Note 20 - Fair Value Measurements

A. Fair Value Measurements at Reporting Date:

## Notes to Financial Statements

Accounting standards require certain assets and liabilities be reported or disclosed at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following table presents information about the Plan's assets and liabilities measured at fair value at March 31, 2023, and the valuation techniques used by the Plan to determine those fair values.

In general, fair values determined by Level 1 inputs use quoted prices in active market for identical assets or liabilities that the Plan has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

### Level 1 Measurements

Cash and Cash Equivalents – the fair value of cash is the Plan's reported cash balances.

## Notes to Financial Statements

Short-term Investments – None.

Common Stocks – the fair value of these stocks and funds is based upon the unadjusted quoted prices for the identical security in active markets that the Plan can access.

Bonds – the fair value of these stocks and funds is based upon the unadjusted quoted prices for the identical security in active markets that the Plan can access.

## Notes to Financial Statements

### E. Risk-sharing Provisions of the Affordable Care Act (ACA)

- Risk adjustment program - Premium adjustments pursuant to the risk adjustment program will be based on the risk scores (health status) of enrollees participating in risk adjustment covered plans, rather than the actual loss experience of the insured. Risk adjustment receivables or payables are estimated based on experience to date and determinations of the Plan's risk score versus the overall market risk score. These amounts represent the estimated amounts receivable or payable for both individual and small group populations and are based on general demographic data and health status of these populations and data assumptions regarding the general health status of the overall market for which there is limited data.
