruptions for, but not limited to maintaining system integrity, making an emergency purchase, economic reasons, or when available system generation is insufficient to meet anticipated system load.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire service may be taken.

RATE PER MONTH: For separately metered space-conditioning service.

Residential:

Service Charge: (June through October)
\$1.95 per customer per month, plus

Energy Charge:

For billing months of November through May:

4.056¢ per kWh.

For billing months of June through October:

6.746¢ per kWh.

Commercial:

Service Charge: (June through October)
\$1.95 per customer per month, plus

Energy Charge:

For billing months of November through May:

4.052¢ per kWh.

For billing months of June through October:

6.750¢ per kWh.

Public Service Commission in Case
No. U-12478 dated February 5, 2003.

(To reflect reduction of energy charges due to implementation of revised securitization charges)

INTERRUPTIBLE SPACE-CONDITIONING SERVICE RATE

AVAILABILITY OF SERVICE: Available on an optional basis to Residential and Commercial customers desiring separately metered interruptible service for central air conditioning and/or central heat pump use. Customers who have more than one heat pump and/or air-conditioning unit which serves their business or home, will not be permitted to have only a portion of their load on the rate, all units will be interrupted upon the signal from the Company. Installations must conform with the Company's specifications. This rate is not available to commercial customers being billed on a demand rate.

HOURS OF SERVICE: 24 hours.

HOURS OF INTERRUPTION: Central air-conditioning and/or heat pump units only will be turned off by the Company by remote control on selected days for intervals of no longer than thirty minutes in any hour for no more than eight hours in any one day. Company interruptions may include interruptions for, but not limited to maintaining system integrity, making an emergency purchase, economic reasons, or when available system generation is insufficient to meet anticipated system load.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire service may be taken.

RATE PER MONTH: For separately metered space-conditioning service.

Residential:

Service Charge: (June through October)

Rate Schedule No. D1.2

Residential Time-of-Day Service Rate

AVAILABILITY OF SERVICE: Available on an optional basis to customers whose previous twelve months average usage is equal to or greater than 750 kWh/month, or less at the option of the Company, and desires time of day service for their residential dwelling. Customers who select this rate must qualify for the Residential Service rate D1. This rate is available to no more than 5,000 customers per year.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire.

RATE PER MONTH:

For the billing months of June through October

Service Charge:

\$19.00 per customer per month, plus

Energy Charge:

20.532¢ per kWh for all On-Peak kWh

2.932¢ per kWh for all Off-Peak kWh

For the billing months of November through May

Service Charge:

\$19.00 per customer per month, plus

Energy Charge:

19.492¢ per kWh for all On-Peak kWh

3.222¢ per kWh for all Off-Peak kWh

On-Peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-Peak, all other kWh used.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Commencing upon installation of the Time-of-Day meter, service will be provided for twelve continuous months thereafter, with termination upon mutual consent of the Company and the customer.

WATER HEATING SERVICE: Water heating service is available on an optional basis except that Option II--Combined Meter--Controlled is not available.

INTERRUPTIBLE SPACE CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

MICHIGAN PUBLIC
SERVICE COMMISSION

MAR 19 2003

FILED JKB

Effective for bills rendered on and after March 1, 2003 under authority of order of the Michigan Public Service Commission in Case No. U-12478 dated February 5, 2003.

(To reflect reduction of energy charges due to implementation of revised securitization charges)

RESIDENTIAL TIME OF DAY SERVICE RATE

AVAILABILITY OF SERVICE: Available on an optional basis to customers whose previous twelve months average usage is equal to or greater than 750 kWh/month, or less at the option of the Company, and desires time of day service for their residential dwelling. Customers who select this rate must qualify for the Residential Service rate D1. This rate is available to no more than 5,000 customers per year.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire.

RATE PER MONTH:

For the billing months of June through October

Service Charge:

\$19.00 per customer per month, plus

Energy Charge:

20.881¢ per kWh for all On-Peak kWh

3.281¢ per kWh for all Off-Peak kWh

For the billing months of November through May

Service Charge:

\$19.00 per customer per month, plus

Energy Charge:

19.841¢ per kWh for all On-Peak kWh

3.571¢ per kWh for all Off-Peak kWh

On-Peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-Peak, all other kWh used.

BASE RATE REDUCTION: A credit of 0.30897¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Commencing upon installation of the Time-of-Day meter, service will be provided for twelve continuous months thereafter, with termination upon mutual consent of the Company and the customer.

WATER HEATING SERVICE: Water heating service is available on an optional basis except that Option II--Combined Meter--Controlled is not available.

INTERRUPTIBLE SPACE CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

(EXPERIMENTAL)**

AVAILABILITY OF SERVICE: Available to no more than 100 selected customers with licensed electric vehicles who desire service at time-of-day rates. Service under this rate is available for a special test period to individually metered single or double occupancy dwelling units for all residential purposes, including the charging of electric vehicles.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire.

RATE PER MONTH:

Service Charge:

\$6.00 per customer per month, plus

Energy Charge:

10.9¢ per kWh for all On-Peak kWh

5.9¢ per kWh for all Off-Peak kWh

On-Peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-Peak, all other kWh used.

SURCHARGE ADJUSTMENT: .0415¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Commencing upon installation of test meters and upon approval of rates by the Michigan Public Service Commission, service will be provided for twelve continuous months thereafter, with termination upon completion of the twelve-month test period. Upon completion of the twelve-month test period, the customer shall be served in accordance with the provisions of the appropriate Residential Rate, unless the terms of the Time-Of-Day Test Service Agreement are extended by the mutual consent of the Company and the customer.

WATER HEATING SERVICE: Water heating service is available on an optional ^{base} except that Option II—Combined Meter—Controlled is not available.

Rate Schedule No. D1.3

Senior Citizen Residential Service Rate

AVAILABILITY OF SERVICE: Available to customers desiring service for all residential purposes through one meter to a single occupancy or individual dwelling unit including farm dwellings. To qualify for this rate, the customer must be at least 62 years of age and head of the household. As a condition of service under this rate, a customer must agree to permit the Company to control some of his appliances, if and when the Company implements such control equipment. Customers with electric water heaters must receive service under controlled water heating rate D5. Residential appliances subject to control may be central air-conditioning, dishwashers and electric clothes dryers. The exact nature and conditions of control of devices, however, shall be those authorized by the Commission pursuant to a subsequent hearings procedure.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER DAY:

Full Service Customers:

Power Supply Charges:

Energy Charges:

3.131¢ per kWh for the first 10 kWh per day

9.883¢ per kWh for excess over 10 kWh per day

Delivery Charges:

Distribution Charge: 2.706¢ per kWh for all kWh

Surcharges and Credits: As approved by the Commission. See Schedule Designations B-4.8 and B-4.9. Applies only to actual consumption and not to the minimum charge.

Retail Access Service Customers:

Delivery Charges:

Distribution Charge: 2.706¢ per kWh for all kWh

Surcharges and Credits: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

SPACE HEATING PROVISION: For customers in which all of the space heating is supplied by electric service through the same meter and is installed on a permanent basis, **the Power Supply charge** for usage in excess of 10 kWh per day for the billing months of November through May shall be billed at **3.625¢ per kWh**.

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

MINIMUM CHARGE: The **applicable per kWh charges listed above for 60 kWh**.

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months. Terminable on three days' notice after initial 12 months by either party. Where special services are required, the term will be specified in the applicable contract rider.

WATER HEATING SERVICE: See Schedule Designation No. D5.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

SUPPLEMENTAL SPACE HEATING PROVISION: Rate D1.5 is available on an optional basis.

REMOVED BY CP
Effective for bills rendered on
and after March 26, 2001 under
authority of order of the Michigan
Public Service Commission in Case
No. U-12478 dated November 2, 2000.

(To reflect 5% rate reduction as authorized by Order No. U-12464 issued June 5, 2000)

SENIOR CITIZEN RESIDENTIAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for all residential purposes through one meter to a single occupancy or individual dwelling unit including farm dwellings. To qualify for this rate, the customer must be at least 62 years of age and head of the household. As a condition of service under this rate, a customer must agree to permit the Company to control some of his appliances, if and when the Company implements such control equipment. Customers with electric water heaters must receive service under controlled water heating rate D5. Residential appliances subject to control may be central air-conditioning, dishwashers and electric clothes dryers. The exact nature and conditions of control of devices, however, shall be those authorized by the Commission pursuant to a subsequent hearings procedure.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER DAY:

Energy Charge:

5.84¢ per kWh for the first 10 kWh/day

12.55¢ per kWh for over 10 kWh/day

SPACE HEATING PROVISION: For customers in which all of the space heating is supplied by electric service through the same meter and is installed on a permanent basis, usage in excess of 10 kWh per day for the billing months of November through May shall be billed at 6.90¢ per kWh.

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

BASE RATE REDUCTION: A credit of 0.23208¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6. Applies only to actual kWh consumption and not to the minimum charge.

MINIMUM CHARGE: The energy charge for 60 kWh.

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months. Terminable on three days' notice after initial 12 months by either party. Where special services are required, the term will be specified in the applicable contract rider.

WATER HEATING SERVICE: See Schedule Designation No. D5.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

SUPPLEMENTAL SPACE HEATING PROVISION: Rate D1.5 is available on an optional basis.

SENIOR CITIZEN RESIDENTIAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for all residential purposes through one meter to a single occupancy or individual dwelling unit including farm dwellings. To qualify for this rate, the customer must be at least 62 years of age and head of the household. As a condition of service under this rate, a customer must agree to permit the Company to control some of his appliances, if and when the Company implements such control equipment. Customers with electric water heaters must receive service under controlled water heating rate D5. Residential appliances subject to control may be central air-conditioning, dishwashers and electric clothes dryers. The exact nature and conditions of control of devices, however, shall be those authorized by the Commission pursuant to a subsequent hearings procedure.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volt, three-wire. Where available, and the demand justifies, three-phase four-wire, Y connected service may be had at 208Y/120 volts nominally.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt three-wire service may be taken.

RATE PER DAY:

Energy Charge:

6.2¢ per kWh for the first 10 kWh/day
12.11¢ per kWh for over 10 kWh/day

SPACE HEATING PROVISION: For customers in which all of the space heating is supplied by electric service through the same meter and is installed on a permanent basis, usage in excess of 10 kWh per day for the billing months of November through May shall be billed at 7.34¢ per kWh.

SURCHARGE ADJUSTMENT: .0415¢ per kWh for all kWh.

BILLING FREQUENCY: Based on a nominal 30-day month. See Schedule Designation B-4.2(1).

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6. Applies only to actual kWh consumption and not to the minimum charge.

MINIMUM CHARGE: The energy charge for 60 kWh.

CONTRACT TERM: The customer shall contract to remain on this rate for at least 12 months. Terminable on three days' notice after initial 12 months by either party. Where special services are required, the term will be specified in the applicable contract rider.

WATER HEATING SERVICE: See Schedule Designation No. D5.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9. Applies only to actual consumption and not to the minimum charge.

INTERRUPTIBLE AIR-CONDITIONING PROVISION: Rate D1.1 is available on an optional basis.

SUPPLEMENTAL SPACE HEATING PROVISION: Rate D1.5 is available on an optional basis.

INTERRUPTIBLE HEAT PUMP PROVISION: Rate D1.6 is available on an optional basis.

M/99

Issued: February 2, 1987

authority of Order of the Michigan
Public Service Commission dated
July 21, 1981 in Case U-6488.

Rate Schedule No. D3

General Service Rate

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the Large General Service Rate. At the Company's option, service may be available to loads in excess of 1000 kW for situations where significant modifications to service facilities are not required to serve the excess load. Effective May 27, 1981, this rate is not available to customers desiring service through one meter for residential purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$8.78 per customer per month, plus

Energy Charge:

8.608¢ per kWh for all kWh

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. Where special services are required, or where the investment to serve is out of proportion to the revenue derived therefrom, the term will be as specified in the applicable contract rider.

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available for commercial space-conditioning use. This provision is applicable to central air-conditioning and heat pump use. All other provisions of D3 shall apply.

MICHIGAN PUBLIC
SERVICE COMMISSION

MAR 19 2003

FILED

JKB

Effective for bills rendered on and after March 1, 2003 under authority of order of the Michigan Public Service Commission in Case No. U-12478 dated February 5, 2003.

(To reflect reduction of energy charges due to implementation of revised securitization charges)

GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the Large General Service Rate. At the Company's option, service may be available to loads in excess of 1000 kW for situations where significant modifications to service facilities are not required to serve the excess load. Effective May 27, 1981, this rate is not available to customers desiring service through one meter for residential purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:
\$9.24 per customer per month, plus
Energy Charge:
9.461¢ per kWh for all kWh

CANCELLED BY
ORDER U-12478

REMOVED BY JKB

DATE 3-19-03

BASE RATE REDUCTION: A credit of 0.33248¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. Where special services are required, or where the investment to serve is out of proportion to the revenue derived therefrom, the term will be as specified in the applicable contract rider.

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

INTERRUPTIBLE SPACE-CONDITIONING PROVISION: Rate D1.1 is available for commercial space-conditioning use. This provision is applicable to central air-conditioning and heat pump use. All other provisions of D3 shall apply.

At the Company's option, service may be available to loads in excess of 1000 kW for situations where significant modifications to service facilities are not required to serve the excess load.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$8.20 per customer per month, plus

Energy Charge:

9.56¢ per kWh for all kWh

SURCHARGE ADJUSTMENT: .0455¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.231¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. Where special services are required, or where the investment to serve is out of proportion to the revenue derived therefrom, the term will be as specified in the applicable contract rider.

WATER HEATING SERVICE: Water heating service is available on an optional basis. See Schedule Designation No. D5.

INTERRUPTIBLE AIR-CONDITIONING PROVISION: Rate D1.1 is available for commercial air-conditioning use during the months of June through October. All other provisions of D3 shall apply.

GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the Large General Service Rate, nor to installations having a peak 30 minute integrated demand reading in excess of 1000 kilowatts, including applicable riders, not taking service on this rate prior to August 19, 1972.

The 1000 kilowatt limitation may be waived for the following cases:

1. For temporary installations where the customer pays the "in and out" charges.
2. For Primary Supply installations during construction while the building is under jurisdiction of the contractor.

Effective May 27, 1981, this rate is not available to customers desiring service through one meter for domestic purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt, single-phase three-wire; or 208Y/120 volt, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$7.30 per customer per month, plus

Energy Charge:

8.16¢ per kWh for all kWh

INTERIM SURCHARGE ADJUSTMENT: .672¢ per kWh for all kWh.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

Rate Schedule No. D3.1

Unmetered General Service Rate

AVAILABILITY OF SERVICE: Available at the option of the Company to customers for loads that can be readily calculated and are impractical to meter.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

SERVICE CONNECTIONS: The customer is to furnish and maintain all necessary wiring and equipment, or reimburse the Company therefore. Connections are to be brought to the Company's underground or overhead lines by the customer as directed by the Company, and the final connections to the Company's line are to be made by the Company.

Conversion and/or relocation of existing facilities must be paid for by the customer, except when initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

RATE: 3.41¢ per month per Watt of the total connected load in service for each customer. Loads operated cyclically will be prorated. This rate is based on 350 hours per month. Proration of cyclical loads will not apply when hours of operation are within 10% of base. Proration may either increase or decrease connected load.

The Company may, at its option, install meters and apply a standard metered rate schedule applicable to the service.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: \$3.00 per month.

CONTRACT TERM: Open order on a month-to-month basis.

Connections are to be brought to the Company's underground or overhead lines by the customer as directed by the Company, and the final connections to the Company's line are to be made by the Company.

