

# MI Safer High School End-of-Year Events Guidance

[Michigan.gov/Coronavirus](https://Michigan.gov/Coronavirus)

Issue Date: May 5, 2021

## New Updates

- Based on the most current [CDC Guidance](#), fully vaccinated individuals do not need to participate in routine asymptomatic screening COVID-19 testing if they are asymptomatic.

## Executive Summary

The Michigan Department of Health and Human Services (MDHHS) is providing guidance on how to hold safer high school end-of-year events – such as prom, graduation, and end-of-year parties – during the COVID-19 pandemic. This document provides:

- General guidance for how schools can be safer while holding end-of-year events.
- Guidance for schools that choose to implement an end-of-year school testing program.

Based on the current epidemiology of the virus across the state at this time, **virtual events are safest**, and we encourage schools to choose this option. Schools, families, students, local health departments, and communities should assess the risk versus benefit of participating in school events. Individual circumstances, including underlying health conditions that put participants or household contacts at increased risk of severe disease if they should contract COVID-19, should be considered before participating. The local characteristics of spread of the virus should also be considered. Mitigation efforts can reduce the risk of contracting COVID-19; however, mitigation efforts will not eliminate COVID-19 risk.

**A higher rate of vaccination among participants is another way to reduce the risk of transmission at the event and may allow participants to engage in more activities more safely. Encourage participants to complete their vaccination series (or single dose) at least two weeks prior to the event to maximize the risk reductions.**

## **End-of-Year School Events Testing Recommendations:**

### **1. Test 25% of the unvaccinated in-person student population on a weekly basis.**

Schools should test at least 25% of its unvaccinated in-person student body.

### **2. Test any unvaccinated student, staff, volunteer, or other attendee who will participate in the end-of-year event within 24 hours of the event.**

Anyone who plans to attend an end-of-year event should obtain a negative COVID-19 rapid antigen test within 24 hours before the event, or a negative Nucleic Acid Amplification Test (NAAT - e.g., RT-PCR) within 72 hours before the event.

- Documentation of prior COVID-19 infection in the last 90 days may be used if proof of a NAAT or antigen test can be provided.

MDHHS recommends that schools offer on-site rapid antigen testing before an end-of-year event.

### **3. Exclude students, staff, volunteers, or other attendees who test positive for COVID-19 from participating in in-person learning or end-of-year events for the duration of their infectious period.**

Anyone who tests positive for COVID-19 should follow [current CDC guidelines](#) for isolation. This includes fully vaccinated individuals.

### **4. Exclude unvaccinated students, staff, volunteers, or other attendees who have been "close contacts" of a confirmed or probable case of COVID-19 from attending an event that takes place during their quarantine period.**

Anyone with [close contact](#) to a confirmed or probable case of COVID-19 should quarantine according to their local health department requirements. Even if an individual tests negative for COVID-19 by antigen or PCR test, that individual should not participate in in-person learning or in-person end-of-year activities for the duration of their quarantine period if deemed a "[close contact](#)" with an individual who tested positive for COVID-19.

### **5. Exclude students, staff, volunteers, or other attendees with COVID-19 symptoms from attending the event.**

Even if an individual tests negative for COVID-19 by antigen or PCR test, that individual should not participate in in-person learning or in-person end-of-year activities while presently exhibiting COVID-19 [symptoms](#). This includes fully vaccinated individuals.

### Testing Support from MDHHS

MDHHS will provide training, guidance, and rapid antigen testing materials to schools that sign up and agree to the MI Safe Schools Testing Program requirements. MDHHS will provide:

- **Sufficient testing supplies.** Enroll your school to receive supplies through the program website.
- **Guidance.** The training series for school antigen testing can be found at the program website, including weekly office hours.

More information about the testing program, including how to order supplies and report testing results, can be found [here](#).

Schools may also contract with external vendors to support their testing needs, however MDHHS will not be able to reimburse the cost of those expenses.

### General Guidance for End-of-Year School Events:

#### 1. Location

All end-of-year events should be conducted in outdoor spaces to decrease the risk of transmission of COVID-19. Please review the specific capacity limits outlined below for clarification on attendance limitations for non-residential gatherings.

- Barns, tents, and other coverings may be used to provide refuge from inclement weather, as long as doors and/ or tent flaps remain open to increase airflow.

#### 2. Cohorting

For social events like prom and year-end parties, cohorting or pods should be implemented to maintain small groups throughout the events. Participants should be cohorted into groups of *six or fewer* in order to do traditional activities. However, if the event is held outside of school grounds and dining is included, each cohort size *must* be limited to six people, according to the [MDHHS Gatherings and Face Mask Order](#)

The **same cohort** should be maintained for all the examples listed below, and individuals should avoid intermingling with others from outside of their cohort for the duration of the event. Lists of cohort members should be documented for contact tracing purposes.

