

Evergreen Organics Farm, LLC

AU-G-C-000792

This entity qualifies for the Bronze level tier of
the Social Equity All-Star Program

Social Equity Plan

Evergreen Organics Farm LLC respects the importance of Community. We believe that through continued learning and education the community can better PLAN Today, PREPARE for Tomorrow and THRIVE in the Future. Creating a regenerative community is of most importance. In order to purposefully prepare for the future, we must first understand the past. The best plan for positively impacting communities is to empower them with knowledge & resources to self-educate and to take proper action towards a future of Thriving. Communities have the power of the people! With proper localized action community members can collaborate and establish programs that promote Health and Wellness. Community gardens are a perfect place to start; teach the importance of knowing how your food is being grown and most importantly how to grow your own food. Managing your own food garden may not always be an option but participating in a community garden, sharing your knowledge and learning from others is a very fulfilling. Know your Farmer < Grow your own < Farm for your Community!

Evergreen Organics Farm operates on four guiding principles;

Ecological: Do No Harm; Zero synthetics, zero harsh chemicals, no remediation, sun grown in native living soil, locally sourced clean/sustainable inputs, Pollinator/ beneficial insect habitats. Clean & Healthy Sun Grown Cannabis in Native Living Soil- The way nature intended.

Educational: Educate as to the importance of why! It is important to have access to clean and healthy Cannabis and more importantly Food & Water. Just because it is on the shelf doesn't mean it is clean and healthy. Pesticides for example are approved for production even some are allowed in organic production, but why would you want to smoke pesticides! You don't and should avoid doing so. Rules and regulations don't require a producer to label which pesticides were used. They don't even require cannabis that has been remediated to be labeled. Transparency is extremely important; no one wants to smoke irradiated cannabis that still contains "dead" mold and or pesticides.

Ethics: We only grow and sell cannabis that we would consume. We do not; remediate, use synthetics or chemical pesticides. We are working with nature to grow cannabis in a natural environment the way nature intended.

Economic: Our way of growing with nature allows us to produce High End Craft combined with affordable/competitive pricing = Happy Loyal Consumers.

We are owned and operated by former MMMP Patients and Caregivers. When business operations grow and more team members are needed Evergreen Organics Farm will seek out for hire disproportionately impacted individuals including but not limited too; Current or Former MMMP Medical Caregivers and Patients that are/were actively registered for 2 years or more (2008-present), Veterans and or those actively serving.

Evergreen Organics Farm LLC is dedicated to continuing community empowerment! One of our plans is to establish a network of Like-Minded Businesses also participating in the Social Equity Program. One of the potential perks of being in our network would include Purchasing Priority to the fellow members with priority notification of our upcoming product availability.