Conversion and/or relocation of existing facilities must be paid for by the customer, except when initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

RATE: 3.71¢ per month per Watt of the total connected load in service for each customer. Loads operated cyclically will be prorated. This rate is based on 350 hours per month. Proration of cyclical loads will not apply when hours of operation are within 10% of base. Proration may either increase or decrease connected load.

The Company may, at its option, install meters and apply a standard metered rate schedule applicable to the service.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: \$3.00 per month.

CONTRACT TERM: Open order on a month-to-month basis.

Issued: January 27, 1994

Executive Vice President
and Chief Financial Officer
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 22, 1994 under authority of order of the Michigan Public Service Commission dated January 21, 1994 in Case U-10102

UNMETERED GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available at the option of the Company to customers for loads that can be readily calculated and are impractical to meter.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

SERVICE CONNECTIONS: The customer is to furnish and maintain all necessary wiring and equipment, or reimburse the Company therefore. Connections are to be brought to the Company's underground or overhead lines by the customer as directed by the Company, and the final connections to the Company's line are to be made by the Company.

Conversion and/or relocation of existing facilities must be paid for by the customer, except when initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

RATE: 3.84¢ per month per Watt of the total connected load in service for each customer. Loads operated cyclically will be prorated.

The Company may, at its option, install meters and apply a standard metered rate schedule applicable to the service.

NUCLEAR DECOMMISSIONING SURCHARGE: .088% applicable to the total bill, net of taxes.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: \$3.00 per month.

CONTRACT TERM: Open order on a month-to-month basis.

**EXPERIMENTAL TIME-OF-DAY
GENERAL SERVICE RATE**

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose for the entire electrical requirements at a location. The Company may limit the availability of this rate to 100 customers.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt, three-wire or 208Y/120 volt, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:
\$8.80 per customer per month, plus

Energy Charge:
11.0¢ per kWh for all kWh used during the on-peak period.
4.84¢ per kWh for all kWh used during the off-peak period.
On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.
Off-peak, all other kWh used.

INTERIM SURCHARGE ADJUSTMENT: .672¢ per kWh for all kWh.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: The energy charges on the above rate are subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: One year under written contract and month-to-month thereafter. This rate is experimental in nature and may be cancelled at either the completion of the first year of the contract or upon one month's notice thereafter, by either party.

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 1, 1983, under authority of Order of the Michigan Public Service Commission dated March 31, 1983, in Case U-6949.

EXPERIMENTAL TIME-OF-DAY
GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose for the entire electrical requirements at a location. The Company may limit the availability of this rate to 100 customers.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt, three-wire or 208Y/120 volt, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$8.00 per customer per month, plus

Energy Charge:

10.0¢ per kWh for all kWh used during the on-peak period.

4.4¢ per kWh for all kWh used during the off-peak period.

On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-peak, all other kWh used.

INTERIM SURCHARGE ADJUSTMENT: .526¢ per kWh for all kWh.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: The energy charges on the above rate are subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: One year under written contract and month-to-month thereafter. This rate is experimental in nature and may be cancelled at either the completion of the first year of the contract or upon one month's notice thereafter, by either party.

Rate Schedule No. D3.3

Interruptible General Service Rate

AVAILABILITY OF SERVICE: Available to no more than 100 customers desiring interruptible service in conjunction with taken service under the general service rate. Service to interruptible load shall be taken through separately metered circuits and permanently wired. The design and method of installation for application of this rate shall be subject to the approval of the Company. Service to interruptible load may not be transferred to firm service circuits to avoid interruption. This rate is not available for loads that are primarily off-peak, such as outdoor lighting.

HOURS OF SERVICE: 24 hours except as described below.

HOURS OF INTERRUPTION: All electric power delivered hereunder shall be subject to interruption by the Company, by remote control signal. Company interruptions may include interruptions for, but not limited to, maintaining system integrity, making an emergency purchase, economic reasons, or when available system generation is insufficient to meet anticipated system load.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$8.78 per customer per month, plus

Energy Charge:

6.354¢ per kWh for all kWh

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. However, where special services are required or where the investment to serve is out of proportion to the revenue derived there from, the contract term will be as specified in the applicable contract rider or Extension of Service Agreement.

INTERRUPTIBLE GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available in conjunction with service taken on General Service Rate schedules. Service to interruptible load shall be taken through separately metered circuits and permanently wired. The design and method of installation for application of this rate shall be subject to the approval of the Company. Service to interruptible load may not be transferred to firm service circuits to avoid interruption. This rate is not available for loads that are primarily off-peak, such as outdoor lighting.

HOURS OF SERVICE: 24 hours except as described below.

HOURS OF INTERRUPTION: All electric power delivered hereunder shall be subject to interruption by the Company, by remote control signal. The power shall not be interrupted for more than eight (8) hours in a day, nor more than 1000 hours per calendar year.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$9.11 per customer per month, plus

Energy Charge:

7.97¢ per kWh for all kWh

NUCLEAR DECOMMISSIONING SURCHARGE: .00960¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. However, where special services are required or where the investment to serve is out of proportion to the revenue derived there from, the contract term will be as specified in the applicable contract rider or Extension of Service Agreement.

Rate Schedule No. D3.4

Optional Time-of-Day General Service Rate

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose for the entire electrical requirements at a location. Only open to customers whose energy consumption is equal to or greater than 25,000 kWh per month for three consecutive months, and otherwise qualify for the General Service Rate D3.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$12.95 per customer per month, plus

Energy Charge:

14.337¢ per kWh for all kWh used during the on-peak period

6.737¢ per kWh for all kWh used during the off-peak period

On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-peak, all other kWh used.

POWER SUPPLY COST RECOVERY FACTOR: The energy charges on the above rates are subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: One year under written contract and month-to-month thereafter. This rate is experimental in nature and may be cancelled at either the completion of the first year of the contract or upon one month's notice thereafter, by either party.

DETROIT, MICHIGAN

Michigan Public Service
Commission

January 4, 2005

Filed JKB

EFFECTIVE FOR SERVICE RENDERED ON
AND AFTER NOVEMBER 24, 2004
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED NOVEMBER 23, 2004
IN CASE NO. U-13808

OPTIONAL TIME-OF-DAY
GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose for the entire electrical requirements at a location. Only open to customers whose energy consumption is equal to or greater than 25,000 kWh per month for three consecutive months, and otherwise qualify for the General Service Rate D3.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$13.63 per customer per month, plus

Energy Charge:

15.576¢ per kWh for all kWh used during the on-peak period

7.576¢ per kWh for all kWh used during the off-peak period

On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-peak, all other kWh used.

BASE RATE REDUCTION: A credit of 0.35204¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The energy charges on the above rates are subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges, excluding the Rate Increase Surcharge.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: One year under written contract and month-to-month thereafter. This rate is experimental in nature and may be cancelled at either the completion of the first year of the contract or upon one month's notice thereafter, by either party.

DEC 1988
APPROVED BY

Issued: January 1, 1989
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 1, 1989, under authority of order of the Michigan Public Service Commission dated December 27, 1988 in Case U-8789.

OPTIONAL TIME-OF-DAY
GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose for the entire electrical requirements at a location. Only open to customers whose energy consumption is equal to or greater than 25,000 kWh per month for three consecutive months, and otherwise qualify for the General Service Rate D3.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, three-wire or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$12.75 per customer per month, plus

Energy Charge:

15.2¢ per kWh for all kWh used during the on-peak period

7.8¢ per kWh for all kWh used during the off-peak period

On-peak, all kWh used between 1100 and 1900 hours Monday through Friday.

Off-peak, all other kWh used.

SURCHARGE ADJUSTMENT: .0455¢ per kWh for all kWh.

NUCLEAR DECOMMISSIONING SURCHARGE: .00960¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.231¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The energy charges on the above rates are subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: One year under written contract and month-to-month thereafter. This rate is experimental in nature and may be cancelled at either the completion of the first year of the contract or upon one month's notice thereafter, by either party.

Rate Schedule No. D4

Large General Service Rate

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the General Service Rate.

Effective May 27, 1981, this rate is not available to customers desiring service through one meter for residential purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$13.67 per customer per month, plus

A demand charge of:

\$10.78 per kW

An energy charge per kilowatthour of:

5.558¢ per kWh for the first 200 kWh per kW of billing demand and

5.008¢ per kWh for the excess

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: Service Charge plus the billing demand charge.

MONTHLY BILLING DEMAND: Is the greatest of the following:

- (a) The highest single reading of the demand meter during the billing period.
- (b) 5 kW.
- (c) 65% of the highest metered billing demand occurring during the billing months of June through October established during the preceding eleven billing months.

Demand readings shall be rounded to the nearest whole integer.

For customers who guarantee a minimum billing demand of 100 kW, the monthly billing demand in part (a) above shall be the highest 30-minute reading of the demand meter during on-peak hours. (See Rule B-4.4, Schedule of on-peak hours.) If the highest 30-minute demand occurs during off-peak hours, then the monthly billing demand shall be the on-peak demand plus one-third of the difference between the on-peak and off-peak maximum demands occurring during the same period.

MONTHLY BILLING DEMAND: Is the greatest of the following:

(a) The highest single reading of the demand meter during the billing period.

(b) 5 kW.

(c) 65% of the highest metered billing demand occurring during the billing months of June through October established during the preceding eleven billing months.

Demand readings shall be rounded to the nearest whole integer.

For customers who guarantee a minimum billing demand of 100 kW, the monthly billing demand in part (a) above shall be the highest 30-minute reading of the demand meter during on-peak hours. (See Rule B-4.4, Schedule of on-peak hours.) If the highest 30-minute demand occurs during off-peak hours, then the monthly billing demand shall be the on-peak demand plus one-third of the difference between the on-peak and off-peak maximum demands occurring during the same period.

M/109

Issued: March 1, 2002

By: H. L. Dow III

Senior Vice President

Strategic Planning and Development

2000 Second Avenue

Detroit, Michigan 48226

Effective for bills rendered on and after March 1, 2002 under authority of order of the Michigan Public Service Commission in Case No. U-12478 dated February 6, 2002.

(To reflect reduction of energy charges due to implementation of securitization charges.)

LARGE GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the General Service Rate.

Effective May 27, 1981, this rate is not available to customers desiring service through one meter for residential purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$13.67 per customer per month, plus

A demand charge of:

\$12.58 per kW

An energy charge per kilowatthour of:

5.91¢ per kWh for the first 200 kWh per kW of billing demand and

5.36¢ per kWh for the excess

BASE RATE REDUCTION: A credit of 0.29305¢ per kWh applied to all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: Service Charge plus the billing demand charge.

MONTHLY BILLING DEMAND: Is the greatest of the following:

- The highest single reading of the demand meter during the billing period.
- 5 kW.
- 65% of the highest metered billing demand occurring during the billing months of June through October established during the preceding eleven billing months.

Demand readings shall be rounded to the nearest whole integer.

For customers who guarantee a minimum billing demand of 100 kW, the monthly billing demand in part (a) above shall be the highest 30-minute reading of the demand meter during on-peak hours. (See Rule B-4.4, Schedule of on-peak hours.) If the highest 30-minute demand occurs during off-peak hours, then the monthly billing demand shall be the on-peak demand plus one-third of the difference between the on-peak and off-peak maximum demands occurring during the same period.

REVISED BY

LARGE GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the General Service Rate.

Effective May 27, 1981, this rate is not available to customers desiring service through one meter for residential purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$11.66 per customer per month, plus

A demand charge of:

\$9.96 per kW

An energy charge per kilowatthour of:

6.98¢ per kWh for the first 200 kWh per kW of billing demand and

6.47¢ per kWh for the excess

SURCHARGE ADJUSTMENT: .0396¢ per kWh for all kWh.

NUCLEAR DECOMMISSIONING SURCHARGE: .00749¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.210¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

MINIMUM CHARGE: Service Charge plus the billing demand charge.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MONTHLY BILLING DEMAND: Is the greatest of the following:

- (a) The highest single reading of the demand meter during the billing period.
- (b) 5 kW.
- (c) 65% of the highest metered billing demand occurring during the billing months of June through October established during the preceding eleven billing months.

Demand readings shall be rounded to the nearest whole integer.

For customers who guarantee a minimum billing demand of 100 kW, the monthly billing demand in part (a) above shall be the highest 30-minute reading of the demand meter during on-peak hours. (See Rule B-4.4, Schedule of on-peak hours.) If the highest 30-minute demand occurs during off-peak hours, then the monthly billing demand shall be the on-peak demand plus one-third of the difference between the on-peak and off-peak maximum demands occurring during the same period.

(Continued on next sheet)

Issued: January 26, 1988
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 24, 1988, under authority of order of the Michigan Public Service Commission dated January 12, 1988 in Case U-7660.

LARGE GENERAL SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the General Service Rate.

Effective May 27, 1981, this rate is not available to customers desiring service through one meter for residential purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volts, single-phase three-wire; or 208Y/120 volts; three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$11.25 per customer per month, plus

A demand charge of:

\$9.72 per kW

An energy charge per kilowatthour of:

6.82¢ per kWh for the first 200 kWh per kW of billing demand and

6.32¢ per kWh for the excess

SURCHARGE ADJUSTMENT: .0396¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.210¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

MINIMUM CHARGE: Service Charge plus the billing demand charge.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MONTHLY BILLING DEMAND: Is the greatest of the following:

- (a) The highest single reading of the demand meter during the billing period.
- (b) 5 kW.
- (c) 65% of the highest metered billing demand occurring during the billing months of June through October established during the preceding eleven billing months.

Demand readings shall be rounded to the nearest whole integer.

For customers who guarantee a minimum billing demand of 100 kW, the monthly billing demand in part (a) above shall be the highest 30-minute reading of the demand meter during on-peak hours. (See Rule B-4.4, Schedule of on-peak hours.) If the highest 30-minute demand occurs during off-peak hours, then the monthly billing demand shall be the on-peak demand plus one-third of the difference between the on-peak and off-peak maximum demands occurring during the same period.

~~GENERAL SERVICE RATE~~

AVAILABILITY OF SERVICE: Available to customers desiring service for any purpose, except that this rate is not available for service in conjunction with the General Service Rate.

Effective May 27, 1981, this rate is not available to customers desiring service through one meter for domestic purposes to a single or double occupancy dwelling unit.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 120/240 volts, three-wire; or three-phase four-wire, Y connected at 208Y/120 volts; or under certain conditions three-phase four-wire, Y connected at 480Y/277 volts.

In certain city districts, alternating current is supplied from a Y connected secondary network from which 120/208 volt, single-phase three-wire; or 208Y/120 volt, three-phase four-wire service may be taken.

RATE PER MONTH:

Service Charge:

\$10.00 per customer per month, plus

A demand charge of:

\$ 8.70 per kW

An energy charge per kilowatthour of:

5.79¢ per kWh for the first 200 kWh per kW of billing demand and

5.29¢ per kWh for the excess

INTERIM SURCHARGE ADJUSTMENT: .603¢ per kWh for all kWh.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

MINIMUM CHARGE: Service Charge plus the billing demand charge.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MONTHLY BILLING DEMAND: Demand indicators are read monthly at the time of the scheduled meter reading. The monthly billing demand is the highest single reading of the demand indicator or integrating demand meter, established during the billing period, but not less than 65% of the highest metered billing demand occurring during the billing months of June through October established during the preceding eleven billing months, nor less than 50% of the highest metered billing demand established during the preceding eleven billing months, nor less than 5 kW. Demand readings shall be rounded to the nearest whole integer. For customers who guarantee a minimum billing demand of 100 kW, the daily demand is the highest 30-minute integrated reading of the demand meter during on-peak hours in each day, subject to Schedule of on-peak hours B-4.4. To this shall be added one-third of the amount by which it is exceeded by the highest single demand occurring during the off-peak hours on the same calendar day. The weekly billing demand is the highest of the daily demands established on seven-day intervals commencing with the first day of the billing period. The monthly billing demand is the average of the four weekly demands. (The period after the first 21 days of each month is considered to be the fourth week.)

