

MiScorecard Performance Summary

Business Unit: BOA
Executive/Director Name: Jeri Ann Sherry, Deputy Director, BOA
Reporting Period: Aug 2015

Green >90% of target
Yellow >= 75% - 90% of target
Red <75% of target
 Date Approved: 9/18/2015

Metric ID	Metric	Status	Progress	Target	Current	Previous	Frequency	Metric Definition
V1 - Protection of Public, Safety of Staff, Security of Offenders								
BOA-02	Prisoners Past Earliest Release Date (ERD) Without Paroles -In-Hand - # Prisoners	Green	=	7500	0 CY 2013, July (ON HOLD - OMS ISSUE)	0	Monthly	This figure represents the number of prisoners continuing to serve their prison sentence after becoming eligible for release to parole. A prisoner may not be granted parole until the Parole Board has reasonable assurance, after consideration of all of the facts and circumstances, that the prisoner will not become a menace to society or a risk to the public safety. The factors considered by the Parole Board in making parole decisions include the nature of the current offense, the prisoner's criminal history, prison behavior, program performance, age, parole guidelines score, risk as determined by various validated assessment instruments, and information obtained during the prisoner's interview, if one is conducted. A lower number indicates a smaller population of parole-eligible prisoners otherwise denied parole for reasons specific to their circumstances.
V3 - Sound Management, Proven Fiscal Practices, Outcome-Oriented Strategies								
BOA-18	General Fund / General Purpose Budgetary Appropriation Lapse - % Lapse			0.5%	0.0% First Report - FY 2016, November		FY Annually	Although the GF/GP lapse is measured annually, the current year projected balance is looked at monthly and provides guidance for hitting an annual target which guides the management of the department's budget. Having a manageably small lapse is a good measure of budget management. Measure is the percentage of lapsed funds to overall GF/GP appropriation. Below the low threshold may be difficult and risky to manage considering the department has approximately 90 line items the lapse may be spread into. Note--sometimes, the State Budget Office will require a lapse of at least a certain amount. In these instances, the target may need to be reassessed.
BOA-19	Legislative transfers made as a percentage of original appropriations - % of appropriations			1.0%	0.0% First Report - FY 2016, November		FY Annually	Legislative transfers made as a percentage of the original appropriations is a good measure of whether the enacted budget was well planned. This is a good indicator of up-front budgeting transparency and helps to build credibility with the legislature.
BOA-20	Spending Plans Approved on-time and at or under budget - # of days between submission and approval			35	0 First Report -		FY Annually	In order to help improve the management of individual appropriation spending plans, it is important to complete timely approved spending plans back to individual programs. Measure would be the average number of days between the

					FY 2016, November			date of submission of spending plan requests from programs to the date a spending plan is approved. Statistics have not formerly been collected.
BOA-21	Regular (Non-Holiday) Overtime as a percentage of overall department salary and wages - % of overall			5.0%	8.3% FY 2015, 3rd Quarter	0.0%	Quarterly	A higher percentage of overtime usage can signal problems to management such as high vacancies, high sick leave usage, etc. Although some level of overtime usage is cost-effective in 24/7 operations, higher percentage usage is not cost-effective and can result in staff burnout.
BOA-22	Facility Energy/Utility Costs (1 year Rolling Aggregate) - Percentage Cost Increase	Green		2.5%	-3.4% FY 2015, August	-3.6%	Monthly	This figure is the yearly percentage cost increase for water, sewer, electricity, natural and LP gas, and other fuels necessary for the operations of the Michigan Department of Corrections. It is calculated as a rolling percentage cost increase for the previous 12 months. This figure includes fuel and utility costs for the entire department, except Michigan State Industries. With ever-rising utility rates, lower costs reflect the Department's continuous efforts to reduce its energy consumption.
BOA-23	Facility Utility Water Usage in Dollars for Ionia Complex - \$ Spent			\$160750	\$0 First Report - FY 2015, 4th Quarter		Quarterly	In order to show a cost savings associated with water usage through the implementation of Energy Performance Contract (EPC) facility hardware and/or systems upgrades. EPC hardware and/or systems installed to increase energy efficiency, reducing usage, creating a cost savings. This measure is followed in the Ionia Complex: Michigan Reformatory (RMI), Ionia Correctional Facility (ICF), Bellamy Creek Correctional Facility (IBC) and Richard Handlon Correctional Facility (MTU). A good measure is whether the cost associated with water usage falls into the annual target range. The measure is the cost of water in dollars within the Ionia Complex. This measure can reveal whether or not EPC's should be implemented state-wide as cost saving upgrades.
BOA-24	Percentage of procurement card eligible transactions processed on procurement cards - % processed			90.0%	0.0% First Report - FY 2016, February		CY Annually	According to the 2012 Benchmark Study Comparison of Procurement Results, the cost to MDOC per transaction processed on procurement cards was \$2.58. The cost per standard department purchase orders was \$45. Increasing the use of procurement cards to process purchases is more cost effective and will promote timely payments. Transaction statistics are related to GVP and excludes CFA correctional facilities as they currently process their own transactions.
V4 - Hire, Train, Equip, Support & Mentor High Quality Staff at Highest Professional Standards								
BOA-09	Correctional Officer Vacancies (Budget Enhancement Metric) - # Vacancies	Green		500	484 FY 2015, August	415	Monthly	The Michigan Department of Corrections (MDOC) has a highly senior staff, and this metric is to inform Leadership about MDOC needs based upon projected correctional officer attrition. The metric will enable the Department to monitor trends in officer attrition, as a very useful strategic planning tool. Otherwise, the rate of attrition could accelerate without the Department being aware in time to take appropriate operational and budgetary action. This metric tracks the monthly number of officer vacancies, adjusted for the impact of temporarily closed housing units (if any) and New Employee Schools that have begun. A higher number of vacancies results in a greater use of overtime hours and its
