

MI SCHOOL DATA QUICK START GUIDES

K12 STUDENT REPORTS

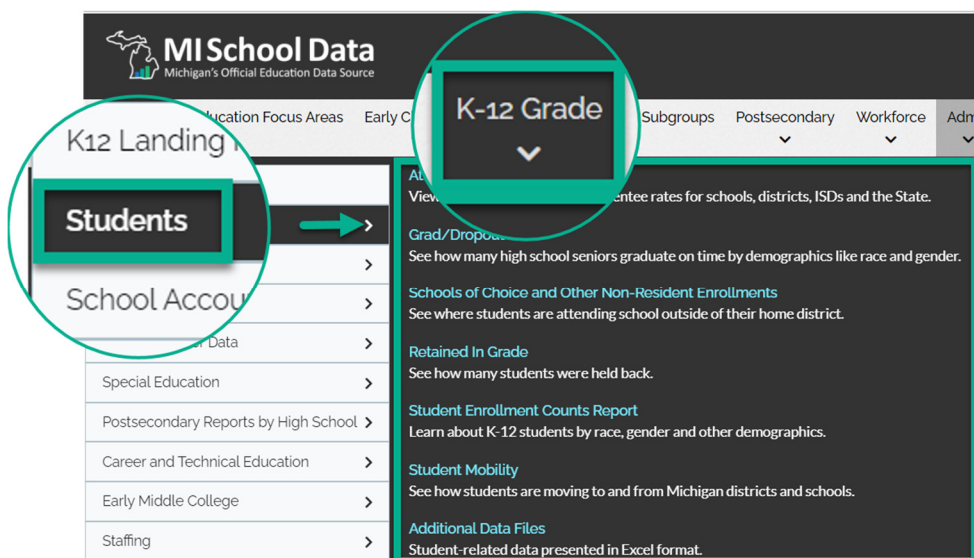

**ATTENDANCE, GRADUATION / DROPOUT, RETENTION,
MOBILITY, CHOICE, AND MORE**

The K12 Grade menu **Students** submenu allows users to explore demographic student information.

Locate the Students submenu by navigating to the K-12 menu of the MISchoolData.org portal. Data are available for attendance, graduation and dropout rates, schools of choice and non-resident enrollments, retentions, enrollments and mobility. Secure users may have access to additional student level data.

Users can also explore additional data files and request downloads.

Reports display in a variety of formats and can be downloaded, printed, or shared for local use. The public may view snapshots, trends, and entity breakdown data.

Below is a listing of the reports available and the types of information for each:

Attendance

View attendance and chronic absentee rates for schools, districts, ISDs and the State.

Grad/Dropout Rate

See how many high school seniors graduate on time by demographics like race and gender.

Schools of Choice and Other Non-Resident Enrollments

See where students are attending school outside of their home district.

Retained In Grade

See how many students were held back.

Student Enrollment Counts Report

Learn about K-12 students by race, gender and other demographics.

Student Mobility

See how students are moving to and from Michigan districts and schools.

Additional Data Files

Student-related data presented in Excel format.

K12 GRADE STUDENTS SUBMENU OVERVIEW

To explore student data:

1. Locate the **K-12 Grade** menu and select the **Students** submenu.
2. Choose a report inquiry from the following options:
 - ⇒ *Attendance*
 - ⇒ *Grad/Dropout Rate*
 - ⇒ *Schools of choice and Other Non-Resident Enrollments*
 - ⇒ *Retained in Grade*
 - ⇒ *Student Enrollment*
 - ⇒ *Student Mobility*
 - ⇒ *Additional Data Files*

The screenshot shows the MI School Data website interface. The top navigation bar includes 'Dashboards & Education Focus Areas', 'Early Childhood', 'K-12 Grade' (highlighted with a green box), 'Student Subgroups', 'Postsecondary', and 'Workforce'. Below the navigation bar, the 'K12 Landing Page' is displayed. On the left, a list of submenus is shown, with 'Students' highlighted by a green box and a green arrow pointing to the right. On the right, a list of report categories is shown, including 'Attendance', 'Grad/Dropout Rate', 'Schools of Choice and Other Non-Resident Enrollments', 'Retained In Grade', 'Student Enrollment Counts Report', 'Student Mobility', and 'Additional Data Files'.

