Updates of Interest

Nationally, the proportion of influenza A/H1N1 viruses is increasing compared to influenza B viruses in most states. Predominating influenza virus varies by state and age group. Please see the following link for more details: https://www.cdc.gov/flu/weekly/

Influenza-associated Pediatric Mortality

Nationally, 92 influenza-associated pediatric deaths have been reported thus far for the 2019-2020 flu season. Two (2) pediatric influenza (B) deaths have been confirmed by MDHHS during this season.
Influenza-like Illness Outpatient Surveillance

Week Ending Feb 8, 2020

U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet)

Michigan participates in ILINet, a collaborative effort between the CDC, state and local health departments, and volunteer sentinel clinicians as part of Michigan’s influenza surveillance. ILINet provides data on the total number outpatient visits to health care providers seen for any reason and the number of those patients with influenza-like illness (ILI). For this system, ILI is defined as fever (temperature of 100°F [37.8°C] or greater) and a cough and/or a sore throat without a known cause other than influenza.

Number of Reports and ILI % by Region in Michigan during this time period:

Michigan ILI Activity

4.0%  
(Last week: 3.3%)
Regional Baseline*: 1.9%
A total of 482 patient visits due to ILI were reported out of 12,034 office visits during this period.

*Regional baseline is determined by calculating the mean percentage of patient visits due to ILI during non-influenza weeks for the previous three seasons and adding two standard deviations.

National Surveillance

In the United States, 6.8% of outpatient visits were due to ILI. (Last week: 6.6%) 
This is above the national baseline of 2.4%

Influenza Hospitalization Surveillance Project (IHSP)

The CDC’s Influenza Hospitalization Surveillance Network (FluSurv-NET) provides population-based rates of laboratory-confirmed influenza-associated hospitalizations from October 1st through April 30th each year. Michigan participates as an IHSP state in FluSurv-NET for Clinton, Eaton, Genesee, Ingham, and Washtenaw Counties.

There were 67 (15 pediatric, 52 adult) influenza-associated hospitalizations reported to MDHHS for the IHSP during this time period. Since October 1st, 481 (98 pediatric, 383 adult) influenza-related hospitalizations were reported in the catchment area for the 2019-2020 season.
Laboratory (Virologic) Surveillance

Week Ending Feb 8, 2020

There were 21 new positive influenza results (8C, 0N, 4SE, 9SW) reported by the MDHHS Bureau of Laboratories (BOL) during this time period.

**Did you know?**
Congregate setting outbreaks of viral respiratory illnesses are **required** to be reported to your local health department? See:
- Influenza Guidance for Healthcare Providers
- Guideline for influenza and Respiratory Virus Outbreaks in Long-Term Care Facilities
**Influenza Vaccine Updates**

**Michigan 2019-2020 Mid-Season Influenza Vaccination Coverage Estimates**

Each quarter the Division of Immunization at the Michigan Department of Health and Human Services creates County and State Immunization Report Cards that provide vaccine coverage estimates for children and adults.

These report cards include child vaccination series and recommended adult vaccinations along with school/childcare estimates of completed vaccine series and influenza vaccine coverage estimates.

The current State and County Immunization Report Cards reflect data as of December 31, 2019.

**2019-2020 Mid-Season Flu Coverage**

<table>
<thead>
<tr>

**Influenza Burden Estimates**

The Centers for Disease Control and Prevention (CDC) have once again begun to release preliminary burden estimates for the 2019-2020 influenza season.

Between October 1, 2019 through February 8, 2020 it is estimated that there have been:

- 26 million – 36 million flu illnesses
- 12 million – 17 million flu medical visits
- 250,000 – 440,000 flu hospitalizations
- 14,000 – 36,000 flu deaths

Additionally, there have been 92 confirmed flu-associated pediatric deaths for the 2019-2020 flu season.

Influenza activity continues to be elevated throughout the country. Check out [CDC’s Weekly Influenza Surveillance Report](#) for more information.

**Remember: It is not too late to get vaccinated! Get your flu shot!**