Rate Schedule No. D4 (Continued)

Large General Service Rate

EXPERIMENTAL LOAD AGGREGATION PROVISION: The provision is available to Rate Schedule No. D4 and Rate Schedule No. D6 customers with at least 7 locations who desire for power supply billing purposes, to aggregate their power supply billing demands. The minimum load per customer is 5,000 kilowatts and the maximum allowed load is 40,000 kilowatts. The total capacity served under this provision is limited to 125,000 kilowatts in total for Rates D4 and D6, available on a first-come, first-served basis. Interval Demand Meters are required for service under this provision. Meter reading will be accomplished electronically through Customer-provided telecommunication links or other electronic data methods able to provide the Company with the metering data necessary to determine the aggregated demands for billing purposes. Customers requiring the installation of an interval demand meter and/or the communication link will be responsible for the costs associated with the required metering equipment, its installation cost, and the costs associated with the communication link.

This provision will continue until the latter of March 31, 2008 or twelve months from the date of filing of the general electric rate case ordered by the Commission in MPSC Case No. U-14399.

CONTRACT TERM: Open order, terminable on three days' written notice by either party. Where special services are required, or where the investment to serve is out of proportion to the revenue obtainable therefrom, the term will be as specified in the applicable contract rider.

WATER HEATING SERVICE: Water heating service is available on a separate meter basis. See Options I and III, [Schedule Designation No. D5](#).

~~WATER HEATING SERVICE RATE~~

AVAILABILITY OF SERVICE: Available to customers using hot water for sanitary purposes** and taking service under Domestic and General Service Rate Schedules. Options I and III are also available to customers with solar assisted hot water heaters. Company approved waste heat reclamation systems and heat pump water heaters when used in conjunction with an approved electric water heater are also acceptable for use on Option I or III.

Option I: Available to customers who desire controlled water heating service to all of the heating elements of electric water heaters, the design and method of installation of which are approved by the Company as adapted to this service, taken through a separately metered circuit to which no other load except water heating may be connected.

Option II: Available to customers who desire controlled water heating service to single tank installations of 40 through 120 gallon tank capacity, the design and method of installation of which are approved by the Company as adapted to this service. This service may be taken combined with normal load through the regular meter with only the lower element controlled. NOT AVAILABLE FOR NEW INSTALLATIONS.

Option III: Available to customers who desire uncontrolled water heating service to installations, the design and method of which are approved by the Company as adapted to this service, taken through a separately metered circuit to which no other load except water heating may be connected.

HOURS OF SERVICE: The daily use of all controlled water heating service will be controlled by a timer or other monitoring device. Control of service shall not exceed 4 hours per day, said hours to be established from time to time by the Company.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, nominally at 240 volts, three-wire, except that, in certain city districts, alternating current service at 208 volts, nominal, three-wire, or three-phase at the option of the Company.

REMOVED BY

Issued: January 1, 1992
By: L. G. Garberding
Executive Vice President
and Chief Financial Officer
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on
and after January 1, 1992, under
authority of order of the Michigan
Public Service Commission dated
December 19, 1991 in Case U-8789.

WATER HEATING SERVICE RATE

RATE PER MONTH:

Option I—Separate Meter—Controlled

\$2.00 service charge, plus
5.41¢ per kilowatthour for all kilowatthours

Option II—Combined Meter—Controlled

5.41¢ per kilowatthour shall apply to 10 kilowatthours per day, but not to the first 7 kilowatthours per day which will be billed on the applicable rate schedule. However, for customers being billed on the General Service Rate D3, a block of 300 kWh per month will apply, but not to the first 210 kWh/month.

Option III—Separate Meter—Uncontrolled

\$2.00 service charge, plus
8.07¢ per kilowatthour for all kilowatthours

NUCLEAR DECOMMISSIONING SURCHARGE: .00014¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

CONTRACT TERM: Open order, terminable on three days' notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

Effective for bills rendered on
and after June 5, 2000 under
authority of order of the Michigan
Public Service Commission in Case
No. U-12464 dated June 5, 2000.

Rate Schedule No. D6

Primary Supply Rate

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, sub-transmission, or transmission voltage who contract for a specified capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month

Demand Charges:

\$11.71 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

2.431¢ per kWh for all on-peak kWh

2.131¢ per kWh for all off-peak kWh

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at sub-transmission level

SUBSTATION CREDIT: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provision of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month

Demand Charges:

\$14.25 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

2.536¢ per kWh for all on-peak kWh

2.236¢ per kWh for all off-peak kWh

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at sub-transmission level

Public Service Commission in Case
U-11726 dated December 28, 1998

REMOVED BY

PRIMARY SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, sub-transmission, or transmission voltage who contract for a specified capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month

Demand Charges:

\$14.25 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity.

This clause is applicable to each voltage level served.

Energy Charge:

2.96¢ per kWh for all on-peak kWh

2.66¢ per kWh for all off-peak kWh

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at sub-transmission level

SUBSTATION CREDIT: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provision of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

PRIMARY SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, sub-transmission, or transmission voltage who contract for a specified capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. Customers served at more than one voltage level shall establish separate contract capacities for each voltage level.

RATE PER MONTH:

Service Charge:
\$225.00 per customer per month

Demand Charges:

\$ 9.41 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$2.80 per kW of maximum demand

For service at subtransmission voltage level (24 to 41.6 kV) \$2.00 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.50 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

3.75¢ per kWh for all on-peak kWh

3.05¢ per kWh for all off-peak kWh

SUBSTATION CREDIT: Available to customers served at subtransmission voltage level (24 to 41.6 kV) or higher, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.26 per kW of maximum demand shall be applied to the maximum demand charge. A 1% credit shall be applied to the energy charge where the service is metered on the primary side of the transformer.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: The Energy Charge in the above rate is subject to the provision of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

PRIMARY SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, sub-transmission, or transmission voltage who contract for a specified capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. Customers served at more than one voltage level shall establish separate contract capacities for each voltage level.

RATE PER MONTH:

Service Charge:
\$190.00 per customer per month

Demand Charges:

\$7.80 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$2.40 per kW of maximum demand

For service at subtransmission voltage level (24 to 41.6 kV) \$1.55 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.05 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

SUBSTATION CREDIT: Available to customers served at subtransmission voltage level (24 to 41.6 kV) or higher, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.18 per kW of maximum demand shall be applied to the maximum demand charge, and a credit of .05¢ per kWh shall be applied to the energy charge.

Energy Charge:

3.65¢ per kWh for all on-peak kWh

2.95¢ per kWh for all off-peak kWh

INTERIM SURCHARGE ADJUSTMENT: .386¢ per kWh for all kWh.

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

EMERGENCY LOAD MANAGEMENT DISCOUNT: (Available for loads of 500 kW or more)

A credit of \$.25 per kW of on-peak monthly billing demand shall be applied to any customer who contracts in writing to permit the Company to curtail his entire load during a period of short-term power emergency as a means of emergency load management. As applied in rule B-3.7.

(Continued From Sheet No. D6)

Rate Schedule No. D6 (Continued)

Primary Supply Rate

Retail Access Service Customers:

Delivery Charges:

Service Charge: \$275 per month

Distribution Charges:

For primary service (less than 24 kV) \$3.20 per kW of maximum demand.

For service at subtransmission voltage (24 to 41.6 kV) \$1.20 per kW of maximum demand.

For service at transmission voltage (120 kV and above) \$0.80 per kW of maximum demand.

Substation Credit: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

Surcharges And Credits: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.6.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the single highest 30-minute integrated reading of the demand meter during the on-peak hours of the billing period. The monthly on-peak billing demand will not be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50 kilowatts.

EXPERIMENTAL LOAD AGGREGATION PROVISION: *The provision is available to Rate Schedule No. D4 and Rate Schedule No. D6 customers with at least 7 locations who desire for power supply billing purposes, to aggregate their power supply billing demands. The minimum load per customer is 5,000 kilowatts and the maximum allowed load is 40,000 kilowatts. The total capacity served under this provision is limited to 125,000 kilowatts in total for Rates D4 and D6, available on a first-come, first-served basis. Interval Demand Meters are required for service under this provision. Meter reading will be accomplished electronically through Customer-provided telecommunication links or other electronic data methods able to provide the Company with the metering data necessary to determine the aggregated demands for billing purposes. Customers requiring the installation of an interval demand meter and/or the communication link will be responsible for the costs associated with the required metering equipment, its installation cost, and the costs associated with the communication link.*

This provision will continue until the latter of March 31, 2008 or twelve months from the date of filing of the general electric rate case ordered by the Commission in MPSC Case No. U-14399.

MAXIMUM DEMAND: The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

MINIMUM CHARGE: All applicable demand charges plus the service charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

Rate Schedule No. D6 (Continued)

Primary Supply Rate

Retail Access Service Customers:

Delivery Charges:

Service Charge: \$275 per month

Distribution Charges:

For primary service (less than 24 kV) \$3.20 per kW of maximum demand.

For service at subtransmission voltage (24 to 41.6 kV) \$1.20 per kW of maximum demand.

For service at transmission voltage (120 kV and above) \$0.80 per kW of maximum demand.

Substation Credit: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

Surcharges And Credits: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.6.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the single highest 30-minute integrated reading of the demand meter during the on-peak hours of the billing period. The monthly on-peak billing demand will not be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50 kilowatts.

MAXIMUM DEMAND: The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

MINIMUM CHARGE: All *applicable* demand charges plus the service charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE:

Full Service Customers:

The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Any power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

Retail Access Service Customers:

A power factor of less than 70% is not permitted and necessary corrective equipment must be installed by the Customer to correct to a minimum level of 70%. Power factor and excess Reactive Demand charges will be calculated at each Customer location at the time of the Location's single highest 30-minute integrated kW reading of the Interval Demand Meter during the on-peak hours of the billing period, which are those hours from 7 a.m. until 11 p.m. consistent with the ITC Open Access Transmission Tariff. Excess Reactive Demand is any Reactive Demand resulting from operations below 80% power factor. A monthly charge of \$3.50/kVAR will be applied to excess Reactive Demand.

PRIMARY SUPPLY RATE-Continued

EMERGENCY LOAD MANAGEMENT DISCOUNT: (Available for loads of 500 kW or more)

A credit of \$.25 per kW of on-peak monthly metered billing demand shall be applied to any customer who contracts in writing to permit the Company to curtail his entire load during a period of short-term power emergency as a means of emergency load management, as applied in Rule B-3.7. The contract term is five years extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year. Failure, by a customer, to comply with an interruption order of the Company shall be considered unauthorized use, and shall be billed at 10 times the energy charges and 10 times the on-peak billing demand rate applied to the maximum demand during the period of interruption.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.7.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the average of the four weekly highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period. The weekly billing demand is the highest of the daily demands established on seven-day intervals commencing with the first day of the billing period. (The period after the first 21 days of each month is considered to be the fourth week.) The monthly on-peak billing demand will not be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50 kilowatts,

MINIMUM CHARGE: The billing demand charge as above plus the service charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. PRIMARY SUPPLY RATE-Continued

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.7.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the average of the four weekly highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period. (The period after the first 21 days of each month is considered to be the fourth week.) In no event will the monthly on-peak billing demand be less than 65% of the highest monthly on-peak billing demand during the calendar months of June, July, August, September, and October of the preceding eleven calendar months, nor less than 50 kilowatts.

MINIMUM CHARGE: The billing demand charge as above plus the service charge. The Power Factor Clause shall not operate to increase the monthly minimum charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load.

Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

Customers will be permitted to transfer from this rate to a secondary commercial rate, provided they can meet the availability requirements, if the load characteristic changes sufficiently so that the customer would benefit by the change for the foreseeable future even though metering was continued at primary voltage. Frequent changes, however, from one rate to another for a period less than one full year will not be permitted in accordance with Rule B-2.4—Choice of Rates.

For example, during the period that a building is under construction, primary service may be supplied and metered at primary voltage and billed on a secondary rate while the building is under the jurisdiction of the contractor.

Also, for the convenience of the utility, service to a large school complex or a high rise building where, as a matter of design, primary voltage is furnished with Company owned transformers at remote locations fed by customer owned primary cables, the account can be billed on a secondary rate though metered at one central primary voltage location at or near the termination of the utility-owned cables.

At the option of the Company, service may be supplied at the primary voltage and metered at a secondary voltage when the customer transfers from a secondary rate. For loads metered at a secondary voltage, all measured kWhs shall be increased by 2%.

CONTRACT TERM: The term is five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year. Where special services are required, the term will be as specified in the applicable contract rider.

Issued: April 1, 1983
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 1, 1983, under authority of Order of the Michigan Public Service Commission dated March 31, 1983, in Case U-6949.

Rate Schedule No. D6.1

Alternative Primary Supply Service

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, subtransmission, or transmission voltage who contract for a specified capacity of not less than 10,000 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 10,000 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Service Charge:
\$275.00 per customer per month

Demand Charge:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

12.207¢ /kWh for the first 150 hours use of on-peak billing demand created during the month, but not less than 10,000 kWh.

1.781¢ /kWh for the next 300 hours use of on-peak billing demand created during the month, but not less than 10,000 kWh.

1.391¢ /kWh for the excess kilowatthours.

The energy charge will be reduced by 0.30¢ /kWh for all off-peak use.

Voltage Level Discount:

.15¢ per kWh at transmission level.

.10¢ per kWh at subtransmission level

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED NOVEMBER 23, 2004
IN CASE NO. U-13808

(To reflect application of Interim Rate Increase Surcharge)

ALTERNATIVE PRIMARY SUPPLY SERVICE

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, subtransmission, or transmission voltage who contract for a specified capacity of not less than 10,000 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 10,000 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month

Demand Charge:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

14.096¢ /kWh for the first 150 hours use of on-peak billing demand created during the month, but not less than 10,000 kW.

1.886¢ /kWh for the next 300 hours use of on-peak billing demand created during the month, but not less than 10,000 kW.

1.496¢ /kWh for the excess kilowatthours.

The energy charge will be reduced by 0.30¢ /kWh for all off-peak use.

Voltage Level Discount:

.15¢ per kWh at transmission level.

.10¢ per kWh at subtransmission level

BASE RATE REDUCTION: A credit of 3.227% applied to the base bill.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges, excluding the Rate Increase Surcharge.

and Chief Financial Officer
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 22, 1994 under authority of order of the Michigan Public Service Commission dated January 21, 1994 in Case U-10102

ALTERNATIVE PRIMARY SUPPLY SERVICE

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, subtransmission, or transmission voltage who contract for a specified capacity of not less than 10,000 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 10,000 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. Customers served at more than one voltage level shall establish separate contract capacities for each voltage level.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month

Demand Charge:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity.

This clause is applicable to each voltage level served.

Energy Charge:

15.11¢ /kWh for the first 150 hours use of on-peak billing demand created during the month, but not less than 10,000 kWh.

3.58¢ /kWh for the next 300 hours use of on-peak billing demand created during the month, but not less than 10,000 kWh.

3.01¢ /kWh for the excess kilowatthours.

The energy charge will be reduced by 7.00 mills per kWh for all off-peak use.

Voltage Level Discount:

.15¢ per kWh at transmission level.

