ORDER U-12270

REMOVED BY JKB

DATE 3-22-04

RULES AND REGULATIONS

B-2.1 FRANCHISE PROVISIONS:

The Company is furnishing electric service under franchises granted to it or its predecessors or assignors by various municipalities and townships in which it is doing business. These franchises provide that the rates and charges for electric service shall not exceed its rates and charges for like service elsewhere in its service area, evidenced by its uniform rate schedules at the time on file with and approved by the Michigan Public Service Commission.

The Company is also exercising all such rights, privileges and franchises as it and its predecessors and assignors have or are entitled to under the statutes of the State of Michigan.

B-2.2 RATE SCHEDULES:

All rates and charges are subject to the approval of the Michigan Public Service Commission. Copies of the rate schedule for electric service as filed with and approved by the Michigan Public Service Commission are available at all customer business offices for public inspection during regular business hours.

B-2.3 APPLICATION FOR SERVICE:

Customers may apply for electric service by telephone, by mail or at any business office of the Company. Applicants for General Service or Industrial electric service will be required to sign a contract or agreement. However, whether an agreement is signed or not, a customer is subject to the rules and rates of the Company and is responsible for the service used.

Service can normally be re-established to residential, commercial and industrial premises recently supplied, within one full business day from the date of application. However, where new construction is required, additional time will be needed to allow for right-of-way to be obtained, engineering, and the construction of the facility.

Before accepting an application for electric service, the Company reserves the right to request the applicant to present identification at an Edison Office.

* Unless the applicant has had one or more shutoffs, the Company shall not require other adults who will be residing at the premises for which service is requested to sign an application for service. A utility shall permit more than 1 name on the application if requested by the customer.

* If the applicant is renting the premises for which service is requested, a utility may require proof that the applicant is a tenant. Written or oral confirmation by the manager, landlord, or owner of the property or a copy of the lease submitted by the manager, landlord, or owner of the property is sufficient proof.

To cover the expenses involved in opening a customer's account, an account opening charge of \$5.00 will be assessed against each new secondary installation or transfer of service order. This charge will be included on the first bill rendered.

B-2.4 CHOICE OF RATES:

In some cases, the customer is eligible to take service under any one of two or more rates. If requested, the Company will advise the customer in the selection of the rate which will give him the lowest cost of service, based on the information at hand, but the responsibility for the selection of the rate lies with the customer.

After the customer has selected the rate under which he elects to take service, the customer is not permitted to change from that rate to another until twelve months have elapsed. Neither will a customer be permitted to evade this rule by the device of temporarily terminating the customer's service.

* Residential customers only

authority of Order of the Michigan
Public Service Commission dated
November 5, 1985, in Case U-8004

RULES AND REGULATIONS

B-2.1 FRANCHISE PROVISIONS:

The Company is furnishing electric service under franchises granted to it or its predecessors or assignors by various municipalities and townships in which it is doing business. These franchises provide that the rates and charges for electric service shall not exceed its rates and charges for like service elsewhere in its service area, evidenced by its uniform rate schedules at the time on file with and approved by the Michigan Public Service Commission.

The Company is also exercising all such rights, privileges and franchises as it, its predecessors and assignors, have or are entitled to under the statutes of the State of Michigan.

B-2.2 RATE SCHEDULES:

All rates and charges are subject to the approval of the Michigan Public Service Commission. Copies of the rate schedule for electric service as filed with and approved by the Michigan Public Service Commission are available at all customer business offices for public inspection during regular business hours.

B-2.3 APPLICATION FOR SERVICE:

Customers may apply for electric service by telephone, by mail or at any business office of the Company. Applicants for General Service or Industrial electric service will be required to sign a contract or agreement. However, any recipient of electric service is a customer of the Company, whether an agreement is signed or not. As a customer, one is subject to the rules and rates of the Company and is responsible for the service used.

Service can normally be re-established to residential, commercial and industrial premises recently supplied, within one full business day from the date of application. However, where new construction is required, additional time will be needed to allow for right-of-way to be obtained, engineering, and the construction of the facility.

Before accepting an application for electric service, the Company reserves the right to request the applicant to present identification at an Edison Office. The Company may withhold service from any customer, where service is being transferred into another name solely for the purpose of avoiding payment for previous electric service.

To cover the expenses involved in opening a customer's account, an account opening charge of \$5.00 will be assessed against each new secondary installation or transfer of service order. This charge will be included on the first bill rendered.

B-2.4 CHOICE OF RATES:

In some cases, the customer is eligible to take service under any one of two or more rates. If requested, the Company will advise the customer in the selection of the rate which will give him the lowest cost of service, based on the information at hand, but the responsibility for the selection of the rate lies with the customer.

After the customer has selected the rate under which he elects to take service, he is not permitted to change from that rate to another until twelve months have elapsed. Neither will a customer be permitted to evade this rule by the device of temporarily terminating his service.

RULES AND REGULATIONS

B-2.1 FRANCHISE PROVISIONS:

The Company is furnishing electric service under franchises granted to it or its predecessors or assignors by various municipalities and townships in which it is doing business. These franchises provide that the rates and charges for electric service shall not exceed its rates and charges for like service elsewhere in its service area, evidenced by its uniform rate schedules at the time on file with and approved by the Michigan Public Service Commission.

The Company is also exercising all such rights, privileges and franchises as it, its predecessors and assignors, have or are entitled to under the statutes of the State of Michigan.

B-2.2 RATE SCHEDULES:

All rates and charges are subject to the approval of the Michigan Public Service Commission. Copies of the rate schedule for electric service as filed with and approved by the Michigan Public Service Commission are available at all customer business offices for public inspection during regular business hours.

B-2.3 APPLICATION FOR SERVICE:

Customers may apply for electric service by telephone, by mail or at any business office of the Company. Applicants for General Service or Industrial electric service will be required to sign a contract or agreement. However, any recipient of electric service is a customer of the Company, whether an agreement is signed or not. As a customer, one is subject to the rules and rates of the Company and is responsible for the service used.

Service can normally be re-established to residential, commercial and industrial premises recently supplied, within one full business day from the date of application. However, where new construction is required, additional time will be needed to allow for right-of-way to be obtained, engineering, and the construction of the facility.

Before accepting an application for electric service, the Company reserves the right to request the applicant to present identification at an Edison Office. The Company may withhold service from any customer, where service is being transferred into another name solely for the purpose of avoiding payment for previous electric service.

B-2.4 CHOICE OF RATES:

In some cases, the customer is eligible to take service under any one of two or more rates. If requested, the Company will advise the customer in the selection of the rate which will give him the lowest cost of service, based on the information at hand, but the responsibility for the selection of the rate lies with the customer.

After the customer has selected the rate under which he elects to take service, he is not permitted to change from that rate to another until twelve months have elapsed. Neither will a customer be permitted to evade this rule by the device of temporarily terminating his service.

RULES AND REGULATIONS--Continued

B-2.4 (cont'd.)

However, the Company may, at its option, waive this rule where it appears that an earlier change is requested for permanent rather than for temporary or seasonal advantage. The intent of this rule is to prohibit frequent shifts from rate to rate. As used in this rule, the word rate shall include applicable riders.

B-2.5 (1) SHUTOFF OF SERVICES PERMITTED: (Residential customers only)

Subject to the requirements of these rules, the Company may shut off or terminate service to a residential customer or install a load limiter for any of the following reasons.

- (a) Non-payment of a delinquent account that accrued within the last 6 years.
- (b) Failure to post a cash security deposit or other form of guarantee.
- (c) Unauthorized use, diversion, or interference with the Company service situated or delivered on or about the customer's premises.
- (d) Failure to comply with the terms and conditions of a settlement agreement.
- (e) Refusal to grant access at reasonable times to equipment installed upon the premises of the customer for the purpose of inspection, meter reading, maintenance or replacement.
- (f) Misrepresentation of identity for the purpose of obtaining Company service.
- (g) Violation of any other rules of the Company on file with and approved by the Commission which adversely affects the safety of the customer or other persons or the integrity of the Company's energy delivery system.
- (h) A current member of the customer's household has not paid a delinquent account for service that is not in dispute and that is owed by that person, if the customer lived at the same residence served by the utility at the time that all or part of the debt was incurred by the current member of the customer's household. This subdivision shall not apply if the utility holds a deposit pursuant to the provisions of B-4.1 (2)(e).
- (i) The customer has requested the termination of service. The utility shall make reasonable efforts to determine that the customer of record has authorized the termination of service.
- (j) A municipal official provides a written order for service discontinuation due to unsafe electrical installations in the building.

(2) SHUTOFF OF SERVICE PROHIBITED: (Residential customers only)

None of the following shall constitute sufficient cause for the Company to shut off service.

- (a) The failure of a customer to pay for merchandise, appliances or services not approved by the Commission as an integral part of the utility service provided by the Company.
- (b) The failure of the customer to pay for concurrent service received at a separate metering point, residence or location.

B-2.4 (cont'd.)

However, the Company may, at its option, waive this rule where it appears that an earlier change is requested for permanent rather than for temporary or seasonal advantage. The intent of this rule is to prohibit frequent shifts from rate to rate. As used in this rule, the word rate shall include applicable riders.

B-2.5 (1) DISCONTINUATION OF SERVICE: (Residential customers only)

Subject to the requirements of these rules, the Company, at its option, may discontinue service to a residential customer or install a load limiter for one or more of the following reasons.

- (a) Non-payment of a delinquent account.
- (b) Failure to post a cash security deposit or other form of guarantee.
- (c) Unauthorized use, diversion, or interference with the Company service situated or delivered on or about the customer's premises.
- (d) Failure to comply with the terms and conditions of a settlement agreement.
- (e) Refusal to grant access at reasonable times to equipment installed upon the premises of the customer for the purpose of inspection, meter reading, maintenance or replacement.
- (f) Misrepresentation of identity for the purpose of obtaining Company service.
- (g) Violation of any other rules of the Company on file with and approved by the Commission which adversely affects the safety of the customer or other persons or the integrity of the Company's energy delivery system.
- (h) A delinquent account for service remains unpaid and is not in dispute and is owed by a current member of the customer's household if the customer lived at the same residence served by the Company at the time that all or part of the debt was incurred. This rule shall only be applied if the Company is not currently holding a deposit pursuant to B-4.1(2)(f).
- (i) A municipal official provides a written order for service discontinuation due to unsafe electrical installations in the building.

(2) DISCONTINUANCE OF SERVICE PROHIBITED:

None of the following shall constitute sufficient cause for the Company to discontinue service.

- (a) The failure of a customer to pay for merchandise, appliances or services not approved by the Commission as an integral part of the utility service provided by the Company.
- (b) The failure of the customer to pay for concurrent service received at a separate metering point, residence or location. In the event of discontinuation or termination of service at a separate residential metering point, residence or location in accordance with these rules, the Company may transfer any unpaid balance to any other residential service account of the customer.

RULES AND REGULATIONS Continued

B-2.4 (cont'd.)

However, the Company may, at its option, waive this rule where it appears that an earlier change is requested for permanent rather than for temporary or seasonal advantage. The intent of this rule is to prohibit frequent shifts from rate to rate. As used in this rule, the word rate shall include applicable riders.

B-2.5 (1) **DISCONTINUATION OF SERVICE:** (Residential customers only)

Subject to the requirements of these rules, the Company may discontinue service to a residential customer for one or more of the following reasons:

- (a) Non-payment of a delinquent account.
- (b) Failure to post a cash security deposit or other form of guarantee.
- (c) Unauthorized use, diversion, or interference with the Company service situated or delivered on or about the customer's premises.
- (d) Failure to comply with the terms and conditions of a settlement agreement.
- (e) Refusal to grant access at reasonable times to equipment installed upon the premises of the customer for the purpose of inspection, meter reading, maintenance or replacement.
- (f) Misrepresentation of identity for the purpose of obtaining Company service.
- (g) Violation of any other rules of the Company on file with and approved by the Commission which adversely affects the safety of the customer or other persons or the integrity of the Company's energy delivery system.
- (h) A delinquent account for service remains unpaid and is not in dispute and is owed by a current member of the customer's household if the customer lived at the same residence served by the Company at the time that all or part of the debt was incurred. This rule shall only be applied if the Company is not currently holding a deposit pursuant to B-4.1(2)(f).
- (i) A municipal official provides a written order for service discontinuation due to unsafe electrical installations in the building.

(2) **DISCONTINUANCE OF SERVICE PROHIBITED:**

None of the following shall constitute sufficient cause for the Company to discontinue service.

- (a) The failure of a customer to pay for merchandise, appliances or services not approved by the Commission as an integral part of the utility service provided by the Company.
- (b) The failure of the customer to pay for concurrent service received at a separate metering point, residence or location. In the event of discontinuation or termination of service at a separate residential metering point, residence or location in accordance with these rules, the Company may transfer any unpaid balance to any other residential service account of the customer.

RULES AND REGULATIONS--Continued

B-2.5 (cont'd.)

- (c) The failure of the customer to pay for a different class of service received at the same or different location. The placing of more than one meter at the same location for the purpose of billing the usage of specific domestic energy using devices under optional rate schedules or provisions is not construed as a different class of service for the purpose of this rule.
- (d) The failure of a customer, such as a landlord, to pay for service where service is used by another person, such as a tenant. The Company may shut off service, however, in any of the following circumstances:
 - (1) If the customer supplies a written statement under oath that the premises are unoccupied.
 - (2) If the premises are occupied, and the occupant agrees in writing to the shutoff of service.
 - (3) If it is not feasible to provide service to the occupant as a customer without a major revision of existing distribution facilities. Where it is feasible to so provide service, the Company, after providing notice as required in these rules, shall offer the occupant the opportunity to subscribe for service in his or her own name. If the occupant refuses, the Company may shut off service pursuant to these rules.

B-2.5 (2)(A) WINTER PROTECTION PLAN: (Residential customers only)

- (1) "Eligible customer" means either an eligible low-income customer or an eligible senior citizen customer.
- (2) "Eligible low-income customer" means a utility customer whose household income does not exceed 150% of the poverty level, as published by the United States Department of Health and Human Services, or who receives any of the following:
 - (a) Supplemental security income, aid to families with dependent children, or general assistance.
 - (b) Food stamps.
 - (c) Medicaid.
- (3) "Eligible senior citizen customer" means a utility customer who is 65 years of age or older and who advises the utility of his or her eligibility.
- (4) A utility shall not shut off service to an eligible customer during the space heating season for nonpayment of a delinquent account if the customer is an eligible senior citizen customer or if the customer pays to the utility a monthly amount equal to 7% of the estimated annual bill for the eligible customer and the eligible customer demonstrates, within 14 days of requesting shutoff protection, that he or she has made application for state or federal heating assistance. If an arrearage exists at the time an eligible customer applies for protection from shutoff of service during the space heating season, the utility shall permit the customer to pay the arrearage in equal monthly installments between the date of application and the start of the subsequent space heating season.

 - (3) If it is not feasible to provide service to the occupant as a customer without a major revision of existing distribution facilities. Where it is feasible to so provide service, the Company, after providing notice as required in these rules, shall offer the occupant the opportunity to subscribe for service in his own name. If the occupant then declines to so subscribe, the Company may discontinue service pursuant to these rules. The Company shall not attempt to recover, or condition service upon the payment of, any outstanding bills or other charges due upon the account of any other person.
- (3) **TIME OF DISCONTINUATION:**
- (a) Subject to the requirements of these rules, the Company may discontinue service to a residential customer on the date specified in the notice of discontinuation or within a reasonable time thereafter only between the hours of 8:00 a.m. and 4:00 p.m.
 - (b) Service shall not be discontinued on a day, or a day immediately preceding a day when the services of the Company are not available to the general public for the purpose of reconnecting discontinued service.
- (4) **RESTORATION OF SERVICE:**
- (a) After service has been discontinued, the Company shall restore service promptly upon the customer's request when the cause for discontinuation of service has been cured or satisfactory credit arrangements have been made.

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS--Continued

B-2.5 (2)(A) WINTER PROTECTION PLAN (cont'd.)

- (5) A utility may shut off service to an eligible low-income customer who does not pay the monthly amounts referred to in subrule (2) of this rule after giving notice in the manner required by these rules. The utility is not required to offer a settlement agreement to an eligible low-income customer who fails to make the monthly payments referred to in subrule (2) of this rule.
- (6) If a customer fails to comply with the terms and conditions of this rule, a utility may shut off service after giving the customers a notice, by personal service or first-class mail, that contains all of the following information:
- (a) That the customer has defaulted on the winter protection plan.
 - (b) The nature of the default.
 - (c) That unless the customer makes the payments that are past due under this rule within 10 days of the date of mailing, the utility may shut off service.
 - (d) The date on or after which the utility may shut off service, unless the customer takes appropriate action.
 - (e) That the customer has the right to file a complaint disputing the claim of the utility before the date of the proposed shutoff of service.
 - (f) That the customer has the right to request a hearing before a utility hearing officer if the complaint cannot be otherwise resolved and that the customer must pay to the utility that portion of the bill that is not in dispute within 3 days of the date that the customer requests a hearing.
 - (g) That the customer has the right to represent himself or herself, to be represented by counsel, or to be assisted by other person of his or her choice in the complaint process.
 - (h) That the utility will not shut off service pending the resolution of a complaint that is filed with the utility in accordance with these rules.
 - (i) The telephone number and address of the utility where the customer may make inquiry, enter into a settlement agreement, or file a complaint.
 - (j) That the customer should contact a social services agency immediately if the customer believes he or she might be eligible for emergency economic assistance.
 - (k) That the utility will postpone shutoff of service if a medical emergency exists at the customer's residence.
 - (l) That the utility may require a deposit and restoration charge if the utility shuts off service for nonpayment of a delinquent account.
- (7) At the conclusion of the space heating season, the utility shall reconcile the accounts of eligible customers and permit customers to pay any amounts owing in equal monthly installments between April 1 and December 1. A utility may shut off service to eligible customers who fail to make installment payments on a timely basis in the manner required by these rules. At the option of the customer, between April 1 and November 30, the customer may choose to pay 9% of the estimated annual bill each month together with the monthly installment for any pre-enrollment arrearage instead of the amount otherwise owing for actual and reconciled past due amounts. After November 30, the utility shall reconcile the account of the customer who has chosen and fulfilled the obligations of the 9% option by refunding any net overcollection or adding any net undercollection to the customer's arrearage for the upcoming space heating season. If a customer fails to make all payments that are required pursuant to the 9% option, the utility may immediately reconcile his or her account by refunding any net overcollection or by adding any net undercollection to the customer's current bill.

HP

Issued: October 13, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after October 14, 1981 under authority of Order of the Michigan Public Service Commission dated October 13, 1981 in Case U-4240.

RULES AND REGULATIONS—Continued

B-2.5 (cont'd.)

- (b) Every effort shall be made to restore service at all times upon the day restoration is requested. In any event, restoration shall be made no later than the first working day after the day of the request of the customer.
- (c) The Company may charge the customer a fee reasonably related to the manner in which service was discontinued for restoration of that service (See Rule B-2.8).

(5) NOTICE OF DISCONTINUATION OF SERVICE:

- (a) The Company will not discontinue residential service unless written notice by first class mail is sent to the customer or personally served at least ten days prior to the date of the proposed discontinuance. Notice shall be sent to the account name and address and to the address where service is provided, if different. Service of notice by mail is complete upon mailing. The Company will maintain an accurate record of the date of mailing.
- (b) A notice of discontinuance of service shall not be issued if a customer has pending with the Company a complaint concerning the bill upon which the notice is based.

(6) MANNER OF DISCONTINUATION:

- (a) At least one day preceding physical discontinuation of service, the Company will make reasonable efforts to contact the customer by telephone to advise the customer of the pending action and what steps must be taken to avoid discontinuation.
- (b) Immediately preceding the physical disconnection of service, the employee of the Company designated to perform such function will identify himself to the customer or other responsible person then upon the premises and will announce the purpose of his presence.
- (c) The employee will have in his possession the past due account of the customer and request any available verification that the outstanding claims have been satisfied or are currently in dispute. Upon the presentation of evidence which reasonably indicates that the claim has been satisfied or is currently in dispute, service shall not be discontinued.
- (d) The employee may be authorized to accept payment and in such case shall not discontinue service if the customer then and there tenders payment in full.

B-2.5 (2)(A) WINTER PROTECTION PLAN (Continued)

- (8) A utility shall not require an eligible low-income customer whose utility service has been shut off before applying for protection under this rule to pay a fee for restoring service or a security deposit pursuant to the provisions of B-4.1 (3) during the space heating season. A utility may not require an amount greater than one twelfth of an arrearage owing in order to restore service or initiate participation in the winter protection plan. The 7% payment shall be billed according to normal billing procedures for the utility.
- (9) An eligible low-income customer may preenroll in the winter protection plan between November 15 and November 30 by paying the current usage plus 1/12 of any arrearage and agreeing to the terms of the winter protection plan for the upcoming space heating season. An eligible senior citizen customer may preenroll by advising the utility of his or her eligibility. A preenrolled customer shall not have his or her service terminated before the commencement of the winter protection plan. A customer who is off service as of November 15 shall be eligible to preenroll in the winter protection plan and have service restored immediately after fulfilling the requirements for preenrollment. Further, an off service low-income customer who applies during the preenrollment period shall be entitled to have all deposits and reconnection fees waived.

B-2.5 (2)(B) Alternative Shut-off Protection Program for Eligible Low-Income and Senior Citizen Customers

- (1) **As used in Section B-2.5 (2)(B):**
- (A) ***"Eligible customer" means either a Low-income or Senior citizen customer whose arrearage has not accrued as a result of theft or unauthorized use.***
- (B) ***"Low-income customer" means a utility customer whose household income is at or below 200% of the Federal Poverty Level (FPL) and provides proof of meeting the eligibility requirement at the time of enrollment.***
- (C) ***"Senior citizen customer" means a utility customer who is 62 years of age or older and provides proof of meeting the eligibility requirement at the time of enrollment.***
- (2) ***Customers eligible to participate under the Winter Protection Plan, Section B-2.5 (2)(A), will be required to waive their rights to participate under the Winter Protection Plan in order to participate under the Alternative Shut-off Protection Program for Eligible Low-Income and Senior Citizen Customers, Section B-2.5 (2)(B).***
- (3) ***Eligible customers may enroll year-round. Once enrolled, Eligible customers will be required to pay a minimum payment of 10% of the total balance of the amount owing at the time of enrollment and minimum monthly payments that include 1/12 of any remaining arrearage balance plus 1/12 of the estimated annual bill. Reconnection fees will be waived upon initial enrollment. Eligible customers will not be subject to late fees or deposits while enrolled in the program. The Company may elect to offer the customer additional time to resolve the arrearage resulting in an extended payment plan up to 24 months.***

DATE 03-11-08

(3) TIME OF SHUTOFF: (Residential Customers Only)

- (a) Subject to the requirements of these rules, the Company may shut off service to a residential customer on the date specified in the notice of shutoff or within a reasonable time following that date. If the Company does not shut off service and mails a subsequent notice, then the Company shall not shut off service before the date specified in the subsequent notice. Shutoff shall occur only between the hours of 8 a.m. and 4 p.m.
- (b) Service shall not be shut off on a day, or a day immediately preceding a day, when the services of the Company are not available to the general public for the purpose of restoring service, and shall not be shut off on a Friday during the space heating season to a customer who has defaulted on the winter protection plan.
- (c) The Company shall not shut off service for an amount that is in dispute while a customer is awaiting the resolution of a complaint with the Commission or the Company in accordance with these rules.

(4) RESTORATION OF SERVICE: (Residential Customers Only)

- (a) After service has been shut off, the Company shall restore service promptly upon the customer's request when the cause has been cured or credit arrangements satisfactory to the Company have been made.
- (b) Every effort shall be made to restore service at all times upon the day restoration is requested. In any event, restoration shall be made no later than the first working day after the day of the request of the customer.
- (c) The Company may assess the customer a charge, including reasonable costs incurred, for restoration of service and relocating the customer's meter if such charges are provided in the Company's approved schedule of rates and tariffs. [See Rule B-2.8 and B-5.3 (3)]

(5) NOTICE OF SHUTOFF OF SERVICE: (Residential Customers Only)

- (a) The Company shall not shut off service pursuant to the provisions of B2.5 unless it transmits a notice, by first-class mail, to the customer or personally serves the notice not less than 10 days before the date of the proposed shut off. The Company shall send notice to the account name and address and to the address where service is provided if the service address is different and the transmittal can be delivered at that address. The Company shall maintain a record of the date of transmittal.
- (b) A utility shall permit a residential customer to designate a consenting individual or agency to receive a copy of any notice of shutoff sent by the utility to the customer.
- (c) Not less than 30 days before the proposed shutoff of service to a single-metered dwelling used as a residence for 5 or more families, a utility shall transmit a notice to each dwelling unit which indicates that the customer of record, the landlord, has failed to pay an outstanding bill and is subject to shutoff of service on or after a specified date.

REMOVED BY

RULES AND REGULATIONS-Continued

B-2.5 (cont'd.)

(3) TIME OF DISCONTINUATION

- (a) Subject to the requirements of these rules, the Company may discontinue service to a residential customer on the date specified in the notice of discontinuation or within a reasonable time thereafter only between the hours of 8:00 a.m. and 4:00 p.m.
- (b) Service shall not be discontinued on a day, or a day immediately preceding a day when the services of the Company are not available to the general public for the purpose of reconnecting discontinued service.
- (c) Service shall not be discontinued pending the resolution of a complaint with the Commission.

(4) RESTORATION OF SERVICE:

- (a) After service has been discontinued, the Company shall restore service promptly upon the customer's request when the cause for discontinuation of service has been cured or credit arrangements satisfactory to the Company have been made.
- (b) Every effort shall be made to restore service at all times upon the day restoration is requested. In any event, restoration shall be made no later than the first working day after the day of the request of the customer.
- (c) The Company may assess the customer a charge, including reasonable costs incurred, for restoration of service and relocating the customer's meter if such charges are provided in the utility's approved schedule of rates and tariffs. [See Rule B-2.8 and B-5.3 (3)]

(5) NOTICE OF DISCONTINUATION OF SERVICE

- (a) The Company will not discontinue residential service unless written notice by first class mail is sent to the customer or personally served at least ten days prior to the date of the proposed discontinuance. Notice shall be sent to the account name and address and to the address where service is provided, if different. Service of notice by mail is complete upon mailing. The Company will maintain an accurate record of the date of mailing.
- (b) A notice of discontinuance of service shall not be issued if a customer has pending with the Company a complaint concerning the bill upon which the notice is based.
- (c) A utility shall permit a residential customer to designate a consenting individual or agency to receive a copy of any notice of discontinuance sent by the utility to the customer.
- (d) Not less than 30 days before the proposed discontinuance of service to a single-metered dwelling used as a residence for 5 or more families, a utility shall mail or deliver a notice, if possible, to each dwelling unit which indicates that the customer of record, the landlord, has failed to pay an outstanding bill and is subject to termination of service on or after a specified date.

