B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Health premiums received are recognized as income in the month of coverage. Premiums collected are recognized as revenue during the months of coverage. Medical Loss Ratio (MLR) rebates are mandated by the Public Health Service Act. Rebates are accrued if the ratio of medical losses to premiums is below the specified minimum of 85% for Medicare Advantage plans. Premiums are reported net of reinsurance and MLR rebates.

Net investment income earned consists primarily of interest less investment related expenses. Interest is recognized on an accrual basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other than temporary. Expenses for management and administration of the organization, including acquisition costs such as marketing, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

(11) Claim reserves are estimated based on five key service categories (i.e., inpatient, SNF, outpatient, emergency room, and therapy). Inpatient estimates are based on a review of open authorizations priced at a reasonable cost per service. SNF, Therapy, Outpatient services and emergency room services IBNR estimates are established based on a run-rate historical cost per member for similar services at comparable plans. Management review is used to ensure the final incurred claims approximate a reasonable final incurred amount for each service. It is important to note that IBNR estimates are subject to favorable or unfavorable changes until sufficient claim experience is developed in the plan to minimize variations in estimation. Loss adjustment expense is typically estimated at 1% of total IBNR reserves and is generally reserved prior to year-end.

Effective 1/1/23, the Company entered into an IPA agreement with the Michigan IPA. The unpaid claim liability for claims arising after the effective date of this agreement is determined as the amount due to the IPA as of the end of the reporting period.
