

Congratulations on the new member of your family!

The ***New Mother Center*** is available for employees working in or visiting the Van Wagoner Building, who have recently had a baby and are providing breast milk for their infant.

The center is located on the first floor of the Van Wagoner Building and it provides a private, relaxing environment, which is very important. It has permanent walls, doors that remain locked, and a sink.

The keys for the New Mother Center are maintained in the Safety and Security Administration office area located at Pillar C-20 on the first floor.

To schedule a visit or learn more about the center, please stop in or contact Teresa Kozlowski by phone (517-241-1697) or email (kozlowskit@michigan.gov) or Eileen Phifer by phone (517-373-1898) or email (phifere@michigan.gov). While someone is generally in our office, there are times when we are away. Please contact us prior to your return to work so we can be sure we are available to meet with you.

If you work in another MDOT facility and would like assistance in making arrangements for an appropriate space, please contact Teresa or Eileen.