.10¢ per kWh at subtransmission level

NUCLEAR DECOMMISSIONING SURCHARGE: .00622¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 16, 1985, under authority of Order of the Michigan Public Service Commission dated July 16, 1985 in Case U-7660.

ALTERNATIVE PRIMARY SUPPLY SERVICE--Continued

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.7.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the single highest 30-minute integrated reading of the demand meter during the on-peak hours of the billing period. The monthly on-peak billing demand will not be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 10,000 kilowatts.

MINIMUM CHARGE: Energy charge for first 150 hours of use.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Any power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load.

Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

Customers will be permitted to transfer from this rate to a secondary commercial rate, provided they can meet the availability requirements, if the load characteristic changes sufficiently so that the customer would benefit by the change for the foreseeable future even though metering was continued at primary voltage. Frequent changes, however, from one rate to another for a period less than one full year will not be permitted in accordance with Rule B-2.4 - Choice of Rates.

For example, during the period that a building is under construction, primary service may be supplied and metered at primary voltage and billed on a secondary rate while the building is under the jurisdiction of the contractor.

ALTERNATIVE PRIMARY SUPPLY SERVICE—Continued

EMERGENCY LOAD MANAGEMENT DISCOUNT: (Available for loads of 500 kW or more)

A credit of \$.25 per kW of on-peak monthly metered billing demand shall be applied to any customer who contracts in writing to permit the Company to curtail his entire load during a period of short-term power emergency as a means of emergency load management, as applied in Rule B-3.7. The contract term is five years extending thereafter from month-to-month until terminated by mutual consent or on twelve months' written notice by either party, which may be given at any time after the end of the fourth year. Failure, by a customer, to comply with an interruption order of the Company shall be considered unauthorized use, and shall be billed at 10 times the energy charges and 10 times the on-peak billing demand rate applied to the maximum demand during the period of interruption.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.7.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the average of the four weekly highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period. The weekly billing demand is the highest of the daily demands established on seven-day intervals commencing with the first day of the billing period. (The period after the first 21 days of each month is considered to be the fourth week.) The monthly on-peak billing demand will not be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 10,000 kilowatts.

MINIMUM CHARGE: Energy charge for first 150 hours of use.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load. Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits. Customers will be permitted to transfer from this rate to a secondary commercial rate, provided they can meet the availability requirements, if the load characteristic changes sufficiently so that the customer would benefit by the change for the foreseeable future even though metering was continued at primary voltage. Frequent changes, however, from one rate to another for a period less than one full year will not be permitted in accordance with Rule B-2.4 - Choice of Rates. For example, during the period that a building is under construction, primary service may be supplied and metered at primary voltage and billed on a secondary rate while the building is under the jurisdiction of the contractor.

ALTERNATIVE PRIMARY SUPPLY SERVICE
(continued)

EMERGENCY LOAD MANAGEMENT DISCOUNT: (Available for loads of 500 kW or more)

A credit of \$.25 per kW of on-peak monthly metered billing demand shall be applied to any customer who contracts in writing to permit the Company to curtail his entire load during a period of short-term power emergency as a means of emergency load management, as applied in Rule B-3.7. The contract term is five years extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year. Failure, by a customer, to comply with an interruption order of the Company shall be considered unauthorized use, and shall be billed at 10 times the energy charges and 10 times the on-peak billing demand rate applied to the maximum demand during the period of interruption.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.7.

MONTHLY ON PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the average of the four weekly highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period. The weekly billing demand is the highest of the daily demands established on seven-day intervals commencing with the first day of the billing period. (The period after the first 21 days of each month is considered to be the fourth week.) The monthly on-peak billing demand will not be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50 kilowatts.

MINIMUM CHARGE: Energy charge for first 150 hours of use.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load.

Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

Customers will be permitted to transfer from this rate to a secondary commercial rate, provided they can meet the availability requirements, if the load characteristic changes sufficiently so that the customer would benefit by the change for the foreseeable future even though metering was continued at primary voltage. Frequent changes, however, from one rate to another for a period less than one full year will not be permitted in accordance with Rule B-2.4-Choice of Rates.

For example, during the period that a building is under construction, primary service may be supplied and metered at primary voltage and billed on a secondary rate while the building is under the jurisdiction of the contractor.

(Continued on next page)

M/114c

Effective on service rendered on and after July 16, 1985, under authority of Order of the Michigan Public Service Commission dated July 16, 1985 in Case U-7660.

ALTERNATIVE PRIMARY SUPPLY RATE--Continued

At the option of the Company, service may be supplied at the primary voltage and metered at a secondary voltage when the customer transfers from a secondary rate. For loads metered at a secondary voltage (less than 600V), all measured quantities shall be increased by 2%.

SUBSTATION CREDIT: Available to customers where service at subtransmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

CONTRACT TERM: The term is five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months' written notice by either party, which may be given at any time after the end of the fourth year. Where special services are required, the term will be as specified in the applicable contract rider.

Rate Schedule No. D6.2

Primary Space Conditioning Rate

AVAILABILITY OF SERVICE: Available on an optional basis for customers at primary, subtransmission or transmission voltage, who have all their space conditioning supplied by electric service, and contract for a specific capacity of not less than 50 kilowatts at a single location. This rate is only available to customers being served on this rate prior to January 22, 1994.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Full Service Customers:

Power Supply Charges:

Demand Charge: 8.77 per kW of on-peak billing demand

Energy Charges:

2.354¢ per kWh for the first 500 hours use of current month's highest demand

1.973¢ per kWh for any excess

Voltage Level Discount:

0.15¢ per kWh at transmission level

0.10¢ per kWh at subtransmission level

Delivery Charges:

Service Charge: \$275 per month

Distribution Charges:

For primary service (less than 24 kV) \$6.85 per kW of maximum demand.

For service at subtransmission voltage (24 to 41.6 kV) \$1.20 per kW of maximum demand.

For service at transmission voltage (120 kV and above) \$0.80 per kW of maximum demand.

Substation Credit: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

Surcharges And Credits: As approved by the Commission. See Schedule Designations B-4.8 and B-4.9.

Rate Schedule No. D6.2

Primary Space Conditioning Rate

AVAILABILITY OF SERVICE: Available on an optional basis for customers at primary, subtransmission or transmission voltage, who have all their space conditioning supplied by electric service, and contract for a specific capacity of not less than 50 kilowatts at a single location. This rate is only available to customers being served on this rate prior to January 22, 1994.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Service Charge:
\$275.00 per customer per month

Demand Charges:

\$9.21 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charges:

2.471¢ per kWh for the first 500 hours use of current month's highest demand

2.071¢ per kWh for any excess

The energy charge will be reduced by 0.30¢ per kWh for all off-peak kWh.

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at subtransmission level

SUBSTATION CREDIT: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. authority of order of the Michigan
Public Service Commission dated
January 21, 1994 in Case U-10102

PRIMARY SPACE CONDITIONING RATE

AVAILABILITY OF SERVICE: Available on an optional basis for customers at primary, subtransmission or transmission voltage, who have all their space conditioning supplied by electric service, and contract for a specific capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. Customers served at more than one voltage level shall establish separate contract capacities for each voltage level.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month

Demand Charges:

\$11.34 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charges:

4.05¢ per kWh for the first 500 hours use of current month's highest demand

3.25¢ per kWh for any excess

The energy charge will be reduced by 7.00 mills per kWh for all off-peak kWh.

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at subtransmission level

NUCLEAR DECOMMISSIONING SURCHARGE: .00622¢ per kWh for all kWh.

SUBSTATION CREDIT: Available to customers served at subtransmission voltage level (24 to 41.6 kV) or higher, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

ORDER 48787
74 31
DEC 1988

PRIMARY SPACE CONDITIONING RATE

AVAILABILITY OF SERVICE: Available on an optional basis for customer at primary, subtransmission or transmission voltage, who have all their space conditioning supplied by electric service, and contract for a specific capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. Customers served at more than one voltage level shall establish separate contract capacities for each voltage level.

RATE PER MONTH:

Service Charge:

\$239.00 per customer per month

Demand Charges:

\$8.37 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charges:

4.65¢ per kWh for the first 500 hours use of current month's highest demand

3.85¢ per kWh for any excess

The energy charge will be reduced by 7.00 mills per kWh for all off-peak kWh.

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at subtransmission level

SURCHARGE ADJUSTMENT: .0284¢ per kWh for all kWh.

NUCLEAR DECOMMISSIONING SURCHARGE: .00622¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.155¢ per kWh for all kWh.

SUBSTATION CREDIT: Available to customers served at subtransmission voltage level (24 to 41.6 kV) or higher, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 16, 1985, under authority of Order of the Michigan Public Service Commission dated July 16, 1985 in Case U-7660.

(Continued From **Sheet No. D6.2**)

Rate Schedule No. D6.2 (Continued)

Primary Space Conditioning Rate

Retail Access Service Customers:

Delivery Charges:

Service Charge: \$275 per month

Distribution Charges:

For primary service (less than 24 kV) \$3.20 per kW of maximum demand.

For service at subtransmission voltage (24 to 41.6 kV) \$1.20 per kW of maximum demand.

For service at transmission voltage (120 kV and above) \$0.80 per kW of maximum demand.

Substation Credit: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

Surcharges And Credits: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.6.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period and the preceding eleven billing months, but not less than 50 kilowatts.

MAXIMUM DEMAND: The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

MINIMUM CHARGE: All *applicable* demand charges plus the service charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE:

Full Service Customers:

The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Any power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

Retail Access Service Customers:

A power factor of less than 70% is not permitted and necessary corrective equipment must be installed by the Customer to correct to a minimum level of 70%. Power factor and excess Reactive Demand charges will be calculated at each Customer location at the time of the Location's single highest 30-minute integrated kW reading of the Interval Demand Meter during the on-peak hours of the billing period, which are those hours from 7 a.m. until 11 p.m. consistent with the ITC Open Access Transmission Tariff. Excess Reactive Demand is any Reactive Demand resulting from operations below 80% power factor. A monthly charge of \$3.50/kVAR will be applied to excess Reactive Demand.

IN CASE NO. U-14399

(Continued From Sheet No. D6.2)

Rate Schedule No. D6.2 (Continued)

Primary Space Conditioning Rate

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provision of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.7.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period and the preceding eleven billing months, but not less than 50 kilowatts.

MINIMUM CHARGE: All demand charges plus the service charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Any power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load.

Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

Customers will be permitted to transfer from this rate to a secondary commercial rate, provided they can meet the availability requirements, if the load characteristic changes sufficiently so that the customer would benefit by the change for the foreseeable future even through metering was continued at primary voltage. Frequent changes, however, from one rate to another for a period of less than one full year will not be permitted in accordance with Rule B-2.4, Choice of Rates.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Any power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load.

Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

Customers will be permitted to transfer from this rate to a secondary commercial rate, provided they can meet the availability requirements, if the load characteristic changes sufficiently so that the customer would benefit by the change for the foreseeable future even through metering was continued at primary voltage. Frequent changes, however, from one rate to another for a period of less than one full year will not be permitted in accordance with Rule B-2.4, Choice of Rates.

authority of Order of the Michigan
Public Service Commission dated
July 16, 1985 in Case U-7660.

(Continued From Sheet No. D6.2a)

Rate Schedule No. D6.2 (Continued)

Primary Space Conditioning Rate

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load.

Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

Customers will be permitted to transfer from this rate to a secondary commercial rate, provided they can meet the availability requirements, if the load characteristic changes sufficiently so that the customer would benefit by the change for the foreseeable future even through metering was continued at primary voltage. Frequent changes, however, from one rate to another for a period of less than one full year will not be permitted in accordance with Rule B-2.4, Choice of Rates.

For example, during the period that a building is under construction, primary service may be supplied and metered at primary voltage and billed on a secondary rate while the building is under the jurisdiction of the contractor.

Also, for the convenience of the utility, service to a large school complex or a high rise building where, as a matter of design, primary voltage is furnished with Company owned transformers at remote locations fed by customer owned primary cables, the account can be billed on a secondary rate though metered at one central primary voltage location at or near the termination of the utility-owned cables.

At the option of the Company, service may be supplied at the primary voltage and metered at a secondary voltage when the customer transfers from a secondary rate. For loads metered at a secondary voltage (less than 600V), all measured quantities shall be increased by 2%.

CONTRACT TERM: For new primary installations over 1000 kW the term is for not less than five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months' written notice by either party, which may be given at any time after the end of the fourth year. For new primary installations of 1000 kW or less and for new customers at existing installations, the term is for one year which under special circumstances may be increased or reduced at the discretion of the Company, extending thereafter from month-to-month until terminated by mutual consent or on one month written notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

Effective on service rendered on
and after July 16, 1985, under
authority of Order of the Michigan
Public Service Commission dated
July 16, 1985 in Case U-7660.

Rate Schedule No. D7

Transitional Primary Supply Rate

AVAILABILITY OF SERVICE: Available to customers desiring service at primary, sub-transmission, or transmission voltage who took service under a Special Manufacturing Contract during 2004.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The contract capacity for customers served at more than one voltage level shall be the sum of the contract capacities established for each voltage level.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month

Demand Charges:

\$10.00 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

2.143¢ per kWh for all kWh

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at sub-transmission level

SUBSTATION CREDIT: Available to customers where service at sub-transmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provision of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED NOVEMBER 23, 2004
IN CASE NO. U-13808

BULK POWER SUPPLY RATE

THIS RATE IS CANCELLED AS OF JANUARY 1, 1989

CANCELLED BY
ORDER U-13808
REMOVED BY JKB
DATE 1-4-89

Issued: January 1, 1989
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on
and after January 1, 1989, under
authority of order of the Michigan
Public Service Commission dated
December 27, 1988 in Case U-8789.

BULK POWER SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for heavy industrial purposes who contract for a specified capacity of not less than 50,000 kilowatts at a single location for service at transmission voltage (120,000 volts or above).

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 120,000 volts or above from the bulk power system of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements, but not less than 50,000 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its bulk power system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity.

RATE PER MONTH:

Service Charge:

\$2,500.00 per customer per month

Demand Charge:

\$11.72 per kW of on-peak billing demand

Energy Charges:

4.50¢ per kWh for all kWh consumed during the on-peak period

3.80¢ per kWh for all kWh consumed during the off-peak period

SURCHARGE ADJUSTMENT: .0224¢ per kWh for all kWh.

NUCLEAR DECOMMISSIONING SURCHARGE: .00703¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.155¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

FACILITIES CHARGE: For any portion of the load served at less than 120,000 volts, the Company will provide the necessary facilities in accordance with its rules and regulations. The annual facilities charge is established at \$11.40 per kilowatt of contract capacity for that portion of the load so served. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The annual facilities charge shall be billed in twelve equal installments to be added to the demand charge. This provision is not intended to make this rate available to customers metered at less than transmission voltage (120,000 volts or above).

EMERGENCY LOAD MANAGEMENT DISCOUNT: A credit of \$.25 per kW of on-peak monthly metered billing demand shall be applied to any customer who contracts in writing to permit the Company to curtail his entire load during a period of short-term power emergency as a means of emergency load management as applied in Rule B-3.7. The contract term is five years extending thereafter from month-to-month until terminated by mutual consent or on twelve months' written notice by either party, which may be given at any time after the end of the fourth year. Failure by a customer to comply with an interruption order of the Company shall be considered unauthorized use, and shall be billed at 10 times the energy charges and 10 times the on-peak billing demand rate applied to the maximum demand during the period of interruption.

M6/115

Issued: January 26, 1988
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 24, 1988, under authority of order of the Michigan Public Service Commission dated January 12, 1988 in Case U-7660.