Issued: December 27, 1984
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 18, 1984 under authority of Order of the Michigan Public Service Commission dated April 3, 1984 in Case U-4240.

RULES AND REGULATIONS-Continued

B-2.5 (cont'd.)

- (c) The Company may charge the customer a fee reasonably related to the manner in which service was discontinued for restoration of that service (See Rule B-2.8).

(5) NOTICE OF DISCONTINUATION OF SERVICE:

- (a) The Company will not discontinue residential service unless written notice by first class mail is sent to the customer or personally served at least ten days prior to the date of the proposed discontinuance. Notice shall be sent to the account name and address and to the address where service is provided, if different. Service of notice by mail is complete upon mailing. The Company will maintain an accurate record of the date of mailing.
- (b) A notice of discontinuance of service shall not be issued if a customer has pending with the Company a complaint concerning the bill upon which the notice is based.
- (c) A utility shall permit a residential customer to designate a consenting individual or agency to receive a copy of any notice of discontinuance sent by the utility to the customer.
- (d) Not less than 30 days before the proposed discontinuance of service to a single-metered dwelling used as a residence for 5 or more families, a utility shall mail or deliver a notice, if possible, to each dwelling unit which indicates that the customer of record, the landlord, has failed to pay an outstanding bill and is subject to termination of service on or after a specified date.

(6) MANNER OF DISCONTINUATION:

- (a) At least one day preceding physical discontinuation of service, the Company will make reasonable efforts to contact the customer by telephone to advise the customer of the pending action and what steps must be taken to avoid discontinuation.
- (b) Immediately preceding the physical disconnection of service, the employee of the Company designated to perform such function will identify himself or herself to the customer or other responsible person then upon the premises and will announce the purpose of his or her presence.
- (c) The employee will have in his possession the past due account of the customer and request any available verification that the outstanding claims have been satisfied or are currently in dispute. Upon the presentation of evidence which reasonably indicates that the claim has been satisfied or is currently in dispute, service shall not be discontinued.
- (d) The employee may be authorized to accept payment and in such case shall not discontinue service if the customer then and there tenders payment in full, together with a reasonable charge for sending the employee to the premises if provided in the utility's schedule of rates and tariffs.
- (e) Payment may be made by the customer in any reasonable manner including personal check. Payment by personal check is not reasonable if the customer has on a previous occasion within the last three years tendered payment in this manner and the check has been returned for insufficient funds or no account.

REMOVED BY HP

Issued: October 13, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after October 14, 1981 under authority of Order of the Michigan Public Service Commission dated October 13, 1981 in Case U-4240.

RULES AND REGULATIONS-Continued

B-2.5 (cont'd.)

- (e) Payment may be made by the customer in any reasonable manner including personal check. Payment by personal check is not reasonable if the customer has on a previous occasion within the last three years tendered payment in this manner and the check has been returned for insufficient funds.
- (f) If prior telephone contact has not been made and the customer or other responsible person is not in or upon the premises, the employee will leave notice in a manner conspicuous to the customer that service will be discontinued on the next business day unless outstanding claims have been satisfied. If the customer or other responsible person has been telephonically contacted, service may be discontinued immediately.
- (g) If the customer or other responsible person is not in or upon the premises upon the return of the employee, or upon the first visit if the customer or other responsible person does not respond when it reasonably appears that the premises are occupied, the employee may discontinue service.
- (h) When service is discontinued, the employee will leave notice upon the premises in a manner conspicuous to the customer that service has been discontinued and the address and telephone number of the Company where the customer may arrange to have service restored.

(7) MEDICAL EMERGENCY:

Notwithstanding any other provision of these rules, the Company will postpone the physical discontinuation of Company service to a residential customer for a reasonable time not in excess of 21 days, if the customer produces a physician's certificate or notice from a public health or social services official which states that physical discontinuation will aggravate an existent medical emergency of the customer, a member of his family or other permanent resident of the premises where service is rendered. The certificate shall identify the medical emergency and specify the period of time during which discontinuation will aggravate the circumstances. The postponement may be extended by renewal of the certificate or notice.

(8) NOTICE OF DISCONTINUATION SHALL CONTAIN THE FOLLOWING INFORMATION:

- (a) The name and address of the customer and the address of the service, if different.
- (b) A clear and concise statement of the reason for the proposed discontinuation of service.
- (c) The date, or within a reasonable time thereafter, on which service will be discontinued unless the customer takes appropriate action.

RULES AND REGULATIONS--Continued

B-2.5 (cont'd.)

(6) MANNER OF SHUTOFF: (Residential Customers Only)

- (a) At least 1 day preceding shutoff of service, the utility shall make not less than 2 attempts to contact the customer by telephone if a telephone number is accessible to the utility to advise the customer of the pending action and what steps the customer must take to avoid shutoff. The utility shall either document all attempts to contact the customer or shall document that automated procedures are in place that will make at least 2 attempts to contact the customer by telephone.
- (b) Immediately preceding the shutoff of service, the employee of the Company who is designated to perform such function will identify himself or herself to the customer or other responsible person then upon the premises and will announce the purpose of his presence.
- (c) The employee will have in his or her possession a copy of the delinquent account of the customer and request any available verification that the outstanding claims have been satisfied or are currently in dispute. Unless the customer presents evidence which reasonably indicates that the claim has been satisfied or is currently in dispute, the employee may shut off service.
- (d) The employee may be authorized to accept payment and shall not shut off service if the customer offers payment in full, together with a reasonable charge for sending the employee to the premises if provided in the utility's schedule of rates and tariffs.
- (e) Payment may be made by the customer in any reasonable manner including personal check. Payment by personal check is not reasonable if the customer has on a previous occasion within the last 12 months tendered payment in this manner and the check has been returned for insufficient funds, or no accounts, excluding bank error.
- (f) If prior telephone contact has not been made and the customer or other responsible person is not in or upon the premises, the employee will leave notice in a manner conspicuous to the customer that service will be shut off on or after the next business day unless outstanding claims have been satisfied. If the customer or other responsible person has been telephonically contacted, service may be shut off immediately.
- (g) If the customer or other responsible person is not in or upon the premises upon the return of the employee, or upon the first visit if the customer or other responsible person does not respond when it reasonably appears that the premises are occupied, the employee may shut off service.
- (h) When service is shut off, the employee shall leave notice upon the premises in a manner conspicuous to the customer that service has been shut off and the address and telephone number of the Company where the customer may arrange to have service restored. The shutoff form should state "efforts by the customer to restore his or her own service are unlawful and dangerous."

(7) MEDICAL EMERGENCY: (Residential Customers Only)

Notwithstanding any other provision of these rules, a utility shall postpone the shutoff of service for a reasonable time, but not for more than 21 days, if the customer produces a physician's certificate or notice from a public health or social services official stating that the shutoff of service will aggravate an existing medical emergency of the customer, a member of his or her family, or another permanent resident of the premises. The certificate shall identify the medical emergency and specify the period of time during which shutoff will aggravate the emergency. The utility shall extend the postponement for further periods of not more than 21 days, not to exceed a total postponement of shutoff of service of 63 days, only if the customer produces a physician's certificate. If shutoff of service has occurred without any postponement being obtained, the utility shall restore service for a reasonable time, but not for more than 21 days, and shall continue the restoration for further periods of not more than 21 days, not to exceed a total restoration of service of 63 days, only upon the customer providing a physician's certificate.

- (f) The right of the customer to request a hearing before a utility hearing officer if the complaint cannot be otherwise resolved and a statement that the customer must pay to the Company that portion of the bill not in dispute within three days of the date that the hearing is requested.
- (g) The right of the customer to represent himself or herself, or to be represented by counsel, or to be assisted by other persons of his or her choice in the complaint process.
- (h) A statement that service will not be shut off pending the resolution of a complaint filed with the Company in accordance with the rules of the Michigan Public Service Commission.
- (i) The telephone number and address of the Company where the customer may make inquiry, enter into a settlement agreement, or file a complaint.
- (j) A statement advising the customer to contact a social service agency immediately if the customer believes he or she might be eligible for emergency economic assistance.
- (k) A statement indicating that shutoff of service may be postponed if a medical emergency exists in the customer's residence.
- (l) That the utility may require a deposit and restoration charge if the utility shuts off service for nonpayment of a delinquent account.
- (m) That the customer should contact the utility for information about the winter protection plan if the date on or after which shutoff of service may occur is between November 15 and March 31.

(9) EMERGENCY DISCONTINUATION:

Notwithstanding any other provision of these rules, the Company may discontinue residential service temporarily for reasons of health or safety or in a state of national emergency.

(10) DISCONNECTION OF SERVICE: (To Commercial and Industrial Customers)

Service to commercial and industrial customers may be denied or discontinued for any of the following reasons:

- (a) Without notice if a condition on the customer's premises is determined by the Company or a governmental agency to be hazardous.
- (b) Without notice if a customer uses equipment in a manner which adversely affects the Company's equipment or the Company's service to others.
- (c) Without notice if the customer tampers with the equipment furnished and owned by the Company.
- (d) Without notice if unauthorized use of the equipment furnished and owned by the Company occurs, including obtaining the use of equipment by submitting a falsified application.
- (e) For violation of, or noncompliance with, the Company's rules on file with, and approved by, the commission.
- (f) For failure of the customer to fulfill his or her contractual obligations for service or facilities which are subject to regulation by the commission.

Effective for service rendered on and after October 29, 1992, under authority of order of the Michigan Public Service Commission dated October 2, 1992 in Case U-9754.

RULES AND REGULATIONS—Continued

B-2.5 (cont'd.)

- (f) The right of the customer to request a hearing before a utility hearing officer if the complaint cannot be otherwise resolved and a statement that the customer must pay to the Company that portion of the bill not in dispute within three days of the date that the hearing is requested.
- (g) The right of the customer to represent himself or herself, or to be represented by counsel, or to be assisted by other persons of his or her choice in the complaint process.
- (h) A statement that service will not be discontinued pending the resolution of a complaint filed with the Company in accordance with the rules of the Michigan Public Service Commission.
- (i) The telephone number and address of the Company where the customer may make inquiry, enter into a settlement agreement, or file a complaint.
- (j) A statement advising the customer to contact a social service agency immediately if the customer believes he or she might be eligible for emergency economic assistance.
- (k) A statement indicating that discontinuation of service may be postponed if a medical emergency exists in the customer's residence.
- (l) A statement that a deposit of up to \$150.00 may be required if the customer is disconnected for nonpayment of a delinquent account.

(9) EMERGENCY DISCONTINUATION:

Notwithstanding any other provision of these rules, the Company may discontinue residential service temporarily for reasons of health or safety or in a state or national emergency.

(10) DISCONNECTION OF SERVICE: (To Commercial and Industrial Customers)

Service to commercial and industrial customers may be denied or discontinued for any of the following reasons:

- (a) Without notice if a condition on the customer's premises is determined by the Company or a governmental agency to be hazardous.
- (b) Without notice if a customer uses equipment in a manner which adversely affects the Company's equipment or the Company's service to others.
- (c) Without notice if the customer tampers with the equipment furnished and owned by the Company.
- (d) Without notice if unauthorized use of the equipment furnished and owned by the Company occurs, including obtaining the use of equipment by submitting a falsified application.
- (e) For violation of, or noncompliance with, the Company's rules on file with, and approved by, the commission.
- (f) For failure of the customer to fulfill his or her contractual obligations for service or facilities which are subject to regulation by the commission.

- (l) A statement that a deposit of up to \$150.00 may be required if the customer is disconnected for nonpayment of a delinquent account.

(9) EMERGENCY DISCONTINUATION:

Notwithstanding any other provision of these rules, the Company may discontinue residential service temporarily for reasons of health or safety or in a state or national emergency.

(10) DISCONNECTION OF SERVICE (For accounts other than residential):

The Company reserves the right to refuse or to discontinue its service for any of the following reasons:

- ✓ (a) For nonpayment of bills provided the bill remains unpaid ten (10) days after the bill due date and after at least five (5) days written notice has been given the customer. The bill due date shall be 21 calendar days from the day of physical mailing of the bill.
- (b) For failure of the customer to fulfill his contractual obligations for service or facilities furnished by the Company.
- ✓ (c) For failure to provide a surety deposit as required by the Company.
- (d) Without notice in the event of unauthorized use of service or tampering with the equipment owned by the Company.
- (e) For non-compliance with any rule established by the Company and filed with and approved by the Commission.

RULES AND REGULATIONS-Continued

B-2.5 (cont'd.)

- (e) For non-compliance with any rule established by the Company and filed with and approved by the Commission.
- (f) For failure of the customer to furnish and install the corrective equipment reasonably necessary in the judgment of the Company to eliminate interference with the satisfactory operation of facilities of the Company, or any of its other customers, or of other public utility companies.
- (g) After proper notification upon written notice from governmental inspection authorities of condemnation of the customer's facilities or premises.
- (h) After proper notice, for fraudulent representation as to the use of electric service.
- (i) Without notice where hazardous conditions exist in the customer's facilities.
- (j) Without notice for unauthorized reconnection after disconnection with due notice.
- (k) For failure to provide reasonable access to the customer's premises.
- (l) In the case of a mobile home park, the utility shall notify the Michigan Public Service Commission ten (10) days prior to shut off of service for nonpayment, when the service is being supplied to the licensed owner or operator of a mobile home park for the use and benefit of the park's tenants.

B-2.6 EXCEPTIONAL CASES:

The usual supply of electric service shall be subject to the provisions of M.P.S.C. No. 9. Where special service-supply conditions or problems arise which are not provided for in these rules the Company may modify or adapt its supply terms to meet the peculiar requirements of such cases. Any such modification must be a rational expansion of standard provisions herein.

B-2.7 NO PREJUDICE OF RIGHTS:

The failure by the Company to enforce any of the terms of M.P.S.C. No. 9 shall not be deemed a waiver of its right to do so.

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS-Continued

B-2.5 (cont'd.)

- (g) For failure of the customer to permit the Company reasonable access to its equipment.
- (h) For nonpayment of a bill if the Company has made a reasonable attempt to effect collection.
- (i) For failure of the customer to provide the Company with a deposit as authorized by B-4.1 (1).
- (2) Except as provided in subrule (a), (b), (c), and (d) of this rule, the Company shall give the customer written notice that he or she has not less than 10 days to make settlement of his or her account or to comply with the rules and regulations of the Company, as the case may be, or have his or her service denied.
- (3) At least 1 day before scheduled field action for disconnect, an attempt shall be made to contact the customer by telephone or in person. If no contact is made within 24 hours before disconnect, a notice shall be left at the premises in a conspicuous location indicating service may be disconnected the next business day if the bill is not paid. Service shall not be discontinued on the day preceding a day or days on which the Company does not provide for receiving payments and restoring service, except as provided in subrule (a), (b), (c), and (d) of this rule.

(11) DISCONNECTION OF SERVICE PROHIBITED: (Commercial and Industrial Customers)

- (a) The following reasons do not constitute sufficient cause for denial of service to a present or prospective customer:
 - (1) Delinquency in payment for service by a previous occupant of the premises to be served.
 - (2) Failure to pay for merchandise purchased from the Company.
 - (3) Failure to pay for a different type or class of Company service.
 - (4) Failure to pay the bill of another customer as guarantor thereof.
- (b) The Company shall not discontinue service during a reasonable time period given to a customer to pay the amount of a backbilling as provided in B-4.11 (c) and B-6.14 (1).

B-2.6 EXCEPTIONAL CASES:

The usual supply of electric service shall be subject to the provisions of M.P.S.C. No. 9. Where special service-supply conditions or problems arise which are not provided for in these rules the Company may modify or adapt its supply terms to meet the peculiar requirements of such cases. Any such modification must be a rational expansion of standard provisions herein.

B-2.7 NO PREJUDICE OF RIGHTS:

The failure by the Company to enforce any of the terms of M.P.S.C. No. 9 shall not be deemed a waiver of its right to do so.

B-2.8 COLLECTION, RECONNECTION AND TURN-ON CHARGES:

For all customers billed on Domestic and General Service rates, where service has been discontinued at the customer's request, a "turn-on" charge of \$20.00 will be made to restore service to such customer at the same premises within the following 12-month period. If turn-on is requested during other than normal working hours, the above charge will be doubled.

When an employe of the Company is dispatched to call at a customer's premise for the purpose of collecting electric bill(s) that are in arrears, and the electric service was not disconnected, a charge of \$6.00 will be added to the amount in arrears to cover the cost of sending the employe to the customer's premise. This charge will be applied even if the customer is not at home when the employe calls.

RULES AND REGULATIONS-Continued

B-2.8 COLLECTION, RECONNECTION AND TURN-ON CHARGES:

For all customers billed on Domestic and General Service rates, where service has been discontinued at the customer's request, a "turn-on" charge of \$20.00 will be made to restore service to such customer at the same premises within the following 12-month period. If turn-on is requested during other than normal working hours, the above charge will be doubled.

When an employee of the Company is dispatched to call at a customer's premise for the purpose of collecting electric bill(s) that are in arrears, and the electric service was not disconnected, a charge of \$6.00 will be added to the amount in arrears to cover the cost of sending the employee to the customer's premise. This charge will be applied even if the customer is not at home when the employee calls.

A charge of \$20.00 will be made to cover the cost of restoring service that has been discontinued for any breach of the Rules and Regulations by the customer.

Whenever it is necessary to restore service that has been disconnected at a pole, the charge will be \$25.00. If reconnection is requested during other than normal working hours, the charge will be \$40.00. For all other rates, actual charges will apply to cover the cost of restoring service that has been disconnected for any breach of the Company's Rules or Regulations by the customer.

B-2.9 INFORMATION ON BILLS:

Every bill rendered by the Company for metered electric service will state clearly:

- (a) The beginning and ending meter readings of the billing period and the dates thereof.
- (b) The due date.
- (c) Any previous balance.
- (d) The amount due for energy usage.
- (e) The amount due for other authorized charges.
- (f) The total amount due.
- (g) The statement that rate schedules, an explanation of how to calculate the accuracy of the bill and an explanation of the fuel clause, if any, is available and will be mailed upon request.
- (h) The statement, "register any inquiry or complaint about this bill prior to the due date."

Changes (in bold, italics, underline) reflect Order U-11397 dated 2/9/2000

RULES AND REGULATIONS--Continued

B-2.8 COLLECTION, RECONNECTION AND TURN-ON CHARGES:

For all customers billed on Residential and General Service rates, where service has been discontinued at the customer's request, a seasonal reconnection charge of \$20.00 will be made to reconnect service to such customer at the same premises within the following 12-month period. If reconnection is requested during other than normal working hours, the above charge will be doubled.

When an employee of the Company is dispatched to call at a customer's premises for the purpose of collecting electric bill(s) that are in arrears, and the electric service was not disconnected, a charge of \$8.00 will be added to the amount in arrears to cover the cost of sending the employee to the customer's premises. This charge will be applied even if the customer is not at home when the employee calls.

A restoration charge of \$20.00 will be made to cover the cost of restoring service that has been discontinued for any breach of the Rules and Regulations by the customer.

Whenever it is necessary to restore service that has been disconnected at a pole, the charge will be \$25.00. If restoration is requested during other than normal working hours, the charge will be \$40.00. For all other rates, actual charges will apply to cover the cost of restoring service that has been disconnected for any breach of the Company's Rules or Regulations by the customer.

B-2.9 INFORMATION ON BILLS:

Every bill transmitted by the Company shall state clearly:

- (a) The beginning and ending meter readings of the billing period and the dates thereof.
- (b) The units of energy consumed during the billing period and the units of energy consumed during the comparable period the prior year. A utility may comply with the provisions of this subrule by providing a comparison of energy consumed based on average daily use for the billing period. The commission may exempt a utility from this requirement by order upon a showing by the utility that compliance would be excessively costly or administratively impractical.
- (c) A designation of the rate.
- (d) The due date.
- (e) Any previous balance.
- (f) The amount due for energy usage.
- (g) The amount due for other authorized charges.
- (h) The amount of tax.
- (i) The total amount due.
- (j) The rate schedules, the explanation of rate schedules, and the explanation of how to verify the accuracy of the bill will be provided upon request.
- (k) The statement, "Register any inquiry or complaint about this bill prior to the due date."
- (l) The address and telephone number of the Company designating where the customer may initiate any inquiry or complaint regarding the bill as rendered or the service provided by the Company.
- (m) The statement that, "This utility is regulated by the Michigan Public Service Commission, Lansing, Michigan."

Effective on service rendered on
and after July 23, 1981 under
authority of Order of the Michigan
Public Service Commission dated
July 21, 1981 in Case U-6488.

RULES AND REGULATIONS-Continued

B-2.9 (cont'd.)

- (i) The address and telephone number of the Company designating where the customer may initiate an inquiry or complaint regarding the bill as rendered or the service provided by the Company.
- (j) The statement that, "this utility is regulated by the Michigan Public Service Commission, Lansing, Michigan."
- (k) The number and kinds of units and class of rate. Any tax which the Commission authorizes the utility to collect from its customers, may be included in the total bill without being shown as a separate item. Such bills, however, shall contain a statement thereon to the effect that said bill includes the tax so imposed.
- (l) The average kWh use per day for the current period and the same period one year ago and the percentage change between the two time periods (for domestic rate class customers only).

B-2.10 LATE PAYMENT CHARGE AND DISCOUNTS:

(1) Residential:

A one-time late payment charge of 1-1/2% upon the unpaid balance of any bill rendered for energy use or other approved rates and tariffs outstanding beyond 21 calendar days from the date of physical mailing of the bill will be assessed. This provision is not applicable for Domestic customers who are participating in the Winter Protection Plan described in Case U-4240.

Bills rendered on the Senior Citizen Domestic Service Rate are exempted from the late payment charge.

(2) Other than residential:

A one-time late payment charge of 1-1/2% upon the unpaid balance of any bill rendered for energy use or other approved rates and tariffs outstanding beyond 21 calendar days from the date of physical mailing of the bill will be assessed. This late payment charge will not be applicable to the first late payment of each calendar year, provided that such bill is paid in full on or before the date of physical mailing of the next succeeding billing. This provision is not applicable for domestic service.

B-2.11 HOME INSULATION FINANCE PLAN:

(Applicable to residential accounts only.)—At the request of a residential homeowner customer, The Detroit Edison Company will arrange for the installation of home insulation provided that: (1) the customer's credit rating is satisfactory to Detroit Edison, (2) the customer holds legal title to the premises for which home insulation is sought, and (3) the customer enters into forms of contract and security agreement prepared by Detroit Edison. Detroit Edison will not sell or install insulation, but will subcontract the work to a licensed insulation dealer or contractor participating in this program.

RULES AND REGULATIONS--Continued

B-2.10 LATE PAYMENT CHARGE:

(1) Residential:

The due date shall be 17 days following the date of mailing. A late payment charge of 2%, not compounded, of the unpaid balance, net of taxes, shall be added to any bill which is delinquent as defined by the Commission Rules. The late payment charge shall not apply to customers participating in the Winter Protection Plan described in U-9754.

(2) Other than residential:

A one-time late payment charge of 2% upon the unpaid balance of any bill rendered for energy use or other approved rates and tariffs outstanding beyond 21 calendar days from the date of physical mailing of the bill will be assessed. This late payment charge will not be applicable to the first late payment of each calendar year, provided that such bill is paid in full on or before the date of physical mailing of the next succeeding billing.

B-2.11 (cont'd.)

The terms of the home insulation finance program are as follows:

1. The customer will be furnished with an estimate(s) as to the cost of the desired home insulation, as installed.
2. Detroit Edison will enter into a contract for the installation of the desired home insulation with the customer at a mutually agreed upon price.
3. Detroit Edison will require, at the time of contracting a down payment of at least fifteen percent (15%) of the total contract price. In the event the contract price exceeds \$750.00, the required down payment will be fifteen percent (15%) of the contract price or an amount such that the total amount financed will be \$750.00 or less. The total amount owing prior to the commencement of the installation of the home insulation may not exceed \$750.00.
4. The balance owing on the home insulation contract may be paid in three ways:
 - (1) Upon the completion of the installation of the insulation or within thirty (30) days after the completion of the installation. (Under this option the customer will not incur interest charges.)
 - (2) Commencing thirty (30) days after the completion of the installation of the insulation, the balance owing may be repaid in three equal monthly installments. (Under this option the customer will not incur interest charges.)
 - (3) Over a period not exceeding forty-eight (48) months, commencing thirty (30) days after the completion of the installation of the insulation, the balance owing may be paid in equal monthly installments. Under this option, Detroit Edison will charge interest at the rate of \$8.00 per \$100.00 per annum, computed on the principal amount financed. At all times, the customer will have the option of paying the balance owing in full; in such cases, applicant will make an appropriate reduction in interest charges.

B-2.12 INSULATION STANDARDS FOR ELECTRIC HEATING RATES:

To qualify for electric heating rates, any new or conversion domestic or commercial customer installing electric heat as the primary heat source shall install insulation to meet the following minimum R value, except where it will be impractical in the judgement of the Company.

	R Insulation
Ceiling (*)	35
Sidewall	11
Floors over unheated areas	19
Basement Walls (if used as living area)	11
Slab construction 2" rigid foam around perimeter of slab and extending down vertically or under slab horizontally 24".	

(*) This does not apply to mobile homes or structures with cathedral ceilings or flat deck roofs.

The above standards may be waived for domestic heating customers using supplemental renewable energy heat sources.

B-2.11 (cont'd.)

3. Detroit Edison will require, at the time of contracting a down payment of at least fifteen percent (15%) of the total contract price. In the event the contract price exceeds \$750.00, the required down payment will be fifteen percent (15%) of the contract price or an amount such that the total amount financed will be \$750.00 or less. The total amount owing prior to the commencement of the installation of the home insulation may not exceed \$750.00.
4. The balance owing on the home insulation contract may be paid in three ways:
 - (1) Upon the completion of the installation of the insulation or within thirty (30) days after the completion of the installation. (Under this option the customer will not incur interest charges.)
 - (2) Commencing thirty (30) days after the completion of the installation of the insulation, the balance owing may be repaid in three equal monthly installments. (Under this option the customer will not incur interest charges.)
 - (3) Over a period not exceeding forty-eight (48) months, commencing thirty (30) days after the completion of the installation of the insulation, the balance owing may be paid in equal monthly installments. Under this option, Detroit Edison will charge interest at the rate of \$8.00 per \$100.00 per annum, computed on the principal amount financed. At all times, the customer will have the option of paying the balance owing in full; in such cases, applicant will make an appropriate reduction in interest charges.

