Research and Development Project (Cont.)
Please provide a brief overview of the study (sample size, storage conditions, testing performed, etc).
Please describe how the results will be reviewed for safety and compliance. Include the name and title of the individual reviewing results, maximum and minimum values for the characteristics ensuring shelf-stability (e.g. pH, water activity), and maximum and minimum cannabinoid concentrations allowed throughout the study. Also include corrective action procedures for products that do not meet these specifications.

Attestation and Signature	
I attest that the information provided is true, accurate, and complete. I understand that I am responsible for ensuring data obtained during the Research and Development Project supports any labeling claims made such as potency, shelf-life, dosage, etc. I agree to maintain such data, minimally, for two years past the expiration date of the last production and will provide the data to the CRA upon request. I understand that if the data is not maintained, or does not support the labeling claims made, products in commerce may be considered noncompliant and subject to enforcement actions including fines and possible recall actions.