Examples include:

- **Outdoor dining within a cohort:** If dining is included in the event and it is (1) held outside of school grounds and/or (2) it is open to non-school attendees, the cohort size must be limited to a maximum of *six people*, according to the [MDHHS Gatherings and Face Mask Order](#). Individuals may temporarily remove their masks for the purposes of dining outdoors while seated with their cohort.

- Tables should be placed six feet apart and individuals should have assigned seating with one cohort of six people seated per table.
- The consumption of food or beverages is permitted only while seated in designated areas.
- **Dancing within a cohort:** Individuals may dance with members of their own cohort without social distancing, but face masks must be worn at all times (per the [MDHHS Gatherings and Face Mask Order](#)). Six feet of distance should be maintained between each cohort, cohorts may not intermingle, and face masks must be worn at all times.
- **Activities and games within a cohort:** Individuals may play games with members of their cohort without social distancing while wearing masks. Six feet of distance should be maintained between each cohort, cohorts may not intermingle, and face masks must be worn at all times.
- **Transportation with a cohort:** Party buses or limousines may be used to transport members of a single cohort. Face masks must be worn at all times.

### 3. Face Masks

Face masks are required at all times and must cover each person's nose and mouth, per the MDHHS Gatherings and Face Mask Order. However, face masks may be temporarily removed when eating or drinking while seated in a designated area and where at least six feet of distance can be maintained from individuals outside of one's cohort.

### 4. Physical Distancing

Students, staff, and volunteers should stay six feet apart from other individuals outside of their cohort.

- Students may dance, play games, or otherwise socialize without practicing physical distancing within their cohort, so long as students remain masked and at least six feet from other cohorts.

### 5. Clean and Disinfect Often

- Use FDA approved cleaning supplies that are listed [here](#).
- Have hand sanitizing and cleaning supplies stations easily and plentifully available for use.
- Do not share items that are difficult to clean, sanitize or disinfect (such as props in photo booths).

### 6. Additional Considerations

- Consider scheduling students in staggered time slots for the event (e.g., 100 students each time slot).
- Consider decreasing the duration of the event. Longer events increase the chance of transmission.
- Be prepared if someone gets sick during or after the event. Implement contact tracing and follow recommendations from local health departments.

- Review the [CDCs Readiness and Planning Tool to Prevent the Spread of COVID-19 Events and Gatherings](#) to determine the level of readiness to implement mitigation measures and other safety measures.

### **Specific Guidance for Prom and other End-of-Year Parties**

1. Capacity limits for end-of-year events, whether on school grounds or at an entertainment/recreational venue, must be in accordance with the [MDHHS Gatherings and Face Mask Order](#) as follows:
  - a. Outdoors: 300 people
  - b. Indoors: 25 people
2. Capacity limits include all participants in attendance at the event, including students, guests, staff, and volunteers.
3. Inviting outside guests increases the risk of COVID-19 transmission.
4. MDHHS recommends testing every unvaccinated participant attending prom or end-of-year events with a rapid antigen test within 24 hours prior to the event.
5. Encourage cohorting of groups of (six maximum), and document names of participants within cohorts such that contact tracing can be performed if a case is detected after the events.
6. Consider strategies to reduce density at the event (staggered time slots for attendees)
7. Consider alternate activities to dancing. If dancing is planned, then consider strategies to reduce density on the dance floor. Consider several smaller dance floors around the venue.

### **Specific Guidance for Graduation Ceremonies**

1. Capacity limits for graduation ceremonies must follow the requirements in the [MDHHS Gatherings and Face Mask Order](#). The total number of allowable guests is limited based on the type of venue and the applicable social distancing rules. All groups must maintain six feet of distance from others at all times. The number of students, faculty, staff, and guests allowed is also limited by the social distancing rules in addition to the capacity limits set forth below.
  - a. Entertainment/Recreational Facility (including school facilities):
    - i. Overall occupancy of all attendees (including students, staff, faculty, and guests) must not exceed 50% of the total capacity limits established by the fire marshal.
    - ii. Indoors: up to 300 guests
    - iii. Outdoors: up to 1,000 guests
  - b. Stadiums/Arenas:
    - i. Indoors (5,000+ fixed seats): 375 guests
    - ii. Indoors (10,000+ fixed seats): 750 guests
    - iii. Outdoor (5,000+ fixed seats): up to 1,000 guests
    - iv. Outdoor (10,000+ fixed seats): 1,500 spectators
  - c. Outdoor events that establish and follow an infection control plan that complies with the [MDHHS Large Outdoor Events Guidance](#) can have increased capacity. The number of students, faculty, staff, and guests may not exceed 20% of fixed seating capacity or 20 persons per 1,000 square feet, whichever is greater.

2. Family members or spectators who attend end-of-year events, such as graduation, are encouraged to cohort in groups of six or fewer. Cohorts should remain six feet apart from individuals in other cohorts at all times.
3. We encourage testing of every unvaccinated participant attending graduation—including family members and guests—with a rapid antigen test within 24 hours prior to the event.
4. For graduation ceremonies, consider fist bumps, elbow bumps, or air high fives in lieu of traditional handshakes.
