(1) Fair Value Measurements at Reporting Date Assets and liabilities recorded at fair value in the statutory statement of admitted assets, liabilities and capital and surplus are categorized based upon the extent to which the fair value estimates are based upon observable and unobservable inputs. Level inputs are as follows:

Level 1: Inputs are unadjusted, quoted prices for identical assets or liabilities in active markets at the measurement date.

Level 2: Inputs are other than quoted process included in Level 1 that are observable for the asset or liability through corroboration with market data at the measurement date

Level 3: Unobservable inputs that reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date

The following discussion described the valuation methodologies utilized by the Company for assets measured or disclosed at fair value. Fair value estimates are made at a specific point in time, based on available market information and judgments about the financial instrument, including discount rates, estimates of timing, amount of expected future cash flows, and the credit standing of the issuer.

Cash and Cash Equivalents

The fair values of cash and cash equivalents are based on quoted market prices.
