

Highlights from the March 23rd, 2010, TSG Meeting

1. The theme for the TSG Earth Day room this year is “Dust Off Your Waders – Let’s Go Fishing!” Several TSGers have done a great deal of prep work and now volunteers are needed to staff the displays. Please contact Dr. Fritz if you are able to devote some time on the day of the event (Thursday, April 22nd.) As in previous years, we will be set up in the ConCon Room.
2. Dr. Ries attended the SOT Annual Meeting in Salt Lake City, Utah, from March 7th-11th. Cumulative risk assessment (CRA), non-chemical stressors, low-dose exposure, and the use of high-throughput *in vitro* models were a few of the topics emphasized during the meeting. We will discuss further some of the approaches to/issues with CRA during upcoming Brown Bag sessions.
3. The Children’s Environmental Health Subcommittee has been asked by the Department of Community Health (DCH) for input regarding environmental data available for the National Children’s Study. The subcommittee will be meeting with DCH staff to determine what data are necessary/most applicable.
4. The next TSG meeting is scheduled for Tuesday, May 25th from 9 am-11 am in the Katherine Cushman Conference Room, 1st Floor, North Tower, Constitution Hall.
