

**MDHHS Community Outreach Pilot Project for
Vaccination of Vulnerable Individuals Aged 60 years and Over
Request for Pilot Proposals (Version 2/22/21)**

The Michigan Department of Health & Human Services (MDHHS) and the Protect Michigan Commission announces a program starting March 1st that will encourage special vaccination and outreach projects focusing on people ages 60 and older in communities with the high Social Vulnerability Index (SVI) and high COVID mortality rates. Applicants can apply for up to 2,500 doses.

Doses of vaccine would be provided to federally COVID-enrolled providers and their partners who have specific plans to remove barriers to access to vaccination for people age 60 and up. Applicants are expected to have established strong partnerships with community-based organizations and demonstrated ability to effectively reach out to these vulnerable Michiganders.

MDHHS and the Protect Michigan Commission encourage entities to submit letters of application to MDHHS-VaccineOutreach@michigan.gov by 5 p.m. Monday March 1, 2021. Applications should be succinct, descriptive and no longer than 3 pages (not including letters of support, diagrams or other supplementary material). All questions about this application should be sent to MDHHS-VaccineOutreach@michigan.gov.

MDHHS's goal is to complete review of applications and order processing in time for vaccine to be in the possession of successful applicants to begin vaccinating on March 9 and March 10, 2021.

Application Content

Figure 1: Examples of barriers to vaccine access

Barriers include, but are not limited to:

- transportation
- language
- access related to sensory, cognitive, emotional, or physical disabilities
- vaccine hesitancy
- other barriers experienced by underserved and minority populations

The application must describe identified barriers to vaccination of vulnerable people aged 60 and older and the specific strategies planned to address those barriers (see Figure 1). The application should include steps that are specifically used to address the identified barrier(s) in the identified community. This application is geared to providers who have identified a specific strategy and can begin to implement as soon as awarded a vaccine allocation. This is not intended to build capacity or develop new outreach strategies, but an effort to implement the state's vaccine equity strategy.

Applications should include:

- Brief description of the strategy ensuring clarity of how the enrolled provider will work with community partners and community organizations to reach individuals 60 and over within the census tract locations.
- The specific census tracts (including "location" and "SVI Index" in Table 1 in Attachment A) and the population aged 60 and over that are the focus of the outreach strategy in your application.

- Description of the method for outreach (e.g., door to door, pop-up clinic, other).
- Description of how the enrolled provider works with their respective local health department.
- Letters of support from partners identified as having a role in vaccination implementation which show commitment and capacity to undertake this project.
- Clinic/Administration locations and hours, or specific plans for mobile vaccination.
- Description of ability to store and maintain the vaccine, including during transport if applicable.
- Method for managing second doses. MDHHS will automatically order the second doses four weeks out to cover the first dose allocation awarded.
- Plan for making use of doses in opened vaccine vials if appointments are not kept so that no doses of vaccine are wasted.
- Assurance that all vaccines administered will be entered into the MI Care Improvement Registry (MCIR) within 24 hours of administration.
- Number of doses requested and time frame for administration of all doses. Note: vaccines will be capped at 2,500 first doses for use in a time frame not to exceed two weeks.
- Anticipated number of people vaccinated per day.
- Evaluation Metrics (goal of vaccination, target population, how will success be measured).
- Name, phone number and email for the project lead.
- Identify of the Federally Enrolled COVID Provider (name, contact and MCIR ID).

By submitting this application, the project lead is agreeing to allow MDHHS vaccination staff to conduct assurance activities around vaccine management and storage during the project period. By submitting this application, the project lead is agreeing that unused doses at the end of the project period will be coordinated with the local health department.

This set of applications is a pilot project that MDHHS is conducting to increase vaccination of individuals most at risk of negative COVID-19 outcomes and to identify innovative practices for effective vaccination strategies for vulnerable communities. Continuation of this program is subject to availability of vaccine and project ability to meet vaccination goals.

4	Attachment A: Map 1: State of Michigan Census Tract Map
5	Attachment A: Map 2: City of Detroit Census Tract Map
6	Attachment A: Table 1: Census tract locations and SVI values
67	Attachment B: Table 2: Cumulative COVID-19 Mortality Rates per 1,000,000 People by County

ATTACHMENT A: **Census tracts by social vulnerability index reference materials**

MDHHS is seeking applications for vaccination outreach strategy to adults age 60 and over in communities with social vulnerabilities. Applications must serve adults aged 60 and over in one or more of these tracts. The two maps below provide SVI Values by quartile across the state. The table below provides the Census Tract Location and SVI Value that needs to be included in your letter of application.

You can download a pdf map of the census tracts for your county here: [Index of /geo/maps/DC2020/PL20/st26_mi/censustract_maps](https://geo.maps/DC2020/PL20/st26_mi/censustract_maps)
