

**COVID-19-Positive Resident Movement: CRC - CRF Decision Flow**

Residents who test positive and are asymptomatic or minimally symptomatic, and not otherwise in need of emergency medical care, should not be transferred to the hospital solely for the purpose of placement. CRC and CRF Programs were established to ensure Michigan's nursing homes were prepared to provide care to individuals who have tested positive for COVID-19 under TBP within the guidelines and best practices from the CDC. If neither CRC or CRF options are available, facilities should contact MDHHS-IPRAT@michigan.gov.

\* MCL 333.21717 Care of certain individuals in nursing home; approval of area and program; definitions. Sec. 21717. (1) An individual shall not be admitted or retained for care in a nursing home if any of the following apply:  
 (b) The individual has tested positive for coronavirus, is currently receiving treatment at a hospital, and has less than 72 hours remaining in the individual's overall isolation period as described in guidelines established by the federal Centers for Disease Control and Prevention. However, if the hospital determines that it has reached surge capacity, this subdivision does not apply.
