

REPORT TO THE LEGISLATURE
Pursuant to P.A. 200 of 2012
Section 612(4)
Parole/Probation Violators
2nd Quarter Report
(November 2012 – January 2013 Data)

Section 612(4) of 2012 P.A.200 requires that the Department of Corrections provide a report on the number of all parolees returned to prison and probationers sentenced to prison for either technical violations or new sentences during the preceding calendar quarter, broken down by probationers, parolees after their first parole, and parolees who have been paroled more than once, including detailed information regarding:

- (a) *The number of parole and probation violators returned to or sent to prison for a new crime with a comparison of original versus new offenses by major offense type: assaultive, nonassaultive, drug, and sex.*

See **TABLE A1** for probation violators sent to prison for new sentences committed while on probation. See **TABLE A2** for parole violators returned to prison for new sentences (PVNS) committed while on parole.

- (b) *The number of offenders returned for a technical violation and the type of violation, including, but not limited to, zero gun tolerance and substance abuse violations.*

For probationers sentenced to prison, charges for technical violations are not recorded in our data system (although planned as a future enhancement). See **TABLE B** for all sustained charges for parole technical violators returned to prison.

- (c) *The educational history of those offenders, including how many had a G.E.D. or high school diploma prior to incarceration in prison, how many received a G.E.D. while in prison, and how many received a vocational certificate while in prison.*

For probationers sentenced to prison see **TABLE C1**. See **TABLE C2** and **TABLE C3** for parolees returned to prison.

- (d) *The number of offenders who participated in the MPRI versus the number of those who did not.*

Prisoner Reentry planning, preparation and support in Michigan is no longer considered to be an “initiative” because the pilot that had been labeled the “MPRI” has now been now implemented both statewide and up-to-scale. The department’s investment into this work has, as intended, evolved into a systematic and comprehensive approach which includes risk and needs assessments of offenders early in their terms, an evaluation of prisoner programs in light of principles of responsivity, dosage and intensity for the sake of matching programs and treatment to prisoners on a case by case basis, training of staff in the interest of a collaborative case management approach to supervision, development of partnerships with service agencies in local communities, integration of validated risk assessments into the parole consideration process and an improved parole revocation decision-making process that offers safe and effective interventions as alternatives to return to prison. This has become a way of conducting business and is no longer a pilot intended to test the reentry model for success. Not all offenders require financial support upon release, such as transitional housing, but there is no longer a clear distinction between offenders who receive

reentry support and those who don't. The vision of enhancing public safety through successful transition of offenders from prison to their local communities has guided the development of the current reentry system, and all offenders benefit in some way from today's methodology. Therefore, there will no longer be a data table for this report item.

- (e) *The unduplicated number of offenders who participated in substance abuse treatment programs, mental health treatment programs, or both, while in prison by diagnosis.*

See **TABLE E** for parolees returned to prison.