3. Use the **Location and Report Settings** to filter your inquiries. Use the “School, District, ISD name or code” to search by name or keyword, or use the drop down menus to filter by ISD, District, School, School Year, and/or Report Category.
4. To generate results, click on **Update Report**.

The screenshot shows the 'Location and Report Settings' form. The form is divided into two main sections. The left section, titled 'Select Locations', contains a search bar for 'School, District, ISD name or code' and three dropdown menus for 'ISD', 'District', and 'School'. The right section contains dropdown menus for 'School Year' (set to 2020-21) and 'Report Category' (set to All Students). A green box highlights the 'Update Report' button, which is located below the dropdown menus. A green arrow points to the 'Update Report' button. Below the button, a message states: 'Location and setting changes will be reflected in the report charts and tables after clicking the Update Report button.'

REPORT FEATURES

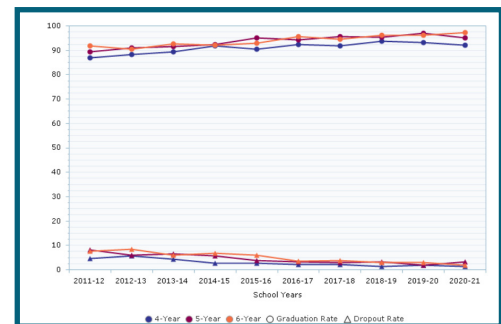

Reports can be viewed in a variety of formats, including as a table or as a chart or graph. Charts/graphs display **Snapshot**, **Trend**, or **Entity Breakdown**. In some reports, logged in users have the option of choosing **Student Breakdown**.

☐ Snapshot ☒ Trend ☐ Entity Breakdown

The **Snapshot** report view displays in the form of a bar graph.

The **Trend** report view displays as data overtime.

The **Entity Breakdown** provides a data table with information for each entity within the district or organization.

MI SCHOOL DATA QUICK START GUIDES

K12 STUDENT ATTENDANCE

View attendance and chronic absentee rates for schools, districts, ISDs and the State.

Regular attendance is critical to student success. This report can give an overview of attendance rates for all public K-12 students in Michigan or compare rates for different locations, grade levels or demographics. Data for the Attendance report come from the Michigan Student Data System. Districts report total days attended and total possible attendance (the number of days students could have attended from the first day of school, the date of new enrollment or the beginning of a program) for each student at the end of the year, or upon creating an exit record for the student during the year.

The data used for this report do not differentiate between excused and unexcused absences, and therefore do not reflect truancy rates. The report is updated annually in early fall. The Attendance Report shows the aggregate attendance rates for students in three categories: all students, chronically absent, and non chronically absent.

Follow these steps to generate an **Attendance** report: Generate this report by using the **K12 Grade Students** sub-menu and choosing **Attendance**.

MI SCHOOL DATA QUICK START GUIDES

K12 GRADUATION & DROPOUT

See how many high school seniors graduate on time by demographics like race and gender.

The Graduation/Dropout Rate report shows the percent and count of public high school students who, after beginning ninth grade four, five, or six years ago, graduated or dropped out of school. Four-year graduation rates are an important school accountability measure adopted by the state and aligned with the National Governors Association Graduation Counts Compact.

The Grad/Dropout Rate report contains data collected from each public school district, including public school academies (charter schools). Each student is assigned to a graduation cohort the first time they are reported as a ninth grader. Students who transfer into the Michigan public education system after ninth grade are placed into the appropriate cohort based on the grade in which the initial district places them. This method tracks individual students who stay in school for up to six years to earn a diploma and helps districts account for students who are retained in a grade, who drop out and return later, or who transfer in/out of a district or the public school system. Graduation trends are available starting from the 2006-07 school year, and is updated annually every February/March. Historical reports are located in the Data Files section of MI School Data.

Students are included in district rates if they've been reported for at least one count day, based on fall and spring counts. If students have not been in the district for at least one count day, they're only included in the state-level rates. To be included in building rates, students must have been reported to the state for two or more count days.

Students who transferred out of state, to a private school, or who began home schooling aren't included in the data. Buildings that exclusively serve court-placed students as defined by Title I, Part D have a building-level graduation/dropout rate, but are not included in the district rate.