BULK POWER SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for heavy industrial purposes who contract for a specified capacity of not less than 50,000 kilowatts at a single location for service at transmission voltage (120,000 volts or above).

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 120,000 volts or above from the bulk power system of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements, but not less than 50,000 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its bulk power system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity.

RATE PER MONTH:

Service Charge:

\$2,500.00 per customer per month

Demand Charge:

\$11.46 per kW of on-peak billing demand

Energy Charges:

4.40¢ per kWh for all kWh consumed during the on-peak period

3.70¢ per kWh for all kWh consumed during the off-peak period

SURCHARGE ADJUSTMENT: .0224¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.155¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

FACILITIES CHARGE: For any portion of the load served at less than 120,000 volts, the Company will provide the necessary facilities in accordance with its rules and regulations. The annual facilities charge is established at \$11.40 per kilowatt of contract capacity for that portion of the load so served. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The annual facilities charge shall be billed in twelve equal installments to be added to the demand charge. This provision is not intended to make this rate available to customers metered at less than transmission voltage (120,000 volts or above).

EMERGENCY LOAD MANAGEMENT DISCOUNT: A credit of \$.25 per kW of on-peak monthly metered billing demand shall be applied to any customer who contracts in writing to permit the Company to curtail his entire load during a period of short-term power emergency as a means of emergency load management as applied in Rule B-3.7. The contract term is five years extending thereafter from month-to-month until terminated by mutual consent or on twelve months' written notice by either party, which may be given at any time after the end of the fourth year. Failure by a customer to comply with an interruption order of the Company shall be considered unauthorized use, and shall be billed at 10 times the energy charges and 10 times the on-peak billing demand rate applied to the maximum demand during the period of interruption.

Energy Charges:

4.40¢ per kWh for all kWh consumed during the on-peak period.

3.70¢ per kWh for all kWh consumed during the off-peak period.

SURCHARGE ADJUSTMENT: .0224¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

FACILITIES CHARGE: For any portion of the load served at less than 120,000 volts, the Company will provide the necessary facilities in accordance with its rules and regulations. The annual facilities charge is established at \$11.40 per kilowatt of contract capacity for that portion of the load so served. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The annual facilities charge shall be billed in twelve equal installments to be added to the demand charge. This provision is not intended to make this rate available to customers metered at less than transmission voltage (120,000 volts or above).

EMERGENCY LOAD MANAGEMENT DISCOUNT: A credit of \$.25 per kW of on-peak monthly metered billing demand shall be applied to any customer who contracts in writing to permit the Company to curtail his entire load during a period of short-term power emergency as a means of emergency load management as applied in Rule B-3.7. The contract term is five years extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year. Failure by a customer to comply with an interruption order of the Company shall be considered unauthorized use, and shall be billed at 10 times the energy charges and 10 times the on-peak billing demand rate applied to the maximum demand during the period of interruption.

BULK POWER SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring service for heavy industrial purposes who contract for a specified capacity of not less than 50,000 kilowatts at a single location for service at transmission voltage (120,000 volts or above).

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 120,000 volts or above, from the bulk power system of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements, but not less than 50,000 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its bulk power system at the contract capacity. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity.

RATE PER MONTH:

Service Charge:

\$2,500.00 per customer per month

Demand Charge:

\$11.46 per kW of on-peak billing demand

Energy Charges:

4.40¢ per kWh for all kWh consumed during the on-peak period.

3.70¢ per kWh for all kWh consumed during the off-peak period.

DATED NOVEMBER 23, 2004
IN CASE NO. U-13808

BULK POWER SUPPLY RATE—Continued

THIS RATE IS CANCELLED AS OF JANUARY 1, 1989

CANCELLED BY
ORDER U-13808
REMOVED BY JKB
DATE 1-4-89

Issued: January 1, 1989
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on
and after January 1, 1989, under
authority of Order of the Michigan
Public Service Commission dated
December 27, 1988 in Case U-8789.

BULK POWER SUPPLY RATE—Continued

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the highest hourly integrated reading of the demand meter during the on-peak hours of the billing period. In no event will the monthly on-peak billing demand be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50,000 kilowatts.

MINIMUM CHARGE: The billing demand charge as above plus, the monthly installment on the facilities charge plus the service charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric service for power factor below 85% lagging, in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

PRIMARY METERING ADJUSTMENT: For any portion of the load served at less than 120,000 volts, all kilowatts, kilowatthours and kilovarhours consumed shall be increased by 1% for transformation losses from the 120,000 volt service.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load. The Company will provide separate metering to determine the contract capacity applicable to any portion of the load served at standard primary voltage.

The Company offers to provide the necessary facilities for 120,000 volt service connections on private property in accordance with its rules and regulations. The annual facilities charge applicable to such additional investment is established at 18% of actual cost.

Customer-owned equipment must be operated so that voltage fluctuations on the bulk power system of the Company shall not exceed permissible limits.

CONTRACT TERM: The term will not be less than five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year. Where special services are required, the term will be as specified, taking into consideration the facilities to be furnished by the Company in serving the load.

By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 1, 1983, under authority of Order of the Michigan Public Service Commission dated March 31, 1983, in Case U-6949.

BULK POWER SUPPLY RATE—Continued

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the highest hourly integrated reading of the demand meter during the on-peak hours of the billing period. In no event will the monthly on-peak billing demand be less than 65% of the highest monthly on-peak billing demand during the calendar months of June, July, August, September, and October of the preceding eleven calendar months, nor less than 50,000 kilowatts.

MINIMUM CHARGE: The billing demand charge as above plus, the monthly installment on the facilities charge plus the service charge. The Power Factor Clause shall not operate to increase the monthly minimum charge.

SCHEDULE OF ON-PEAK HOURS: See Schedule Designation B-4.4.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric service for power factor below 85% lagging, in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

PRIMARY METERING ADJUSTMENT: For any portion of the load served at less than 120,000 volts, all kilowatts, kilowatthours and kilovarhours consumed shall be increased by 1% for transformation losses from the 120,000 volt service.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load. The Company will provide separate metering to determine the contract capacity applicable to any portion of the load served at standard primary voltage.

The Company offers to provide the necessary facilities for 120,000 volt service connections on private property in accordance with its rules and regulations. The annual facilities charge applicable to such additional investment is established at 18% of actual cost.

Customer-owned equipment must be operated so that voltage fluctuations on the bulk power system of the Company shall not exceed permissible limits.

CONTRACT TERM: The term will not be less than five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year. Where special services are required, the term will be as specified, taking into consideration the facilities to be furnished by the Company in serving the load.

By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

(To reflect reduction of energy charges due to implementation of revised securitization charges)

INTERRUPTIBLE SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring separately metered service at primary voltage who contract for a specified quantity of demonstrated interruptible load of not less than 50 kilowatts at a single location. Contracted interruptible capacity on this rate is limited to 150 megawatts.

HOURS OF INTERRUPTION: All electric power delivered hereunder shall be subject to curtailment on order of the Company. Customers may be ordered to interrupt only when the Company finds it necessary to do so either to maintain system integrity or when the existence of such loads shall lead to a capacity deficiency by the utility. A System Integrity Interruption Order may be given by the Company when the failure to interrupt will contribute to the implementation of the rules for emergency electrical procedures under Rule B-3.7. A Capacity Deficiency Interruption Order may be given by the Company when available system generation is insufficient to meet anticipated system load.

NOTICE OF INTERRUPTION: The customer shall be provided, whenever possible, notice in advance of probable interruption and the estimated duration of the interruption.

NON-INTERRUPTION FEE: Customers who do not interrupt within one hour following notice of a capacity deficiency interruption order shall be billed at the cost of replacement energy plus 0.511¢ per kWh during the time of interruption plus the applicable voltage level charge, but not less than the normal D8 rate. Voltage level charges for service other than transmission voltage are:

0.15¢ per kWh at the distribution level.

0.05¢ per kWh at the subtransmission level.

NON-INTERRUPTION PENALTY: A customer who does not interrupt within one hour following a system integrity interruption order shall be billed at the rate of \$50 per kW for the highest 30-minute kW demand created during the interruption period for all usage above the customer's firm demand, in addition to the prescribed monthly rate. In addition, the interruptible contract capacity of a customer who does not interrupt within one hour following notice shall be immediately reduced by the amount by which the customer failed to interrupt, unless the customer demonstrates that failure to interrupt was beyond its control.

NOTICE OF INTERRUPTION: The customer shall be provided, whenever possible, notice in advance of probable interruption and the estimated duration of the interruption.

NON-INTERRUPTION FEE: Customers who do not interrupt within one hour following notice of a capacity deficiency interruption order shall be billed at the cost of replacement energy plus 0.63¢ per kWh during the time of interruption plus the applicable voltage level charge, but not less than the normal D8 rate. Voltage level charges for service other than transmission voltage are:

0.15¢ per kWh at the distribution level.

0.05¢ per kWh at the subtransmission level.

NON-INTERRUPTION PENALTY: A customer who does not interrupt within one hour following a system integrity interruption order shall be billed at the rate of \$50 per kW for the highest 30-minute kW demand created during the interruption period for all usage above the customer's firm demand, in addition to the prescribed monthly rate. In addition, the interruptible contract capacity of a customer who does not interrupt within one hour following notice shall be immediately reduced by the amount by which the customer failed to interrupt, unless the customer demonstrates that failure to interrupt was beyond its control.

and Chief Financial Officer
2000 Second Avenue
Detroit, Michigan 48226

Effective for bills rendered on and after March 26, 2001 under authority of order of the Michigan Public Service Commission in Case No. U-12478 dated November 2, 2000.

INTERRUPTIBLE SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring separately metered service at primary voltage who contract for a specified quantity of demonstrated interruptible load of not less than 50 kilowatts at a single location. Contracted interruptible capacity on this rate is limited to 150 megawatts.

HOURS OF INTERRUPTION: All electric power delivered hereunder shall be subject to curtailment on order of the Company. Customers may be ordered to interrupt only when the Company finds it necessary to do so either to maintain system integrity or when the existence of such loads shall lead to a capacity deficiency by the utility. A System Integrity Interruption Order may be given by the Company when the failure to interrupt will contribute to the implementation of the rules for emergency electrical procedures under Rule B-3.7. A Capacity Deficiency Interruption Order may be given by the Company when available system generation is insufficient to meet anticipated system load.

NOTICE OF INTERRUPTION: The customer shall be provided, whenever possible, notice in advance of probable interruption and the estimated duration of the interruption.

NON-INTERRUPTION FEE: Customers who do not interrupt within one hour following notice of a capacity deficiency interruption order shall be billed at the cost of replacement energy plus 1.00¢ per kWh during the time of interruption plus the applicable voltage level charge, but not less than the normal D8 rate. Voltage level charges for service other than transmission voltage are:
0.15¢ per kWh at the distribution level.
0.05¢ per kWh at the subtransmission level.

NON-INTERRUPTION PENALTY: A customer who does not interrupt within one hour following a system integrity interruption order shall be billed at the rate of \$50 per kW for the highest 30-minute kW demand created during the interruption period for all usage above the customer's firm demand, in addition to the prescribed monthly rate. In addition, the interruptible contract capacity of a customer who does not interrupt within one hour following notice shall be immediately reduced by the amount by which the customer failed to interrupt, unless the customer demonstrates that failure to interrupt was beyond its control.

Issued: January 27, 1994
By: L. G. Garberding
Executive Vice President
and Chief Financial Officer
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on
and after January 22, 1994 under
authority of order of the Michigan
Public Service Commission dated
January 21, 1994 in Case U-10102

INTERRUPTIBLE SUPPLY RATE

AVAILABILITY OF SERVICE: Available to customers desiring separately metered service at primary voltage who contract for a specified quantity of demonstrated interruptible load of not less than 50 kilowatts at a single location.

Contracted interruptible capacity on this rate is limited to 135 megawatts in 1989. For the years 1990, 1991, 1992, and 1993 the limit on contracted interruptible capacity shall be increased each year by 5 megawatts or one half of the growth in the Company's temperature adjusted annual peak demand, whichever is less.

HOURS OF INTERRUPTION: All electric power delivered hereunder shall be subject to curtailment on order of the Company. The power shall not be interrupted for more than 8 hours in a day, nor more than 500 hours in a calendar year. Customers may be ordered to interrupt only when the Company finds it necessary to do so either to maintain system integrity or when the existence of such loads shall lead to emergency purchases by the utility. A system integrity interruption order may be given by the Company when the failure to interrupt will contribute to the implementation of the rules for emergency electrical procedures under Rule B-3.7. An emergency purchase interruption order may be given by the Company when available system generation is insufficient to meet anticipated system load.

NOTICE OF INTERRUPTION: The customer shall be provided, whenever possible, notice in advance of probable interruption and the estimated duration of the interruption. The customers may be ordered to interrupt when the Company reasonably anticipates that it will, within one hour, be unable to maintain system integrity or be required to make an emergency purchase.

NON-INTERRUPTION FEE: Through December 31, 1993, customers who do not interrupt within one hour following notice of an emergency purchase interruption order shall be billed at the cost of replacement energy plus 1.00¢ per kWh during the time of interruption plus the applicable voltage level charge, but not less than the normal D8 rate. Voltage level charges for service other than transmission voltage are:

0.15¢ per kWh at the distribution level.

0.05¢ per kWh at the subtransmission level.

After December 31, 1993, customers who do not interrupt within one hour following notice of an emergency purchase interruption order shall be billed at the rate of \$20 per kW for the highest 30-minute kW demand created during the interruption period for all usage above the customer's firm demand in addition to the prescribed monthly rate.

NON-INTERRUPTION PENALTY: A customer who does not interrupt within one hour following a system integrity interruption order shall be billed at the rate of \$50 per kW for the highest 30-minute kW demand created during the interruption period for all usage above the customer's firm demand, in addition to the prescribed monthly rate.

In addition, the interruptible contract capacity of a customer who does not interrupt within one hour following notice shall be immediately reduced by the amount by which the customer failed to interrupt, unless the customer demonstrates that failure to interrupt was beyond its control.

REMOVED BY
Effective on service rendered on
and after January 1, 1989, under
authority of Order of the Michigan
Public Service Commission dated
December 27, 1988 in Case U-8789.

INTERRUPTIBLE SUPPLY RATE

AVAILABILITY OF SERVICE: Available in association with:

Primary Supply Rate D6
Bulk Power Supply Rate D7

To customers desiring separately metered service at primary voltage who contract for a specified capacity of not less than 50 kilowatts of interruptible power at a single location. Service is available only to the extent that there exists sufficient reserve margin in the Detroit Edison production system.

HOURS OF INTERRUPTION: All electric power delivered hereunder shall be subject to curtailment at the option of the Company. The power shall not be interrupted for more than 8 hours in a day, nor more than 500 hours in a calendar year.

Customers shall be interrupted only when either the Company finds it necessary to do so in order to maintain the system integrity, or when the existence of such loads shall lead to emergency purchase by the utility. The customer shall be provided whenever possible, notice in advance of probable interruption and estimated duration of the interruption. Failure by a customer to comply with an interruption order of the Company shall be considered as unauthorized use and billed at the rate of \$20 per kW for the highest 30-minute kW demand created during the interruption period, in addition to the prescribed monthly rate.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet maximum interruptible requirements, but not less than 50 kilowatts. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The interruptible contract capacity shall not include any firm power capacity, except under Product Protection Provision.

RATE PER MONTH:

Service Charge:

\$239.00 per customer per month.