B-2.12 INSULATION STANDARDS FOR ELECTRIC HEATING RATES:

To qualify for electric heating rates, any new or conversion residential or commercial customer installing electric heat as the primary heat source shall install insulation to meet the following minimum R value, except where it will be impractical in the judgement of the Company.

	<u>R</u> <u>Insulation</u>
Ceiling (*)	35
Sidewall	11
Floors over unheated areas	19
Basement Walls (if used as living area)	11
Slab construction 2" rigid foam around perimeter of slab and extending down vertically or under slab horizontally 24".	

(*) This does not apply to mobile homes or structures with cathedral ceilings or flat deck roofs.

The above standards may be waived for residential heating customers using supplemental renewable energy heat sources.

B-2.13 ENERGY ASSISTANCE PROGRAM: (RESIDENTIAL CUSTOMERS ONLY)

- (1) Listing of energy assistance programs.

The Commission shall provide a listing of all existing federal and state energy assistance programs and the eligibility requirements thereof to all electric and gas utilities regulated by the Commission.

- (2) Notice of energy assistance programs.

(A) The Company shall annually inform its residential customers of the following information:

- (1) Federal and state energy assistance programs and the eligibility requirements of such programs as provided to the Company by the Commission.
- (2) The winter protection plan described in rule B-2.5 (2)(A).
- (3) The medical emergency provisions of B-2.5 (7).

(B) The utility shall provide the information required by the provision of subrule (A) of this rule as an explanation on the customer's bill, a bill insert, or other transmittal. If the utility does not print an explanation on the customer's bill, then the utility shall, on the customer's bill, direct the customer to the bill insert or other transmittal.

- (3) Additional energy assistance programs.

As further information regarding energy assistance programs becomes available, the Commission shall provide that information to all utilities. Within 60 days of the receipt of such information, the Company shall:

- (A) Provide further information regarding new eligibility requirements for energy assistance programs to all of its customers.
- (B) Provide further information regarding new benefit levels for energy assistance programs to customers currently enrolled in the programs.

B-2.13 ENERGY ASSISTANCE PROGRAM: (RESIDENTIAL CUSTOMERS ONLY)

- (1) Listing of energy assistance programs.

* The Commission shall provide a listing of all existing federal and state energy assistance programs and the eligibility requirements thereof to all electric and gas utilities regulated by the Commission.

- (2) Notice of energy assistance programs.

(A) The Company shall annually inform its residential customers of the following information:

* (1) Federal and state energy assistance programs and the eligibility requirements of such programs as provided to the Company by the Commission.

(2) The winter protection plan described in rule B-2.5 (2)(A).

(3) The medical emergency provisions of B-2.5 (7).

(B) The utility shall provide the information required by the provision of subrule (A) of this rule as an explanation on the customer's bill, a bill insert, or other transmittal. If the utility does not print an explanation on the customer's bill, then the utility shall, on the customer's bill, direct the customer to the bill insert or other transmittal.

- (3) Additional energy assistance programs.

As further information regarding energy assistance programs becomes available, the Commission shall provide that information to all utilities. Within 60 days of the receipt of such information, the Company shall:

(A) Provide further information regarding new eligibility requirements for energy assistance programs to all of its customers.

(B) Provide further information regarding new benefit levels for energy assistance programs to customers currently enrolled in the programs.

B-2.14 UNCOLLECTIBLES ALLOWANCE RECOVERY FUND

(1) A utility shall establish and administer an Uncollectibles Allowance Recovery Fund.

(2) A utility shall annually deposit into its uncollectibles allowance recovery fund the difference between the uncollectibles provision as recorded on the utility's financial records for 1999 less the provision as recorded on the utility's financial records in each subsequent fiscal year.

(3) A utility shall annually disburse the funds placed into its uncollectibles allowance recovery fund according to the following formula:

(a) Twenty-five percent (25%) shall be retained by the utility.

(b) Seventy-five percent (75%) shall be contributed to the Michigan Clean Air Fund of The Department of Environmental Quality for use in programs or projects established to reduce oxides of nitrogen and volatile organic compounds.

REGULATORY AFFAIRS

DETROIT, MICHIGAN

Michigan Public Service
Commission

July 23, 2004

Filed gkb

EFFECTIVE: JULY 24, 2001

ISSUED UNDER AUTHORITY OF THE
MICHIGAN PUBLIC SERVICE COMM.
DATED JULY 11, 2001
IN CASE NO. U-12734

RULES AND REGULATIONS-Continued

B-3.1 CHARACTER OF SERVICE:

The Company furnishes alternating current service at a nominal frequency of 60 hertz, and at 120/240 volts which is suitable for lighting and small single-phase power uses. In certain city districts, alternating current is supplied from a Y connected secondary network at 208Y/120 volts.

For three-phase General Service installations, the Company will provide 208Y/120 volt three-phase four-wire service. The Company may at its option provide 240/120 volt, three-phase four-wire Delta connected service or 480Y/277 volt, three-phase four-wire Y connected service for the customer's entire requirements. Where service is supplied at 480Y/277 volts, the customer must furnish any transformation for the supply of his 120/240 volt requirements.

For primary (high voltage) service, the Company offers alternating current service at nominal 4,800, 13,200, 24,000, 41,570 or 120,000 volts, as available, at the option of the Company. Customers must provide their own switchgear and necessary transformation equipment and the installation must be compatible with the Company's system. The operation and maintenance of this switchgear and equipment shall be the responsibility of the customer.

Before purchasing equipment or installing wiring, the customer should secure from the Company the characteristics of electric service available.

B-3.2 CONTINUITY OF SERVICE:

The Company agrees to furnish continuous and adequate service subject to interruption by agreement, or upon advance notice or by accident or other causes not under the reasonable control of the Company, and except where limitations or hours for controlled service are shown in the Schedule of Rates. The Company will not be liable for damages caused by an interruption of service, voltage or frequency variations, single-phase supply to three-phase lines, reversal of phase rotation, or carrier-current frequencies imposed by the Company for system operations or equipment control except such as result from the failure of the Company to exercise reasonable care and skill in furnishing the service. Therefore, the customer should install suitable protective equipment if such occurrences might damage his apparatus.

NOTWITHSTANDING ANY OTHER PROVISION OF THESE RULES, THE COMPANY MAY INTERRUPT, CURTAIL, OR SUSPEND ELECTRIC SERVICE TO ALL OR SOME OF ITS CUSTOMERS BY STATUTE OR IN ACCORDANCE WITH THE PROVISIONS OF THE ORDER APPROVED BY THE MICHIGAN PUBLIC SERVICE COMMISSION ON MAY 23, 1975, AND AS AMENDED ON DECEMBER 11, 1979, IN CASE NO. U-4128, OR SUBSEQUENT ORDERS, AND THE COMPANY SHALL BE UNDER NO LIABILITY WITH RESPECT TO ANY SUCH INTERRUPTION, CURTAILMENT, OR SUSPENSION.

RULES AND REGULATIONS—Continued

B-3.3 EXTENSION OF SERVICE:

Upon application for new or increased service, the Company will make extensions or alterations of its electric supply facilities under the following conditions, provided that the service applied for will not disturb or impair the service to existing customers.

(1) GENERAL:

- (a) Each installation shall be a separate distinct unit and any further extension therefrom shall have no effect upon any agreement under which previous installations were constructed.
- (b) The applicant shall furnish, without cost to the Company, all necessary right-of-way and tree trimming permits in a form satisfactory to the Company. If the applicant is unable to secure satisfactory right-of-way permits, the Company shall extend its facilities along an alternate route selected by the Company. The applicant will be required to pay all additional costs incurred.
- (c) The Company normally provides overhead construction for its electric supply lines. Underground construction will be provided at the option of the Company for its own convenience where necessary for public safety and where overhead construction is impractical.
- (d) Existing rules issued by the Michigan Public Service Commission require that distribution systems in a new residential subdivision and commercial distribution and service lines in the vicinity of or on the customer's property and constructed solely to serve a customer or a group of adjacent customers be placed underground. Commercial distribution specifically includes, but is not limited to, apartment house complexes and shopping centers.

An exception to the foregoing mandatory requirement for undergrounding may be made where, in the Company's judgment, any of the following conditions exist:

- (1) Such facilities would serve General Service customers having loads of temporary duration; or
- (2) Such facilities would serve General Service customers in areas where little aesthetic improvement would be realized if such facilities were placed underground; or
- (3) Such facilities would serve General Service customers in areas where it is impractical to design and place such facilities underground because of uncertainty of the size and character of the loads to be served therefrom.
- (e) In all underground extensions of electric distribution facilities as covered by these rules, the applicant shall make a contribution in aid of construction to the utility in an amount equal to the estimated difference in cost between overhead and underground facilities in accordance with Rules B-3.4 and B-3.5.

REMOVED BY JEL

RULES AND REGULATIONS-Continued

B-3.3 (cont'd.)

- (f) The Company will extend its underground distribution facilities for single-phase service within designated underground districts subject to the conditions specified in Underground Distribution Systems Rule B-3.4. When circumstances require and when demand justifies, the Company will extend its underground distribution facilities for three-phase service and for service to industrial subdivisions and single occupancy buildings within designated underground districts subject to the conditions specified in Underground Service Connections Rule B-3.5.
- (g) Residential subdivisions and other areas where commercial distribution and service lines are constructed solely to serve a customer or a group of adjacent customers, as covered by the rules of the Michigan Public Service Commission requiring mandatory undergrounding of electric distribution facilities, shall be designated underground districts. In addition, those areas for which the owner has requested underground service shall also be designated as underground districts.
- (h) The Company will not undertake the replacement of existing overhead lines and above-surface equipment with underground installations or provide underground installations for transmission lines, subtransmission lines, distribution feeders and above-surface electric equipment associated with switching stations except where agreements for reimbursement are made in accordance with MPSC R-460.516, "Replacement of Existing Overhead Facilities," Rule 6, as follows:

"Before construction is started, the customer shall be required to pay the utility the depreciated cost (net cost) of the existing overhead facilities, plus the cost of removal, less the salvage value thereof and, also, make a contribution in aid of construction in an amount equal to the estimated difference in cost between new underground and new overhead facilities including, but not limited to, the cost of breaking and repairing streets, walks, parking lots and driveways, and of repairing lawns and replacing grass, shrubs and flowers."

- (i) The Company reserves the right to make special contractual arrangements as to the provision of necessary service facilities, duration of contract, customer advances for construction, contributions in aid of construction, deposits, amounts of refunds, minimum bills, service charges or other service conditions. This applies to existing customers and prospective customers whose load requirements exceed the capacity of the available system in the area or whose load characteristics or special service needs require unusual or additional investments by the Company or where there is not sufficient assurance of the permanence of the use of the service.

The Company will construct underground electric distribution facilities and extensions only in the event that it is able to obtain or use the necessary materials, equipment and supplies. Subject to the review by the Michigan Public Service Commission, the Company reserves the right to allocate the use of such materials, equipment and supplies as it may have on hand from time to time among the various customers and prospective customers of the same class.

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS-Continued

B-3.3 (cont'd.)

- (j) If temporary overhead or underground facilities are required, Rule B-3.6, "Temporary Service," shall apply.

(2) CUSTOMERS ON RATES D1 AND D2:

(a) Overhead Extension Policy:

Applications for electric service which require the construction of an extension to the Overhead System will be granted under the following conditions:

(1) Standard Allowance:

For each permanent year-round dwelling, the Company will construct single-phase distribution line extensions at its own cost a distance of 1000 feet, of which no more than 250 feet will be on the customer's property. For each permanent seasonal-type dwelling, the Company will construct single-phase distribution line extensions a distance of 200 feet, of which no more than 100 feet will be on the customer's property. If the distribution line is constructed such that it can be available to serve only two premises (joint lot-line construction), such extension shall be considered as a Lateral Extension, and the customer(s) requesting service shall each be granted up to 250 feet free footage if permanent year-round, or up to 100 feet free footage if permanent seasonal. For purposes of this policy, secondary voltage distribution lines shall not be considered as a line extension.

(2) Customer Advances for Construction:

Distribution line extensions beyond the above standard allowance will require a customer advance for construction of \$1.75 per lineal foot, measured from pole to pole, plus a non-refundable contribution for the estimated tree trimming cost for such excess footage. The advance and contribution must be paid prior to the beginning of construction of the extension.

(b) Underground Extension Policy:

(1) Standard Allowance:

The Company will construct distribution circuit extensions at its own cost when the estimated direct construction cost, excluding engineering overhead costs and administrative costs of such extensions less any required contributions for underground distribution systems, does not exceed two times the estimated average annual revenue to be received from the customer(s) to be immediately served. Where an underground extension is to be installed other than in a residential subdivision and the cost of such extension is less than that of an equivalent overhead extension, the extension shall be made in accordance with Section (2)(a).

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS-Continued

B-3.3 (cont'd.)

(2) Customer Advances for Construction:

Extensions involving costs in excess of the above standard allowance will require a customer advance for construction to be made in the amount by which the standard allowance is exceeded. The advance must be paid prior to the beginning of construction of the extension.

(c) Refund of Advances:

(1) The Company will refund to the party making the advance the sum of \$500.00 for each additional residential customer(s) and two times the actual annual revenue of other customers directly connected to the extension whether by secondary voltage lines or primary lateral extension. Refunds will not be made until the original customer(s) or its equivalent are actually connected to the extension.

(2) Refunds under part (c) (1) of this rule shall be made without interest for a five-year period which begins the first day of the month subsequent to the first full billing period after the date the service is energized. However, if the customer fails to take service within six months after an extension has been completed, refunds will be made for a five-year period which begins on the 15th day of the month following the completion of the line extension construction. The Company shall have no further obligation to refund any remaining portion of the advance. Any unrefunded advance will be considered a permanent contribution in aid of construction. The total amount refunded cannot exceed the amount of the advance under any conditions.

(3) CUSTOMERS ON RATES OTHER THAN D1 OR D2:

(a) For all installations: Applications for electric service which require the construction of a system line extension will be granted under the following conditions:

(1) Standard Allowance:

The Company will construct a system line extension at its own cost when the estimated construction cost, less contributions, if any, required for the underground installation of facilities does not exceed two times the estimated average annual revenue from the customer(s) to be immediately served.

(2) Customer Advances for Construction:

Extensions involving costs in excess of the above standard allowance will require a customer advance for construction to be made in the amount by which the standard allowance is exceeded. The advance must be paid prior to the beginning of construction of the extension.

RULES AND REGULATIONS-Continued

B-3.3 (cont'd.)

(3) Refund of Advances:

The Company will refund to the party making the advance two times the actual annual revenue of all customers directly connected to the extension whether by secondary voltage lines or limited purpose primary voltage lines. Refunds will not be made until the original customer(s) estimated revenues are exceeded by actual revenues as a result of the line extension.

Refunds shall be made without interest for a five-year period which begins the first day of the month subsequent to the first full billing period after the date service is energized. However, if the customer fails to take service within six months after an extension has been completed, refunds will be made for a five-year period which begins on the 15th day of the month following the completion of the line extension construction. The Company shall have no further obligation to refund any remaining portion of the advance. Any unrefunded advance will become a permanent contribution in aid of construction. The total amount refunded will not exceed the amount of the advance under any conditions.

B-3.4 (1) **UNDERGROUND DISTRIBUTION SYSTEMS:**

The Company will install an underground electric distribution system for all new residential subdivisions, mobile home parks, multiple occupancy building complexes, and commercial subdivisions, in cooperation with the developer or owner, evidenced by a signed agreement, and in compliance with the following specific conditions:

The developer or owner must provide for recorded easements or rights-of-way acceptable to the Company. The easements are to be coordinated with other utilities and will include easements for street lighting cable.

The developer or owner must provide for grading the easement to finished grade and for clearing the easement of trees, large stumps and obstructions sufficiently to allow trenching equipment to operate. Survey stakes indicating easements, lot lines and grade must be in place. The developer or owner must certify to the Company that the easements are graded to within four (4) inches of final grade before the underground distribution facilities are installed.

In addition, the developer or owner must make non-refundable contributions for specific underground distribution systems as stated in this rule. If trenching is required where practical difficulties exist, such as in rock or sodden ground or boring under streets, driveways, patios or any other paved areas, the per foot charges stated in this rule shall not apply; and the contribution in aid of construction shall be an amount equal to the total cost differential between overhead and underground construction costs, but not less than the amount calculated on the per foot basis.

RULES AND REGULATIONS-Continued

B-3.3 (cont'd.)

(3) Refund of Advances:

The Company will refund to the party making the advance two times the actual annual revenue of all customers directly connected to the extension whether by secondary voltage lines or limited purpose primary voltage lines. Refunds will not be made until the original customer(s) estimated revenues are exceeded by actual revenues as a result of the line extension.

Refunds shall be made without interest for a five-year period which begins the first day of the month subsequent to the first full billing period after the date service is energized. The Company shall have no further obligation to refund any remaining portion of the advance. Any unrefunded advance will become a permanent contribution in aid of construction. The total amount refunded will not exceed the amount of the advance under any conditions.

B-3.4 (1) UNDERGROUND DISTRIBUTION SYSTEMS:

The Company will install an underground electric distribution system for all new residential subdivisions, mobile home parks, multiple occupancy building complexes, and commercial subdivisions, in cooperation with the developer or owner, evidenced by a signed agreement, and in compliance with the following specific conditions:

The developer or owner must provide for recorded easements or rights-of-way acceptable to the Company. The easements are to be coordinated with other utilities and will include easements for street lighting cable.

The developer or owner must provide for grading the easement to finished grade and for clearing the easement of trees, large stumps and obstructions sufficiently to allow trenching equipment to operate. Survey stakes indicating easements, lot lines and grade must be in place. The developer or owner must certify to the Company that the easements are graded to within four (4) inches of final grade before the underground distribution facilities are installed.

In addition, the developer or owner must make non-refundable contributions for specific underground distribution systems as stated in this rule. If trenching is required where practical difficulties exist, such as in rock or sodden ground or boring under streets, driveways, patios or any other paved areas, the per foot charges stated in this rule shall not apply; and the contribution in aid of construction shall be an amount equal to the total cost differential between overhead and underground construction costs, but not less than the amount calculated on the per foot basis.

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS-Continued

B-3.4 (cont'd.)

The developer or owner will be responsible for any costs of relocating Company facilities to accommodate changes in grade or other changes after underground equipment is installed, and also be responsible for any damage to Company facilities caused by his operations or the operations of his contractors. An amount equal to the total costs involved, including overheads, is required for relocation or rearrangement of facilities whether specifically requested by the developer or owner, or due to the facilities becoming endangered by a change in grade.

An additional amount of \$1.00 per trench foot shall be added to charges for practical difficulties associated with winter construction in the period from December 15 to March 31, inclusive. This charge will not apply to jobs which are ready for construction and for which the construction meeting has been held prior to November 1.

(2) DISTRIBUTION FOR RESIDENTIAL SUBDIVISIONS:

For purposes of definition, all one-family and two-family buildings on individual lots are residential. The Company will furnish, install, own and maintain the entire underground electric distribution system including the service lateral cables for new residential subdivisions. The trenches for primary or secondary main cables will be occupied jointly by facilities of the Company and other utilities where satisfactory agreement for reimbursement exists between the Company and other utilities.

The service normally available from the system will be at secondary voltage, single-phase, 120/240 volt, three-wire, 60 Hz. Three-phase service will be made available for schools, pumping stations, and other special installations only under terms of a separate agreement. Certain related equipment, such as pad-mounted transformers, switching equipment and service pedestals may be above grade. The area must be suitable for the direct burial installations of cable.

The developer or owner will pay to the Company an amount equal to the sum of lot front-foot measurements multiplied by \$1.75 for installation of primary or secondary main cables within the subdivision.

The front-foot measurement of each lot to be served by a residential underground distribution system will be made along the contour of the front lot line. The front lot line is that line which usually borders on or is adjacent to a street. However, when streets border on more than one side of a lot, the shortest dimension will be used. In the case of a curved lot line which borders a street or streets and represents at least two sides of the lot, the front-foot measurement will be considered as one-half the total measurement of the curved lot line.

The use of the lot front-foot measurements in these rules shall not be construed to require that the underground electric distribution system be placed at the front of the lot.

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS-Continued

B-3.4 (cont'd.)

The developer or owner will also pay to the Company \$2.00 per trench foot for service lateral cables. The measured length is determined by measuring from the termination of the Company facilities at the property line along the route of the trench to a point directly beneath the electric meter. In addition, an amount equal to \$2.00 per foot must be contributed by the customer for conduit installed under proposed patios, driveways or any location for which conduit is requested by the customer.

Where sewer lines will parallel Company cables, sewer taps must be extended into each lot for a distance of four (4) feet beyond the route of the cables prior to installation of the cables.

The property owner shall not make any changes in established grade in or near the easement that will interfere with utility facilities already installed. In the event the property owner requests relocation of facilities, or such facilities are endangered by change in grade, the property owner shall pay the cost of the relocation or rearrangement of the facilities.

(3) DISTRIBUTION FOR RESIDENTIAL PURPOSES OUTSIDE OF SUBDIVISIONS:

Outside of residential subdivisions where the installation of underground distribution facilities is requested, a charge for these facilities will be made equal to the estimated total difference in cost between overhead and underground construction costs.

The developer or owner will also pay to the Company \$2.00 per trench foot for service lateral cables. The measured length is determined by measuring from the termination of the Company facilities at the property line along the route of the trench to a point directly beneath the electric meter. In addition, an amount equal to \$2.00 per foot must be contributed by the customer for conduit installed under proposed patios, driveways or any location for which conduit is requested by the customer.

(4) DISTRIBUTION FOR MOBILE HOME PARKS:

The Company will furnish, install, own and maintain the entire underground electric distribution system including the pre-meter portion of the service lateral cables for new mobile home parks. The trenches for primary or secondary main cables will be occupied jointly by facilities of the Company and other utilities where satisfactory agreement for reimbursement exists between the Company and the other utilities. For purposes of this rule, the definition of a mobile home park is a parcel or tract of land under the control of a person(s) upon which three or more mobile homes are located on a continual non-recreational basis not intended for use as a temporary trailer park.

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS-Continued

B-3.4 (cont'd.)

The service for tenant loads normally available from the system will be at secondary voltage, single-phase, 120/240 volt, three-wire, 60 Hz. Three-phase service will be made available for pumps and service installations only under terms of a separate agreement. Certain related equipment, such as pad-mounted transformers, switching equipment and service pedestals may be above grade. The area must be suitable for the direct burial installation of cable.

This service is limited to mobile home parks in which the service is metered by the Company at secondary voltage.

The park owner will pay to the Company prior to construction, an amount arrived at by multiplying the total length of trench feet required for distribution facilities and/or service laterals by \$1.90, plus \$4.00 per kVA (nameplate) of transformer capacity to be installed.

Company cables shall be separated by at least three feet from paralleling underground facilities which do not share the same trench. The park owner's cable systems, such as community antenna systems, should be in separate trenches, if possible. Subject to an agreement with the Company, these cable systems may occupy the same trench. The park owner must agree to pay a share of the trenching cost plus the extra cost of the additional backfill, if required, and agree to notify the other using utilities when maintenance of his cables requires digging in the easement.

The park owner must provide for each mobile home lot a meter pedestal of a design acceptable to the Company.

In the event the park owner requests relocation of facilities or such facilities are endangered by change in grade, the park owner shall pay the cost of the relocation or rearrangement of the facilities.

(5) DISTRIBUTION FOR CONDOMINIUMS AND APARTMENT HOUSE COMPLEXES:

The Company will furnish, install, own and maintain the entire underground electric distribution system including the pre-meter portion of the service lateral cables up to each new multiple occupancy building in the complex. Generally, the trenches will be occupied jointly by facilities of the Company and other utilities where satisfactory agreement for reimbursement exists between the Company and the other utilities.

The service for tenant loads normally available from the system will be at secondary voltage, single-phase, three-wire, 60 Hz. Three-phase service will be made available for motors required for building operations and to commercial tenants only under terms of a separate agreement. Certain related equipment, such as pad-mounted transformers, switching equipment and service pedestals, may be above grade.

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

ORDER 49498
APR 12 1999
JOK

RULES AND REGULATIONS-Continued

B-3.4 (cont'd.)

This service is limited to multiple occupancy buildings in which service is metered by the Company at secondary voltage. These include, but are not limited to, low-rise apartments, townhouses, condominiums and cluster housing where space is available for pad-mounted transformers and other above-grade equipment and the area is suitable for the direct burial installation of cable. Where the developer and/or the Company are concerned that the easement area could be developed with patios, etc., special facilities such as conduit may be required to allow Edison to maintain the system. If special facilities are required, the developer will be responsible for providing them.

The owner will pay to the Company, prior to construction, an amount arrived at by multiplying the total length of trench feet required for distribution facilities and/or service laterals by \$1.90, plus \$4.00 per kVA (nameplate) of transformer capacity to be installed.

In the event the building owner requests relocation of facilities or such facilities are endangered by change in grade, the building owner shall pay the cost of the relocation or rearrangement of the facilities.

(6) DISTRIBUTION FOR COMMERCIAL AND INDUSTRIAL SUBDIVISIONS:

The Company will furnish, install, own and maintain the entire underground electric distribution system for new commercial and, where requested, industrial subdivisions. Generally, the trenches will be occupied jointly by facilities of the Company and other utilities where satisfactory agreement for reimbursement exists between the Company and the other utilities.

The service for individual customers within the subdivision will be furnished as provided for in Underground Service Connections Rule B-3.5.

The developer or owner must provide suitable space and necessary foundations for pad-mounted transformers, primary switching equipment, and other above grade equipment and provide trenching, back filling, conduits and manholes acceptable to the Company for the installation of the distribution system on his property.

The owner will pay to the Company an amount arrived at by multiplying the length in feet of the distribution facilities to be installed by \$1.90 per trench foot, plus \$4.00 per kVA (nameplate) of transformer capacity to be installed.

In the event the building owner requests relocation of facilities or such facilities are endangered by change in grade, the building owner shall pay the cost of the relocation or rearrangement of the facilities.

B-3.5 UNDERGROUND SERVICE CONNECTIONS:

The Company will install underground service connections to commercial and industrial customers and other installations within designated underground districts in cooperation with the developer or owner, evidenced by a separate, signed agreement, subject to the following specific conditions:

(Continued on next sheet)

Issued: July 21, 1981

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

49498
APR 12 1993
jes

RULES AND REGULATIONS-Continued

B-3.5 (cont'd.)

The developer or owner must provide suitable space and provide trenching, backfilling and conduits acceptable to the Company for installation of service cables on his property.