- Example: Students in the 2018 cohort were ninth graders in the 2014-15 school year. Their on-time expected graduation was four years later (2018). Students in this cohort who graduated in 2018 were counted in the four-year graduation rate; those who did not graduate in 2018 could be counted as dropouts or off-track continuing. Five- and six-year rates are calculated the same way, counting those who graduated with a regular high school diploma within five and six years, respectively.
- Exception: Students participating in an early middle college program have five years to complete high school with a regular diploma and an associate degree, 60 transferable college credits, or other advanced certificate, to be considered "On-Track Graduated." EMC students who complete only a high school diploma in five years will be considered "Off-Track Graduated."

Some districts may have "N/A" for both the graduation and the drop rate. These districts do not graduate students, so they do not have graduation or drop counts. They've been included in the report to ensure records for graduating buildings within the non-graduating district are included.

The databases used to inform this report include the Michigan Student Data System (to locate the student's high school building, district, and intermediate school district, as well as grade (used to calculate the expected high school graduation year), exit status, demographics, and subgroup information.) and the Graduation and Dropout Application using audit findings submitted by ISD auditors during the exit status audit period to update a student's graduation status.

MI SCHOOL DATA QUICK START GUIDES

K12 STUDENTS SCHOOLS OF CHOICE & OTHER NON-RESIDENT ENROLLMENTS

See where students are attending school outside of their home district.

The Non-Resident Status report presents the count and percentage of students who live in the selected district but attend school in a different district and/or live in a different district but attend school in the selected district. School districts report residency codes to the state as a part of each student's record. Data are included in this report only when the resident code does not match the code of the reporting district. Therefore, not all residency data are included. Michigan law lets students attend schools outside of their resident district through charter schools, school of choice programs, or other cooperative agreements. Participation in these programs is optional, so interested families contact the district for information about the availability of programs in their area. The source data for this report are gathered in the Michigan Student Data System. For more details about how FTE and residency are determined when a student receives education through more than one district, please refer to the MSDS Collection Details Manual. The report is updated in early spring.

Residency codes that will be shown as nonresident status include:

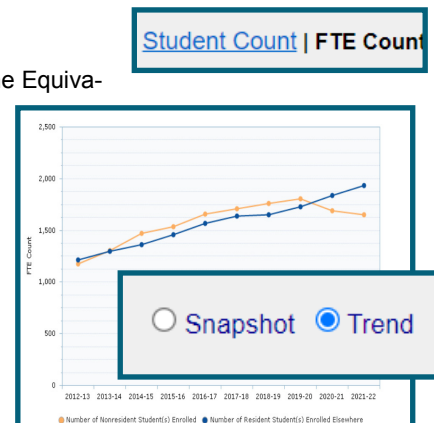

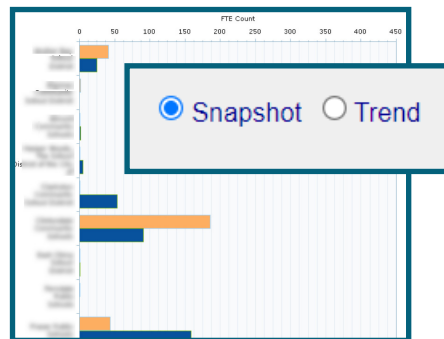

- School of Choice (outside ISD)
- Cooperative Programs Between Districts including Career and Technical Education and Alternative Education
- Home-School Non-Resident
- Non-K-12 District - Attending High School in Another District
- Juvenile Detention Facility
- Department of Community Health Special Education
- Michigan School for the Deaf and Blind
- All Other Non-Resident

The **All Other Resident** status is used by public school academies, or by students enrolled in an ISD district whose resident district is located within the reporting ISD. A note on charter schools: A PSA (charter school) is a publicly-funded school authorized by public bodies, and is considered a district under Michigan law. However, PSAs don't have their own residency statuses, because they do not have a defined geographic boundary. When you select a PSA in this report, you'll only see students as entering the district.

Some notes on graphic displays for this report:

1. The report display can be toggled between Student Count and FTE Count (Full Time Equivalent).

2. Graphs display as Snapshot (bar chart) or Trend (over time)

3. Reports display in two colors, where blue represents "leaving" the district, and yellow means "enrolling" in the district.