Demand Charge:

\$4.34 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

SUBSTATION CREDIT: Available to customers where service at subtransmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

BASE RATE REDUCTION: A credit of 3.227% applied to the base bill.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

(Continued on next sheet)

M/118

Issued: March 1, 2002

By: H. L. Dow III

Senior Vice President

Strategic Planning and Development

2000 Second Avenue

Detroit, Michigan 48226

Effective for bills rendered on and after March 1, 2002 under authority of order of the Michigan Public Service Commission in Case No. U-12478 dated February 6, 2002.

(To reflect reduction of energy charges due to implementation of securitization charges.)

INTERRUPTIBLE SUPPLY RATE--Continued

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet maximum interruptible requirements, but not less than 50 kilowatts. Any single reading of the demand meter in any month that exceeds the contract capacity then in effect shall become the new contract capacity. The interruptible contract capacity shall not include any firm power capacity, except under Product Protection Provision.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month.

Demand Charges:

\$10.18 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charges:

2.49¢ per kWh for all on-peak kWh

2.19¢ per kWh for all off-peak kWh

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at subtransmission level

SUBSTATION CREDIT: Available to customers where service at subtransmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

BASE RATE REDUCTION: A credit of 3.227% applied to the base bill.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the average of the four weekly highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period. The weekly billing demand is the highest of the daily demands established on seven-day intervals commencing with the first day of the billing period. (The period after the first 21 days of each month is considered to be the fourth week.) In no event will the monthly on-peak billing demand be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50 kilowatts.

MINIMUM CHARGE: The Service Charge plus the billing demand charge.

ON-PEAK HOURS: See Schedule Designation B-4.4.

PRODUCT PROTECTION PROVISION: A customer on rate D8 may elect to contract for a minimum load during the period of interruption to protect his product or process. This minimum load called "product protection load" shall not exceed 10% of the total contracted interruptible load and shall be charged a monthly demand charge per kW of product protection contract capacity equal to the kW demand charges for the associated firm rate including on-peak demand charges and maximum demand charges as applicable. The 10% limitation may be increased to 25% in special situation.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factors less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for power factors below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The power factor clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

Issued: January 26, 1988
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after January 24, 1988, under authority of order of the Michigan Public Service Commission dated January 12, 1988 in Case U-7660.

INTERRUPTIBLE SUPPLY RATE—Continued

Energy Charges:
4.50¢ per kWh for all on-peak kWh
3.80¢ per kWh for all off-peak kWh
Voltage Level Discount:
.15¢ per kWh at transmission level
.10¢ per kWh at subtransmission level

SURCHARGE ADJUSTMENT: .0284¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.155¢ per kWh for all kWh.

SUBSTATION CREDIT: Available to customers where service at subtransmission voltage level (24 to 41.6 kV) or higher is required, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of \$.30 per kW of maximum demand shall be applied to the maximum demand charge. A credit of .040¢ per kWh shall be applied to the energy charge where the service is metered on the primary side of the transformer.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the average of the four weekly highest 30-minute integrated readings of the demand meter during the on-peak hours of the billing period. The weekly billing demand is the highest of the daily demands established on seven-day intervals commencing with the first day of the billing period. (The period after the first 21 days of each month is considered to be the fourth week.) In no event will the monthly on-peak billing demand be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50 kilowatts.

MINIMUM CHARGE: The Service Charge plus the billing demand charge.

ON-PEAK HOURS: See Schedule Designation B-4.4.

PRODUCT PROTECTION PROVISION: A customer on rate D8 may elect to contract for a minimum load during the period of interruption to protect his product or process. This minimum load called "product protection load" shall not exceed 10% of the total contracted interruptible load and shall be charged a monthly demand charge per kW of product protection contract capacity equal to the kW demand charges for the associated firm rate including on-peak demand charges and maximum demand charges as applicable. The 10% limitation may be increased to 25% in special situation.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factors less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for power factors below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The power factor clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

INTERRUPTIBLE SUPPLY RATE--Continued

DEFINITION OF CUSTOMER VOLTAGE LEVEL: See Schedule Designation B-4.7.

MONTHLY ON-PEAK BILLING DEMAND: The monthly on-peak billing demand shall be the single highest 30-minute integrated reading of the demand meter during the on-peak hours of the billing period. In no event will the monthly on-peak billing demand be less than 65% of the highest monthly on-peak metered billing demand during the billing months of June, July, August, September, and October of the preceding eleven billing months, nor less than 50 kilowatts.

MINIMUM CHARGE: All demand charges plus the service charge.

ON-PEAK HOURS: See Schedule Designation B-4.4.

PRODUCT PROTECTION PROVISION: A customer on rate D8 may elect to contract for a minimum load during the period of interruption to protect his product or process. This minimum load called "product protection load" shall not exceed 10% of the total contracted interruptible load and shall be charged a monthly demand charge per kW of product protection contract capacity equal to the kW demand charges for the primary supply rate (D6) including on-peak demand charges and maximum demand charges as applicable. The 10% limitation may be increased to 25% in special situations.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Any power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for power factors below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The power factor clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in load. The increase of contract capacity may be limited if, in the opinion of the Company, additional interruptible capacity is not available.

Customer-owned equipment must be operated so that voltage fluctuations on the electrical system of the Company shall not exceed permissible limits.

The customer will own and maintain the necessary switching equipment to separate the interruptible load from the firm power load. The interruptible load shall not be served from the firm power source at any time. The switching equipment must meet the Company standards. The customer must provide space for the separate metering of the interruptible load.

CONTRACT TERM: The contract term is five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year.

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

INTERRUPTIBLE SUPPLY RATE—Continued

SPECIAL TERMS AND CONDITIONS: The contract capacity however established shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in load. The increase of contract capacity may be limited if, in the opinion of the Company, additional interruptible capacity is not available.

Customer-owned equipment must be operated so that voltage fluctuations on the electrical system of the Company shall not exceed permissible limits.

The customer will own and maintain the necessary switching equipment to separate the interruptible load from the firm power load. The interruptible load shall not be served from the firm power source at any time. The switching equipment must meet the Company standards. The customer must provide space for the separate metering of the interruptible load.

CONTRACT TERM: The contract term is five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months' written notice by either party, which may be given at any time after the end of the fourth year.

M/119a

Issued: January 1, 1989
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on
and after January 1, 1989, under
authority of order of the Michigan
Public Service Commission dated
December 27, 1988 in Case U-8789.

ECONOMIC REDEVELOPMENT RATE
(EXPERIMENTAL)

AVAILABILITY OF SERVICE: To manufacturing customers desiring interruptible service in excess of load levels currently served on-peak or separately metered interruptible service for loads not presently served. Load not presently served is defined as the load associated with equipment that construction was not started on or before October 1, 1983. Service is available to those customers with a single high 30-minute integrated demand of 5,000 kilowatts or greater on a firm rate schedule or its associated riders, and a minimum of 1,000 kilowatts of additional connected load served on this interruptible rate.

HOURS OF INTERRUPTION: All electric power delivered hereunder shall be subject to curtailment at the option of the Company. The customer shall be interrupted if the Company finds it necessary to do so in order to maintain system integrity or when the marginal energy cost of internally generated power or the cost of replacement power needed to serve Company firm load levels equals or exceeds 4.05¢ per kilowatthour.

The customer shall be provided whenever possible, notice in advance of probable interruption and estimated duration of the interruption. The customer may avoid interruption for economic purposes only and not for emergency interruptions. The customer will be billed for energy at the cost of replacement energy plus 1.00¢ per kWh during the time of interruption.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase served from the transmission or subtransmission system.

RATE PER MONTH:

Energy Charge:

4.46¢ per kWh for all separately metered kilowatthours or for all kilowatthours consumed in excess of the contracted base load level.

NUCLEAR DECOMMISSIONING SURCHARGE: .00622¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.106¢ per kWh for all kWh.

SUBSTATION CREDIT: Available to customers served at subtransmission voltage (24 to 41.6 kV) or higher, who provide the on-site substation including all necessary transforming, controlling and protective equipment. A credit of 0.3¢/kWh will be applied to the energy use associated with the first 100 hours use of the monthly 30 minute high integrated demand.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of "maximum demand".

For service at transmission voltage level (120 kV and above) \$1.80 per kW of "maximum demand".

authority of Order of the Michigan
Public Service Commission dated
December 27, 1988 in Case U-8789.

ECONOMIC REDEVELOPMENT RATE (continued)
(EXPERIMENTAL)

The maximum demand shall be the highest 30-minute demand created during the previous 12 months for the demand in excess of the base load maximum demand. For separately metered use, the maximum demand shall be the highest 30-minute reading of the demand meter during the preceding 12 months including the current month, but not less than 5,000 kW.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factors less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for power factors below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the minimum billing, but will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS:

The contracted base load level where excess load levels are not separately metered will be determined jointly by the Company and customer through an analysis of the most recent 12 months billing history or through an analysis of the customers connected load. The contracted base load level shall include a designated on-peak billing demand, maximum demand (when applicable), on-peak and off-peak kilowatthours and power factor. The on-peak billing demand used in determining the contracted base load will be the highest on-peak billing demand established in the previous twelve months. Exceptions may be made where unusual circumstances occur, such as, where equipment which affected the on-peak billing demand was removed during the 12-month period.

Customer-owned equipment must be operated so that voltage fluctuations on the electrical system of the Company shall not exceed permissible limits.

For separately metered loads the customer will own and maintain the necessary switching equipment to separate the interruptible load from the firm power load. The interruptible load shall not be served from the firm power source at any time. The switching equipment must meet the Company standards. The customer must provide space for the separate metering of the interruptible load as required.

The contracted base load level shall not be decreased during the term of the contract unless there is a specific reduction in connected load. The contracted base load level may be increased if the customer transfers existing load from an associated contract rider or tariff.

CONTRACT TERM: This tariff will be available until May 1, 1986. The rate has a guaranteed availability not to exceed three years after actually obtaining service under the rate. Additional load added and not already served on this rate may be contracted for, and have a guaranteed availability not to exceed three years, providing the contract for this additional load is signed prior to May 1, 1986.

Rate Schedule No. D9

Outdoor Protective Lighting

AVAILABILITY OF SERVICE: Customers desiring controlled service for outdoor protective lighting on premises where the customer is presently taking electric service under a standard metered rate schedule. This service is limited to not more than eight (8) units installed on not more than four (4) new or existing poles.

HOURS OF SERVICE: Dusk to dawn service controlled by photo-sensitive devices which provide service every night and all night for approximately 4200 hours per year.

KIND OF SERVICE: Multiple lighting from overhead lines. The Company will own, operate and maintain the lights. Burned out lights must be reported by the customer and the Company will undertake to replace the lights as soon as possible during regular working hours.

RATES: As shown on Sheet No. D9a and D9b.

BILLING: Billing will be on a monthly basis using the annual rate divided by twelve and rounded to the nearest cent.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

CONTRACT TERM: Contracts for overhead service will be taken for a minimum of two years, except that where more than two lights are installed or special purpose facilities are required, the contract term may be extended up to five years. Contracts for underground service were taken for a minimum of five years. Conversion and/or relocation of existing lighting facilities must be paid for by the customer, except where initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

SPECIAL TERMS AND CONDITIONS: Outdoor protective lighting is intended primarily for installations served from existing secondary facilities. All lights will be installed so as to overhang private property at locations satisfactory to the customer and the Company. However, exceptions can be made for floodlight installations to overhang public property where practical.

The stated charges for underground service on Sheet No. D9b cover the ordinary trenching for cable extensions under normal soil conditions in cleared areas.

AVAILABILITY OF SERVICE: Customers desiring controlled service for outdoor protective lighting on premises where the customer is presently taking electric service under a standard metered rate schedule. This service is limited to not more than eight (8) units installed on not more than four (4) new or existing poles.

HOURS OF SERVICE: Dusk to dawn service controlled by photo-sensitive devices which provide service every night and all night for approximately 4200 hours per year.

KIND OF SERVICE: Multiple lighting from overhead lines. The Company will own, operate and maintain the lights. Burned out lights must be reported by the customer and the Company will undertake to replace the lights as soon as possible during regular working hours.

RATES: As shown on Sheet No. D9a and D9b.

BILLING: Billing will be on a monthly basis using the annual rate divided by twelve and rounded to the nearest cent.

BASE RATE REDUCTION: A credit of 3.227% applied to the base bill.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

CONTRACT TERM: Contracts for overhead service will be taken for a minimum of two years, except that where more than two lights are installed or special purpose facilities are required, the contract term may be extended up to five years. Contracts for underground service were taken for a minimum of five years. Conversion and/or relocation of existing lighting facilities must be paid for by the customer, except where initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

SPECIAL TERMS AND CONDITIONS: Outdoor protective lighting is intended primarily for installations served from existing secondary facilities. All lights will be installed so as to overhang private property at locations satisfactory to the customer and the Company. However, exceptions can be made for floodlight installations to overhang public property where practical.

The stated charges for underground service on Sheet No. D9b cover the ordinary trenching for cable extensions under normal soil conditions in cleared areas.

Rate Schedule No. D9 (Continued)

Outdoor Protective Lighting

- (1) Special purpose facilities are considered to be line or cable extensions, transformers, and any additional poles without lights, excluding facilities provided under stated charges on Sheet No. D9a. Where special purpose facilities are required, a service charge of 18% per year on the investment in such facilities will be billed in installments as an addition to the regular rate for each light. In the event the customer discontinues service before the end of the contract term, the established rate as well as the service charge on special purpose facilities for the remaining portion of the contract term shall immediately become due and payable. This provision was closed to new installations as of January 22, 1994.
- (2) For new installations after January 22, 1994, which require investment in excess of three times the annual revenue, this rate is available only to customers who make a contribution in aid of construction equal to the amount by which the investment exceeds three times the annual revenue at the prevailing rate at the time of installation.

RATES: All-night service.

Nominal Lamp Size Watts	Type of Service	Charge per Lamp per Year
	Overhead Protective Lighting Service Existing Pole and Existing Secondary Facilities	
175	Mercury Vapor	<u>\$129.12</u>
250*	Mercury Vapor	<u>\$151.20</u>

authority of order of the Michigan
Public Service Commission dated
December 19, 1991 in Case U-8789.

OUTDOOR PROTECTIVE LIGHTING—Continued

Special purpose facilities are considered to be line or cable extensions, transformers, and any additional poles without lights, excluding facilities provided under stated charges on Sheet No. D9a. Where special purpose facilities are required, a service charge of 18% per year on the investment in such facilities will be billed in installments as an addition to the regular rate for each light. In the event the customer discontinues service before the end of the contract term, the established rate as well as the service charge on special purpose facilities for the remaining portion of the contract term shall immediately become due and payable.

RATES: All-night service.

Effective on service rendered on
and after July 23, 1981 under
authority of Order of the Michigan
Public Service Commission dated
July 21, 1981 in Case U-6488.

Rate Schedule No. D10

All-Electric School Building Service Rate

AVAILABILITY OF SERVICE: Available to customers desiring service in school buildings served at primary voltage who contract for a specified installed capacity of not less than 50 kilowatts at a single location provided the space heating and water heating for all or a substantial portion of the premises is supplied by electric service and is installed on a permanent basis.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800 or 13,200 volts at the option of the Company.

RATE PER MONTH:

Service Charge:
\$108.00 per customer per month, plus

Energy Charge:
7.869¢ per kWh for all kWh, except that during the billing months of November through May, usage shall be billed at 6.199¢ per kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factors of less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve the power factor. At the company's option, a penalty will be applied to the total amount of the monthly billing for electric energy when the power factor is below 85% lagging, in accordance with the table in Power Factor Determination, Schedule Designation B-4.5.

SPECIAL TERMS AND CONDITIONS: Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

At the option of the Company where service to a large school complex, as a matter of design, primary voltage is furnished with Company owned transformers at remote locations fed by customer owned primary cables, the account can be billed on a secondary rate though metered at one central primary voltage location at or near the termination of the utility-owned cables.

