

# MI SAFE START: COSMETOLOGY AND BARBER SERVICES

## An informed-choice guidance for evaluating protective measures

As locations begin the process of reopening or scaling up after their initial response to COVID-19, certain actions will be inherently more protective of their staff and the general public. This document provides guidance that should be followed regardless of the current level of COVID-19 transmission, and additional measures that can be scaled depending on local levels of COVID-19 transmission and the protective measures desired.

## Guidelines for all cosmetology and barber services, regardless of local COVID-19 transmission levels:

### *Understand your community*

- Establish and maintain communication with tribal, local and state authorities to determine current contact tracing protocol, local mitigation levels, or local reengagement phase for your community, as described in the [MI Safe Start](#) plan.
- Strongly consider special accommodations for employees who are members of an at-risk population. Possible considerations could include flexible leave, telework when feasible, or the reassignment to duties to reduce contact with the general public. Members of households with at-risk residents should be aware that by returning to work or other environments where distancing is not possible, they could carry the virus back home. Precautions should be taken to isolate from at-risk residents.
- Strongly consider special accommodations for clients who are members of an at-risk population. Possible considerations could include special operating hours solely for those at-risk individuals, separate workstations isolated from the rest of the establishment, or enhanced sanitation measures. Members of households with at-risk residents should be aware that by returning to environments where distancing is not possible, they could carry the virus back home. Precautions should be taken to isolate from at-risk residents.
- Employers should follow applicable Occupational Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) guidance for businesses to plan and respond to COVID-19.

### *Safe behaviors*

- Enforce hand washing and the covering of coughs and sneezes at all times.
- Ensure adequate supplies to support healthy hygiene practices for both employees and customers including soap, hand sanitizer with at least 60 percent alcohol (at every workstation and other high contact locations), paper towels, and tissues.
- Use gloves when removing garbage bags or handling and disposing of trash. Remove gloves properly and wash hands afterwards.

- Ensure enough time between appointments for proper cleaning and disinfection of the workstation and equipment.
- When disinfecting, use products that meet EPA's criteria for use against SARS-CoV-2 and that are appropriate for the surface. Prior to wiping the surface, allow the disinfectant to sit for the necessary contact time recommended by the manufacturer. Train staff on proper cleaning procedures to ensure safe and correct application of disinfectants.
- Consider making available individual disinfectant wipes in bathrooms.
- Increase availability for delivery or curb-side pick-up for products.
- Ensure that ventilation systems operate properly and increase circulation of outdoor air as much as possible such as by opening windows and doors. Do not open windows and doors if doing so poses a safety risk to employees, children, or customers.
- Take steps to ensure that all water systems and features (for example, drinking fountains, decorative fountains) are safe to use after a prolonged facility shutdown to minimize the risk of Legionnaires' disease and other contaminants associated with water.
- Train all employees in the above safety actions while maintaining social distancing and/or use of face coverings during training.

#### *Health checks and response actions*

- Require staff who are sick to stay at home.
- If implementing health checks, conduct them safely and respectfully, and in accordance with any applicable privacy laws and regulations. Confidentiality should be respected. Employers may use examples of screening methods in CDC's General Business FAQs as a guide.
- Designate a staff person to be responsible for responding to COVID-19 concerns. Employees should know who this person is and how to contact them.
- Create and test communication systems for employees for self-reporting and notification of exposures and closures.
- Employees with symptoms of COVID-19 (fever, cough, or shortness of breath or difficulty breathing, chills, muscle pain, sore throat, new loss of taste of smell, nausea, vomiting, diarrhea) at work should immediately be sent to their home.
- Inform those who have had close contact to a person diagnosed with COVID-19 to stay home and self-monitor for symptoms, and to follow CDC guidance for home isolation if symptoms develop. If a person does not have symptoms follow appropriate CDC guidance for home quarantine.
- Establish procedures for safely transporting anyone sick to their home or to a healthcare facility.
- Notify local health officials, staff, and customers (if possible) immediately of any possible case of COVID-19 while maintaining confidentiality consistent with the Americans with Disabilities Act (ADA) and other applicable federal and state privacy laws.
- Close off areas used by a sick person and do not use them until after cleaning and disinfection. Wait 24 hours before cleaning and disinfecting. If it is not possible to wait 24 hours, wait as long as possible. Ensure safe and correct application of disinfectants and keep disinfectant products away from children.

- Advise sick staff members not to return until they have met CDC's criteria to discontinue home isolation.
- Implement flexible sick leave and other flexible policies and practices, such as telework, if feasible.
- Monitor absenteeism of employees and create a roster of trained back-up staff.
- Support coping and resilience among employees.

*Be prepared for closings*

- Check State and local health department notices about transmission in the area daily and adjust operations accordingly.
- Be prepared to consider temporarily closing facilities if there is a case of COVID-19 in the establishment or if cases increase in the local area.

**Additional guidelines for cosmetology and barber services arranged by level of protective behavior are provided below.**

*Facial Coverings and Distancing:*

<b>Facial Coverings: Clients and Visitors</b>	Facial covering and eye protection at all times, client services limited	Facial covering at all times, client services limited	Facial covering at all times unless removal needed for certain client services	Facial coverings not required
<b>Facial Coverings: Employees</b>	Facial covering and eye protection required at all times	Facial covering required at all times, eye protection required when client does not have facial covering	Facial covering required when within six feet of clients	Facial coverings not required
<b>Personal Distancing: Clients</b>	Clients are never within six feet, workstations are separated with partitions	Clients are never within six feet <i>-or-</i> Workstations are separated with partitions		Clients are often within six feet without the use of partitions
