NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern**A. Accounting Practices**

The accompanying financial statements have been prepared in conformity with accounting practices prescribed or permitted by the Michigan Department of Insurance and Financial Services (DIFS). DIFS requires that HMOs domiciled in Michigan prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual, subject to any deviations prescribed or permitted by DIFS.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements of HMOs requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

C. Accounting Policy**(1) Basis for Short-Term Investments**

All short-term investments have been classified in accordance with National Association of Insurance Commissioners (NAIC) guidelines and are stated at amortized cost for financial statement disclosure.

(2) Basis for Bonds and Amortization Schedule

Investments in bonds are carried at amortized cost. The cost of bonds is adjusted for amortization of premiums and discounts to maturity using a level-yield method. Realized gains and losses are determined using the specific identification method and are included in operations. The fair value of investments is determined based upon quoted market prices.

(3) Basis for Common Stocks

Investments in Common Stocks are reported at fair market value based upon quoted market prices.

(4) Basis for Preferred Stocks

NOT APPLICABLE

(5) Basis for Mortgage Loans

NOT APPLICABLE

(6) Basis for Loan-Backed Securities and Adjustment Methodology

Loan-backed securities as well as other asset-backed securities are held and are reported at their amortized cost.

(7) Accounting Policies for Investments in Subsidiaries, Controlled and Affiliated Entities

NOT APPLICABLE

(8) Accounting Policies for Investments in Joint Ventures, Partnerships and Limited Liability Entities

NOT APPLICABLE

(9) Accounting Policies for Derivatives

NOT APPLICABLE

(10) Anticipated Investment Income Used in Premium Deficiency Calculation

The Plan utilizes anticipated investment income as a factor in the premium deficiency calculation.

(11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses

Under traditional arrangements, health care costs are recognized as expenses when services are rendered including, based on historical data, an estimate of costs incurred but not reported at the balance sheet date. Under capitation arrangements and risk-savings/sharing programs, health care costs are recognized when accruable under the providers' respective agreements. Adjustments to previously rendered claims reserve estimates are reflected in the statement of operations in the period in which the estimates are revised. Such reserve adjustments consist of restatements of claims estimates and changes in margin associated with these estimates and could be material in the future. Given the nature of the health care costs and provider billing requirements, as defined by the participating providers' agreements, amounts accrued at year-end are paid predominantly in the following year.

(12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period

The Plan has had no change in capitalization policy.

(13) Method Used to Estimate Pharmaceutical Rebate Receivables

The Plan estimates pharmaceutical rebate receivables based on historic collection experience and reporting provided by pharmacy benefit managers.

NOTE 20 Fair Value Measurements

A.

The Plan's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by Financial Accounting Standards Board (FASB) Accounting Standards Codification 820, Fair Value Measurements and Disclosures). The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lower ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1: Financial instruments with unadjusted, quoted prices listed on active market exchanges.

Level 2: Financial instruments lacking unadjusted, quoted prices from active market exchanges, including over-the-counter traded financial instruments. The prices for the financial instruments are determined using prices for recently traded financial instruments with similar underlying terms as well as directly or indirectly observable inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3: Financial instruments that are not actively traded on a market exchange. This category includes situations where there is little, if any, market activity for the financial instrument. The prices are determined using significant unobservable inputs or valuation techniques.

(1) Fair Value Measurements at Reporting Date