\$108.00 per customer per month, plus

Energy Charge:

8.626¢ per kWh for all kWh, except that during the billing months of November through May, usage shall be billed at 6.956¢ per kWh.

BASE RATE REDUCTION: A credit of 3.227% applied to the base bill.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges, excluding the Rate Increase Surcharge.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factors of less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve the power factor. At the company's option, a penalty will be applied to the total amount of the monthly billing for electric energy when the power factor is below 85% lagging, in accordance with the table in Power Factor Determination, Schedule Designation B-4.5.

SPECIAL TERMS AND CONDITIONS: Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

At the option of the Company where service to a large school complex, as a matter of design, primary voltage is furnished with Company owned transformers at remote locations fed by customer owned primary cables, the account can be billed on a secondary rate though metered at one central primary voltage location at or near the termination of the utility-owned cables.

ALL-ELECTRIC SCHOOL BUILDING SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service in school buildings served at primary voltage who contract for a specified installed capacity of not less than 50 kilowatts at a single location provided the space heating and water heating for all or a substantial portion of the premises is supplied by electric service and is installed on a permanent basis.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800 or 13,200 volts at the option of the Company.

RATE PER MONTH:

Service Charge:

\$108.00 per customer per month, plus

Energy Charge:

8.626¢ per kWh for all kWh, except that during the billing months of November through May, usage shall be billed at 6.956¢ per kWh.

BASE RATE REDUCTION: A credit of 3.227% applied to the base bill.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

5% SECURITIZATION REDUCTION: A credit of 5% applied to the base bill and surcharges.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800 or 13,200 volts at the option of the Company.

RATE PER MONTH:

Service Charge:

\$95.00 per customer per month, plus

Energy Charge:

8.34¢ per kWh for all kWh, except that during the billing months of November through May, usage shall be billed at 7.64¢ per kWh.

NUCLEAR DECOMMISSION SURCHARGE: .00854¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: The Service Charge.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. At the Company's option, a penalty will be applied to the total amount of the monthly billing for electric energy for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5.

SPECIAL TERMS AND CONDITIONS: Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

At the option of the Company where service to a large school complex, as a matter of design, primary voltage is furnished with Company owned transformers at remote locations fed by customer owned primary cables, the account can be billed on a secondary rate though metered at one central primary voltage location at or near the termination of the utility-owned cables.

ALL-ELECTRIC SCHOOL BUILDING SERVICE RATE

AVAILABILITY OF SERVICE: Available to customers desiring service in school buildings served at primary voltage who contract for a specified installed capacity of not less than 50 kilowatts at a single location provided the space heating and water heating for all or a substantial portion of the premises is supplied by electric service and is installed on a permanent basis.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800 or 13,200 volts at the option of the Company.

RATE PER MONTH:

Service Charge:

\$88.00 per customer per month, plus

Energy Charge:

8.55¢ per kWh for all kWh, except that during the billing months of November through May, usage shall be billed at 7.83¢ per kWh.

SURCHARGE ADJUSTMENT: .0331¢ per kWh for all kWh.

NUCLEAR DECOMMISSIONING SURCHARGE: .00854¢ per kWh for all kWh.

1986 TAX REFORM ACT SURCHARGE: -.185¢ per kWh for all kWh.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

ALL-ELECTRIC SCHOOL BUILDING SERVICE RATE - Continued

At the option of the Company, service may be supplied at the primary voltage and metered at a secondary voltage when the customer transfers from a secondary rate. For loads metered at a secondary voltage (less than 600V), all measured quantities shall be increased by 2%.

CONTRACT TERM: For new primary installations over 1000 kW the term is for not less than five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months written notice by either party, which may be given at any time after the end of the fourth year. For new primary installations of 1000 kW or less and for new customers at existing installations, the term is for one year which under special circumstances may be increased or reduced at the discretion of the Company, extending thereafter from month-to-month until terminated by mutual consent or on one month written notice by either party. Where special services are required, the term will be as specified in the applicable contract rider.

Rate Schedule No. E1

Municipal Street Lighting Rate
(High Intensity Discharge Lamp Service)

AVAILABILITY OF SERVICE: Available to governmental agencies desiring controlled nighttime service for street lighting, for public thoroughfares, public parking lots and other public areas. Mercury Vapor service listed hereunder is not available for new business, except for limited additions to existing systems, but will be continued for customers taking said service as of July 23, 1981.

HOURS OF SERVICE: For circuits controlled by photo-sensitive devices, the street lights are burning at all times when the general level of illumination is lower than about 3/4 of a footcandle.

KIND OF SERVICE: Multiple or series street lighting at the option of the Company from overhead lines or underground circuits.

The Company presently has three (3) street lighting rate options available to municipalities. They are: (I) A Company owned system, (II) A municipally owned and Company maintained system, (III) A municipally owned and maintained system.

OPTION I

The Company will clean, inspect, operate and maintain street lighting equipment and furnish lamp replacements.

OPTION II

Where the street lighting system is owned by the municipality, but is maintained by the Company, the normal maintenance will consist of replacement of glassware and lamps. Major maintenance such as broken lamp posts, etc., must be paid for by the municipality. The street lighting system must be built to Company specifications.

OPTION III

Where the municipality owns and maintains the system, the Company's function will be confined solely to the supply of electricity.

RATES: As shown on Sheet No. E1a, E1b and E1c.

BILLING: Billing will be on a monthly basis using the annual rate divided by twelve and rounded to the nearest cent.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

CONTRACT TERM: Open order terminable on a thirty day written notice by either party. Any conversion, relocation and/or removal of existing street lighting facilities at the customer's request, including those removals necessitated by termination of service, must be paid for by the customer. The detailed provisions and schedule of charges, which may include the remaining value of the existing facilities, will be quoted upon request. The Company shall not withdraw service, and the municipality shall not substitute another source of service in whole or in part, without twelve months' written notice to the other party.

The Company will clean, inspect, operate and maintain street lighting equipment and furnish lamp replacements.

OPTION II

Where the street lighting system is owned by the municipality, but is maintained by the Company, the normal maintenance will consist of replacement of glassware and lamps. Major maintenance such as broken lamp posts, etc., must be paid for by the municipality. The street lighting system must be built to Company specifications.

OPTION III

Where the municipality owns and maintains the system, the Company's function will be confined solely to the supply of electricity.

RATES: As shown on Sheet No. E1a, E1b and E1c.

NUCLEAR DECOMMISSIONING SURCHARGE: .008% applicable to the total bill, net of taxes.

BILLING: Billing will be on a monthly basis using the annual rate divided by twelve and rounded to the nearest cent.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

CONTRACT TERM: Open order terminable on a thirty day written notice by either party. Any conversion, relocation and/or removal of existing street lighting facilities at the customer's request, including those removals necessitated by termination of service, must be paid for by the customer. The detailed provisions and schedule of charges, which may include the remaining value of the existing facilities, will be quoted upon request. The Company shall not withdraw service, and the municipality shall not substitute another source of service in whole or in part, without twelve months' written notice to the other party.

JAN 21 1994

Issued: January 1, 1989
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on
and after January 1, 1989, under
authority of order of the Michigan
Public Service Commission dated
December 27, 1988 in Case U-8789.

MUNICIPAL STREET LIGHTING RATE
(HIGH INTENSITY DISCHARGE LAMP SERVICE)

AVAILABILITY OF SERVICE: Available to governmental agencies desiring controlled nighttime service for street lighting, for public thoroughfares, public parking lots and other public areas. Mercury Vapor service listed hereunder is not available for new business, except for limited additions to existing systems, but will be continued for customers taking said service as of July 23, 1981.

HOURS OF SERVICE: For circuits controlled by photo-sensitive devices, the street lights are burning at all times when the general level of illumination is lower than about 3/4 of a footcandle.

KIND OF SERVICE: Multiple or series street lighting at the option of the Company from overhead lines or underground circuits.

The Company presently has three (3) street lighting rate options available to municipalities. They are: (I) A Company owned system, (II) A municipally owned and Company maintained system, (III) A municipally owned and maintained system.

OPTION I

The Company will clean, inspect, operate and maintain street lighting equipment and furnish lamp replacements.

OPTION II

Where the street lighting system is owned by the municipality, but is maintained by the Company, the normal maintenance will consist of replacement of glassware and lamps. Major maintenance such as broken lamp posts, etc., must be paid for by the municipality. The street lighting system must be built to Company specifications.

OPTION III

Where the municipality owns and maintains the system, the Company's function will be confined solely to the supply of electricity.

RATES: As shown on Sheet No. E1a, E1b and E1c.

SURCHARGE ADJUSTMENT: .448% applicable to the total bill, net of taxes.
(Belle River Appeal .44% and Nuclear Decommissioning .008%)

1986 TAX REFORM ACT SURCHARGE: -2.45% applicable to the total bill, net of taxes

BILLING: Billing will be on a monthly basis using the annual rate divided by twelve and rounded to the nearest cent.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

CONTRACT TERM: Open order terminable on a thirty day written notice by either party. Any conversion, relocation and/or removal of existing street lighting facilities at the customer's request, including those removals necessitated by termination of service, must be paid for by the customer. The detailed provisions and schedule of charges, which may include the remaining value of the existing facilities, will be quoted upon request. Rate Schedule No. E1 (Continued)

Municipal Street Lighting Rate

Option I: Company Owned Street Lighting System

Where new installations require an investment in excess of an investment allowance, Option I is available only to customers who make a contribution in aid of construction equal to the amount by which the investment ** exceeds three times the annual revenue at the prevailing rate at the time of installation.

As an alternative, where the required contribution exceeds \$10,000, upon agreement of the customer and the Company, the customer will pay an additional annual charge of 12% times the contribution amount in lieu of the cash contribution.

RATES: All-night service.
(Overhead Street Lighting Service)

<u>Nominal Lamp Size</u>	<u>Type of Service</u>	<u>Charge per Lamp per Year</u>
100 Watt*	Mercury Vapor	<u>\$105.96</u>
175 Watt	Mercury Vapor	<u>\$136.80</u>
250 Watt*	Mercury Vapor	<u>\$154.44</u>
400 Watt	Mercury Vapor	<u>\$206.28</u>
1,000 Watt	Mercury Vapor	<u>\$369.60</u>
70 Watt	High Pressure Sodium	<u>\$150.00</u>
100 Watt	High Pressure Sodium	<u>\$157.80</u>
250 Watt	High Pressure Sodium	<u>\$201.84</u>
360 or 400 Watt	High Pressure Sodium	<u>\$262.56</u>
1,000 Watt	High Pressure Sodium	<u>\$449.04</u>

Multiple Lamps on a Single Pole

For each additional luminaire added to the same pole,
reduce rate per lamp per year on the added luminaire \$11.04.

DE-ENERGIZED LIGHTS: Customers may elect to have any or all luminaires served under this rate disconnected. The charge per luminaire per year, payable in equal monthly installments, shall be 60% of the regular yearly rates. A \$15.00 charge per luminaire will be made at the time of reconnection.

DUSK TO MIDNIGHT SERVICE: For service to parking lots from dusk to approximately twelve o'clock midnight E.S.T., a discount of 1.06¢ per nominal lamp size wattage per month will be applied. One control per circuit will be provided.

*Not available for new business.

** Effective January 1, 1991, the investment amount will be limited to direct cost.
Effective January 1, 1992, the investment amount will include full cost.

(Continued From Sheet No. E1c)

Rate Schedule No. E1 (Continued)

Municipal Street Lighting Rate

Option III: Municipally Owned and Maintained Street Lighting System (Controlled/Metered)

AVAILABILITY OF SERVICE: Available to governmental agencies desiring controlled nighttime service for primary or secondary voltage energy-only street lighting service where the Company has existing distribution lines available for supplying energy for such service. Luminaires served under any of the Company's other street lighting rates shall not be intermixed with luminaires serviced under this street lighting rate. This rate is not available for resale purposes. Service is governed by the Company's Standard Rules and Regulations.

HOURS OF SERVICE: For circuits controlled by automatic timing devices, one-half hour after sunset until one-half hour before sunrise. For circuits controlled by photo-sensitive devices, the streetlights burn whenever the general level of illumination is less than approximately 3/4 footcandle. For dusk to midnight service, luminaires shall be controlled to turn off at approximately twelve o'clock midnight.

KIND OF SERVICE:

Secondary Voltage Service: Alternating current, 60 hertz, single-phase 120/240 nominal volt service for a minimum of ten luminaires located within a clearly defined area. Except for control equipment, the customer will furnish, install, own and maintain all equipment comprising the street lighting system up to the point of attachment with the Company's distribution system. The Company will connect the customer's equipment to the Company's lines and supply the energy for operation. All of the customer's equipment will be subject to the Company's review.

Primary Voltage Service: Alternating current, 60 hertz, single-phase or three-phase, primary voltage service for actual demands of not less than 100 kW at each point of delivery. The particular nature of the voltage shall be determined by the Company. The customer will furnish, install, own and maintain all equipment comprising the street lighting system, including control equipment, up to the point of attachment with the Company's distribution system. The Company will supply the energy for operation of the customer's street lighting system.

MONTHLY RATE:

Secondary Energy: The monthly charge shall be 3.932¢ per kWh based on the capacity requirements in kilowatts of the equipment assuming 4,200 burning hours per year, adjusted by the ratio of the monthly kWh consumption to the total annual kWh consumption. At the Company's option, service may be metered and the metered kWh will be the basis for billing. Capacity requirements of lighting equipment shall be determined by the Company from manufacturer specifications, but the Company maintains the right to test such capacity requirements from time to time. In the event that Company tests show capacity requirements other than those indicated in manufacturer specifications, the capacity requirements indicated by Company tests will be used. The customer shall not change the capacity requirements of its equipment without first notifying the Company in writing.

KIND OF SERVICE:

Secondary Voltage Service: Alternating current, 60 hertz, single-phase 120/240 nominal volt service for a minimum of ten luminaires located within a clearly defined area. Except for control equipment, the customer will furnish, install, own and maintain all equipment comprising the street lighting system up to the point of attachment with the Company's distribution system. The Company will connect the customer's equipment to the Company's lines and supply the energy for operation. All of the customer's equipment will be subject to the Company's review.

Primary Voltage Service: Alternating current, 60 hertz, single-phase or three-phase, primary voltage service for actual demands of not less than 100 kW at each point of delivery. The particular nature of the voltage shall be determined by the Company. The customer will furnish, install, own and maintain all equipment comprising the street lighting system, including control equipment, up to the point of attachment with the Company's distribution system. The Company will supply the energy for operation of the customer's street lighting system.

MONTHLY RATE:

Secondary Energy: The monthly charge shall be 4.85¢ per kWh based on the capacity requirements in kilowatts of the equipment assuming 4,200 burning hours per year, adjusted by the ratio of the monthly kWh consumption to the total annual kWh consumption. At the Company's option, service may be metered and the metered kWh will be the basis for billing. Capacity requirements of lighting equipment shall be determined by the Company from manufacturer specifications, but the Company maintains the right to test such capacity requirements from time to time. In the event that Company tests show capacity requirements other than those indicated in manufacturer specifications, the capacity requirements indicated by Company tests will be used. The customer shall not change the capacity requirements of its equipment without first notifying the Company in writing.

ENERGY-ONLY MUNICIPAL STREET LIGHTING RATE--Continued

AVAILABILITY OF SERVICE: Available to governmental agencies desiring controlled nighttime service for primary or secondary voltage energy-only street lighting service where the Company has existing distribution lines available for supplying energy for such service. Luminaires served under any of the Company's other street lighting rates shall not be intermixed with luminaires serviced under this street lighting rate. This rate is not available for resale purposes. Service is governed by the Company's Standard Rules and Regulations.