(1) Outdoor Pad-Mounted Installation:

- (a) The Company will furnish, install, own and maintain the pre-meter portion of the individual service lateral where the conductor size does not exceed single 1/0 copper or 2/0 aluminum per phase.
- (b) When a commercial or industrial building is divided in such a manner as to require several 1/0 copper or 2/0 aluminum services (as described above), the owner shall be required to make provisions for a common pre-meter feed either by grouping meters in a manner acceptable to the Company, or by installing a secondary connection cabinet on the exterior of the building. The Company will furnish, install in the customers' conduits, own and maintain an appropriately sized lateral from the Company's distribution facilities to the common point regardless of cable size. The general limit on service laterals in this instance is 25 feet.
- (c) Where service laterals are installed by the Company as in (a) or (b) above, the owner or developer will pay to the Company an amount arrived at by multiplying the horizontal length of the service lateral in feet by \$4.00.
- (d) Where service laterals are required for situations not covered in (b) and (c) above, the customer will furnish and install the service lateral in a manner suitable to the Company. The Company will make connection of the customer furnished lateral to its distribution system.

(2) Indoor Transformer Installation:

Service can be furnished with Company-owned transformers at remote locations fed from customer-owned primary cables in the building. The transformers will be installed by the customer. The cables will be furnished, installed, owned and maintained by the customer and will be terminated in primary switching equipment located near the service entrance point of the building. The Company will furnish, install, own and maintain the entire underground electric distribution system from the property line to and including the primary switching equipment. The customer will furnish, install, own and maintain the secondary cable between the transformer secondary terminals and the tenant meter location. The meters must be grouped and installed in a manner acceptable to the Company. The load at each transformer location must be sufficient to justify the use of one standard Company transformer or multiples thereof. Standard Company transformer sizes and secondary voltages for this application are: 167 kVA single-phase 120/240 V, 300 kVA three-phase 208Y/120 V and 300 kVA three-phase 480Y/277 V. The fuse cabinet and associated equipment will be furnished, owned and maintained by the Company at each transformer location. The fuse cabinet and associated equipment will be paid for and installed by the customer. The transformer locations must be suitable for the installation of dry type transformers and must be accessible for operation and maintenance. The installation must be approved by the Company and must meet code requirements.

RULES AND REGULATIONS-Continued

B-3.5 (cont'd.)

The developer or owner must provide suitable space and provide trenching, backfilling and conduits acceptable to the Company for installation of service cables on his property.

(1) Outdoor Pad-Mounted Installation:

- (a) The Company will furnish, install, own and maintain the pre-meter portion of the individual service lateral where the conductor size does not exceed single 1/0 copper or 2/0 aluminum per phase.
- (b) When a commercial or industrial building is divided in such a manner as to require several 1/0 copper or 2/0 aluminum services (as described above), the owner shall be required to make provisions for a common pre-meter feed either by grouping meters in a manner acceptable to the Company, or by installing a secondary connection cabinet on the exterior of the building. The Company will furnish, install in the customers' conduits, own and maintain an appropriately sized lateral from the Company's distribution facilities to the common point regardless of cable size. The general limit on service laterals in this instance is 25 feet.
- (c) Where service laterals are installed by the Company as in (a) or (b) above, the owner or developer will pay to the Company an amount arrived at by multiplying the horizontal length of the service lateral in feet by \$4.00.
- (d) Where service laterals are required for situations not covered in (b) and (c) above, the customer will furnish and install the service lateral in a manner suitable to the Company. The Company will make connection of the customer furnished lateral to its distribution system.

(2) Indoor Transformer Installation:

Service can be furnished with Company-owned transformers at remote locations fed from customer-owned primary cables in the building. The transformers will be installed by the customer. The cables will be furnished, installed, owned and maintained by the customer and will be terminated in primary switching equipment located near the service entrance point of the building. The Company will furnish, install, own and maintain the entire underground electric distribution system from the property line to and including the primary switching equipment. The customer will furnish, install, own and maintain the secondary cable between the transformer secondary terminals and the tenant meter location. The meters must be grouped and installed in a manner acceptable to the Company. The load at each transformer location must be sufficient to justify the use of one standard Company transformer or multiples thereof. Standard Company transformer sizes and secondary voltages for this application are: 167 kVA single-phase 120/240 V, 300 kVA three-phase 208Y/120 V and 300 kVA three-phase 480Y/277 V. Fused disconnects acceptable to the Company will be furnished, installed, owned and maintained by the customer at each transformer location. The transformer locations must be suitable for the installation of dry type transformers and must be accessible for operation and maintenance. The installations must be approved by the Company and must meet code requirements.

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

RULES AND REGULATIONS--Continued

B-3.5 (cont'd.)

Suitable access and means shall be provided for transformer, fuse cabinets and associated equipment replacement. The customer shall be responsible for all damages and personal liability arising out of or in connection with the installation of the Company's transformers, fuse cabinets and associated equipment and shall also take reasonable steps to prevent damage to the transformers, fuse cabinets and associated equipment while they are installed on the customer's property.

The owner will pay the following charges to the Company:

- (a) \$1.90 per trench foot of cable on private property between the primary switching equipment and the property lines nearest the point of connection to the Edison distribution system--plus any other Company charges for unusual conditions.
- (b) The installed cost of the primary switchgear.
- (c) \$15 per kVA for all dry type transformers and \$4 per kVA for pad-mount transformers.
- (d) The delivered cost of the fuse cabinet and associated equipment.
- (e) The developer or owner must provide suitable space and necessary foundations for pad-mounted transformer and the primary switchgear, etc., and must provide for any trenching, conduit, or manholes acceptable to the Company.

(3) Metered Primary Voltage:

For underground primary (high voltage) services, the Company will extend its conduit to the property line. The customer will pay for the underground-overhead cost differential for that portion of the off-site facilities that may be required to serve the customer. That part of the service connection on private property inside the property line will be owned and maintained by the customer. The design, construction and material for high voltage service shall be acceptable to the Company. In the case of commercial and industrial subdivisions, the costs, requirements, and agreements between the developer or owner and the Company will be set forth in Distribution for Commercial Subdivisions.

Subtransmission underground cables feeding Company-owned substations on private property will be furnished and maintained by the Company. The customer will provide trenching and install and maintain the conduit and manholes for these cables.

B-3.6 TEMPORARY SERVICE:

The Company will furnish temporary service including a line extension, service connection and a transformer, as required. The applicant for the service shall pay the accounts receivable cost of furnishing, installing and removing such temporary service equipment in excess of any salvage realized, in addition to charges for electric service rendered. The charges for electric service will be billed to the applicant at the applicable metered rate. When the applicant requires the installation of a transformer, the monthly charge for electric service rendered will not be less than the following:

- (a) 48¢ per kVA of installed transformer capacity for the first 10 kVA.
- (b) 12¢ per kVA of installed transformer capacity in excess of 10 kVA.

The contract is an open order, terminable on three days' written notice by either the applicant or the Company.

When an unauthorized connection has been made which provides unmetered service to the customer, the Company shall charge the accounts receivable cost as stated above for the "Temporary Service Connection," plus an amount to cover the Company's estimation of kilowatthour usage at the applicable rate.

RULES AND REGULATIONS-Continued

B-3.7 (cont'd.)

- (b) Implement procedures for mandatory curtailment of service to customers covered in Section 3 C(2)(b) to levels specified by Consumers Power and Detroit Edison, such curtailment to be not more than 50% of such customer's respective monthly base period use.

As a measure of last resort, manual load shedding of firm customer loads will be initiated as necessary to preserve the integrity of the system. Voltage may be reduced up to six percent if at any time it is deemed appropriate by Consumers Power and Detroit Edison to maintain the integrity of the system.

4. PENALTIES:

Demand use in excess of that permitted under a curtailment instituted pursuant to Sections 3 A(6), A(9) or A(11) shall be subject to an excess demand charge per kW of up to 15 times the average cost per kW of the capacity or demand related charges for the billing month in question. The first 15% of excess demand shall be penalized at a rate of 5 times the average cost per kW of capacity or demand related charges for the billing month in question, the next 15% of excess demand shall be penalized at a rate of 10 times the average cost per kW of the capacity or demand related charges for the billing month in question, and all additional excess demand shall be penalized at a rate of 15 times the average cost per kW of the capacity or demand related charges for the billing month in question.

Energy use in excess of that permitted under a curtailment instituted pursuant to Sections 3 B(2)(b), B(2)(e), B(2)(g), C(2)(b), C(3)(c) and C(4)(b) shall be subject to an excess charge per kWh of up to 15 times the average cost per kWh of the energy related charges for the billing month in question. The first 15% of excess energy use shall be penalized at a rate of 5 times the average cost per kWh for the billing month in question, the next 15% of excess energy use shall be penalized at a rate of 10 times the average cost per kWh for the billing month in question, and all additional excess energy use shall be penalized at a rate of 15 times the average cost per kWh for the billing month in question.

Such charges shall be in addition to the regular rates under which service is supplied. Customers failing to comply with the specified reductions for more than a 60-day period will be subject to disconnection upon 24 hours' written notice for the duration of the emergency.

The "ratchet" clause of the on-peak minimum billing demand provision for rates D, F and J (Consumers Power Company) and rates D4, D6, D6.1, D7 and E4 (The Detroit Edison Company) will be waived during periods when the long-term portion of these procedures are in effect for those customers who are affected by the clause due to their efforts to conserve energy or reduce demand.

RULES AND REGULATIONS-CONTINUED

B-3.8 PARALLEL OPERATION AND STANDBY SERVICE:

- (1) Customers who desire to run electrical generating equipment in parallel with the Company's system or customers who desire the Company to serve load that is normally served by another source of energy or by the customer's generator or prime mover must have written permission by the Company for parallel operation and must take standby service under the provisions of Rider No. 3, except as provided for in paragraph (2) below.
- (2) Any customer operating in parallel with the Company's system under written permission by the Company but not taking service under Rider No. 3 as of the January 1, 1989, will not be required to take service under Rider No. 3 as long as there is no change in the customer's generating facilities or other source of energy.
- (3) The customer must meet the interconnection requirements of Detroit Edison specified in "Protective Relaying Operating and Telemetering Guidelines for Independently-Owned Generation", published by the Company, as approved by the Michigan Public Service Commission, before parallel operation will be permitted. On or before March 30, 1989, the Company will petition the Michigan Public Service Commission for this approval. The Company must approve in writing any subsequent changes in the interconnection configuration before such changes are allowed. Operating in parallel with the Company's system without written approval by the Company of the interconnection and any subsequent changes to the interconnection will make the customer subject to disconnection. The Company will respond to requests for interconnection, granting or denying, within 20 working days of the receipt of the request provided that the request conforms to the Company's interconnection requirements as specified.

RULES AND REGULATIONS—Continued

B-4.1 (1) DEPOSIT PROCEDURE FOR COMMERCIAL AND INDUSTRIAL ACCOUNTS:

(a) Customer Deposits - New Customers

- (1) Except as provided in subdivision (2) of this subrule, the Company shall not require a deposit from a new customer as a condition of receiving service. The Company may, with proper notification, require a deposit from a new customer if the customer exhibits an unsatisfactory record of bill payment within the first 6 months after service has commenced. Payment of bills on or before the due date shall constitute a satisfactory record of bill payment.
- (2) The Company may require a deposit for a new customer in cases involving service for short periods or special occasions, in cases where the new customer has an existing bad debt with the Company, or in cases where other business accounts with the customer are experiencing collection activity.

(b) Customer Deposits - Existing Customers

- (1) An existing customer shall be classified as one who has received service for more than a 6-month period. A deposit may be required following the mailing of 2 or more final disconnect notices within the most recent 12-month period or if service has been discontinued for nonpayment.

(c) Deposit Requirements

- (1) A deposit of not more than 3 times an average monthly billing may be required from customers who are subject to deposit provisions. The Company shall provide reasonable terms for the payment of the deposit.
- (2) A deposit may be retained by the Company until the customer compiles a record of 18 continuous months of bill payment on or before the due date.
- (3) Simple interest on deposits at the rate of not less than 9% per annum shall be paid by the Company to each customer who is required to make such deposit for the time the deposit is held by the Company. Interest need not be paid unless the deposit is held for more than 12 months. Payment of the interest to the customer shall be made annually if requested by the customer. If payment of the interest is not requested, the interest shall be paid at the time the deposit is returned. Interest shall be accrued annually. The deposit shall cease to draw interest on the date the deposit is returned, on the date service is terminated, or on the date that notice that the deposit is no longer required is sent to the customer's last known address.
- (4) Each Company shall keep records which show all of the following information:
 - (a) The name and address of each depositor.
 - (b) The amount and date of the deposit.
 - (c) Each transaction concerning the deposit.
- (5) The Company shall issue a receipt of deposit to each customer from whom a deposit is received and shall provide means whereby a depositor may establish his or her claim if his or her receipt is lost. A record of each unclaimed deposit shall be maintained for not less than 3 years, during which time the Company shall make a reasonable effort to return the deposit. Unclaimed deposits, together with accrued interest, shall be credited to an appropriate account and shall be disposed of pursuant to Michigan statutes.

RULES AND REGULATIONS-Continued

B-4.1 (1) CREDIT REQUIREMENTS (For Accounts Other Than Residential):

The Company may require the customer to make a reasonable cash deposit at anytime to secure the prompt payment of bills.

- (a) If at anytime the Company deems any cash deposit to be inadequate, the customer may be required to make an additional deposit.
- (b) Deposits may be used to satisfy any unpaid balance on a closed account, but will not be applied to bills owing on an active account. Any remaining balance of a deposit and accrued interest will be returned to the customer upon termination of his service.
- (c) Interest at the rate of 6% per annum shall be payable on all such deposits for the time the deposit is held by the Company and service is taken by the customer.

DEPOSIT PROCEDURE AS APPLICABLE TO DOMESTIC ACCOUNTS (Commission Order U-4240):

(2) DEPOSITS; NEW SERVICE:

The Company will not require a cash deposit or other guarantee as a condition of new service unless the customer has an unsatisfactory credit or service standing with the Company due to any of the following:

- (a) The customer has outstanding a prior utility service account with any utility which accrued within the last six years and at the time of the request for service remains unpaid and not in dispute.
- (b) The applicant or customer misrepresents his or her identity or credit standing at the time of application for new service, thus avoiding disclosure of pertinent credit information.
- (c) The customer has, in an unauthorized manner, interfered with the service of the utility situated or delivered on or about the customer's premises within the last 6 years, if such finding of unauthorized interference or use is made and determined after notice and opportunity for hearing is provided to the customer pursuant to these rules and is not in dispute.
- (d) The customer or applicant requests service at a residence in which he or she does not reside.
- (e) The utility has had 2 or more checks for the customer's account returned from a bank within the past 3 years for insufficient funds or no account, excluding bank error.
- (f) The customer or applicant requests service at a household that was inhabited by the customer or applicant during a period in which all or a part of a prior past due service account was incurred by another household member who still resides at the household, if, at the time of the request for service, the account remains unpaid and is not in dispute.

(2) DEPOSITS, NEW SERVICE:

The Company may require a cash deposit as a condition of new service due to any of the following provisions:

- (a) The applicant has a delinquent bill with any electric or gas provider that accrued within the last 6 years, and that, at the time of the request for service, remains unpaid and is not in dispute.
- (b) The applicant misrepresents his or her identity or credit standing.
- (c) The applicant fails to provide complete positive identification information upon request at the time of applying for new service, to the extent a request for such information is not barred by B4.1(4)(3).
- (d) The applicant is a previous customer who has, in an unauthorized manner, used, diverted, or interfered with the service of the Company situated or delivered on or about the customer's premises within the last 6 years, if such finding of unauthorized use, diversion, or interference is made after notice and an opportunity for a hearing under these rules.
- (e) The applicant requests service at a residence in which he or she does not reside.
- (f) The applicant was a household member during a period in which all or part of a delinquent service account was accrued by another household member who currently resides with the applicant, if, at the time of the request for service, the account remains unpaid and is not in dispute.
- (g) The applicant is unable to provide prior utility service history information with any regulated or unregulated utility in Michigan or elsewhere during the last 6 years and has an unfavorable commercial credit rating caused by 3 or more delinquent payments of more than 60 days in the last 2 years.
- (h) A receiver has been appointed in a court proceeding within the last 6 years.
- (i) As allowed by Federal bankruptcy law, the applicant has sought relief under Federal bankruptcy laws within the last 6 years.
- (j) The Company shall not require a cash deposit as a condition of new service if any of the following provisions apply:
 - 1. The Family Independence Agency is responsible for making monthly payments to a utility on behalf of the applicant.
 - 2. Where the applicant secures a guarantor who is a customer of good standing with the Company.
 - 3. None of the conditions described in SubRule (1) of this rule applies to the applicant.
 - 4. The applicant is over 65 years of age and has no negative credit history with any gas or electric provider.

- (d) The applicant requests service at a residence in which he or she does not reside.
- (e) The Company has had 2 or more checks for the customer's account returned from a bank within the past 3 years for insufficient funds or no account, excluding bank error.
- (f) The applicant requests service at a household that was inhabited by the applicant during a period in which all or a part of a prior past due service account was incurred by another household member who still resides at the household, if, at the time of the request for service, the account remains unpaid and is not in dispute.
- (g) The applicant is unable to provide prior utility service history information with any Michigan utility during the last 6 years.
- (h) The Company shall not require a cash deposit as a condition of new service in either the following situations:
 1. Where payment to the Company is the responsibility of the department of social services.
 2. Where the applicant secures a guarantor who is a customer of good standing with the Company.

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 18, 1984 under authority of Order of the Michigan Public Service Commission dated April 3, 1984 in Case U-4240.

RULES AND REGULATIONS-Continued

DEPOSIT PROCEDURE AS APPLICABLE TO DOMESTIC ACCOUNTS (Commission Order U-4240):

(2) DEPOSITS; NEW SERVICE:

The Company will not require a cash deposit or other guarantee as a condition of new service unless the customer has an unsatisfactory credit or service standing with the Company due to any of the following:

- (a) The customer has outstanding a prior utility service account with any utility which accrued within the last six years and at the time of the request for service remains unpaid and not in dispute.
- (b) The applicant or customer misrepresents his or her identity or credit standing at the time of application for new service, thus avoiding disclosure of pertinent credit information.
- (c) The customer has, in an unauthorized manner, interfered with the service of the utility situated or delivered on or about the customer's premises within the last 6 years, if such finding of unauthorized interference or use is made and determined after notice and opportunity for hearing is provided to the customer pursuant to these rules and is not in dispute.
- (d) The customer or applicant requests service at a residence in which he or she does not reside.
- (e) The utility has had 2 or more checks for the customer's account returned from a bank within the past 3 years for insufficient funds or no account, excluding bank error.
- (f) The customer or applicant requests service at a household that was inhabited by the customer or applicant during a period in which all or a part of a prior past due service account was incurred by another household member who still resides at the household, if, at the time of the request for service, the account remains unpaid and is not in dispute.

RULES AND REGULATIONS--Continued

(3) DEPOSITS, FOR PREVIOUS CUSTOMER OR CONTINUED SERVICE:

- (1) The Company may require a deposit as a condition of providing or restoring service to a previous customer or continuing service to a current customer if the customer has an unsatisfactory credit standing with the Company due to any of the following:
 - (a) The customer or applicant has a prior service account that is delinquent, that accrued within the last 6 years, and that, at the time of the request for service, remains unpaid and is not in dispute, or if litigation was required to obtain full payment of the Company account that was not in dispute.
 - (b) The customer or applicant misrepresents his or her identity or credit standing.
 - (c) The customer or applicant fails to provide complete positive identification information upon request at the time of applying for service, to the extent that a request for such information is not barred by B4.1(4)(3).
 - (d) The customer or applicant, in an unauthorized manner, used, diverted, or interfered with the service of the Company situated or delivered on or about the customer's or applicant's premises within the last 6 years, if the finding of unauthorized use, diversion, or interference is made after notice and an opportunity for a hearing under these rules and is not in dispute.
 - (e) The Company has shut off service to the customer for nonpayment of a delinquent account that is not in dispute.
 - (f) The Company has had 1 or more checks for the customer's account returned from a bank within the last 12 months for insufficient funds or no account, excluding bank error.
 - (g) A receiver has been appointed in a court proceeding within the last 6 years.
 - (h) As allowed by Federal bankruptcy law, the applicant has sought relief under Federal bankruptcy laws within the last 6 years.
- (2) The Company shall not require a deposit as a condition of providing service to a previous customer or continuing service to a current customer if one of the following provisions applies:
 - (a) The Family Independence Agency is responsible for making monthly payments to the Company on behalf of the applicant.
 - (b) The customer or applicant secures a guarantor who is a customer in good standing with the Company.
 - (c) The customer or applicant has none of the conditions described in SubRule (1) of this rule.
 - (d) The applicant is over 65 years of age and has no negative credit history with any gas or electric provider.

(4) OTHER STANDARDS PROHIBITED:

- (1) The Company shall not require a cash deposit or other guarantee as a condition of new or continued Company service based upon any of the following: commercial credit standards (if the customer or applicant has prior Company service credit history with any electric or gas provider in Michigan or elsewhere during the previous 6 years), income, home ownership, residential location, race, color, creed, sex, age, national origin or any other criteria not authorized by these rules.
- (2) The Company shall not attempt to recover from any person any outstanding bills or other charges due upon the account of any other person, unless that other person has entered into a lawful guarantee or other agreement to pay those bills and charges.
- (3) The Company shall not require a customer or applicant who has prior utility service history with any electric or gas provider in Michigan or elsewhere during the previous 6 years to provide the utility with his or her social security number as a condition of obtaining or continuing a utility service.

(3) DEPOSITS, FOR PREVIOUS CUSTOMER OR CONTINUED SERVICE:

- (1) A utility may require a deposit as a condition of providing or restoring service to a previous customer or continuing service to a current customer if the customer has an unsatisfactory credit standing with the utility due to any of the following:
 - (a) The customer or applicant has a prior service account that is delinquent, that accrued within the last 6 years, and that, at the time of the request for service, remains unpaid and is not in dispute, or if litigation was required to obtain full payment of a utility account that was not in dispute.
 - (b) The customer or applicant misrepresents his or her identity or credit standing or fails to provide positive identification, if requested, at the time of applying for service, thus avoiding disclosure of pertinent credit information.
 - (c) The customer or applicant, in an unauthorized manner, used, diverted, or interfered with the service of the utility situated or delivered on or about the customer's or applicant's premises within the last 6 years, if the finding of unauthorized use, diversion, or interference is made after notice and an opportunity for a hearing pursuant to these rules and is not in dispute.
 - (d) The utility has shut off service to the customer for nonpayment of a delinquent account that is not in dispute.
 - (e) The utility has had 1 or more checks for the customer's account returned from a bank within the last 12 months for insufficient funds or no account, excluding bank error.
- (2) A utility shall not require a deposit as a condition of providing or restoring service to a previous customer or continuing service to a current customer if either of the following provisions apply:
 - (a) The department of social services is responsible for making payment to the utility.
 - (b) The customer or applicant secures a guarantor who is a customer in good standing with the utility.
- (3) If the customer or applicant has sought any form of relief under the federal bankruptcy laws or is brought within the jurisdiction of the bankruptcy court for any reason, or if a receiver is appointed in a state court proceeding, the utility may assess a deposit as allowed by federal bankruptcy law or state law.

(4) OTHER STANDARDS PROHIBITED:

The Company will not require a cash deposit or other guarantee as a condition of new or continued utility service based upon commercial credit standards, income, home ownership, residential location, race, color, creed, sex, age, national origin or any other criteria not authorized by these rules.

(5) GENERAL DEPOSIT CONDITIONS:

A cash deposit required pursuant to these rules is subject to the following terms and conditions:

- (a) A deposit required as a condition of new service or providing or continuing service due to a prior outstanding account not in dispute shall be the lesser of twice the average projected system-wide monthly bill or 1 month's projected average bill for the premises. The Company may also require payment of the prior outstanding account as a condition of new or continued service if the prior account is in the customer or applicant's name, is delinquent and is owed to the Company, and was accrued within the last 6 years.

(3) DEPOSITS; EXISTING SERVICE:

The Company will not require a cash deposit or other guarantee as a condition of providing or restoring service to a previous customer or continued service to a current customer, unless such customer has an unsatisfactory credit standing with the Company due to any 1 of the following:

- (a) The service of the customer has been discontinued for nonpayment of a delinquent account not in dispute.
- (b) In an unauthorized manner, the customer interfered with or diverted the service of the Company situated or delivered on or about the customer's premises, if the finding of unauthorized interference or use is made and determined after notice and opportunity for hearing is provided to the customer pursuant to these rules and is not in dispute.
- (c) The Company has had 2 or more checks for the customer's account returned from a bank within the last 3 years for insufficient funds or no account, excluding bank error.
- (d) The customer or applicant is responsible for a prior service account which is past due; which accrued within the last 6 years, except as otherwise provided by statute; and which, at the time of the request for service, remains unpaid and is not in dispute.
- (e) The applicant or customer misrepresents his or her identity or credit standing. Appropriate credit information may include positive identification or prior service account history with any Michigan utility.
- (f) The customer fails or is unable to provide appropriate credit information at the time service is provided or restored. Appropriate credit information may include positive identification or prior service account history with any Michigan utility.

(4) OTHER STANDARDS PROHIBITED:

The Company will not require a cash deposit or other guarantee as a condition of new or continued utility service based upon commercial credit standards, income, home ownership, residential location, race, color, creed, sex, age, national origin or any other criteria not authorized by these rules.

(5) GENERAL DEPOSIT CONDITIONS:

A cash deposit required pursuant to these rules is subject to the following terms and conditions:

- (a) A deposit required as a condition of new service or providing or continuing service due to a prior outstanding account not in dispute shall be the lesser of twice the average projected system-wide monthly bill or 1 month's projected average bill for the premises. (4) OTHER STANDARDS PROHIBITED:

The Company will not require a cash deposit or other guarantee as a condition of new or continued utility service based upon commercial credit standards, income, home ownership, residential location, race, color, creed, sex, age, national origin or any other criteria not authorized by these rules.

(5) GENERAL DEPOSIT CONDITIONS:

A cash deposit required pursuant to these rules is subject to the following terms and conditions:

- (a) A deposit required as a condition of new service due to a prior outstanding account not in dispute shall not exceed the lesser of the amount of the prior outstanding account or \$100.00. The Company may also require payment of the prior outstanding account as a condition of new service.
- (b) A deposit required as a condition of continued service due to discontinuance for nonpayment shall not exceed the lesser of an amount equal to the actual or estimated maximum monthly bill for service at the customer's premises or \$100.00. The Company may also require payment of the prior outstanding account as a condition of continued service.
- (c) A deposit required for new or continued service due to unauthorized interference or use shall not exceed \$100.00.
- (d) Before requiring a deposit as a condition of continued service, the Company will have offered the customer prior to discontinuance for nonpayment, the opportunity to enter into a settlement agreement.
- (e) Interest at the rate of 6% per annum shall be payable on all deposits. Interest shall be credited semi-annually upon the service account of the customer or paid upon the return of the deposit, whichever occurs first. The Commission by order may revise the annual interest rate not later than January 31 of each year after the effective date of these rules, after having given notice of the proposed revision by publication in three daily newspapers of general circulation, one of which shall be in the Upper Peninsula, and having afforded all interested parties the opportunity to comment upon the proposed interest rate.
- (f) Upon termination of service, the deposit, and accrued interest shall be credited to the final bill and the balance shall be returned promptly to the customer.

