

Join the **FIX A LEAK WEEK PARTNERSHIP**

Water leaks trouble many disadvantaged communities. Aging infrastructure and older homes contribute to energy and water waste, as well as public health concerns. Water infrastructure and premise plumbing leaks are costly for residents and community water suppliers.

FIX A LEAK WEEK
MARCH 15-21
2021

MAKE AN IMPACT IN YOUR COMMUNITY

Michigan will recognize Fix a Leak Week from March 15-21, 2021. Fix a Leak Week was created by the U.S. Environmental Protection Agency (EPA) and is supported by WaterSense partners across the U.S. and Canada. During Fix a Leak Week, the Office of the Clean Water Public Advocate is looking for partners to help support water leak efforts across Michigan. Foundations may consider funding water leak projects in disadvantaged communities.

If you are interested in joining the Fix a Leak Week Partnership and/or hosting an event in your community, please contact:

EGLE-CleanWater@Michigan.gov

Fix a Leak Week Partners can:

- Provide education and outreach around the importance of addressing water leaks
- Work with partners and foundations to provide resources for DIY plumbing repairs or professional plumbing repairs
- Promote existing water leak assistance programs
- Host a Fix a Leak Week event in your community

FOCUS ON WATER INITIATIVE

working together to ensure a healthy water future
