Record Layout Details

SID data may be entered online, or by building a comma-delimited file for bulk data submission. This is commonly referred to as a comma separated value (CSV) file. Due to the complexity of creating the file, most users utilize the online interface.

Please note the following items pertaining to the layout of the file:

1. Fields A, B, and C must be submitted at the beginning of each record followed by the numbered fields as defined in the SID Data Field Descriptions.
2. Each field must be separated by a comma.
3. The reserved fields must be separated by a comma and should not contain any data.
4. Completed lines should end with the value of the last field, followed by a carriage return/line feed character pair.
5. A comma will always be treated as a field separator, so be sure that field values do not contain any comma characters.

For your convenience, changes that are effective for the current collection are marked as underlined font (new requirement or clarification) on the following page.