RULES AND REGULATIONS--Continued

B-4.1 (cont'd.)

(5) GENERAL DEPOSIT CONDITIONS:

A cash deposit required pursuant to these rules is subject to the following terms and conditions:

- (a) A deposit required under these rules due to a prior outstanding account that is not in dispute or a shutoff for nonpayment shall not be more than twice the average peak season monthly bill for the premises or twice the Company's system average peak season monthly bill for residential service if consumption history for the premises is unavailable. The Company may also require payment of the delinquent account as a condition of providing or continuing service if the prior account is in the customer's or applicant's name, is delinquent and owed to the Company, and accrued within the last 6 years.
- (b) A deposit required as a condition of providing, restoring, or continuing service due to: Unauthorized use, diversion, or interference shall not be more than 4 times the average peak season monthly bill for the premises or 4 times the utility's system average peak season monthly bill for residential service if consumption history for the premises is unavailable. The utility may also require payment of the delinquent account and approved charges as a condition of providing, restoring, or continuing service if the prior account is in the customer's or applicant's name, is delinquent and owed to the utility, and accrued within the last 6 years.
- (c) Unless the applicant misrepresents his or her identity or credit standing or fails to provide positive identification, if requested, at the time of applying for service, the utility shall, within 30 days after the applicant applies, decide whether to require a deposit.
- (d) Except in the case of unauthorized use, diversion, or interference, if the Company shuts off service for nonpayment, then the Company shall not require a deposit as a condition of restoring service unless the Company offered the customer, prior to shutoff for nonpayment, the opportunity to enter into a settlement agreement as provided in part 6 of these rules.
- (e) Interest at the rate of 9% per annum shall be payable on all deposits. Interest shall be credited semi-annually upon the service account of the customer or paid upon the return of the deposit, whichever occurs first.
- (f) If the utility has not already returned the deposit, the utility shall credit the deposit, with accrued interest, to the final bill. A utility may apply the deposit against an existing arrearage that is not in dispute. The utility shall promptly return the balance to the customer.
- (g) The customer's credit shall be established and the deposit and accrued interest shall be refunded promptly by the Company upon satisfactory payment by the customer of all proper charges for Company service for a period of 12 consecutive months. Deposits for unauthorized use, diversion, or interference may be retained by the Company for a period of 24 months and shall be refunded upon satisfactory payment of the final 12 months of charges.
- (h) For purposes of this rule, payment is satisfactory if it is made before the issuance of the notice of shutoff of service for nonpayment that is not in dispute or within 3 days after the issuance of the next succeeding monthly bill, whichever is sooner.

- (f) Upon termination of service, the deposit, and accrued interest shall be credited to the final bill and the balance shall be returned promptly to the customer.
- (g) The credit of a customer shall be established and a deposit and accrued interest shall be refunded promptly by the Company upon satisfactory payment by the customer of all proper charges for utility service for a period of nine successive months. For purposes of this subrule, payment is satisfactory if made prior to the issuance of a notice of discontinuation of service for nonpayment not in dispute. The Company may withhold the deposit funds pending the resolution of a discontinuance for nonpayment which is in dispute in accordance with these rules.
- (h) The Company will maintain a detailed record of all deposits received from customers, showing the name of each customer, the location of the premises occupied by the customer at the time of making the deposit and each successive location while the deposit is retained, the date of making and amount of deposit, and the date and amounts of interest paid.
- (i) Each customer posting a cash deposit will receive in writing at the time of tender of deposit funds a receipt as evidence thereof, which contains the following minimum information:
- (1) Name of customer.
 - (2) Place of payment.
 - (3) Date of payment.
 - (4) Amount of payment.
 - (5) Identifiable name and signature of the Company employee receiving payment.
 - (6) Statement of the terms and conditions governing the receipt, retention and return of deposit funds.
- (j) The Company will provide means whereby a customer entitled to a return of his or her deposit is not deprived of deposit funds even though he or she may be unable to produce the original receipt for the deposit. However, if the Company holds a deposit for a customer it has been unable to locate for seven years, the deposit will be paid to the State pursuant to Michigan law.
- (k) The Company will apply deposit standards uniformly as a condition of utility service to all residential customers.

For purposes of this subrule, payment is satisfactory if made prior to the issuance of a notice of discontinuation of service for nonpayment not in dispute. The Company may withhold the deposit funds pending the resolution of a discontinuance for nonpayment which is in dispute in accordance with these rules.
- (h) The Company will maintain a detailed record of all deposits received from customers, showing the name of each customer, the location of the premises occupied by the customer at the time of making the deposit and each successive location while the deposit is retained, the date of making and amount of deposit, and the date and amounts of interest paid.
- (i) Each customer posting a cash deposit will receive in writing at the time of tender of deposit funds a receipt as evidence thereof, which contains the following minimum information:
- (1) Name of customer.
 - (2) Place of payment.
 - (3) Date of payment.
 - (4) Amount of payment.
 - (5) Identifiable name and signature of the Company employee receiving payment.
 - (6) Statement of the terms and conditions governing the receipt, retention and return of deposit funds.
- (j) The Company will provide means whereby a customer entitled to a return of his deposit is not deprived of deposit funds even though he may be unable to produce the original receipt for the deposit. However, if the Company holds a deposit for a customer it has been unable to locate for seven years, the deposit will be paid to the State pursuant to Michigan law.
- (k) The Company will apply deposit standards uniformly as a condition of utility service to all residential customers.

(6) GUARANTEE IN LIEU OF DEPOSIT:

In lieu of a cash deposit required by these rules, the Company will accept the written guarantee of a responsible party as surety for a customer service account.

(7) GUARANTEE TERMS AND CONDITIONS:

A guarantee accepted on a residential electric service account is subject to the following terms and conditions:

(Continued from [Sheet No. B4-3](#))

B-4.8 SURCHARGES AND CREDITS APPLICABLE TO POWER SUPPLY SERVICE:

(1) POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:

- (a) This Power Supply Cost Recovery Clause permits the monthly adjustment of rates for power supply to allow recovery of the booked costs of fuel and purchased and net interchanged power transactions incurred under reasonable and prudent policies and practices in accordance with 1982 PA 304. All rates for electric service, unless otherwise provided in the applicable rate schedule, shall include a Power Supply Cost Recovery factor.
- (b) The Power Supply Cost Recovery factor is that element of the rates to be charged for electric service to reflect power supply costs incurred by the company and made pursuant to the Power Supply Cost Recovery Clause.
- (c) Effective November 24, 2004, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01072 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 17.32 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

The following factor(s) were applied to bills rendered during the billing months as indicated below for the calendar year 2007 and 2008.

RULES AND REGULATIONS--Continued

B-4.1 (cont'd.)

- (i) The Company will maintain a detailed record of all deposits received from customers, showing the name of each residential customer, the location of the premises occupied by the customer at the time of making the deposit and each successive location while the deposit is retained, the date the customer made the deposit and the dates the utility paid interest and the amounts.
- (j) If a customer makes a deposit, then the utility shall provide, in writing, a receipt that contains all of the following information:
 - (1) Name of customer.
 - (2) Place of payment.
 - (3) Date of payment.
 - (4) Amount of payment.
 - (5) Identifiable name and signature of the Company employee receiving payment.
 - (6) The terms and conditions governing the receipt, retention, and return of the deposit.
- (k) The Company will provide means by which a customer entitled to a return of his or her deposit is not deprived of the deposit even though he or she may be unable to produce the original receipt for the deposit.
- (l) The Company shall apply deposit standards uniformly to all customers.
- (m) For purposes of this rule, both of the following provisions apply:
 - (1) The premise's average peak season monthly bill is defined as the highest 5 consecutive month period of consumption at the premises within the previous 12-month period, divided by 5, priced at current rates.
 - (2) The utility's system average peak season monthly bill is defined as the average peak season monthly bill computed for all residential premises on the utility's system.

(6) GUARANTEE TERMS AND CONDITIONS:

A guarantee accepted in accordance with these rules is subject to all of the following terms and conditions:

- (a) It shall be in writing and shall be renewed in a similar manner at least annually.
- (b) It shall state the terms of guarantee, the maximum amount guaranteed, and that the Company shall not hold the guarantor liable for sums in excess thereof, unless agreed to in a separate written instrument.
- (c) Credit shall be established for the customer, and the guarantor shall be released upon satisfactory payment by the customer of all proper charges for Company service for a period of 12 consecutive months, unless the guarantee was required due to unauthorized use, diversion, or interference.
- (d) A guarantee resulting from unauthorized use, diversion, or interference may be retained for 24 months. Additionally, release of such guarantee is conditioned upon timely payment of the latest 12 months of the guarantee period, before rendering of the next succeeding bill, pursuant to B-4.1(5).
- (e) For purposes of this rule, payment is satisfactory if made before the issuance of a notice of discontinuation of service for nonpayment not in dispute or within 3 days after issuance of the next succeeding monthly bill, whichever is sooner.
- (f) The Company may withhold release of a guarantor pending the resolution of a discontinuance for nonpayment in dispute in accordance with these rules.

B-4.2 BILLING FOR SERVICE:

(1) BILLING FREQUENCY; METHOD OF DELIVERY:

- (a) The Company shall transmit a bill once during each billing month to Residential Rate customers D1, D1.3, D2 and D5 Option II in accordance with the approved daily rate schedules. The Company shall transmit a bill to customers by mail unless the Company and the customer agree in writing to another method of delivery.
- (b) The Company shall transmit a bill once during each billing month to all other customers in accordance with the approved monthly rate schedules. The Company shall transmit a bill to customers by mail unless the Company and the customer agree in writing to another method of delivery.

B-4.9 SURCHARGES AND CREDITS
APPLICABLE TO DELIVERY SERVICE (Contd.)

- (4) **CHOICE IMPLEMENTATION SURCHARGE (CIS):** On November 23, 2004, in its Final Order in Case No. U-13808, the MPSC authorized a Choice Implementation Surcharge of 0.05 cents per kWh applicable to all metered sales of electricity, effective January 1, 2006. This surcharge recovers the costs associated with implementing the retail electric customer choice program. These costs were also approved by the MPSC in the following cases for the years indicated; Case No. U-12892 (2000), Case No. U-13341 (2001), Case No. U-13738 (2002), and Case No. U-14079 (2003).
- (5) **RATE REDUCTION CREDIT (RRC):** On August 31, 2006 in its Order approving a settlement agreement in Case No. U-14838 the MPSC terminated the Rate Reduction Credit authorized in U-14842 effective September 5, 2006.
- (6) **U-14838 RATE REDUCTION CREDIT (RRC):** On August 31, 2006 in its Order approving a settlement agreement in Case No. U-14838 the MPSC authorized a RRC effective for service rendered on and after September 5, 2006. The U-14838 RRC will continue until the latter of March 31, 2008 or twelve months from the date of filing of the general electric rate case ordered by the Commission in MPSC Case No. U-14399.

EFFECTIVE FOR SERVICE
RENDERED ON AND AFTER
OCTOBER 26, 2007
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE
COMMISSION DATED OCTOBER 26, 2007
IN CASE NO. U-14851

(Continued From Sheet No. B4-4)

B-4.2 BILLING FOR SERVICE: (Continued)

(2) ESTIMATED BILLING:

Meters will be read and bills rendered on a monthly basis. In cases where the Company is unable to read the meter, the consumption for the billing period may be estimated using the following procedure.

The consumption for an estimated bill will be calculated using the following methodology, approved by the Michigan Public Service Commission in Case No. U-14523 on August 4, 2005:

(1) ***For accounts having actual historical usage information:***

Consumption will be estimated based on historical average daily usage for the account. The average daily usage is calculated using selected historical data from the current and prior year, adjusted, where applicable, for the impact of the difference in weather between the period being estimated and the weather in the historical periods used to calculate average daily usage.

(2) ***For accounts without sufficient actual historical usage information:***

Consumption will be estimated based on the average daily usage for all accounts within that rate or service classification for selected periods during the prior year. The average daily usage is calculated using data from the prior year's actual consumption, adjusted, where applicable, for the impact of the difference in weather between the period being estimated and the weather in the historical periods used to calculate average daily usage.

This estimating policy is applicable to residential and commercial customers.

A bill rendered on an estimated use is of equal validity with a bill rendered on an actual meter reading. However, where a bill is rendered on an estimated basis and not paid, service will not be disconnected for nonpayment until a meter reading has been made and the estimated bill verified. Where access to the meter has been denied, service will be cut at the pole as provided in Rule B5.4, Access to Premises.

Any bill rendered on an estimated basis shall be clearly and conspicuously identified. The Company will not render an estimated bill unless the estimating procedures employed by the Company and any substantive changes in those procedures have been approved by the Commission.

Notwithstanding the provisions of the above rule, the Company may estimate the bill of any residential customer if extreme weather conditions, emergencies, work stoppages or other circumstances of force majeure prevent actual meter readings.

If the Company is unable to gain access to read a meter, then the Company will undertake reasonable alternative measures to obtain an actual reading including mailing or leaving postpaid pre-addressed postcards upon which the customer may note the reading. If the customer fails to comply with such alternative measures, or makes reading of the meter unnecessarily difficult, then the Company may transmit an estimated bill. If an actual reading cannot be obtained, then the Company will maintain accurate records of the reasons therefore, and efforts it has made to secure the actual reading.

The first residential bill based on an actual ending meter reading following one or more bills based on estimated ending meter readings(s) shall incorporate an adjustment so that the total amount billed for the period between the two most recent actual meter readings, including the Power Supply Cost Recovery Factor and other applicable charges, is based on the average daily use within that period, except that the period shall begin no earlier than the billing month of June 1985.

EFFECTIVE FOR SERVICE RENDERED ON
AND AFTER AUGUST 5, 2005
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED AUGUST 4, 2005
IN CASE NO. U-14523

RULES AND REGULATIONS--Continued

B-4.2 (cont'd.)

(2) ESTIMATED BILLING:

Meters will be read and bills rendered on a monthly basis. In cases where the Company is unable to read the meter, the consumption for the billing period may be estimated using the following procedure.

If an adequate record of actual usage exists for the specific account to be estimated, the estimate shall be based on the weighted average of actual usage which occurred at selected intervals during the preceding twelve months. The selected intervals include, but are not limited to, the same period one year ago, eleven months ago, the period preceding the billing period being estimated, and the entire twelve month history of the account. If possible, each selected interval shall be for the same number of days as the billing period being estimated, otherwise the usage shall be prorated accordingly.

The weights assigned to each component of the estimate shall be established for each rate or service classification. They may be reviewed from time to time and adjusted, if necessary, to insure optimum estimating accuracy. Individual weights may also be modified temporarily for a specific account to reflect a customer change at that location.

If the actual usage record is incomplete and no data, or insufficient data, is available to calculate any of the components of the estimate, then the estimate shall be based on the remaining components. If none of the components can be calculated, the estimate will be based on the average energy usage of all customers within that rate or service classification.

This estimating policy is applicable to residential and commercial customers.

A bill rendered on an estimated use is of equal validity with a bill rendered on an actual meter reading. However, where a bill is rendered on an estimated basis and not paid, service will not be disconnected for nonpayment until a meter reading has been made and the estimated bill verified. Where access to the meter has been denied, service will be cut at the pole as provided in Rule B5.4, Access to Premises.

X Any bill rendered on an estimated basis shall be clearly and conspicuously identified. The Company will not render an estimated bill unless the estimating procedures employed by the Company and any substantive changes in those procedures have been approved by the Commission.

Notwithstanding the provisions of the above rule, the Company may estimate the bill of any residential customer if extreme weather conditions, emergencies, work stoppages or other circumstances of force majeure prevent actual meter readings.

If the Company is unable to gain access to read a meter, then the Company will undertake reasonable alternative measures to obtain an actual reading including mailing or leaving postpaid pre-addressed postcards upon which the customer may note the reading. If the customer fails to comply with such alternative measures, or makes reading of the meter unnecessarily difficult, then the Company may transmit an estimated bill. If an actual reading cannot be obtained, then the Company will maintain accurate records of the reasons therefore, and efforts it has made to secure the actual reading.

The first residential bill based on an actual ending meter reading following one or more bills based on estimated ending meter readings(s) shall incorporate an adjustment so that the total amount billed for the period between the two most recent actual meter readings, including the Power Supply Cost Recovery Factor and other applicable charges, is based on the average daily use within that period, except that the period shall begin no earlier than the billing month of June 1985.

RULES AND REGULATIONS--Continued

B-4.2 (cont'd.)

(2) ESTIMATED BILLING:

Meters will be read and bills rendered on a monthly basis. In cases where the Company is unable to read the meter, the following procedure will be followed.

For each account to be estimated in a month when the meter is not read, the actual use per day for the current period one year ago will be calculated. This average use per day will be multiplied by the number of days in the period to be estimated to obtain the estimated use.

If the actual use per day for the current period one year ago is not available, the actual use per day in the most recent bill period will be used. Upon a customer's request, arrangements can be made to base all estimates on the most recent bill period. This request however, will expire after twelve months.

In cases where the Company does not have an adequate billing history for a customer, or for the customer's premises, upon which to base an estimate, the estimate will be based on average energy usage of all customers within that rate classification. The consumption period to be used in determining the estimate will be the same calendar month of the prior year. This estimating policy is applicable to residential and commercial customers.

A bill rendered on an estimated use is of equal validity with a bill rendered on an actual meter reading. However, where a bill is rendered on an estimated basis and not paid, service will not be disconnected for nonpayment until a meter reading has been made and the estimated bill verified. Where access to the meter has been denied, service will be cut at the pole as provided in Rule B5.4, Access to Premises.

Any bill rendered on an estimated basis shall be clearly and conspicuously identified. The Company will not render an estimated bill unless the estimating procedures employed by the Company and any substantive changes in those procedures have been approved by the Commission.

Notwithstanding the provisions of the above rule, the Company may estimate the bill of any residential customer if extreme weather conditions, emergencies, work stoppages or other circumstances of force majeure prevent actual meter readings.

If the Company is unable to gain access to read a meter, the Company will undertake reasonable alternative measures to obtain an actual reading including mailing or leaving postpaid pre-addressed postcards upon which the customer may note the reading. If the customer fails to comply with such alternative measures, or makes reading of the meter unnecessarily difficult, the Company may render an estimated bill. When an actual reading cannot be obtained, the Company will maintain accurate records of the reasons therefore, and efforts it has made to secure the actual reading.

The first residential bill based on an actual ending meter reading following one or more bills based on estimated ending meter readings(s) shall incorporate an adjustment so that the total amount billed for the period between the two most recent actual meter readings, including the Power Supply Cost Recovery Factor and other applicable charges, is based on the average daily use within that period, except that the period shall begin no earlier than the billing month of June 1985.

(Continued from [Sheet No. B4-5](#))

**B-4.9 SURCHARGES AND CREDITS
APPLICABLE TO DELIVERY SERVICE:**

(7) CHOICE INCENTIVE MECHANISM (CIM):

- (a) On August 31, 2006 in its Order in Case No. U-14838 the MPSC authorized the establishment of a Choice Incentive Mechanism (CIM). The CIM will determine the change in total non-fuel revenue associated with increases or decreases in annual choice sales from a total "base" choice sales level of 3,400 GWH for the period commencing January 1, 2007 and continuing until the latter of March 31, 2008 or twelve months from the date of filing of the general electric rate case ordered by the Commission in MPSC Case No. U-14399. The first CIM filing will be filed on or before March 31, 2008.
- (b) In the event of a decrease in total non-fuel revenue, the total decrease in non-fuel revenue will first be reduced by a "deadband" modifier equal to \$8 million. Recoverable non-fuel revenue is limited to 90% of this adjusted amount and shall not exceed \$70.8 million. Recoverable non-fuel revenue will be allocated in the same manner that the full service rate reduction was allocated to full-service customers in Case No. U-14838. Tariff specific surcharges apply only to full-service customers and will be based on a cents per kWh basis for metered customers and on a percent basis for unmetered customers. If the surcharges result in an over or under recovery of recoverable non-fuel revenues such over or under recovery will be deferred and included in the following CIM reconciliation filing.
- (c) In the event of an increase in total non-fuel revenue, the total increase in non-fuel revenue will first be reduced by a "deadband" modifier equal to \$8 million. The balance will be used to reduce unrecovered regulatory asset balances related to the RARS mechanism (Section 10d(4) costs).
- (d) Changes in non-fuel revenue will be determined as follows:

	(a) Actual Choice Sales (GWH)	(b) Base Choice Sales (GWH)	(c) Choice Sales Change (GWH)	(d) Non-Fuel Price (/kWh)	(e) Increase/ (Decrease) in Non-Fuel Revenue
• Residential	TBD	0	a-b	3.1	-c*d
• Commercial	TBD	2,100	a-b	4.2	-c*d
• Primary (excl. Rate D7)	TBD	1,300	a-b	3.8	-c*d
• Rate No. D7	<u>TBD</u>	<u>0</u>	<u>a-b</u>	<u>2.1</u>	<u>-c*d</u>

EFFECTIVE FOR SERVICE
RENDERED ON AND AFTER
OCTOBER 26, 2007
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE
COMMISSION DATED OCTOBER 26, 2007
IN CASE NO. U-14851

Changes (in bold, italics, underline) reflect Order U-11397 dated 2/9/2000

RULES AND REGULATIONS--Continued

B-4.2 (cont'd.)

***(3) CUSTOMER METER READING:**

The Company will provide each customer with the opportunity to read and report energy usage as long as energy usage is reported on a regular and accurate basis and will provide postpaid pre-addressed postcards for this purpose upon request. At least annually, the Company will obtain an actual meter reading of customer usage in order to verify the accuracy of readings reported in this manner. This rule shall not prevent the Company from reading meters on a regular basis.

***(4) EQUAL MONTHLY BILLING:**

The Company may bill its Residential customers in accordance with equal monthly billing programs at the election of the customer upon a finding by the Commission that such programs assure reasonable billing accuracy. If a customer has a credit balance of more than \$2.00 at the end of the program year, upon the request of the customer, the Company shall return the credit balance.

The Company may bill residential customers on an equal monthly billing program at the election of the customer. For six months the customer will make equal payments based on Company forecasts of average monthly bills. At the end of six months, the billing amount may be recalculated and adjusted if necessary. The customer will pay the adjusted amount for the next five months. In the twelfth month the customer will receive a settlement bill that will reconcile the customer billings with Company records. The Company will refund or credit to the following month's bill any over-collection in accordance with Commission rules.

***(5) CYCLE BILLING:**

The Company may bill its customers on a cyclical basis if the individual customer receives each billing on or about the same day of each billing month. If the Company changes meter reading routes or schedules, billing cycles may be altered upon 10 days written notice to the affected customer.

***X*(6) SEPARATE BILLS:**

(a) The Company will transmit a separate billing as required by Rule B-2.9 for service provided at each residence or location and will not combine two or more accounts without written authorization of the customer. The Company may, at its option, render one combined bill for all utility services in the same customer's name at one service location.

X(b) Notwithstanding the provisions of subrule (a) of this rule, if there is shutoff or termination of service at a separate residential metering point, residence, or location in accordance with these rules, then the Company may transfer an unpaid balance to any other residential service account of the customer.

***(7) BILLING FOR NON-TARIFF SERVICES:**

The Company may include charges for non-tariff services together with charges for tariff service on the same monthly bill, if the charges for non-tariff services are designated clearly and separately from the charges for tariff service. If partial payment is made, the Company will first credit payment to the balance outstanding for tariff service.

B-4.3 PAYMENT FOR SERVICE AND RETURNED CHECKS:

(1) The Company shall permit each customer a period of not less than 17 days from the date the bill was transmitted to pay in full, unless the customer agrees in writing to a different period.

(2) Payment may be made by the customer in any reasonable manner including personal check. Payment by personal check is not reasonable if the customer has on previous occasion within the last three years tendered payment in this manner and the check has been returned for insufficient funds.

* Residential Customers Only

(a) The Company will render a separate billing as required by Rule B-2.9 for service provided at each residence or location and will not combine two or more accounts without written authorization of the customer. The Company may, at its option, render one combined bill for all utility services in the same customer's name at one service location.

(b) Notwithstanding the provisions of subrule (a) of this rule, in the event of shutoff or termination of service at a separate residential metering point, residence, or location in accordance with these rules, a utility may transfer an unpaid balance to any other residential service account of the customer.

***(7) SPECIAL SERVICES:**

The Company may include charges for special services together with charges for utility service on the same monthly bill, if the charges for special services are designated clearly and separately from the service account. If partial payment is made, the Company will first credit all payments to the balance outstanding for utility service.

B-4.3 PAYMENT FOR SERVICE AND RETURNED CHECKS:

(1) The Company will permit each customer at least 21 calendar days from the date of rendition of each bill for payment in full.

(2) Payment may be made by the customer in any reasonable manner including personal check. Payment by personal check is not reasonable if the customer has on previous occasion within the last three years tendered payment in this manner and the check has been returned for insufficient funds.

* Residential Customers Only

CANCELLED BY ORDER
IN CASE NO. U-10223
FEB 09 2000

Issued: January 4, 1993
By: L. G. Garberding
Executive Vice President
and Chief Financial Officer
2000 Second Avenue
Detroit, Michigan 48226

Effective for service rendered on
and after December 8, 1992, under
authority of order of the Michigan
Public Service Commission dated
December 8, 1992 in Case U-10223.

RULES AND REGULATIONS--Continued

B-4.2 (cont'd.)

***(3) CUSTOMER METER READING:**

The Company will provide each customer with the opportunity to read and report energy usage as long as energy usage is reported on a regular and accurate basis and will provide postpaid pre-addressed postcards for this purpose upon request. At least annually, the Company will obtain an actual meter reading of customer usage in order to verify the accuracy of readings reported in this manner. This rule shall not prevent the Company from reading meters on a regular basis.

***(4) EQUAL MONTHLY BILLING:**

The Company may bill its Space Heating customers in accordance with equal monthly billing programs at the election of the customer upon a finding by the Commission that such programs assure reasonable billing accuracy. If a customer has a credit balance of more than \$2.00 at the end of the program year, upon the request of the customer, the Company shall return the credit balance.

