

Cannabis Regulatory Agency Summarily Suspends the Processing Licenses of Michigan Investments 10 in Pinconning

November 15, 2023 – Today, the Cannabis Regulatory Agency (CRA) summarily suspended the medical and adult-use marijuana processor licenses of Michigan Investments 10, Inc., located at 772 E. Pinconning Rd., Pinconning, Michigan. The CRA determined that the safety or health of patrons or employees is jeopardized by Michigan Investments 10's continued operation and that the public health, safety, or welfare requires emergency action.

Michigan Investments 10 currently holds a medical processor license (PR-000165) under the Medical Marijuana Facilities Licensing Act (MMFLA), and an adult-use marijuana processor license (AU-P-000171) under the Michigan Regulation and Taxation of Marijuana Act (MRTMA). Following an investigation, the CRA determined that both businesses violated numerous administrative rules under the MRTMA and MMFLA.

The CRA discovered the alleged violations after the agency conducted onsite inspections and reviews of statewide monitoring system (Metrc) data. The CRA's investigation revealed that the businesses incorrectly entered data in Metrc, failed to properly track large quantities of product in Metrc, had product that was missing Metrc tags and could not be traced to the legal market, and could not physically locate numerous products that were in their Metrc inventory.

The CRA's complaints also allege that Michigan Investments 10 failed to follow proper sampling and testing procedures. Specifically, the CRA alleges that the businesses failed to produce proper quantities of product for sampling to be tested and failed to properly enter test results into Metrc. Further, product that was tested at different stages showed inconsistent results. The manager of the adult-use business admitted the business used product that failed testing to "circumvent testing" requirements.

While on-site, CRA agents observed that the businesses did not have properly locked and secured doors and that video surveillance was not fully functioning or located in the correct areas. Additionally, the CRA determined that the businesses were not properly monitoring waste areas and failed to provide standard operating procedures for waste upon request.

Further details can be found in formal complaints the CRA issued today [against the adult-use license](#) and [the medical license](#).

The CRA also issued a public health and safety [bulletin](#) regarding the affected marijuana products in conjunction with the formal complaints and summary suspension orders. The affected products are marketed under the brand "Muha Meds" and consist of vape cartridges, infused pre-rolls, and gummies.