4. Where a county educational service center (ISD, RESD, RESA, etc.) has Center Programs for Special Education, these enrollments are shown as **ISD-District Created from ISD**

Inquiry & Reporting

Follow these steps to generate a report:

1. Generate this report by using the **K12 Grade Students** sub-menu and choosing **Schools of Choice & Non-Resident Enrollments Report**.
2. Use “**Location and Report Settings**” to choose an ISD, District, Report Year Grade, and Report Category.
3. In the “**Resident Status**” area, click the box(es) for your selection or choose “**Select/De-Select All**” to auto-populate all boxes.

MI SCHOOL DATA QUICK START GUIDES

K12 STUDENTS RETAINED IN GRADE

See how many students were held back.

The Retained in Grade report shows the counts and percentages of students who did not move with their class to the next grade level. This is a fall-to-fall snapshot, and does not reflect changes to grade placement after the fall collection period of the second school year. Differences in student retention between grade levels, schools, districts and student groups can help identify where to focus efforts to improve student achievement. The report is updated in late spring/early summer.

Many factors can lead to a student repeating a grade. For example, when a student changes schools, the new school may have a different curriculum. The student may need more time to gain proficiency, like in Kindergarten Planned Retention. Or the student may have been in a rigorous Early/Middle College program that required an extra year.

About the data:

- ⇒ Students appear in the data tables and charts for the district(s) that reported them in the MSDS. If a student is reported by two or more districts, they are counted once in each district. In other words, the report has not been de-duplicated, and students can be counted more than once in the statewide, LSD or district totals.
- ⇒ Students who were retained but were enrolled from outside of Michigan, from nonpublic school, or from home school in the previous school year are not included in the counts.
- ⇒ The report only includes students who were identified as continuing (actively enrolled at the time of collection and expected to continue at the district) during the fall collection of the second school year
- ⇒ Students retained in kindergarten are broken into Planned and Unplanned groups. The Unplanned group are students who repeated kindergarten. The Planned group are students who completed one year of Kindergarten through a Developmental Kindergarten program (also called Young 5s or Beginningergarten), and who are now in their second year of that planned retention program.
- ⇒ Students in Early/Middle College are participating in a five-year high school program designed to allow a pupil to earn a high school diploma and substantial college credit through an additional year of study. Most of the time, Early/Middle College Students are submitted into MSDS Grade 12 two years in a row in order to lengthen the expected graduation date to five years; however, any adjustment to any high school grade level is permissible while the student is participating in the program.
- ⇒ For school years 2013-14 through 2019-20, Early/Middle College students are included as retained at any point they are reported in a 9-12 grade more than once.
- ⇒ For school year 2020-21 and forward, Early/Middle College students are included as retained only when they are reported in the same 9-11 grade more than once, or in grade 12 more than twice to align with the MDE reporting policy.

Follow these steps to generate a Student Retention Report:

1. Generate this report by using the **K12 Grade Students** sub-menu and choosing **Student Retention Report** to update your "Location and Report Settings"
2. Choose from Snapshot, Trend, or Entity Breakdown views.
 - The Snapshot and Trend reports allow you to change from "Show Student Count View" to "Show Percent of Total View".
 - The Entity Breakdown report shows a tabular breakdown of the retentions, as well as whether the students were enrolled in a different ISD, District, or school building in the previous year.

K12 GRADE STUDENTS SUBMENU OVERVIEW

To explore student data:

1. Locate the **K-12 Grade** menu and select the **Students** submenu.
2. Choose a report inquiry from the following options:
 - ⇒ *Attendance*
 - ⇒ *Grad/Dropout Rate*
 - ⇒ *Schools of choice and Other Non-Resident Enrollments*
 - ⇒ *Retained in Grade*
 - ⇒ *Student Enrollment*
 - ⇒ *Student Mobility*
 - ⇒ *Additional Data Files*

The screenshot shows the MI School Data website interface. The top navigation bar includes 'Dashboards & Education Focus Areas', 'Early Childhood', 'K-12 Grade' (highlighted with a green box), 'Student Subgroups', 'Postsecondary', and 'Workforce'. Below the navigation bar, the 'K12 Landing Page' is displayed. On the left, a list of submenus is shown, with 'Students' highlighted by a green box and a green arrow pointing to the right. On the right, a list of report categories is shown, including 'Attendance', 'Grad/Dropout Rate', 'Schools of Choice and Other Non-Resident Enrollments', 'Retained In Grade', 'Student Enrollment Counts Report', 'Student Mobility', and 'Additional Data Files'.