***(5) CYCLE BILLING:**

The Company may bill its customers on a cyclical basis if the individual customer receives each billing on or about the same day of each billing month. If the Company changes meter reading routes or schedules, billing cycles may be altered upon 10 days written notice to the affected customer.

***(6) SEPARATE BILLS:**

- (a) The Company will render a separate billing as required by Rule B-2.9 for service provided at each residence or location and will not combine two or more accounts without written authorization of the customer. The Company may, at its option, render one combined bill for all utility services in the same customer's name at one service location.
- (b) Notwithstanding the provisions of subrule (a) of this rule, in the event of shutoff or termination of service at a separate residential metering point, residence, or location in accordance with these rules, a utility may transfer an unpaid balance to any other residential service account of the customer.

***(7) SPECIAL SERVICES:**

The Company may include charges for special services together with charges for utility service on the same monthly bill, if the charges for special services are designated clearly and separately from the service account. If partial payment is made, the Company will first credit all payments to the balance outstanding for utility service.

B-4.3 PAYMENT FOR SERVICE AND RETURNED CHECKS:

- (1) The Company will permit each customer at least 21 calendar days from the date of rendition of each bill for payment in full.
- (2) Payment may be made by the customer in any reasonable manner including personal check. Payment by personal check is not reasonable if the customer has on previous occasion within the last three years tendered payment in this manner and the check has been returned for insufficient funds.

Effective ~~for~~ *MAR 31 1993* service rendered on
and after July 23, 1981 under
authority of Order of the Michigan
Public Service Commission dated
July 21, 1981 in Case U-6480.

(Continued From Sheet No. B4-6)

B-4.3 PAYMENT FOR SERVICE AND RETURNED CHECKS: (Continued)

(3) CHECKS RETURNED BY BANKS OR OTHER FINANCIAL INSTITUTIONS:

Checks remitted by customers as bill payments and returned because they are not valid are rebilled to the customer's accounts. A \$5.00 charge will be assessed to customers for handling checks received and returned by banks for reasons of insufficient funds, bank account closed, no account and similar situations excluding bank errors. Appropriate collection action follows if the customer does not redeem the check.

*(4) The date of transmitting a bill is the date the utility mails the bill. For bills that are delivered other than by mail, the date of transmitting a bill is the date that the utility conveys or dispatches the billing information to the customer in accordance with the method of delivery that the customer and the utility agreed to use. If the last calendar day for payments falls upon a Sunday, legal holiday or any other day when the offices of the Company regularly used for the payment of customers' bills are not open to the general public, the payment date shall be extended through the next business day.

(5) The customer is responsible for payments of all bills for service used until service is ordered discontinued and the Company has been given reasonable time and opportunity to secure a final meter reading. Payment after due date will result in the assessment of a late payment charge as specified in B-2.10. The failure on the part of the customer to receive the bill shall not entitle him to a waiver of the late payment charge.

B-4.4 SCHEDULE OF ON-PEAK HOURS:

For Large General Service Rate-D4;
Primary Supply Rate-D6;
Alternative Primary Supply Rate-D6.1;
Interruptible Supply Rate-D8;
Standard Contract Rider-R3

On-peak hours are those hours between 1100 hours and 1900 hours each day, Monday through Friday, legal holidays excluded.

The following will be considered legal holidays for the purpose of applying this schedule: New Year's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day. "Monday" holidays, where legally recognized, will be recognized in place of the "traditional" holidays.

Schedule of on-peak hours also applies to on-peak and off-peak kWh charges.

B-4.5 POWER FACTOR DETERMINATION:

Where the filed rate requires a determination of power factor, the Company will install a lagging reactive component meter in addition to the kilowatt-hour meter used for the measurement of energy. From the readings of these two meters, the power factor for the regular billing period will be determined according to the following table:

B-4.5 POWER FACTOR DETERMINATION:

Where the filed rate requires a determination of power factor, the Company will install a lagging reactive component meter in addition to the kilowatthour meter used for the measurement of energy. From the readings of these two meters, the power factor for the regular billing period will be determined according to the following table:

(Continued on next sheet)

M/60

Issued: August 15, 1985
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 16, 1985, under authority of Order of the Michigan Public Service Commission dated July 16, 1985 in Case U-7660.

RULES AND REGULATIONS-Continued

B-4.3 (cont'd.)

(3) CHECKS RETURNED BY BANKS OR OTHER FINANCIAL INSTITUTIONS:

Checks remitted by customers as bill payments and returned because they are not valid are rebilled to the customer's accounts. A \$5.00 charge will be assessed to customers for handling checks received and returned by banks for reasons of insufficient funds, bank account closed, no account and similar situations. Appropriate collection action follows if the customer does not redeem the check.

(4) The date of rendition of a utility bill for service will be the date of physical mailing of the bill by the Company. If the last calendar day for remittance falls upon a Sunday, legal holiday or any other day when the offices of the Company regularly used for the payment of customer bills are not open to the general public, the final payment date shall be extended to the next business day. The date of payment for remittance by mail is two days prior to receipt of the remittance.

(5) The customer is responsible for payments of all bills for service used until service is ordered discontinued and the Company has been given reasonable time and opportunity to secure a final meter reading. Payment after due date will result in the assessment of a late payment charge as specified in B-2.10. The failure on the part of the customer to receive the bill shall not entitle him to a waiver of the late payment charge.

B-4.4 SCHEDULE OF ON-PEAK HOURS:

For Large General Service Rate-D4;
Primary Supply Rate-D6;
Bulk Power Supply Rate-D7;
Interruptible Supply Rate-D8;
Primary Pumping Rate-E4;

On-peak hours are those hours between 1100 hours and 1900 hours each day, Monday through Friday, legal holidays excluded.

The following will be considered legal holidays for the purpose of applying this schedule: New Year's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day. "Monday" holidays, where legally recognized, will be recognized in place of the "traditional" holidays.

Schedule of on-peak hours also applies to on-peak and off-peak kWh charges.

B-4.5 POWER FACTOR DETERMINATION:

Where the filed rate requires a determination of power factor, the Company will install a lagging reactive component meter in addition to the kilowatthour meter used for the measurement of energy. From the readings of these two meters, the power factor for the regular billing period, usually a calendar month, will be determined according to the following table:

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

(Continued From Sheet No. B4-7)

B-4.5 POWER FACTOR DETERMINATION: (Continued)

RATIO OF REGISTRATION OF REACTIVE COMPONENT METER TO REGISTRATION OF KILOWATTHOUR METER POWER FACTOR

1.021 and higher	.699 and lower
1.020 to .883	.700 to .749
.882 to .752	.750 to .799
.751 to .622	.800 to .849
.621 to .000	.850 to 1.000

Power Factor: A penalty will be applied to all metered quantities in accordance with the following table:

POWER FACTOR	PENALTY
--------------	---------

.850 and higher	None
.800 to .849	1%
.750 to .799	2%
.700 to .749	3%

Power factors less than .700 are not permitted and necessary corrective equipment must be installed by the customer. A 25% penalty will be applied to any billing after two consecutive months below .700 power factor and will continue as long as the power factor remains below .700. The first two consecutive months below .700, the penalty will be 3%. Once the customer's power factor exceeds .700, it is necessary to go through two consecutive months below .700 again before the 25% penalty applies.

B-4.6 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

- (1) Transmission Voltage Level - 120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

- (2) Subtransmission Voltage Level - 24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

- (3) Primary Service - Less Than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

.700 to .749
.750 to .799
.800 to .849
.850 to 1.000

Power Factor: A penalty will be applied to all metered quantities in accordance with the following table:

POWER FACTOR

PENALTY

.850 and higher
.800 to .849
.750 to .799
.700 to .749

None
1%
2%
3%

Power factors less than .700 are not permitted and necessary corrective equipment must be installed by the customer. A 25% penalty will be applied to any billing after two consecutive months below .700 power factor and will continue as long as the power factor remains below .700. The first two consecutive months below .700 the penalty will be 3%. Once the customer's power factor exceeds .700, it is necessary to go through two consecutive months below .700 again before the 25% penalty applies.

B-4.6 POWER SUPPLY COST RECOVERY CLAUSE:

1. This Power Supply Cost Recovery Clause permits the monthly adjustment of rates for power supply to allow recovery of the booked costs of fuel and purchased and net interchanged power transactions incurred under reasonable and prudent policies and practices in accordance with 1982 PA 304. All rates for electric service, unless otherwise provided in the applicable rate schedule, shall include a Power Supply Cost Recovery factor.
2. The Power Supply Cost Recovery factor is that element of the rates to be charged for electric service to reflect power supply costs incurred by the company and made pursuant to the Power Supply Cost Recovery Clause.
3. The Commission's Opinion and Order in Case U-_____, issued _____, 198____, authorized the Company to apply a maximum allowable Power Supply Cost Recovery Factor of _____ mills per kWh effective on bills rendered on and after May 1, 1983, through December 1983.

The first two consecutive months below .700 the penalty will be 3%. Once the customer's power factor exceeds .700, it is necessary to go through two consecutive months below .700 again before the 25% penalty applies.

B-4.6 FUEL COST ADJUSTMENT AND PURCHASED POWER COST ADJUSTMENT:

1. Fuel Cost Adjustment:

The fuel cost adjustment shall consist of an increase or decrease of .0107 mills per kWh for each full .01 mill increase or decrease in the average delivered cost of fuel burned monthly above or below a cost base of 17.16 mills per kWh. The adjustment so determined shall be reduced by 10% and then rounded to the nearest one-hundredth mill per kWh. The average delivered cost of fuel burned per kWh shall equal the calendar month cost of fossil and nuclear fuel divided by the calendar month net system kWh requirements. The adjustment shall apply to the third billing month following the calendar month in which the fuel is burned.

To correct for the three-month lag in this procedure between cost incurrence and billing adjustment, the increase or decrease in the adjustment per kWh as determined above shall be appropriately increased or decreased by the difference between the "three-month lag" adjustment factor applied in the third preceding billing month and the "three-month lag" adjustment factor to be applied for the immediate billing month.

*2000 PA 141 became effective on June 5, 2000. The Act reduced residential rates in effect on May 1, 2000 by 5% and then froze residential rates through December 31, 2003. Unless otherwise reduced by the Commission pursuant to Section 4 of the Act, non-residential rates were frozen at levels in effect on May 1, 2000 through December 31, 2003. The net PSCR charge to residential customers beginning June 5, 2000 was 0.194 ¢/kWh (0.204 ¢/kWh - 5%). The PSCR charge to non-residential customers beginning June 5, 2000 was 0.204 ¢/kWh. These PSCR charges will continue through December 31, 2003.

 Detroit, Michigan 48226

Effective for bills rendered on and after June 5, 2000 under authority of order of the Michigan Public Service Commission in Case No. U-12464 dated June 5, 2000

(To reflect 1999 PSCR Plan approval and applied factors for 2000)

RULES AND REGULATIONS--Continued

B-4.6 (cont'd.)

- (3) Effective January 22, 1994, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01078 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 15.49 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

- (4) The following factors were applied during the billing months as indicated below for the calendar years 1999* and 2000:

<u>Year 2000</u>	Mills/kWh		Mills/kWh		Mills/kWh
January	2.04	May	<u>2.04</u>	September	
February	<u>2.04</u>	June		October	
March	<u>2.04</u>	July		November	
April	<u>2.04</u>	August		December	
<u>Year 1999</u>	Mills/kWh		Mills/kWh		Mills/kWh
January	\$.00000	May	\$.00000	September	\$.00120
February	\$.00000	June	<u>\$.00000**</u>	October	\$.00000
March	\$.00000	July	\$.00120	November	\$.00000
April	\$.00000	August	\$.00120	December	\$.00120

*On April 24, 2000, the Commission authorized a 1999 power supply cost recovery factor for The Detroit Edison Company of \$.00067 per kilowatthour for each billing month of 1999. On average, the Company applied a factor of \$.00040 per kilowatthour.

**In June of 1999, a refund factor of (\$.00592) was applied in addition to the billing factor of \$.00000, as authorized by the Commission in its May 11, 1999 order in Case No. U-11175-R (1997 PSCR Reconciliation).

	Mills/kWh		Mills/kWh		Mills/kWh
January	2.04	May		September	
February		June		October	
March		July		November	
April		August		December	

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

(1) Transmission Voltage Level - 120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

(2) Subtransmission Voltage Level - 24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

(3) Primary Service - Less Than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

March	(1.08)	July		November	
April	(1.08)	August		December	

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

(1) Transmission Voltage Level - 120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

(2) Subtransmission Voltage Level - 24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

(3) Primary Service - Less Than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

dated February 23, 1995
in Case U-10702

RULES AND REGULATIONS--Continued

B-4.6 (cont'd.)

- (3) Effective January 22, 1994, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01078 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 15.49 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.
- (4) The following factors were applied during the billing month as indicated below for the calendar year 1995.

Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

1988 PSCR RECONCILIATION

As a result of the recent Commission approved settlement in Case No. U-8880-R, the Company implemented a \$0.00458 per kWh surcharge in December 1989 to collect underrecovered 1988 PSCR expenses of \$14,776,236. The actual amount collected by the Company was \$14,688,335, resulting in an uncollected balance of \$87,901.

Pursuant to the settlement agreement and Commission's order, the Company will implement a second surcharge in the amount of \$0.00002 per kWh during the billing month of April 1990 to reduce the remaining uncollected balance below the stipulated threshold level of \$30,000.

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

- (1) Transmission Voltage Level - 120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

- (2) Subtransmission Voltage Level - 24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

- (3) Primary Service - Less Than 24 kV:

RULES AND REGULATIONS—Continued

B-4.6 (cont'd.)

- (4) Effective January 1, 1993, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01083 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 17.52 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

- (1) Transmission Voltage Level - 120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

- (2) Subtransmission Voltage Level - 24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

- (3) Primary Service - Less Than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

M/62

Issued: January 1, 1989
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for bills rendered during the billing month.
Issued under authority of the Michigan Public Service Commission dated December 27, 1988 in Case U-8789.

RULES AND REGULATIONS--Continued

B-4.6 (cont'd.)

Should the Company apply lesser factors than those above, or if the factors are later revised pursuant to Commission Orders or 1982 PA 304, the Company will notify the Commission if necessary and file a revision of the above list.

- (4) The Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01077 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 25.31 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

- o The net billing factors were applied during the billing months as indicated below for the calendar year 1988.

	<u>Mills/kWh</u>		<u>Mills/kWh</u>		<u>Mills/kWh</u>		<u>Mills/kWh</u>
January	(7.00)	April	(5.00)	July	(4.75)	October	(4.62)

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

For: Primary Supply Rate D-6

1. Transmission Voltage Level-120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

2. Subtransmission Voltage Level-24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

3. Primary Service-Less than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

CANCELLED BY
ORDER W-8291

MAR 11 1986

REMOVED BY LES
Effective for bills rendered during
the billing month as indicated
above, under authority of MCLA
460.6 et seq as amended.

Issued: March, 1986
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

RULES AND REGULATIONS-Continued

Should the Company apply lesser factors than those above, or if the factors are later revised pursuant to Commission Orders or 1982 PA 304, the Company will notify the Commission if necessary and file a revision of the above list.

4. The Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01077 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 25.31 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

- o Pursuant to MCLA 460.6 et seq as amended, the net billing factors were applied during the billing months as indicated below for the calendar year 1986.

REMOVED BY

HP

Issued: November 26, 1985
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for bills rendered during the billing month as indicated above, under authority of MCLA 460.6 et seq as amended and Order of the Michigan Public Service Commission dated November 6, 1985 in Case U-7550-R

RULES AND REGULATIONS-Continued

Should the Company apply lesser factors than those above, or if the factors are later revised pursuant to Commission Orders or 1982 PA 304, the Company will notify the Commission if necessary and file a revision of the above list.

4. The Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01077 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 25.31 mills per kWh. Average booked of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power. Effective on July 16, 1985, the base was increased from 21.83 mills per kilowatthour to 25.31 mills per kilowatthour.

- o Pursuant to MCLA 460.6 et seq as amended, a net billing factor of 2.25 mills per kilowatthour was applied during the billing month of August for service rendered prior to July 16, 1985. A billing factor of negative 1.50 mills per kilowatthour was applied for service rendered on and after July 16, 1985.

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

For: Primary Supply Rate D-6

1. Transmission Voltage Level-120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

2. Subtransmission Voltage Level-24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

3. Primary Service-Less than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

333/EP/RB1/1.62

Issued: December 29, 1983
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective for bills rendered during the billing month of January, 1984, under authority of MCLA 460.6 et seq as amended.

RULES AND REGULATIONS-Continued

Should the Company apply lesser factors than those above, or if the factors are later revised pursuant to Commission Orders or 1982 PA 304, the Company will notify the Commission if necessary and file a revision of the above list.

4. The Power Supply Cost Recovery Factor shall consist of an increase or decrease of .0107 mills per kWh for each full increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 21.83 mills per kWh. Average booked of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

For: Primary Supply Rate D-6

333/EP/RB1/1.62

Issued: October 28, 1983
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Issued under authority of Order of
the Michigan Public Service
Commission dated October 18, 1983,
in Case U-7510.

RULES AND REGULATIONS-Continued

B-4.6 (cont'd.)

Net system kWh requirements shall be the sum of net kWh generation and net kWh purchased and interchanged.

Costs incurred or charges made by any subsidiary of the Company shall not be includible for purposes of the fuel cost adjustment without expressed authorization by the Michigan Public Service Commission.

During a period of emergency, if the Company resorts to non-economic dispatch pursuant to Commission approval, the 10% penalty clause will be waived.

2. **Purchased and Net Interchange Power Adjustment:**

The purchased and net interchange power adjustment shall, in accordance with the hearing procedures adopted by the Michigan Public Service Commission, consist of an increase or decrease of .0107 mills per kWh for each full .01 mill increase or decrease in the cost of purchased and net interchange power incurred monthly above or below a cost base of 4.67 mills per kWh. The adjustment so determined shall be reduced by 10% and then rounded to the nearest one-hundredth mill per kWh. The cost of purchased and net interchange power per kWh shall equal the calendar month incurred cost of purchased and net interchange power divided by the calendar month net system kWh requirements. The adjustment, in accordance with the hearings procedures adopted by the Michigan Public Service Commission, shall apply to the third billing month following the calendar month in which the power is purchased and interchanged.

To correct for the "three-month lag" in this procedure between cost incurrence and billing adjustment, the increase or decrease in the adjustment per kWh as determined above shall be appropriately increased or decreased by the difference between the "three-month lag" adjustment factor applied in the third preceding billing month and the "three-month lag" adjustment factor to be applied for the immediate billing month.

Net system kWh requirements shall be the sum of net kWh generation and net kWh purchased and interchanged.

Costs incurred or charges made by any subsidiary of the Company shall not be includible for purposes of the purchased and net interchange power adjustment without expressed authorization by the Michigan Public Service Commission.

During a period of emergency, if the Company resorts to non-economic dispatch pursuant to Commission approval, the 10% penalty clause will be waived.

Issued: April 1, 1983
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 1, 1983, under authority of Order of the Michigan Public Service Commission dated March 31, 1983, in Case U-6949.

RULES AND REGULATIONS-Continued

B-4.6 (cont'd.)

Net system kWh requirements shall be the sum of net kWh generation and net kWh purchased and interchanged.

Costs incurred or charges made by any subsidiary of the Company shall not be includible for purposes of the fuel cost adjustment without expressed authorization by the Michigan Public Service Commission.

During a period of emergency, if the Company resorts to non-economic dispatch pursuant to Commission approval, the 10% penalty clause will be waived.

2. Purchased and Net Interchange Power Adjustment:

The purchased and net interchange power adjustment shall, in accordance with the hearing procedures adopted by the Michigan Public Service Commission, consist of an increase or decrease of .0107 mills per kWh for each full .01 mill increase or decrease in the cost of purchased and net interchange power incurred monthly above or below a cost base of 3.19 mills per kWh. The adjustment so determined shall be reduced by 10% and then rounded to the nearest one-hundredth mill per kWh. The cost of purchased and net interchange power per kWh shall equal the calendar month incurred cost of purchased and net interchange power divided by the calendar month net system kWh requirements. The adjustment, in accordance with the hearings procedures adopted by the Michigan Public Service Commission, shall apply to the third billing month following the calendar month in which the power is purchased and interchanged.

To correct for the "three-month lag" in this procedure between cost incurrence and billing adjustment, the increase or decrease in the adjustment per kWh as determined above shall be appropriately increased or decreased by the difference between the "three-month lag" adjustment factor applied in the third preceding billing month and the "three-month lag" adjustment factor to be applied for the immediate billing month.

Net system kWh requirements shall be the sum of net kWh generation and net kWh purchased and interchanged.

Costs incurred or charges made by any subsidiary of the Company shall not be includible for purposes of the purchased and net interchange power adjustment without expressed authorization by the Michigan Public Service Commission.

During a period of emergency, if the Company resorts to non-economic dispatch pursuant to Commission approval, the 10% penalty clause will be waived.

B-4.8 SURCHARGES AND CREDITS APPLICABLE TO POWER SUPPLY SERVICE:

(1) POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:

- (a) This Power Supply Cost Recovery Clause permits the monthly adjustment of rates for power supply to allow recovery of the booked costs of fuel and purchased and net interchanged power transactions incurred under reasonable and prudent policies and practices in accordance with 1982 PA 304. All rates for electric service, unless otherwise provided in the applicable rate schedule, shall include a Power Supply Cost Recovery factor.
- (b) The Power Supply Cost Recovery factor is that element of the rates to be charged for electric service to reflect power supply costs incurred by the company and made pursuant to the Power Supply Cost Recovery Clause.
- (c) Effective November 24, 2004, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01072 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 17.32 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

The following factor(s) were applied to bills rendered during the billing months as indicated below for the calendar year 2006 and 2007.

The Company will file a revised Sheet No. B4-10 monthly, or as necessary, to reflect the factor to be billed the following month.

- (2) REGULATORY ASSET RECOVERY SURCHARGE (RARS):** On November 23, 2004, in its Order in Case No. U-13808, the MPSC authorized the Regulatory Asset Recovery Surcharge. This surcharge is to recover regulatory assets that were based on legislative authority provided by 2000 PA 141, Sections 10d(3) and 10d(4) or prior Commission orders. On July 5, 2007, in its order approving a settlement agreement in Case No.U-15159, the MPSC authorized the following Regulatory Asset Recovery Surcharges. These surcharges are effective for service rendered on and after July 5, 2007.

<u>Class</u>	<u>RARS</u>	<u>Effective Period</u>
D7 & Large Cust. Contracts	\$0.000689/kWh	July 5, 2007 - 2009
Comm. & Ind. >=15 kW	\$0.000453/kWh or 0.56%	July 5, 2007 - 2009
Comm. & Ind. <15 kW	\$0.000919/kWh or 0.83%	July 5, 2007 - 2009
Residential	\$0.003112/kWh or 3.15%	July 5, 2007 - 2010

DATED AUGUST 21, 2007
IN CASE NO. U-15002

(Continued From Sheet No. B4-9)

B-4.8 SURCHARGES AND CREDITS APPLICABLE TO POWER SUPPLY SERVICE:

(1) POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:

- (a) This Power Supply Cost Recovery Clause permits the monthly adjustment of rates for power supply to allow recovery of the booked costs of fuel and purchased and net interchanged power transactions incurred under reasonable and prudent policies and practices in accordance with 1982 PA 304. All rates for electric service, unless otherwise provided in the applicable rate schedule, shall include a Power Supply Cost Recovery factor.
- (b) The Power Supply Cost Recovery factor is that element of the rates to be charged for electric service to reflect power supply costs incurred by the company and made pursuant to the Power Supply Cost Recovery Clause.
- (c) Effective November 24, 2004, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01072 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 17.32 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

The following factor(s) were applied to bills rendered during the billing months as indicated below for the calendar year 2006 and 2007.

DETROIT, MICHIGAN

(Continued on Sheet No. B4-11)

EFFECTIVE FOR BILLS RENDERED FOR THE
2007 PLAN YEAR
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED DECEMBER 21, 2006
IN CASE NO. U-15002

(Continued From Sheet No. B4-9)

B-4.8 SURCHARGES AND CREDITS APPLICABLE TO POWER SUPPLY SERVICE:

(1) POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:

- (a) This Power Supply Cost Recovery Clause permits the monthly adjustment of rates for power supply to allow recovery of the booked costs of fuel and purchased and net interchanged power transactions incurred under reasonable and prudent policies and practices in accordance with 1982 PA 304. All rates for electric service, unless otherwise provided in the applicable rate schedule, shall include a Power Supply Cost Recovery factor.
- (b) The Power Supply Cost Recovery factor is that element of the rates to be charged for electric service to reflect power supply costs incurred by the company and made pursuant to the Power Supply Cost Recovery Clause.
- (c) Effective November 24, 2004, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01072 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 17.32 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

The following factor(s) were applied to bills rendered during the billing months as indicated below for the calendar year 2006 and 2007.

2006			2007		
<u>Billing Month</u>	<u>Maximum Authorized Factor</u> <u>¢/kWh</u>	<u>Actual Billed Factor</u> <u>¢/kWh</u>	<u>Billing Month</u>	<u>Maximum Authorized Factor</u> <u>¢/kWh</u>	<u>Actual Billed Factor</u> <u>¢/kWh</u>

The Company will file a revised Sheet No. B4-10 monthly, or as necessary, to reflect the factor to be billed the following month.

- (2) REGULATORY ASSET RECOVERY SURCHARGE (RARS):** On November 23, 2004, in its Order in Case No. U-13808, the MPSC authorized the Regulatory Asset Recovery Surcharge. This surcharge is to recover regulatory assets that were based on legislative authority provided by 2000 PA 141, Sections 10d(3) and 10d(4) or prior Commission orders. RARS will be implemented on a service rendered basis.

EFFECTIVE FOR BILLS RENDERED FOR
THE 2006 PLAN YEAR
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED SEPTEMBER 26, 2006
IN CASE NO. U-14702

(Continued From Sheet No. B4-9)

B-4.8 SURCHARGES AND CREDITS APPLICABLE TO POWER SUPPLY SERVICE:

(1) POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:

- (a) This Power Supply Cost Recovery Clause permits the monthly adjustment of rates for power supply to allow recovery of the booked costs of fuel and purchased and net interchanged power transactions incurred under reasonable and prudent policies and practices in accordance with 1982 PA 304. All rates for electric service, unless otherwise provided in the applicable rate schedule, shall include a Power Supply Cost Recovery factor.
- (b) The Power Supply Cost Recovery factor is that element of the rates to be charged for electric service to reflect power supply costs incurred by the company and made pursuant to the Power Supply Cost Recovery Clause.
- (c) Effective November 24, 2004, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01072 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 17.32 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

The following factor(s) were applied to bills rendered during the billing months as indicated below for the calendar year 2005 and 2006.