HOURS OF SERVICE: For circuits controlled by automatic timing devices, one-half hour after sunset until one-half hour before sunrise. For circuits controlled by photo-sensitive devices, the streetlights burn whenever the general level of illumination is less than approximately 3/4 footcandle. For dusk to midnight service, luminaires shall be controlled to turn off at approximately twelve o'clock midnight.

KIND OF SERVICE:

Secondary Voltage Service: Alternating current, 60 hertz, single-phase 120/240 nominal volt service for a minimum of ten luminaires located within a clearly defined area. Except for control equipment, the customer will furnish, install, own and maintain all equipment comprising the street lighting system up to the point of attachment with the Company's distribution system. The Company will connect the customer's equipment to the Company's lines and supply the energy for operation. All of the customer's equipment will be subject to the Company's review.

Primary Voltage Service: Alternating current, 60 hertz, single-phase or three-phase, primary voltage service for actual demands of not less than 100 kW at each point of delivery. The particular nature of the voltage shall be determined by the Company. The customer will furnish, install, own and maintain all equipment comprising the street lighting system, including control equipment, up to the point of attachment with the Company's distribution system. The Company will supply the energy for operation of the customer's street lighting system.

MONTHLY RATE:

Secondary Energy: The monthly charge shall be 5.22¢ per kWh based on the capacity requirements in kilowatts of the equipment assuming 4,200 burning hours per year, adjusted by the ratio of the monthly kWh consumption to the total annual kWh consumption. At the Company's option, service may be metered and the metered kWh will be the basis for billing. Capacity requirements of lighting equipment shall be determined by the Company from manufacturer specifications, but the Company maintains the right to test such capacity requirements from time to time. Rate Schedule No. E2

Traffic and Signal Lights

AVAILABILITY OF SERVICE: Available to municipalities or other public authorities, hereinafter referred to as customer, operating lights for traffic regulation or signal lights on streets, highways, airports or water routes, as distinguished from street lighting.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, at 120 volts two-wire.

SERVICE CONNECTIONS: The customer is to furnish and maintain all necessary wiring and equipment, including lamps and lamp replacements, or reimburse the Company therefore, except that the Company will furnish, install and maintain such span poles and messenger cable as may be needed to support the traffic or signal lights of the overhead type. Connections are to be brought to the Company's underground and overhead lighting mains by the customer as directed by the Company, and the final connection to the Company's main is to be made by the Company.

Conversion and/or relocation of existing facilities must be paid for by the customer, except when initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

RATES: 3.02¢ per month per watt of the total connected traffic light or signal light load in service for each customer.

Total connected wattage will be reckoned as of the fifteenth of the month. Lamps removed from service before the fifteenth or placed in service on or after the fifteenth will be omitted from the reckoning; conversely, lamps placed in service on or before the fifteenth of the month or removed from service after the fifteenth of the month will be reckoned for a full month. Lamps operated cyclically, on and off, will be reckoned at one-half wattage and billed for a full month. No such reduction of reckoned wattage will be allowed for lamps in service but turned off during certain hours of the day.

The Company may, at its option, install meters and apply a standard metered rate schedule applicable to the service.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: \$3.00 per customer per month.

CONTRACT TERM: Open order on a month-to-month basis. However, the Company shall not withdraw service, and the customer shall not substitute another source of service in whole or in part, without twelve months' written notice to the other party.

DATE 4-7-04

M/127

Issued: April 6, 2001
By: L.G. Garberding
Executive Vice President
and Chief Financial Officer
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on and after April 14, 2001 under authority of order of the Michigan Public Service Commission in Case U-12478 dated November 2, 2000.

TRAFFIC AND SIGNAL LIGHTS

AVAILABILITY OF SERVICE: Available to municipalities or other public authorities, hereinafter referred to as customer, operating lights for traffic regulation or signal lights on streets, highways, airports or water routes, as distinguished from street lighting.

HOURS OF SERVICE: 24 hours.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, at 120 volts two-wire.

SERVICE CONNECTIONS: The customer is to furnish and maintain all necessary wiring and equipment, including lamps and lamp replacements, or reimburse the Company therefore, except that the Company will furnish, install and maintain such span poles and messenger cable as *may be needed* to support the traffic or signal lights of the overhead type. Connections are to be brought to the Company's underground and overhead lighting mains by the customer as directed by the Company, and the final connection to the Company's main is to be made by the Company.

Conversion and/or relocation of existing facilities must be paid for by the customer, except when initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

RATES: 3.29¢ per month per watt of the total connected traffic light or signal light load in service for each customer.

Total connected wattage will be reckoned as of the fifteenth of the month. Lamps removed from service before the fifteenth or placed in service on or after the fifteenth will be omitted from the reckoning; conversely, lamps placed in service on or before the fifteenth of the month or removed from service after the fifteenth of the month will be reckoned for a full month. Lamps operated cyclically, on and off, will be reckoned at one-half wattage and billed for a full month. No such reduction of reckoned wattage will be allowed for lamps in service but turned off during certain hours of the day.

The Company may, at its option, install meters and apply a standard metered rate schedule applicable to the service.

BASE RATE REDUCTION: A credit of 3.227% applied to the base bill.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: \$3.00 per customer per month.

CONTRACT TERM: Open order on a month-to-month basis. However, the Company shall not withdraw service, and the customer shall not substitute another source of service in whole or in part, without twelve months' written notice to the other party.

CURRENT, PHASE AND VOLTAGE: Alternating current, single-phase, at 120 volts two-wire.

SERVICE CONNECTIONS: The customer is to furnish and maintain all necessary wiring and equipment, including lamps and lamp replacements, or reimburse the Company therefore, except that, the Company will furnish, install and maintain such span poles and messenger cable as may be needed to support the traffic or signal lights of the overhead type. Connections are to be brought to the Company's underground or overhead lighting mains by the customer as directed by the Company, and the final connection to the Company's main is to be made by the Company.

Conversion and/or relocation of existing facilities must be paid for by the customer, except when initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

RATE: 2.52¢ per month per watt of the total connected traffic light or signal light load in service for each customer.

Total connected wattage will be reckoned as of the fifteenth of the month. Lamps removed from service before the fifteenth or placed in service on or after the fifteenth will be omitted from the reckoning; conversely, lamps placed in service on or before the fifteenth of the month or removed from service after the fifteenth of the month will be reckoned for a full month. Lamps operated cyclically, on and off, will be reckoned at one-half wattage and billed for a full month. No such reduction of reckoned wattage will be allowed for lamps in service but turned off during certain hours of the day.

The Company may, at its option, install meters and apply a standard metered rate schedule applicable to the service.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

MINIMUM CHARGE: \$1.55 per customer per month.

CONTRACT TERM: Open order on a month-to-month basis. However, the Company shall not withdraw service, and the customer shall not substitute another source of service in whole or in part, without twelve months' written notice to the other party.

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

MUNICIPAL STREET LIGHTING RATE
(Incandescent Service)

AVAILABILITY OF SERVICE: Available to governmental agencies desiring controlled night-time service for street lighting, for public thoroughfares, public parking lots and other public areas. The incandescent service listed hereunder is not available for new business, or for additions to existing systems. Customers presently taking said service as of January 4, 1971 may continue; however, service under Options I or II will no longer be available as of January 1, 1987. At the customer's request, the Company will change said incandescent service to high pressure-sodium service.

HOURS OF SERVICE: For circuits controlled by automatic timing devices, one-half hour after sunset until one-half hour before sunrise; for circuits controlled by photo-sensitive devices, the street lights are burning at all times when general level of illumination is lower than about 3/4 of a footcandle. The hours of service under the two methods of control are substantially the same.

KINDS OF SERVICE: Multiple or series street lighting at the option of the Company from overhead lines or underground circuits.

The Company presently has three (3) street lighting rate options available to municipalities. They are: (I) A Company owned system, (II) A municipally owned and Company maintained system, and (III) A municipally owned and maintained system.

OPTION I

The Company will clean, inspect, operate and maintain street lighting equipment and furnish lamp replacements.

Relocation of existing street lighting facilities must be paid for by the customer, except when initiated by the Company. The detailed provisions and schedule of such charges will be quoted upon request.

OPTION II

Where the street lighting system is owned by the municipality, but is maintained by the Company, the normal maintenance will consist of replacement of glassware and lamps. Major maintenance such as broken lamp posts, etc. must be paid for by the municipality. The street lighting system must be built to Company specifications.

OPTION III

Where the municipality owns and maintains the system, the Company's function will be confined solely to the supply of electricity.

RATES: As shown on Sheet No. E3a, E3b, and E3c.

SURCHARGE ADJUSTMENT: .44% Applicable to the total bill, net of taxes.

BILLING: Billing will be on a monthly basis using the annual rate divided by twelve and rounded to the nearest cent.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

add to rate per year. \$19.80

For Semi-Ornamental Systems which employ Ornamental Post Units served
from overhead conductors, where such construction is practical, reduce
rate per year \$21.00

For each additional luminaire added to the same pole, reduce the rate per
year on the added luminaire.

Ornamental.	\$96.00
Ornamental-Lamp Spacing over 120 feet	\$115.80
Semi-Ornamental	\$75.00

DE-ENERGIZED LIGHTS: Customers may elect to have any or all luminaires served under this rate
disconnected. The charge per luminaire per year, payable in equal monthly installments,
shall be 60% of the yearly rates set forth above. A \$12.00 charge per luminaire will be
made at the time of reconnection.

Rate Schedule No. E4

Primary Pumping Rate

AVAILABILITY OF SERVICE: Available to government agencies desiring service at primary voltage for pumping and who contract for a specified capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts, at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any billing demand in any month that exceeds the contract capacity then in effect shall become the new contract capacity.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month, plus

Demand Charges:

\$11.48 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

3.021¢ per kWh for all on-peak kWh

2.721¢ per kWh for all off-peak kWh

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at subtransmission level

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month, plus

Demand Charges:

\$14.21 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

For service at subtransmission voltage level (24 to 41.6 kV) \$2.65 per kW of maximum demand.

For service at transmission voltage level (120 kV and above) \$1.80 per kW of maximum demand.

The maximum demand shall be the highest 30-minute demand created during the previous 12 billing months, including the current month but not less than 50% of contract capacity. This clause is applicable to each voltage level served.

Energy Charge:

3.55¢ per kWh for all on-peak kWh

3.25¢ per kWh for all off-peak kWh

Voltage Level Discount:

.15¢ per kWh at transmission level

.10¢ per kWh at subtransmission level

BASE RATE REDUCTION: A credit of 2.787% applied to the base bill.

POWER SUPPLY COST RECOVERY FACTOR: The Energy Charge in the above rate is subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

Public Service Commission in Case
U-11726 dated December 28, 1998

PRIMARY PUMPING RATE

AVAILABILITY OF SERVICE: Available to government agencies desiring service at primary voltage for pumping and who contract for a specified capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts, at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any billing demand in any month that exceeds the contract capacity then in effect shall become the new contract capacity.

RATE PER MONTH:

Service Charge:

\$275.00 per customer per month, plus

Demand Charges:

\$14.21 per kW for on-peak billing demand, plus:

For primary service (less than 24 kV) \$3.75 per kW of maximum demand.

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 31, 1982 under authority of Order of the Michigan Public Service Commission dated July 30, 1982 in Case U-6949.

PRIMARY PUMPING RATE

AVAILABILITY OF SERVICE: Available to government agencies desiring service at primary voltage for pumping and who contract for a specified capacity of not less than 50 kilowatts at a single location.

HOURS OF SERVICE: 24 hours, subject to interruption by agreement, or by advance notice.

CURRENT, PHASE AND VOLTAGE: Alternating current, three-phase, nominally at 4,800, 13,200, 24,000, 41,570 or 120,000 volts, at the option of the Company.

CONTRACT CAPACITY: Customers shall contract for a specified capacity in kilowatts sufficient to meet normal maximum requirements but not less than 50 kilowatts. The Company undertakes to provide the necessary facilities for a supply of electric power from its primary distribution system at the contract capacity. Any billing demand in any month that exceeds the contract capacity then in effect shall become the new contract capacity.

RATE PER MONTH:

Service Charge:

\$175.00 per customer per month, plus

A demand charge of:

\$8.75 per kW of billing demand

An energy charge of:

3.65¢ per kWh for all consumption during on-peak hours

2.95¢ per kWh for all consumption during off-peak hours

FUEL ADJUSTMENT AND PURCHASED POWER ADJUSTMENT: The Energy Charge in the above rate subject to the provisions of Schedule Designation B-4.6.

SURCHARGES AND CREDITS: As approved by the Commission. See Schedule Designation B-4.9.

LATE PAYMENT CHARGE: See Schedule Designation B-2.10.

131

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

PRIMARY PUMPING RATE--Continued

MONTHLY BILLING DEMAND: The daily on-peak demand is the highest 30-minute integrated reading of the demand meter in each day, subject to Schedule of On-Peak Hours B-4.4. To this shall be added one-third of the amount by which it is exceeded by the highest single demand occurring during the off-peak hours on the same calendar day. The monthly billing demand is the highest of the daily demands. In no event will the monthly billing demand be less than 50% of the highest monthly metered billing demand computed above during the billing months of June through October established during the preceding eleven billing months, nor less than 50 kilowatts.

ON-PEAK HOURS: See Schedule Designation B-4.4.

MINIMUM CHARGE: All demand charges, plus the service charge.

POWER FACTOR CLAUSE: The rates and charges under this tariff are based on the customer maintaining a power factor of not less than 85% lagging. Any power factor less than 70% will not be permitted and the customer will be required to install at his own expense such corrective equipment as may be necessary to improve power factor. A penalty will be applied to the total amount of the monthly billing for electric service for power factor below 85% lagging in accordance with the table in Power Factor Determination, Schedule Designation B-4.5. The Power Factor Clause shall not be applied to the on-peak billing demand ratchet nor to the minimum contract demand, but will be applied to metered quantities.

SPECIAL TERMS AND CONDITIONS: The contract capacity, however established, shall not be decreased during the term of the contract and subsequent renewal periods as long as service is required unless there is a specific reduction in connected load.

Customer-owned equipment must be operated so that voltage fluctuations on the primary distribution system of the Company shall not exceed permissible limits.

Customers with large storm pumping facilities will be permitted to transfer to the Secondary Pumping Rate (E5) if their storm pumping horsepower is at least 60% of their total connected load.

CONTRACT TERM: The term is five years, extending thereafter from month-to-month until terminated by mutual consent or on twelve months' written notice by either party, which may be given at any time after the end of the fourth year. Where special services are required, the term will be as specified in the applicable contract rider.

REMAINING PUMPING RATE-Continued

MONTHLY BILLING DEMAND: The daily on-peak demand is the highest 30-minute integrated reading of the demand meter in each day, subject to Schedule of On-peak Hours B-4.4. To this shall be added one-third of the amount by which it is exceeded by the highest single demand occurring during the off-peak hours on the same calendar day. The weekly billing demand is the highest of the daily demands established on seven-day intervals commencing with the first day of the billing period. The monthly billing demand is the average of the four weekly demands. (The period after the first 21 days of each month is considered to be the fourth week.) In no event will the monthly billing demand be less than 50% of the highest monthly metered billing demand computed above during the billing months of June through October established during the preceding eleven billing months, nor less than 50% of the contract capacity nor less than 50 kilowatts.

ON-PEAK HOURS: See Schedule Designation B-4.4.

MINIMUM CHARGE: The billing demand charge, plus the service charge.
