

K-12 Classroom programs Fall 2025 - Winter 2026

Tahquamenon Falls State Park

To register for a program at our park, email park interpreter Sarah Anderson at AndersonS51@Michigan.gov or call 906-440-0114.

Michigan Mussels

What's hunkering down into the sand during Michigan's cold winters? Learn about the incredible creatures that help to keep our waters clean!

Taking place inside your classroom, this program is geared towards third and fourth graders and lasts approximately 45 minutes.

Skins, Skulls, and Signs

As temperatures drop and snow starts to fall, we layer up and make sure our homes are nice and toasty. How does wildlife survive, though? Your third and fourth grade students can learn about animal behavior and winter adaptations at the park!

Dress for the weather because we'll be examining some pelts and skulls and looking for clues of animal activity on a short walk outside of your school building.

Forest Treasures

Who's who in the forest? Trees can look very similar when they're covered in snow. Your third and fourth grade students can use their powers of observation to practice identifying trees that can be found near your school.

Dress for the weather because we will be outside for the duration of this 45-minute program.

Michigan.gov/TFallsEducation

All programs are free unless otherwise noted; however, a Recreation Passport is required for entry to the park.
