INTRODUCTION

The Directory

This is the sixth edition of Michigan's Wood Products Directory. It is a state-wide listing of the primary wood products manufacturers in Michigan.

Purpose

To enhance product marketing between the wood-using industries and wood products consumers. It also provides current information on the existing forest products industry and its economical contribution to our state.

Information Volunteered By Each Firm

- Name of business and location
- Contact person (name of company officers and management personnel) main phone number, fax, other phone, website address, email
- Industry type
- Products manufactured and specialty
- Species of wood or material used and volume purchased or processed
- Equipment used in manufacture and services offered
- Number of employees (in range and actual number)
- Exporter or interested in exporting
- Year business was established
- Annual dollar sales
- Whether the company's sales are wholesale, retail, or both

Organization

Primary manufacturers are listed in sections alphabetically by county, and within each county. Indices are provided listing companies by county, county section page numbers, and companies by products/services offered.

Did We Miss Anyone?

MDNR identified 260 mills as active as part of the primary manufacturer survey for 2014 calendar year. Of those, 243 were willing to participate in this Directory. Firms were contacted in 2015 by mail, phone, or in person. Effort was made to include all companies who wish to be included in the directory. If additions, changes or deletions are desired, please contact the Forest Products Utilization and Marketing Specialist at DNR-Forest Resources Division, P.O. Box 30452, Lansing, MI 48909-9845, phone: (517) 284-5887, email: neumannnd@michigan.gov.

Update

The directory will be continually updated on the website to reflect additions, changes or deletions. Please refer to the DNR forest products industry website for updated information at www.michigan.gov/forestproducts, and the on-line version of the Forest Products Industry Directory at www.michigan.gov/wood.

Wood Using Industry Assistance

Michigan's wood products industry is a significant part of our State's economy. In 2013, Michigan forest products industries contributions included \$17.8 in output or sales, \$6.7 billion in value added, and support for 87,000+ jobs. The importance of retaining and developing employment opportunities and creating wealth continues to be a State goal. Assistance on industrial expansion, environmental permitting, raw material supply/demand data, etc., can be obtained by contacting our office and the Michigan Departments of Agriculture & Rural Development, and the Department of Environmental Quality.

HOW TO USE THE DIRECTORY

This Directory provides easy-to-access information to mills by company name, county location and products/services offered. Three indices are provided for quick references: an index of companies by county, a county index, and products/services index. The county index provides users with a quick link to a chosen county by simply hovering the mouse cursor over the county name or page number and clicking the left mouse button. A map showing the location of each county in Michigan is also provided. After using the Table of Contents and Indexes a few times, you may find that for your purposes, one of the indexes proves more helpful to you than other in locating the information you desire.