3. Use the **Location and Report Settings** to filter your inquiries. Use the “School, District, ISD name or code” to search by name or keyword, or use the drop down menus to filter by ISD, District, School, School Year, and/or Report Category.
4. To generate results, click on **Update Report**.

The screenshot shows the 'Location and Report Settings' form. The form is divided into two main sections. The left section, titled 'Select Locations', contains a search bar for 'School, District, ISD name or code' and three dropdown menus for 'ISD', 'District', and 'School'. The right section contains a 'School Year' dropdown menu and a 'Report Category' dropdown menu. A green box highlights the 'Update Report' button, and a green arrow points to it. Below the button, a message states: 'Location and setting changes will be reflected in the report charts and tables after clicking the Update Report button.'

MI SCHOOL DATA QUICK START GUIDES

K12 STUDENT ENROLLMENT COUNTS REPORT

Learn about K-12 students by race, gender and other demographics.

The Student Enrollment Counts report provides an unduplicated headcount of students attending a specific district or school. This helps users to understand the number and composition of students attending Michigan schools, and shows how enrollment trends change over time. Note: the report is based on pupil headcount, not full-time equivalency. This means each student is counted once, regardless of whether the student attends full-time or part-time. (For FTE data, please see the District FTE Pupil Count data files.)

The Student Count report is the basis for other reports in MI School Data such as Retained in Grade, Schools of Choice and Other Non-Resident Enrollments and Student Mobility. Student count data are collected on the legislated fall count day, which is the first Wednesday in October. The report is updated in early spring.

Only students receiving school-based services are in this report. This means Early On® and some Pre-K Special Ed students are not included. Nonpublic school students and home-schooled students are not included in the data. The Early Middle College and Not Early Middle College groups are calculated using students in grades 9-12 only.

This is an unduplicated count, meaning a student is counted only once, even if the student is enrolled in more than one facility. A student is included in the district selected if that district was the Primary Education Providing Entity of the student on the legislated count day. Additionally, students from multiple districts may attend Shared Educational Entities. At the building level, data reported will appear under the operating district of the SEE. At the district level, SEE data are included in the aggregate data for the district in which the student is enrolled.

Pre-K students are included at the district level but not in the individual schools for school years after 2012-13. Therefore, school-level total enrollment will not always equal that of the district level. Pre-K students are not required to be reported at individual schools; they are only required to be reported at the district level. Pre-K students are also not included in the ISD aggregate, but they are included in the statewide counts. So ISD totals will not equal statewide in the report.

During district reorganizations, school buildings are sometimes moved to different parent districts. In these cases, the building name and associated data will appear under the new district in the Location Settings hierarchy, and entity breakdown tables of the Student Enrollment Counts report. However, the aggregated district-level data will not change as a result of this. This is one scenario where building-level data that appear in the data tables will not equal aggregated district-level data.

1. Generate this report by using the **K12 Grade Students** sub-menu and choosing **Student Enrollment Counts Report**.

2.

MI SCHOOL DATA QUICK START GUIDES

K12 STUDENT MOBILITY

See how students are moving to and from Michigan districts and schools.

The Student Mobility report shows how the student population changes within a given school year by comparing the number of students who left the district (mobile students), transferred into the district (incoming students), or remained in the district (stable students) after fall count day. Mobility rates are included in the school data file available in the Download/Print section.

Instances of frequent mobility can disrupt student learning. The student mobility report can identify which groups of students have high mobility counts. This information may be used to help meet the needs of these students.

The report is updated in early fall. The report is based on an unduplicated student headcount. This means a student is counted once and only once even if a student is attending more than one facility or is enrolled in multiple classes. This is contrary to a duplicated count where a student who is enrolled in multiple facilities would be counted multiple times. Enrollment is determined by the district and school in which the student is enrolled.