EFFECTIVE FOR BILLS RENDERED FOR
THE 2006 PLAN YEAR
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED DECEMBER 22, 2005
IN CASE NO. U-14702

(Continued From Sheet No. B4-9)

B-4.8 SURCHARGES AND CREDITS APPLICABLE TO POWER SUPPLY SERVICE:

(1) POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:

- (a) This Power Supply Cost Recovery Clause permits the monthly adjustment of rates for power supply to allow recovery of the booked costs of fuel and purchased and net interchanged power transactions incurred under reasonable and prudent policies and practices in accordance with 1982 PA 304. All rates for electric service, unless otherwise provided in the applicable rate schedule, shall include a Power Supply Cost Recovery factor.
- (b) The Power Supply Cost Recovery factor is that element of the rates to be charged for electric service to reflect power supply costs incurred by the company and made pursuant to the Power Supply Cost Recovery Clause.
- (c) Effective November 24, 2004, the Power Supply Cost Recovery Factor shall consist of an increase or decrease of .01072 mills per kWh for each full .01 mill increase or decrease in the projected average booked cost of fuel burned for electric generation and purchased and net interchange power incurred above or below a base of 17.32 mills per kWh. Average booked cost of fuel burned and purchased and net interchange power shall be equal to the booked costs in that period divided by that period's net system kWh requirements. Net system kWh requirements shall be the sum of the net kWh generation and net kWh purchased and interchange power.

The following factor(s) were applied to bills rendered during the billing months as indicated below for the calendar year 2005 *and* 2006.

RULES AND REGULATIONS—Continued

B-4.7 DEFINITION OF CUSTOMER VOLTAGE LEVEL:

(1) Transmission Voltage Level - 120 kV and above:

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

(2) Subtransmission Voltage Level - 24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

(3) Primary Service - Less Than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

B-4.8 CONVERSION FROM MASTER METERING TO DIRECT SERVICE METERING:

(1) Apartment Buildings and Other Multiple Dwellings:

Where the owners of an apartment building or multiple dwelling choose to convert from a master metering installation to an individual tenant direct service utility metering installation, the Company, at its cost, shall provide the equipment and installation ordinarily provided for a newly constructed direct metered multi-dwelling.

(2) Expiration of Master Meters:

All newly constructed duplexes, apartment buildings, mobile homes and multiple occupancy dwellings receiving electrical service on and after August 1, 1979 shall have individual tenant metering.

authority of order of the Michigan
Public Service Commission dated
January 21, 1994 in Case U-10102

RULES AND REGULATIONS-Continued

B-4.8 CONVERSION FROM MASTER METERING TO DIRECT SERVICE METERING:

1. Apartment Buildings and Other Multiple Dwellings:

Where the owners of an apartment building or multiple dwelling choose to convert from a master metering installation to an individual tenant direct service utility metering installation, the Company, at its cost, shall provide the equipment and installation ordinarily provided for a newly constructed direct metered multi-dwelling.

2. Mobile Home Courts:

The Company will, upon request of a mobile home park owner for a mobile home park of a permanent nature with improved streets and with individual water and sewer connections to each lot and subject to the provisions of this Rule, assume ownership of, and incorporate into its electric distribution system, all of an owner's existing electric distribution system and service connection, whether of overhead construction or underground construction including distribution lines, transformers, services, meter set assemblies, meters and associated equipment. The Company on assuming ownership will provide individual service and meters for each ultimate consumer. The purchase price to be paid by the Company for such overhead or underground distribution system will be computed at a rate of \$200 per lot for each lot with an installed service connection to the distribution system where the average age of the mobile home park or Electrical Distribution System is five years or less. Such rate shall be reduced by \$40 per lot for each full five-year period of age as determined based upon the date electric service was first provided on a permanent basis or upon positive proof of significant upgrading of Electric Distribution Facilities subsequent to the initial installation; where the upgrading can be effectively utilized after conversion.

Notwithstanding other provisions of these Rules and Regulations, an overhead distribution system shall be incorporated into the Company's electric distribution system originally as an overhead distribution system. Any subsequent conversion to underground distribution facilities shall be in accordance with the appropriate rule governing underground installations. The mobile home park owner shall be responsible to provide a recordable easement granting rights-of-way suitable for installation and maintenance of the electric facilities; to provide, own, install and maintain suitable meter supports; to remove any unused existing electric equipment not transferred to the utility; to make any necessary wiring changes to separate the electrical responsibilities of the park owner from those of the tenant; and to move mobile homes or other equipment as required to provide access to easements to facilitate maintenance or required upgrading of the existing system.

3. Expiration of Master Meters:

All newly constructed duplexes, apartment buildings, mobile homes and multiple occupancy dwellings receiving electrical service on and after August 1, 1979 shall have individual tenant metering.

RULES AND REGULATIONS-Continued

B-4.7 (cont'd.)

A customer is defined as taking service at the transmission voltage level when he is served directly from the transmission system at 120 kV or above, or from the transmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

2. Subtransmission Voltage Level-24 kV to 41.6 kV:

A customer is defined as taking service at the subtransmission voltage level when he is served directly from the subtransmission system at voltages from 24 kV to 41.6 kV or from the subtransmission system through a Company-owned substation dedicated or primarily providing service to the customer and located on or immediately adjacent to the customer's premises.

3. Primary Service-Less than 24 kV:

A customer is defined as taking primary service when he is served directly from the primary distribution system at a nominal voltage between 4.8 kV and 13.2 kV who does not qualify as either a transmission voltage customer or a subtransmission voltage customer.

B-4.8 CONVERSION FROM MASTER METERING TO DIRECT SERVICE METERING:

1. Apartment Buildings and Other Multiple Dwellings:

Where the owners of an apartment building or multiple dwelling choose to convert from a master metering installation to an individual tenant direct service utility metering installation, the Company, at its cost, shall provide the equipment and installation ordinarily provided for a newly constructed, direct metered multi-dwelling.

2. Mobile Home Courts:

The Company will, upon request of a mobile home park owner for a mobile home park of a permanent nature with improved streets and with individual water and sewer connections to each lot and subject to the provisions of this Rule, assume ownership of, and incorporate into its electric distribution system, all of an owner's existing electric distribution system and service connection, whether of overhead construction or underground construction including distribution lines, transformers, services, meter set assemblies, meters and associated equipment. The Company on assuming ownership will provide individual service and meters for each ultimate consumer. The purchase price to be paid by the Company for such overhead or underground distribution system will be computed at a rate of \$200 per lot for each lot with an installed service connection to the distribution system where the average age of the mobile home park or Electrical Distribution System is five years or less. Such rate shall be reduced by \$40 per lot for each full five-year period of age as determined based upon the date electric service was first provided on a permanent basis or upon positive proof of significant upgrading of Electric Distribution Facilities subsequent to the initial installation; where the upgrading can be effectively utilized after conversion.

**B-4.8 SURCHARGES AND CREDITS APPLICABLE TO POWER SUPPLY SERVICE
(CONTINUED):**

- (3) **ENHANCED SECURITY COST SURCHARGE (ESCS):** On April 3, 2007 the MPSC issued an order in Case No. U-15160 authorizing the ESCS. This surcharge is to recover costs for enhanced security measures incurred at electric generating facilities before January 1, 2006 pursuant to federal or state regulatory security requirements issued after September 11, 2001. ESCS will be implemented on a bills rendered basis.
- (4) **2005 PSCR RECONCILIATION SURCHARGE:** *On May 22, 2007, the MPSC issued an order in Case No. U-14275-R which approved the reconciliation of Detroit Edison's 2005 Power Supply Costs and authorized a 2005 PSCR Reconciliation Surcharge of 0.350 cents per kWh to be collected from Commercial, Industrial, and Governmental PSCR customers for 12 months beginning with the June 2007 bill cycle.*

Filed 

EFFECTIVE FOR BILLS RENDERED ON
AND AFTER FEBRUARY 1, 2006
UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED DECEMBER 22, 2005
IN CASE NO. U-14399

(Continued From Sheet No. B4-10)

B-4.9 SURCHARGES AND CREDITS:

- (1) **NUCLEAR DECOMMISSIONING SURCHARGE (NDS):** A January 1987 MPSC Order authorized the establishment of an external trust fund to finance the decommissioning of Fermi 2 Power Plant when its operating license expires. The Order approves a decommissioning surcharge on customer bills under which the funds are collected. Pursuant to Commission Order U-10102 dated January 21, 1994, a revised surcharge became effective with service rendered on and after January 22, 1994.
- (2) **POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:** See Rule B-4.6
- (3) **SECURITIZATION BOND CHARGE (SBC) AND SECURITIZATION BOND TAX CHARGE (SBTC):** On January 4, 2001 in its Order U-12478, the MPSC authorized the issuance of securitization bonds enabling Detroit Edison's recovery of qualified costs in accordance with the Electric Choice and Electric Reliability Act of 2000. The issuance of the bonds reduced Detroit Edison's overall cost structure and the net cost savings were reflected in 5% reductions in all of Detroit Edison's retail rates. The Securitization Bond Charge was authorized by the MPSC and reflects the payment of principal and interest associated with the bonds as well as recovery of certain servicing and administrative costs. The Securitization Bond Tax Charge reflects the recovery of an income tax liability incurred by the Company arising from its collection of the Securitization Bond principal payments. The Securitization Bond and Securitization Bond Tax Charges are subject to an annual true-up. The current charges appear on Sheet No. B4-11b.
- (4) **RATE INCREASE SURCHARGE (RIS):** On November 23, 2004, in its Final Order in Case No. U-13808, the MPSC granted Detroit Edison rate relief to be implemented through surcharges as set forth on Sheet Nos. B4-11a and B4-12, consistent with the Commission's Order and the rate cap provisions of 2000 PA 141.
- (5) **REGULATORY ASSET RECOVERY SURCHARGE (RARS):** On November 23, 2004, in its Order in Case No. U-13808, the MPSC authorized the Regulatory Asset Recovery Surcharge. This surcharge is to recover regulatory assets that were based on legislative authority provided by 2000 PA 141, Sections 10d(3) and 10d(4) or prior Commission orders. RARS will be implemented on a service rendered basis.

<u>Class</u>	<u>RARS</u>	<u>Effective Period</u>
D7 & Large Cust. Contracts	\$0.000543/kWh or 1.24%	2005 - 2009
Comm. & Ind. >=15 kW	\$0.000898/kWh or 1.26%	2005 - 2009
Comm. & Ind. <15 kW	\$0.001034/kWh or 1.08%	2005 - 2009
Residential	\$0.002274/kWh or 2.62%	2006 - 2010

- (6) **RENEWABLE ENERGY PROGRAM SURCHARGE (REPS):** On November 23, 2004, in its Order in Case No. U-13808, the MPSC authorized funding of a Renewable Energy Program for Detroit Edison through the implementation of a 5-cent per-meter, per billing-cycle surcharge on all meters within the Detroit Edison system for all customers whose rates are no longer capped, pursuant to 2000 PA 141 and then so forth as the caps expire for the remaining customers. This surcharge is effective November 24, 2004 for Commercial & Industrial (C&I) customers >= 15 kW, January 1, 2005 for C&I customers < 15 kW and January 1, 2006 for Residential customers.
- (7) **CHOICE IMPLEMENTATION SURCHARGE (CIS):** On November 23, 2004, in its Final Order in Case No. U-13808, the MPSC authorized a Choice Implementation Surcharge of 0.05 cents per kWh applicable to all metered sales of electricity, effective January 1, 2006. This surcharge recovers the costs associated with implementing the retail electric customer choice program. These costs were also approved by the MPSC in the following cases for the years indicated; Case No. U-12892 (2000), Case No. U-13441 (2001), Case No. U-13738 (2002), and Case No. U-14079 (2003).

UNDER AUTHORITY OF ORDER OF THE
MICHIGAN PUBLIC SERVICE COMMISSION
DATED NOVEMBER 23, 2004
IN CASE NO. U-13808

Changes made to reflect the termination of the Low-Income Energy Assistance Credit

(Continued From Sheet No. B4-10)

B-4.9 SURCHARGES AND CREDITS:

- (1) **NUCLEAR DECOMMISSIONING SURCHARGE (NDS):** A January 1987 MPSC Order authorized the establishment of an external trust fund to finance the decommissioning of Fermi 2 Power Plant when its operating license expires. The Order approves a decommissioning surcharge on customer bills under which the funds are collected. Pursuant to Commission Order U-10102 dated January 21, 1994, a revised surcharge became effective with service rendered on and after January 22, 1994.
- (2) **POWER SUPPLY COST RECOVERY (PSCR) CLAUSE:** See Rule B-4.6
- (3) **SECURITIZATION BOND CHARGE (SBC) AND SECURITIZATION BOND TAX CHARGE (SBTC):** On January 4, 2001 in its Order U-12478, the MPSC authorized the issuance of securitization bonds enabling Detroit Edison's recovery of qualified costs in accordance with the Electric Choice and Electric Reliability Act of 2000. The issuance of the bonds reduced Detroit Edison's overall cost structure and the net cost savings were reflected in 5% reductions in all of Detroit Edison's retail rates. The Securitization Bond Charge was authorized by the MPSC and reflects the payment of principal and interest associated with the bonds as well as recovery of certain servicing and administrative costs. The Securitization Bond Tax Charge reflects the recovery of an income tax liability incurred by the Company arising from its collection of the Securitization Bond principal payments. The Securitization Bond and Securitization Bond Tax Charges are subject to an annual true-up. The current charges appear on Sheet No. B4-11b.
- (4) **RATE INCREASE SURCHARGE (RIS):** On November 23, 2004, in its Final Order in Case No. U-13808, the MPSC granted Detroit Edison rate relief to be implemented through surcharges as set forth on Sheet Nos. B4-11a and B4-12, consistent with the Commission's Order and the rate cap provisions of 2000 PA 141.
- (5) **REGULATORY ASSET RECOVERY SURCHARGE (RARS):** On November 23, 2004, in its Order in Case No. U-13808, the MPSC authorized the Regulatory Asset Recovery Surcharge. This surcharge is to recover regulatory assets that were based on legislative authority provided by 2000 PA 141, Sections 10d(3) and 10d(4) or prior Commission orders. RARS will be implemented on a service rendered basis.

<u>Class</u>	<u>RARS</u>	<u>Effective Period</u>
D7 & Large Cust. Contracts	\$0.000543/kWh or 1.24%	2005 - 2009
Comm. & Ind. >=15 kW	\$0.000898/kWh or 1.26%	2005 - 2009
Comm. & Ind. <15 kW	\$0.001034/kWh or 1.08%	2005 - 2009
Residential	\$0.002274/kWh or 2.62%	2006 - 2010

- (6) **RENEWABLE ENERGY PROGRAM SURCHARGE (REPS):** On November 23, 2004, in its Order in Case No. U-13808, the MPSC authorized funding of a Renewable Energy Program for Detroit Edison through the implementation of a 5-cent per-meter, per billing-cycle surcharge on all meters within the Detroit Edison system for all customers whose rates are no longer capped, pursuant to 2000 PA 141 and then so forth as the caps expire for the remaining customers. This surcharge is effective November 24, 2004 for Commercial & Industrial (C&I) customers >= 15 kW, January 1, 2005 for C&I customers < 15 kW and January 1, 2006 for Residential customers.

B-4.9 SURCHARGES AND CREDITS:

- (1) **ENERGY CONSERVATION SURCHARGE:** Pursuant to the Commission's Order in Case No. U-10297 dated April 11, 1994, the Company implemented an energy conservation program for residential low-income customers for the period 1994-1996. The purpose of this program is to address the needs of low-income customers by implementing measures that result in overall energy efficiency. This program consists of energy education, in-home audits, analysis of energy usage, and installation of energy conservation measures.
- (2) **NUCLEAR DECOMMISSIONING SURCHARGE:** A January 1987 MPSC Order authorized the establishment of an external trust fund to finance the decommissioning of Fermi 2 Power Plant when its operating license expires. The Order approves a decommissioning surcharge on customer bills under which the funds are collected. Pursuant to Commission Order U-10102 dated January 21, 1994, a revised surcharge became effective with service rendered on and after January 22, 1994.
- (3) **DEMAND SIDE MANAGEMENT SURCHARGE:** Pursuant to the Commission's Order in Case U-10102 the Company implemented a demand-side management program in all customer classes. The purpose of this program is to reduce or shift the use of electricity in a manner that will reduce the need for new power plants. The program implemented by the Company consists of the following services:
 - Incentive toward the purchase of energy efficiency measures.
 - Incentives or rates to encourage electricity usage during hours when it is less expensive to produce as opposed to hours when it is more expensive to produce.
 - Energy audits and/or information.
 - Evaluation of programs for cost-effectiveness.

RULES AND REGULATIONS--Continued

B-4.9 SURCHARGES AND CREDITS:

- (1) Pursuant to the provisions of the National Energy Conservation Policy Act dated October 14, 1978, the Michigan Department of Commerce prepared a Michigan Residential Conservation Service Plan (MRCS Plan). On December 30, 1980 the Michigan Public Service Commission in its order in Case No. U-6700 directed covered utilities to comply with the MRCS Plan. The MRCS Plan was revised effective October 1982. The Program implemented by the Company consists of the following services:

- Provision of program announcements.
- Energy audits
- Arrangement services such as assistance in securing contractors to install conservation devices and financial assistance to pay for same.
- Post-installation inspections.

On October 13, 1988, the Commission issued an updated order in Case No. U-6633-R, which authorized the Company to implement a surcharge of up to 0.11 mill per kWh to fund the seventh and eighth years of the MRCS Program. In a letter to the Commission dated November 3, 1988, the Company elected not to implement the full authorized surcharge, but rather remain with the previous surcharge of 0.10 mill per kWh. The Company will continue to monitor the program revenues and expenses and, if necessary, revise this surcharge.

RULES AND REGULATIONS—Continued

B-4.9 SURCHARGES AND CREDITS:

- (1) Pursuant to the provisions of the National Energy Conservation Policy Act dated October 14, 1978, the Michigan Department of Commerce prepared a Michigan Residential Conservation Service Plan (MRCS Plan). On December 30, 1980 the Michigan Public Service Commission in its order in Case No. U-6700 directed covered utilities to comply with the MRCS Plan. The MRCS Plan was revised effective October 1982. The Program implemented by the Company consists of the following services:

- o Provision of program announcements.
- o Energy audits
- o Arrangement services such as assistance in securing contractors to install conservation devices and financial assistance to pay for same.
- o Post-installation inspections.

On October 13, 1988, the Commission issued an updated order in Case No. U-6633-R, which authorized the Company to implement a surcharge of up to 0.11 mill per kWh to fund the seventh and eighth years of the MRCS Program. In a letter to the Commission dated November 3, 1988, the Company elected not to implement the full authorized surcharge, but rather remain with the previous surcharge of 0.10 mill per kWh. The Company will continue to monitor the program revenues and expenses and, if necessary, revise this surcharge.

- (2) On December 27, 1988, the Commission authorized an expense stabilization procedure as follows:

- (a) An Expense Stabilization Procedure (ESP) Surcharge or credit will be implemented beginning on January 1, 1990 to offset annual increases or decreases in operation and maintenance expenses during the first four years of the five year base retail rate moratorium period. This ESP will be based upon the Consumers Price Index - All Urban Consumers (CPI), published by the U.S. Council of Economic Advisors.

- (b) The basic elements of the ESP are as follows:

- o The initial base period ESP value is 1.90 cents/kWh
- o The initial base period ESP value will be adjusted each year by the "allowable change" (compounded). The "allowable change" to be applied annually to the base period ESP value, as adjusted, (to incorporate annual change in CPI for the twelve month period October 1 through September 30) will be calculated as follows:

- For a less than 2% change in CPI, 0% of change; plus
- For the 2 - 8% interval change in CPI, 80% of change; plus
- Any change over 8%, 100% of change

B-4.9 SURCHARGES AND CREDITS:

- (1) Pursuant to the provisions of the National Energy Conservation Policy Act dated October 14, 1978, the Michigan Department of Commerce prepared a Michigan Residential Conservation Service Plan (MRCS Plan). On December 30, 1980 the Michigan Public Service Commission in its order in Case No. U-6700 directed covered utilities to comply with the MRCS Plan. The MRCS Plan was revised effective October 1982. The Program implemented by the Company consists of the following services:

- o Provision of program announcements.
- o Energy audits
- o Arrangement services such as assistance in securing contractors to install conservation devices and financial assistance to pay for same.
- o Post-installation inspections.

On October 13, 1988, the Commission issued an updated order in Case No. U-6633-R, which authorized the Company to implement a surcharge of up to 0.11 mill per kWh to fund the seventh and eighth years of the MRCS Program. In a letter to the Commission dated November 3, 1988, the Company elected not to implement the full authorized surcharge, but rather remain with the previous surcharge of 0.10 mill per kWh. The Company will continue to monitor the program revenues and expenses and, if necessary, revise this surcharge.

1. Pursuant to the provisions of the National Energy Conservation Policy Act dated October 14, 1978, the Michigan Department of Commerce prepared a Michigan Residential Conservation Service Plan (MRCS Plan). On December 30, 1980 the Michigan Public Service Commission in its order in Case No. U-6700 directed covered utilities to comply with the MRCS Plan. The MRCS Plan was revised effective October 1982. The Program implemented by the Company consists of the following services:

- o Provision of program announcements.
- o Energy audits
- o Arrangement services such as assistance in securing contractors to install conservation devices and financial assistance to pay for same.
- o Post-installation inspections.

On May 14, 1987 the Commission issued an order in Case U-6633-R which authorized the Company to implement a MRCS surcharge. The order stated the Company may initiate a surcharge of up to 0.10 mills per kWh commencing June 1, 1987. In a letter to the Commission dated May 21, 1987 the Company elected not to implement any portion of the surcharge through July 31, 1987; however, effective August 1, 1987 the Company will implement the full surcharge of 0.10 mills per kWh.

- o Provision of program announcements.
- o Energy audits
- o Arrangement services such as assistance in securing contractors to install conservation devices and financial assistance to pay for same.
- o Post-installation inspections.
- o Customer billing and loan repayment services.

On October 16, 1981 the Commission issued its order and opinion on Case U-6633 which authorized the Company to collect a surcharge of .31 mills per kWh for service rendered on and after October 17, 1981. The Commission further ordered a reconciliation proceeding to be conducted at the end of the first 12 months of operation of the Residential Conservation Service Program and every 12 months thereafter until termination of the surcharge. June 1, 1981 shall be considered the beginning date of the Company's Residential Conservation Service Program.

Pursuant to Commission Order U-6633-R dated May 21, 1985 the MRCS Surcharge of .31 mills per kWh is herewith suspended through May 31, 1986. On August 12, 1986 the Commission issued an additional order in Case U-6633-R. This order provides for a continuation of the suspension of its MRCS surcharge through May 31, 1987.

B-4.8 (cont'd.)

Notwithstanding other provisions of these Rules and Regulations, an overhead distribution system shall be incorporated into the Company's electric distribution system originally as an overhead distribution system. Any subsequent conversion to underground distribution facilities shall be in accordance with the appropriate rule governing underground installations. The mobile home park owner shall be responsible to provide a recordable easement granting rights of way suitable for installation and maintenance of the electric facilities; to provide, own, install and maintain suitable meter supports; to remove any unused existing electric equipment not transferred to the utility; to make any necessary wiring changes to separate the electrical responsibilities of the park owner from those of the tenant; and to move mobile homes or other equipment as required to provide access to easements to facilitate maintenance or required upgrading of the existing system.

3. Expiration of Master Meters:

All newly constructed duplexes, apartment buildings, mobile homes and multiple occupancy dwellings receiving electrical service on and after August 1, 1979 shall have individual tenant metering.

Detroit, Michigan 48226

Effective on service rendered on and after April 1, 1983, under authority of Order of the Michigan Public Service Commission dated March 31, 1983, in Case U-6949.

RULES AND REGULATIONS-Continued

B-4.8 (cont'd.)

Notwithstanding other provisions of these Rules and Regulations, an overhead distribution system shall be incorporated into the Company's electric distribution system originally as an overhead distribution system. Any subsequent conversion to underground distribution facilities shall be in accordance with the appropriate rule governing underground installations. The mobile home park owner shall be responsible to provide a recordable easement granting rights-of-way suitable for installation and maintenance of the electric facilities; to provide, own, install and maintain suitable meter supports; to remove any unused existing electric equipment not transferred to the utility; to make any necessary wiring changes to separate the electrical responsibilities of the park owner from those of the tenant; and to move mobile homes or other equipment as required to provide access to easements to facilitate maintenance or required upgrading of the existing system.

3. Expiration of Master Meters:

All newly constructed duplexes, apartment buildings, mobile homes and multiple occupancy dwellings receiving electrical service on and after August 1, 1979 shall have individual tenant metering.

B-4.9 SURCHARGES AND CREDITS:

1. Other Operations and Maintenance Expense Surcharge - The Commission in its Opinion and Order in Case U-6488 (CPI) dated January 26, 1982 finds that the percentage change in the national CPI between August 1980 and August 1981 is 10.78%. The Commission in recognizing this change divided the annual allowable change in O & M expense of \$36,481,000 by the total normalized annual jurisdictional electric sales of 36,827,295 kWh, (Case No. U-5502) producing a surcharge of 0.99 mills per kWh. The Company is authorized to apply a surcharge of 0.99 mills per kWh to the monthly bills of its jurisdictional metered electric customers, commencing with the February 1982 billing month and continuing for 12 monthly billing periods.
2. Outreach Program - is a conservation program designed to benefit certain low income customers by installing R-19 of ceiling insulation in the homes of eligible customers. To recover the cost of this program, a surcharge of .01 cents per metered kWh will be applied to all customers commencing with the July 1982 billing month. The order was approved by the commission on June 29, 1982, in Case U-6871.
3. System Availability Incentive Program - The Commission in its opinion and order in Case U-6488 retained the System Availability Incentive Program originally adopted in Case U-5108. The system availability is determined on a calendar year basis using the East Central Area Reliability (ECAR) method.

The provision allows an adjustment to be made to the rate of return on common equity depending on the system availability factor. The scale authorized by the commission is as follows:

.64

Issued: August 9, 1982
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on bills rendered on and after July 1982 billing month under authority of Order of the Michigan

Public Service Commission dated June 29, 1982 in Case U-6871.

RULES AND REGULATIONS-Continued

B-4.8 (cont'd.)

Notwithstanding other provisions of these Rules and Regulations, an overhead distribution system shall be incorporated into the Company's electric distribution system originally as an overhead distribution system. Effective on bills rendered on and
and after June 10, 1982 under
authority of Order of the Michigan
Public Service Commission dated
June 8, 1982 in Case U-6488.

RULES AND REGULATIONS-Continued

B-4.8 (cont'd.)

