CSS Map Services

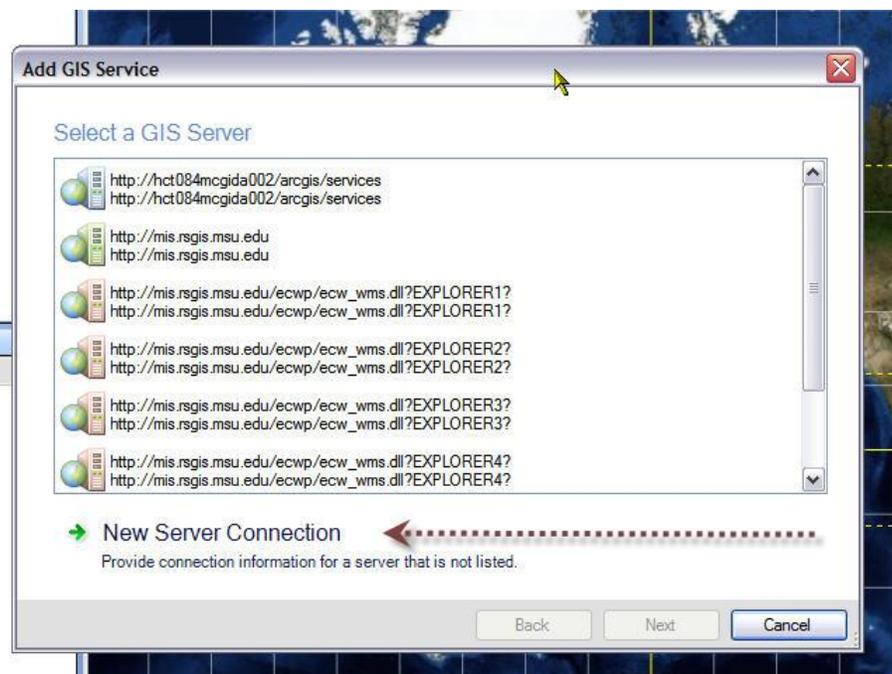

This paper will document how to access to CSS Map Services. These services provide an extensive catalogue of aerial imagery and other raster datasets such as USGS Topo Quad maps.

Start in ArcGIS Explorer under the ADD CONTENT control. Select **GIS Services**.

This opens the **Add GIS Service** window.

If you already are connected to a service it will be listed in the **Select a GIS Service** window. If you are not connected click on the **New Server Connection** link (see arrow in image to right).

Fill in form as follows:

The screenshot shows the 'Add GIS Service' dialog box with the title bar 'Add GIS Service' and a close button. The main heading is 'Specify server connection information' in blue. Below it is the instruction: 'Choose the type of server and specify the URL that uniquely identifies the server on the internet.' A red rectangular box highlights the 'Server type' dropdown menu, which is set to 'ArcGIS Server', and the 'Server' text input field containing the URL 'http://hct084mcgida002/arcgis/services'. Below this box is an example URL: 'Example: http://www.server.com/ArcGIS/Services'. The 'Account (optional)' section contains three input fields: 'User name:', 'Password:', and a checkbox labeled 'Save user name and password'. At the bottom left is a help icon and the text 'About connecting to GIS Servers'. At the bottom right are three buttons: 'Back', 'Next', and 'Cancel'.

Make your choice from the resulting list:

The screenshot shows the 'Add GIS Service' dialog box with the title bar 'Add GIS Service' and a close button. The main heading is 'Choose a service'. The central area is a tree view of services. The tree structure is as follows: 'BaseMap' (expanded), 'BaseMapNEW' (checked), 'DLEG' (expanded), 'LandBankParcels' (checked), 'DNRE' (expanded), 'GeoWebFace' (expanded), 'HuntingApp' (expanded), 'MDOT' (expanded), 'midrive_sensors' (checked), 'PrFinder' (checked), 'PrFinderBase' (checked), 'MRBIS' (expanded), 'NOAA' (expanded), 'NOAA_Service' (checked), 'overview' (checked), 'PrFinder' (expanded), 'Symbology' (expanded), 'TAMC' (expanded), and 'Wetlands' (checked). At the bottom are three buttons: 'Back', 'Add Service', and 'Cancel'.

The map service (i.e. URL) on the form is from the Center for Shared Solutions (CSS). Additional map services are available from ESRI using the following URL:
<http://services.arcgisonline.com/arcgis/services>
