# **MI Symptoms Discontinuation Notice**

MI Symptoms will be discontinuing our service on January 31st, 2022. On that date all users will lose access to the tool and all employer/work code administrators will lose access to the employer dashboard and lose the ability to download any past data you had. We would recommend downloading anything you need for bookkeeping now as we will not be available to assist you after December 31st.

We have provided to you the MI Symptoms 'At Risk' algorithm and question list below, based on CDC guidelines. We strongly recommend you continue to screen symptoms based on this expert-informed algorithm.

#### MI SYMPTOMS AT RISK ALGORITHM:

The user is "at risk" and should refrain from workplace entry if one or more of the below factors is true:

- Restrict for any one of [fever, cough, shortness of breath]
- Restrict for any two of any of the other symptoms
  - Note: "Diarrhea" and "Nausea or Vomiting" must combined with at least one other symptoms. Those 2 symptoms together are not sufficient for restriction.
- Restrict for any temperature >= 100.4
- Restrict if diagnosed with COVID-19 in the past 2 weeks
- Restrict if close contact with anyone else diagnosed with COVID-19 in the past 9 or less days
- Restrict if close contact with anyone else diagnosed with COVID-19 in the past 10, 11, 12, 13, or 14 days with symptoms after most recent close contact

#### **MI SYMPTOMS QUESTION LIST:**

### **Q1: List of Symptoms**

Text:

Check any current symptoms that developed within the last two weeks

- Feverish
- · Loss of taste or smell
- Sore throat
- Shortness of breath
- Diarrhea
- Chills
- CoughHeadache
- Nausea or vomiting
- Muscle aches without recognized cause

[Select Symptoms]

#### AT RISK IF

- any single symptom or more of [fever, cough, shortness of breath] is selected
- any 2 of the other symptoms is selected (Note: "Diarrhea" and "Nausea or Vomiting" must combined with at least one other third symptom)

## **Q2: Temperature**

Text:

"Please enter your body temperature °F" [Enter Temperature]

### AT RISK IF:

temperature >= 100.4

# **Q3: Close Contact**

Text:

Have you had close contact with someone who was diagnosed with COVID-19 in the last two weeks? [Yes or No/Not Sure]

if yes, then ask:

When was your most recent close contact with someone who was diagnosed with COVID-19? [enter date]

if date is between 10 and 14 days ago, then ask:

Have you had any symptoms since the most recent close contact?

Symptoms include: fever, cough, chills, loss of taste or smell, headache, nausea, vomiting, muscle aches without recognized cause, diarrhea
[Yes or No/Not Sure]

#### **AT RISK IF:**

- close contact with anyone else diagnosed with COVID-19 in the past 9 or less days
- close contact with anyone else diagnosed with COVID-19 in the past 10, 11, 12, 13, or 14 days with symptoms after most recent close contact

# Q4: COVID-19 Diagnosis

Text:

Have you been diagnosed with COVID-19 in the past two weeks?

[Yes or No]

#### AT RISK IF:

diagnosed with COVID-19 in the past 2 weeks

# **Q5: COVID-19 Vaccination**

Text:

What is your vaccination status?
This will not affect your MI Symptoms
Wellness Check Result.

[Partially Vaccinated/ Fully vaccinated/ Not Vaccinated/ Opt out of sharing]

No effect on At Risk designation

MI Symptoms began as a small project built by undergraduate students at the University of Michigan, and was the first tool we had all launched at this scale. We are grateful that the tool has become less useful for many of you as we now have vaccines for COVID-19 and understand much more about this virus. Thank you!