Notwithstanding other provisions of these Rules and Regulations, an overhead distribution system shall be incorporated into the Company's electric distribution system originally as an overhead distribution system. Any subsequent conversion to underground distribution facilities shall be in accordance with the appropriate rule governing underground installations. The mobile home park owner shall be responsible to provide a recordable easement granting rights-of-way suitable for installation and maintenance of the electric facilities; to provide, own, install and maintain suitable meter supports; to remove any unused existing electric equipment not transferred to the utility; to make any necessary wiring changes to separate the electrical responsibilities of the park owner from those of the tenant; and to move mobile homes or other equipment as required to provide access to easements to facilitate maintenance or required upgrading of the existing system.

3. Expiration of Master Meters:

All newly constructed duplexes, apartment buildings, mobile homes and multiple occupancy dwellings receiving electrical service on and after August 1, 1979 shall have individual tenant metering.

B-4.9 SURCHARGES AND CREDITS:

1. Other Operations and Maintenance Expense Surcharge - The Commission in its Opinion and Order in Case U-6488 (CPI) dated January 26, 1982 finds that the percentage change in the national CPI between August 1980 and August 1981 is 10.78%. The Commission in recognizing this change divided the annual allowable change in O & M expense of \$36,481,000 by the total normalized annual jurisdictional electric sales of 36,827,295 kWh, (Case No. U-5502) producing a surcharge of 0.99 mills per kWh. The Company is authorized to apply a surcharge of 0.99 mills per kWh to the monthly bills of its jurisdictional metered electric customers, commencing with the February 1982 billing month and continuing for 12 monthly billing periods.
2. System Availability Incentive Program - The Commission in its opinion and order in Case U-6006 retained, the System Availability Incentive Program originally adopted in Case U-5108. The system availability will be determined on a calendar year basis using the East Central Area Reliability (ECAR) method. The scale established by the Commission is that, the Company would be penalized by a downward adjustment of .25% in its rate of return on common equity for an annual average system availability of 0% to 70%; from 70.1% through 80.0% there would be no adjustment; 80.1% through 85.0% an upward adjustment of .25% would be awarded; and 85.1% through 100.0% the Company would be awarded .50% increase in its rate of return on common equity. In hearings held before the Commission in April of 1981 it was concluded that the Company system availability was above 80.1% and thus, qualified the Company for an upward adjustment of .25%. The adjustment represents an increase of annual revenue of \$6,628,587 and will be collected by an increase in metered rates by .202 mills per kWh, commencing with bills rendered on and after June 10, 1981 and continuing for twelve monthly billing periods.

2. System Availability Incentive Program - The Commission in its opinion and order in Case U-6006 retained, the System Availability Incentive Program originally adopted in Case U-5108. The system availability will be determined on a calendar year basis using the East Central Area Reliability (ECAR) method. The scale established by the Commission is that, the Company would be penalized by a downward adjustment of .25% in its rate of return on common equity for an annual average system availability of 0% to 70%; from 70.1% through 80.0% there would be no adjustment; 80.1% through 85.0% an upward adjustment of .25% would be awarded; and 85.1% through 100.0% the Company would be awarded .50% increase in its rate of return on common equity. In hearings held before the Commission in April of 1981 it was concluded that the Company system availability was above 80.1% and thus, qualified the Company for an upward adjustment of .25%. The adjustment represents an increase of annual revenue of \$6,628,587. and will be collected by an increase in metered rates by .202 mills per kWh, commencing with bills rendered on and after June 10, 1981 and continuing for twelve monthly billing periods.

Net Credit Adjustment

SUMMARY:

O & M Surcharge	REMOVED BY <i>AEU</i>	0 mill	or	0¢
System Availability Incentive Provision		.202 mill	or	.0202¢
Net Adjustment		.202 mill	or	.0202¢

OCT 16 1981

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

aug - Sept

Changes made to suspend U-14842 Rate Reduction Credit and the Renewable Energy Program Surcharge
and add U-14838 Rate Reduction Credit

(Continued From Sheet No. B4-11)

**B-4.9 SURCHARGES AND CREDITS
APPLICABLE TO DELIVERY SERVICE:**

- (1) **NUCLEAR DECOMMISSIONING SURCHARGE (NDS):** A January 1987 MPSC Order authorized the establishment of an external trust fund to finance the decommissioning of Fermi 2 Power Plant when its operating license expires. The Order approves a decommissioning surcharge on customer bills under which the funds are collected. Pursuant to Commission Order U-10102 dated January 21, 1994, a revised surcharge became effective with service rendered on and after January 22, 1994.
- (2) **SECURITIZATION BOND CHARGE (SBC) AND SECURITIZATION BOND TAX CHARGE (SBTC):** On January 4, 2001 in its Order U-12478, the MPSC authorized the issuance of securitization bonds enabling Detroit Edison's recovery of qualified costs in accordance with the Electric Choice and Electric Reliability Act of 2000. The issuance of the bonds reduced Detroit Edison's overall cost structure and the net cost savings were reflected in 5% reductions in all of Detroit Edison's retail rates. The Securitization Bond Charge was authorized by the MPSC and reflects the payment of principal and interest associated with the bonds as well as recovery of certain servicing and administrative costs. The Securitization Bond Tax Charge reflects the recovery of an income tax liability incurred by the Company arising from its collection of the Securitization Bond principal payments. The Securitization Bond and Securitization Bond Tax Charges are subject to an annual true-up. The current charges appear on Sheet No. B4-11b.
- (3) **RENEWABLE ENERGY PROGRAM SURCHARGE (REPS):** On November 23, 2004, in its Order in Case No. U-13808, the MPSC authorized funding of a Renewable Energy Program for Detroit Edison through the implementation of a 5-cent per-meter, per billing-cycle surcharge on all meters within the Detroit Edison system for all customers whose rates are no longer capped, pursuant to 2000 PA 141 and then so forth as the caps expire for the remaining customers. This surcharge is effective November 24, 2004 for Commercial & Industrial (C&I) customers \geq 15 kW, January 1, 2005 for C&I customers < 15 kW and January 1, 2006 for Residential customers. ***On August 31, 2006, in its Order approving a settlement agreement in Case No. U-14838, the MPSC suspended the Renewable Energy Program Surcharge until further order of the Commission.***
- (4) **CHOICE IMPLEMENTATION SURCHARGE (CIS):** On November 23, 2004, in its Final Order in Case No. U-13808, the MPSC authorized a Choice Implementation Surcharge of 0.05 cents per kWh applicable to all metered sales of electricity, effective January 1, 2006. This surcharge recovers the costs associated with implementing the retail electric customer choice program. These costs were also approved by the MPSC in the following cases for the years indicated; Case No. U-12892 (2000), Case No. U-13341 (2001), Case No. U-13738 (2002), and Case No. U-14079 (2003).
- (5) **RATE REDUCTION CREDIT (RRC):** ***On August 31, 2006 in its Order approving a settlement agreement in Case No. U-14838 the MPSC terminated the Rate Reduction Credit authorized in U-14842 effective September 5, 2006.***
- (6) **U-14838 RATE REDUCTION CREDIT (RRC):** ***On August 31, 2006 in its Order approving a settlement agreement in Case No. U-14838 the MPSC authorized a RRC effective for service rendered on and after September 5, 2006. The U-14838 RRC will continue until the latter of March 31, 2008 or twelve months from the date of filing of the general electric rate case ordered by the Commission in MPSC Case No. U-14399.***

**B-4.9 SURCHARGES AND CREDITS
APPLICABLE TO DELIVERY SERVICE:**

(7) CHOICE INCENTIVE MECHANISM (CIM):

- (a) On August 31, 2006 in its Order in Case No. U-14838 the MPSC authorized the establishment of a Choice Incentive Mechanism (CIM). The CIM will determine the change in total non-fuel revenue associated with increases or decreases in annual choice sales from a total "base" choice sales level of 3,400 GWH for the period commencing January 1, 2007 and continuing until the latter of March 31, 2008 or twelve months from the date of filing of the general electric rate case ordered by the Commission in MPSC Case No. U-14399. The first CIM filing will be filed on or before March 31, 2008.
- (b) In the event of a decrease in total non-fuel revenue, the total decrease in non-fuel revenue will first be reduced by a "deadband" modifier equal to \$8 million. Recoverable non-fuel revenue is limited to 90% of this adjusted amount and shall not exceed \$70.8 million. Recoverable non-fuel revenue will be allocated in the same manner that the full service rate reduction was allocated to full-service customers in Case No. U-14838. Tariff specific surcharges apply only to full-service customers and will be based on a cents per kWh basis for metered customers and on a percent basis for unmetered customers. If the surcharges result in an over or under recovery of recoverable non-fuel revenues such over or under recovery will be deferred and included in the following CIM reconciliation filing.
- (c) In the event of an increase in total non-fuel revenue, the total increase in non-fuel revenue will first be reduced by a "deadband" modifier equal to \$8 million. The balance will be used to reduce unrecovered regulatory asset balances related to the RARS mechanism (Section 10d(4) costs).
- (d) Changes in non-fuel revenue will be determined as follows:

	(a) Actual Choice Sales (GWH)	(b) Base Choice Sales (GWH)	(c) Choice Sales Change (GWH)	(d) Non-Fuel Price (¢/kWh)	(e) Increase/ (Decrease) in Non-Fuel Revenue
• Residential	TBD	0	a-b	3.1	-c*d
• Commercial	TBD	2,100	a-b	4.2	-c*d
• Primary (excl. Rate D7)	TBD	1,300	a-b	3.8	-c*d
• Rate No. D7	TBD	0	a-b	2.1	-c*d
• Total	TBD	3,400	a-b	NA	Total

- (1) In the event of a decrease in total non-fuel revenue, recoverable non-fuel revenue will be determined as described in paragraph (b).
- (2) In the event of an increase in total non-fuel revenue, the adjusted increase in non-fuel revenue available to reduce the regulatory asset balances related to the RARS mechanism (Section 10d(4) costs) will be determined as described in paragraph (c).

3. System Availability Incentive Program - The Commission in its opinion and order in Case U-6488 retained, the System Availability Incentive Program originally adopted in Case U-5108. The system availability will be determined on a calendar year basis using the East Central Area Reliability (ECAR) method.

The provision allows an adjustment to be made to the rate of return on common equity depending on the system availability factor. The scale authorized by the commission is as follows:

System Availability (ECAR) Plus Periodic Factor	Equity Return Incentive
100% - 92.01%	+.50%
92.00% - 90.76%	+.40%
90.75% - 89.51%	+.30%
89.50% - 88.26%	+.20%
88.25% - 87.01%	+.10%
87.00% - 81.01%	0
81.00% - 80.01%	-.05%
80.00% - 79.01%	-.10%
79.00% - 78.01%	-.15%
78.00% - 77.01%	-.20%
77.00% -	-.25%

CANCELLED BY
ORDER 11-6949

MAR 31 1983

REMOVED BY *jea*

In hearings held before the Commission in April of 1982 it was concluded that the Company system availability was 91.49, and thus qualified the Company for an upward adjustment of .40%. The adjustment represents an increase in annual revenue of \$12,216,512. It will be collected by an increase in metered rates of .375 mills per kWh, commencing with bills rendered on and after June 10, 1982 and continuing for twelve monthly billing periods. (Pursuant to Commission Order in Case U-6949. This program will be abandoned with the expiration of the above surcharge.

4. Pursuant to the provisions of National Energy Conservation Policy dated October 14, 1978, the Michigan Department of Commerce prepared a Michigan Residential Conservation Service Plan (MRCS Plan). On December 30, 1980 the Michigan Public Service Commission in its order of Case No. U-6700 directed covered utilities to comply with the MRCS Plan. The Program implemented by the Company will consist of the following services:

- o Provision of program announcements.
- o Energy audits
- o Arrangement services such as assistance in securing contractors to install conservation devices and financial assistance to pay for same.
- o Post-installation inspections.
- o Customer billing and loan repayment services.

On October 16, 1981 the Commission issued its order and opinion in Case U-6633 which authorized the Company to collect a surcharge of .31 mills per kWh for service rendered on and after October 17, 1981. The Commission further ordered a reconciliation proceeding to be conducted at the end of the first 12 months of operation of the Residential Conservation Service Program and every 12 months thereafter until termination of the surcharge. June 1, 1981 shall be considered the beginning date of the Company's Residential Conservation Service Program.

RULES AND REGULATIONS--Continued

B-4.10 TAX ADJUSTMENT AND FRANCHISE FEES:

Bills to customers receiving service within the limits of political subdivisions which levy special license fees, franchise fees or any other such fee against the Company or its operation or the production or sale of electric energy shall be increased to offset such special fee or any new or increased special fee, thereby preventing other customers from being compelled to share such local fees.

B-4.11 BILLING ERRORS (U-9754 - R460.2125)

- (1) If a utility overcharges a customer due to a billing error, the utility shall refund or credit the amount of the overcharge. A utility is not required to adjust, refund, or credit an overcharge for more than the 3 years immediately preceding discovery of the billing error, unless the customer is able to establish an earlier date for commencement of the error.
- (2) If a utility undercharges a customer, the following provisions apply:
 - (a) In cases that involve meter tampering or fraud, the utility may backbill the customer for the amount of the undercharge.
 - (b) In cases that do not involve meter tampering or fraud, the utility may backbill the customer for the amount of the undercharge during the 12-month period immediately preceding discovery of the error, and the utility shall offer the customer reasonable payment arrangements for the amount of the backbill, taking into account the period of the undercharge.
- (3) Overcharges and undercharges due to electric meter errors shall be reconciled in accordance with the provisions of R 460.3403 of the regulations governing service supplied by electric utilities, or see B-6.14 of these rules.
- (4) Billing Error - Commercial and Industrial customer. See U-6400 - R 460.3404.

Public Service Commission dated
October 2, 1992 in Case U-9754.

RULES AND REGULATIONS—Continued

B-4.11 BILLING ERRORS

- (a) If a customer has been overcharged as a result of incorrect reading of the meter, incorrect use of meter constants, incorrect application of the rate schedule, incorrect connection of the meter, or other similar reasons, the amount of the overcharge shall be adjusted, refunded, or credited to the customer. The Company is not required to adjust, refund, or credit an overcharge beyond the 3-year period immediately preceding discovery of the billing error, unless the customer is able to present a record establishing an earlier date of occurrence or commencement of the error.
- (b) If a customer has been undercharged as a result of incorrect reading of the meter, incorrect use of meter constants, incorrect application of the rate schedule, incorrect connection of the meter, or other similar reasons, the undercharge may be billed to the customer subject to subrule (c) of this rule.
- (c) Except in cases of tampering, the following limitations shall apply to the backbilling of residential, commercial, and industrial customers:
 - (1) Backbilling of residential customers and commercial customers with single-phase 240 volt meters is limited to the 1-year period immediately preceding the discovery of the error. The customer shall be given a reasonable time in which to pay the amount of the backbilling and service shall not be discontinued during this time for nonpayment of the amount of the backbilling.
 - (2) Backbilling of industrial customers and commercial customers not included in subdivision (1) of this subrule is limited to the 1-year period immediately preceding discovery of the error except in instances where the Company could not have detected the error through regular meter readings or the exercise of reasonable diligence in preparing and reviewing a customer's bills and records. In these instances, the Company may backbill a customer for a period of up to 3 years immediately preceding discovery of the error. The customer shall be given a reasonable time in which to pay the amount of the backbilling and service shall not be discontinued during this time for nonpayment of the amount of the backbilling.

RULES AND REGULATIONS-Continued

B-5.1 SERVICE CONNECTIONS:

All wiring upon the customer's premises shall be brought by the customer to any suitable point of service specified by the Company. If the customer wishes a service point other than one specified by the Company, the customer shall pay for any mutually agreed upon extension of the service by a contribution in aid of construction. Only one service connection is installed to a building or group of buildings, including adjacent service areas under a single ownership except where separate service is required for disturbing use of service or where, in the judgment of the Company, additional services are necessary or desirable for operating reasons or for safety requirements. Detailed specifications for service connections will be furnished upon request at any customer business office.

B-5.2 CUSTOMER'S INSTALLATION:

All wiring on the customer's premises shall be installed and maintained in accordance with applicable laws and the rules of the governmental authority having jurisdiction, the National Electrical Code and the rules of the Company.

The use of any part of the Company's distribution system for carrying foreign electric currents or for carrier current transmission or broadcasting is expressly forbidden unless prior written permission has been obtained from the Company.

With the exception of the overhead service entrance cable (if required), the Company's service and equipment ends at the meter. The customer's equipment and wiring begins at the meter and this, in addition to the overhead service entrance cable (if required), is the responsibility of the customer.

The customer shall provide, at a location approved by the Company and free of expense to the Company, a suitable place for the meter or meters and any other supply, protective or control equipment of the Company which may be required in the delivery of the service.

Any inspection provided by The Detroit Edison Company is for the purpose of determining compliance with the technical provisions of Company rules and regulations for service and is, in no way, a guarantee of methods or appliances used by the contractor or the customer, or for the safety of the job.

B-5.3 (1) COMPANY EQUIPMENT ON CUSTOMER'S PROPERTY:

The Company will repair and maintain its own property installed on the premises of the customer. All equipment supplied by the Company shall remain its exclusive property, and the Company shall have the right to remove the same from the premises of the customer at any time after the termination of service for any reason.

Relocation of Company facilities at the request of the customer will be at the customer's expense.

The customer shall be responsible for the safekeeping of the Company's property and shall not permit any person except an authorized Company representative to break any seals upon, or do any work on, any meter or other apparatus of the Company located on the customer's premises.

B-5.3 (cont'd.)

Any customer who willfully or negligently allows the meter seals to be broken, or work to be done on the meter by an unauthorized person, may be charged by the Company for the actual cost to correct, repair or inspect the metering equipment. Where equipment has been tampered with, the customer or owner shall be liable for the damage done to the Company's equipment, and may be charged for any expense incurred for restoration of the installation, which expenses may be applied to the customer's account. The charging for such expenses shall not be deemed an election of remedies or a waiver of the Company's right to seek prosecution for violations of the law.

(2) LOCATION OF METERS:

Meters for all secondary services will, in general, be installed outdoors in a meter enclosure. Meters for other services may be installed outdoors if they are protected from traffic and are readily accessible for reading and testing. Meters which must be protected from inclement weather while being serviced or tested shall be located indoors or in a suitable housing where such work can be performed.

Meters and related equipment located indoors shall be as near as possible to the service entrance, in a clean, dry place, reasonably secure from injury, not subject to vibration, and readily accessible for reading and testing. When ladders are needed to reach the Company's equipment, MIOSHA dictates that the area must be large enough to accommodate their safe use.

In cases of multiple buildings such as two-family flats or apartment buildings, if the meters are installed indoors, they shall be located within the premises served or at a common location readily accessible to the tenants and the Company.

An authorized representative of the Company will determine the acceptability of the meter location in all cases.

(3) CHARGES FOR METER RELOCATION:

The Company may assess the meter relocation charge pursuant to B-2.5(4)(C) in any of the following situations:

- (a) The customer's service had been discontinued by disconnection at the street or pole because access to the meter could not be obtained.
- (b) The customer's service had been otherwise discontinued for nonpayment on 2 occasions.

Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after April 18, 1984 under authority of Order of the Michigan Public Service Commission dated April 3, 1984 in Case U-4240.

B-6.0 **GENERAL:**

The Company complies with all provisions of Order No. U-6400, Rules for Electrical Service, issued by the Michigan Public Service Commission except in the instance of its rules pertaining to electricity meters and certain related transactions with customers. The amended and revised rules relative to these exceptions are stated below.

B-6.1 **METER AND ASSOCIATED DEVICE INSPECTIONS AND TESTS:**

- (a) Every meter and associated device shall be inspected and tested in the meter shop of the Company before being placed in service. The accuracy of each meter shall be certified to be within the tolerances permitted by these rules, except that the Company may rely on the certification of accuracy by the manufacturer on all new self-contained, single-phase meters.
- (b) Meters with associated instrument transformers and phase shifting transformers shall be inspected to determine the proper operation and wiring connections. Inspections shall be made within 60 days after installation by a qualified person who, when possible, should be someone other than the original installer. All self-contained, socket-type meters are excluded from post-installation inspections, except that the original installation shall be inspected when the meter is installed.
- (c) All meters and associated devices shall be tested after they are retired from service.

B-6.2 **METERING ELECTRICAL QUANTITIES:**

- (a) All electrical quantities that are to be metered as provided by the tariff shall be metered by commercially acceptable instruments which are owned and maintained by the Company.
- (b) Every reasonable effort shall be made to measure at 1 point all the electrical quantities necessary for billing a customer under a given rate.
- (c) Metering facilities located at any point where energy may flow in either direction and where the quantities measured are used for billing purposes shall consist of meters equipped with ratchets or other devices to prevent reverse registration and shall be so connected as to separately meter the energy flow in each direction.
- (d) Reactive metering shall not be employed for determining the average power factor for billing purposes where energy may flow in either direction or where the customer may generate an appreciable amount of his or her energy requirements at any time, unless suitable directional relays and ratchets are installed to obtain correct registration under all conditions of operation.
- (e) All electric service of the same type rendered under the same rate schedule shall be metered with instruments having like characteristics, except that the commis-

METERING AND METERING EQUIPMENT

B-6.1 GENERAL:

The Company complies with all provisions of Order No. 1692, Rules for Electrical Service, issued by the Michigan Public Service Commission except in the instance of its rules pertaining to electricity meters and certain related transactions with customers. The amended and revised rules relative to these exceptions are stated below.

B-6.2 MEASURING CUSTOMER SERVICE:

- (a) All energy sold to customers will be measured by commercially acceptable measuring devices owned and maintained by the Company, except where it is impracticable to meter loads, such as street lighting, temporary or special installations, in which case the consumption may be calculated. All other electrical quantities which the rates or rules of the Company indicate are to be metered will be metered by commercially acceptable instruments owned and maintained by the Company.
- (b) Every reasonable effort will be made to measure at one point all the electrical quantities necessary for billing a customer under a given rate.
- (c) 1. Metering facilities located at any point where energy may flow in either direction and where the quantities measured are used for billing purposes will consist of meters equipped with ratchets or other device to prevent reverse registration and be so connected as to meter separately energy flow in each direction.

2. Reactive metering will not be employed for determining average power factor for billing purposes where energy may flow in either direction or where the customer may generate an appreciable amount of his energy requirements at any time unless suitable directional relays and ratchets are installed to obtain correct registration under all conditions of operation.
- (d) All electric service of the same type rendered under the same rate schedule will be metered with instruments having like characteristics, except that the Michigan Public Service Commission may be requested to approve the use of instruments of different types if their use does not result in unreasonable discrimination. Either all of the reactive meters which may run backwards or none of the reactive meters used for measuring reactive power under one schedule shall be ratcheted.

B-6.3 MULTIPLIERS AND TEST CONSTANTS:

- (a) Meters which are not direct reading and those operating from instrument transformers will have the multiplier plainly marked on the dial of the instrument or otherwise suitably marked and all charts taken from recording meters will be marked with the date of the record, the meter number, customer, and chart multiplier.
- (b) The register ratio will be marked on all meter registers. Meters already in service are to be so marked when they are tested.

METERING AND METERING EQUIPMENT-Continued

B-6.3 (cont'd.)

- (c) The watthour constant for the meter itself will be placed on all watthour meters. Meters already in service are to be so marked when they come to the meter shop.

B-6.4 ACCURACY OF WATTHOUR METERS:

- (a) Watthour meters used for measuring electrical quantities supplied will:

1. Be of proper design for the circuit on which they are used, be in good mechanical condition, have adequate insulation, correct internal connections, and correct register.
2. Not creep at "no load" with all load wires disconnected at a rate of one complete revolution of the moving element in ten minutes when potential is impressed.
3. Be accurate to within plus or minus 1.0%, referred to the portable standard watthour meter as a base, at two unity power factor loads: Light load (L.L.) and heavy load (H.L.). Light load test current for self-contained meters is equal to ten percent of the rated test amperes of the meter. Heavy load test current for self-contained meters is between 75 and 100 percent of the rated test amperes of the meter. Heavy load test current for transformer rated meters is between 75 and 200 percent of the rated test amperes of the meter. Light load test current for transformer rated meters is between five and ten percent of the rated test amperes of the meter.
4. Be accurate to within plus or minus 2.0%, referred to the portable standard watthour meter as a base, at Inductive Load (I.L.), approximately 50 percent lagging power factor. Inductive load test current is approximately equal to heavy load test current.

- (b) Polyphase meters will have their elements in balance within 2.0% at rated test amperes at unity power factor and at approximately 50% lagging power factor.

- (c) Meters used with instrument transformers will be adjusted so that the overall accuracy of the metering installation will meet the requirements of this rule.

B-6.5 ACCURACY OF DEMAND METERS:

A demand meter, demand register, or demand attachment used to measure customer's service will:

- (a) Be in good mechanical and electrical condition.
- (b) Have proper constants, indicating scale, contact device, recording tape or chart, and resetting device.
- (c) Not register at no load.
- (d) Be accurate to the following degrees:

(Continued on next sheet)

Issued: July 21, 1981
By: E. L. Grove, Jr.
Vice Chairman of the Board
2000 Second Avenue
Detroit, Michigan 48226

Effective on service rendered on and after July 23, 1981 under authority of Order of the Michigan Public Service Commission dated July 21, 1981 in Case U-6488.

METERING AND METERING EQUIPMENT-Continued

B-6.5 (cont'd.)

1. Curve-drawing meters which record quantity-time curves, and integrated-demand meters will be accurate to within plus or minus 2.0% of full scale throughout their working range. Timing elements measuring specific demand intervals will be accurate to within plus or minus 2.0% and the timing element which serves to provide a record of the time of day when the demand occurs will be accurate to within plus or minus 4 minutes in 24 hours.
2. Lagged-demand meters will be accurate to within plus or minus 4.0 percent of full scale at final indication.

B-6.6 REQUIREMENTS AS TO INSTRUMENT TRANSFORMERS:

- (a) Instrument transformers used in conjunction with metering equipment to measure customer's service will:

1. Be in proper mechanical condition and have electrical insulation satisfactory for the service on which used.
2. Have characteristics such that the combined inaccuracies of all transformers supplying one or more meters in a given installation will not exceed the following:

100% Power Factor	
10%	100%
Current	Current
1%	.75%

50% Power Factor	
10%	100%
Current	Current
3%	2%

- (b) 1. Meters used in conjunction with instrument transformers will be adjusted so that the over-all accuracies will come within the limits specified in the preceding rules.
2. Instrument transformers will be tested with the meter with which they are associated by making an overall test, or may be checked separately. If the transformers are tested separately, the meters will also be checked to see that the over-all accuracy of the installation is within the prescribed accuracy requirements.