The following students are not included in the report: nonpublic, homeschooled, adult education and pre-kindergarten students. For example, a student who is enrolled in a nonpublic school and attends a public school part-time for vocational classes would not be reflected in the count.

This report displays count data, not mobility rates. However, you can download a mobility data spreadsheet that includes rate calculations. Use the Download/Print button at the top of the report, and select Statewide Data for Report. You can use this spreadsheet for filtering and sorting the mobility data for your school.

1. Generate the student mobility report by using the K12 Grade Students sub-menu and choosing **Student Mobility**.

2. Choose from **Snapshot**, **Trend**, or **Entity Breakdown** views.

K12 GRADE STUDENTS SUBMENU OVERVIEW

To explore student data:

1. Locate the **K-12 Grade** menu and select the **Students** submenu.
2. Choose a report inquiry from the following options:
 - ⇒ *Attendance*
 - ⇒ *Grad/Dropout Rate*
 - ⇒ *Schools of choice and Other Non-Resident Enrollments*
 - ⇒ *Retained in Grade*
 - ⇒ *Student Enrollment*
 - ⇒ *Student Mobility*
 - ⇒ *Additional Data Files*

The screenshot shows the MI School Data website interface. The top navigation bar includes 'Dashboards & Education Focus Areas', 'Early Childhood', 'K-12 Grade' (highlighted with a green box), 'Student Subgroups', 'Postsecondary', and 'Workforce'. Below the navigation bar, the 'K-12 Grade' submenu is displayed. On the left, a list of options includes 'K12 Landing Page', 'Students' (highlighted with a green box and a green arrow pointing right), 'School Accountability', 'State Testing', 'English Learner Data', 'Special Education', 'Postsecondary Reports by High School', 'Career and Technical Education', 'Early Middle College', 'Staffing', 'Financial & District/School Information', and 'K-12 School Data Files'. On the right, a list of report categories is shown, including 'Attendance', 'Grad/Dropout Rate', 'Schools of Choice and Other Non-Resident Enrollments', 'Retained In Grade', 'Student Enrollment Counts Report', 'Student Mobility', and 'Additional Data Files'.

3. Use the **Location and Report Settings** to filter your inquiries. Use the “School, District, ISD name or code” to search by name or keyword, or use the drop down menus to filter by ISD, District, School, School Year, and/or Report Category.
4. To generate results, click on **Update Report**.

The screenshot shows the 'Location and Report Settings' form. The form is divided into two main sections. The left section, titled 'Select Locations', contains a search bar for 'School, District, ISD name or code' and three dropdown menus for 'ISD' (All ISDs in State), 'District' (All Districts in State), and 'School' (All Schools in State). A 'Compare' button is at the bottom of this section. The right section contains a 'School Year' dropdown (set to 2020-21) and a 'Report Category' dropdown (set to All Students). A large blue 'Update Report' button is centered between the two sections. Below the button, a note states: 'Location and setting changes will be reflected in the report charts and tables after clicking the Update Report button.'

K12 ADDITIONAL DATA FILES

Student-related data presented in spreadsheet format.

The **Additional Data Files** area of the K12 Grade Student sub-menu provides historical data sets for downloading. These files come in a variety of file formats: database (.dbf), spreadsheet (.xls), or word processing (.txt) where available.

District FTE Pupil Counts Economically Disadvantaged Counts Grad/Dropout Homeless Migrant Nonpublic Student Counts Special E

1. Navigate left to right across the tabs to locate the desired data file.
2. Each tab has historical files across the data sets:
 - ⇒ District FTE Pupil Counts - back to 1999-2000
 - ⇒ Economically Disadvantaged Counts - back to 1995-1996
 - ⇒ Graduation/Dropout - back to 1998
 - ⇒ Homeless - combined file back to 2007-2008
 - ⇒ Migrant - combined file back to 2007-2008
 - ⇒ Nonpublic Student Counts - including nonpublic and home school - back to 2001-2002
 - ⇒ Special Education Enrollment - back to 1994-1995
 - ⇒ Student Count - back to 1991-1992
3. While on a selected tab, use the **Share** button to copy and paste a link and share out its location.
4. As another option, click on the file icon to download the file to share or use locally.
