Consumer Friendly Results & Content

- Patient Portal enables direct access to results and supporting content to individuals
- Ability to customize content to suit organizational needs
- Integration with CLEAR Health Pass

The screenshot shows the BioReference Patient Portal interface. At the top, there's a navigation bar with 'Dashboard', 'Trends', 'Get Smart', and 'My Labs'. A search bar is also present. The main heading is 'COVID-19 Results and Information'. Below this, a paragraph explains that users can access their COVID-19 results and learn more about the testing and disease. It mentions that results are shown for the latest testing and that users can click on test links to see results and educational information. A link to 'My Labs' is provided for users who don't see their results. Below this, a table displays COVID-19 testing results:

COVID-19 Testing	Last Report Date	Test Value
COVID-19 (Coronavirus)	2020-10-06	Not Detected

Below the table, there's a section titled 'Additional Resources' with six video thumbnails. Each thumbnail has a title and a link:

- [COVID-19: What Is It?](#)
- [COVID-19: Taking Care of Yourself When You Have It](#)
- [COVID-19: Taking Care of Yourself if You've Been Exposed](#)
- [COVID-19: Keeping Your Distance](#)
- [COVID-19: Call First to Be Sure](#)
- [COVID-19: 7 Things You Can Do to Keep Your Distance](#)

The screenshot shows the BioReference 'Get Smart' page for COVID-19. The page title is 'Get Smart: COVID-19 (Coronavirus)'. Below the title, a paragraph explains that users can see more details on their test history and learn more about a specific test. It also notes that users may not have results for all tests. The main content area is titled 'Test History: COVID-19 (Coronavirus)' and shows a 'Reference Range: [Not Detected]'. A timeline from July 2020 to December 2020 displays a green bar indicating the test result. Below the timeline, it says 'MOST RECENT: NOT DETECTED'. To the right, there's a section titled 'What it Means' explaining the COVID-19 test and a 'Learn More' button. Below that, there's a 'Related information' section with a video thumbnail titled 'COVID-19: What Is It?'. At the bottom, there's a 'Test Overview' section with a paragraph explaining the COVID-19 test and a 'Possible results values:' section. The 'Possible results values:' section includes a 'Not Detected' result and a note about the possibility of a false negative result.

Test History: COVID-19 (Coronavirus)
Reference Range: [Not Detected]

What it Means
The COVID-19 test uses a sample from swabbing of your nose and/or throat to identify the presence of novel coronavirus disease 2019. COVID-19 is a new virus of global significance which causes respiratory illness.

Test Overview
The COVID-19 test uses a sample from swabbing of your nose and/or throat to identify the presence of novel coronavirus disease 2019. COVID-19 is a new virus of global significance which causes respiratory illness. On March 11, 2020, the World Health Organization (WHO) declared COVID-19 a global pandemic.
Possible results values:
Not Detected: Your results do not currently detect the presence of novel coronavirus disease 2019 (COVID-19) in your sample. Negative results for a sample collected while a person has symptoms usually means that COVID-19 did not cause your recent illness.
It is possible for this test to give a negative result that is incorrect (false negative) in some people with COVID-19. This means that you could possibly still have COVID-19 even though the test is negative. If this is the case, your

Hello Ashley,

Thank you for registering for the BioReference Patient Portal. Within our secure web application you can:

- Access your laboratory reports
- Get valuable insights about your health
- Update your insurance information
- Submit payment for a recent bill

To get started, [login to your account](#).

If you experienced any issues registering for the portal, we are here to help. Please email us at PatientPortal@BioReference.com and tell us about the problem you encountered.

Thanks,

BioReference Laboratories

Step 4 of 4: Identity Verification

Protecting your information is our top priority.

To protect your data and prevent fraud, BioReference Laboratories uses knowledge-based authentication to verify the identity of all users. Based on the demographic information tied to your account, we use a third party service to query public records and commercial data to generate questions to verify your identity. BioReference cannot access or share this data, and does not store the answers you provide.

To help with the identity verification process, you have the option to provide the last four digits of your SSN below. If you do not wish to provide this information,
