

Premier Cannabis Farms

AU-G-C-000554

This entity qualifies for the Bronze level tier of
the Social Equity All-Star Program

**Premier Cannabis Farms - We believe we qualify for the Bronze Level
of the Social Equity All-Star Program**

Social Equity Plan:

Purpose:

The grant will have a massive impact on Premier Cannabis Farms, its workforce and the surrounding community. We are a very small, craft farm with only 5 full time employees, all of whom are products of this great city/state. We are owned/operated by 3 individuals on site and instrumental in day to day operations: Aaron Rivera, Tamara Boatman and Walter Flisnik. Any and all grants would greatly impact local schools and individuals, as well as, ease the inherent burdens of the current market.

Education:

We have a plan to give back through direct donations to employees' pertinent college courses. A continued education is vital to the health of the individual and the business. We must never waiver in our thirst for knowledge in order to provide a higher quality product and higher quality human beings.

Local Municipalities:

Another portion of this grant would go directly to the current construction of Dimondale Elementary. Talks are still in the works on where exactly the money will be most effective; an amendment will be made when talks are complete. Dimondale Elementary is the nearest school to our facility and a few employees grew up in the Holt Public School system.

Fixed Operating Costs:

We also plan on using portions of the grant to pay the incurred dues/fees that are related to the operations of a properly licensed Marijuana facility. License renewals are one of our single greatest expenses and the current economic landscape of the Metro market has made it very difficult to gain traction and get ahead. Couple that with a punishing tax code and the never ending battle to reconcile our Accounts Receivable book and we are always in dire need of being more liquid.

Conclusion:

In summation, Premier Cannabis Farms would justly and properly utilize funds, so that their impact is most greatly felt. Woman and Minority owned, Multi Generational and Locally Owned/Operated, Premier Cannabis Farms embodies for whom these grants are intended for. We would greatly appreciate consideration for any All-Star program grants, and so would the multitude of local families and children that this money would directly impact.
