

Pumping in Campgrounds

Septage waste from portable/vault privies can only be pumped by a licensed septage hauler. Privy waste must then be hauled out of the campground by the licensed septage hauler.

- **Privy waste cannot be discharged to a campground's sanitary dump station due to its high strength (lack of graywater) and its potential effects on groundwater.**
- **Campground owners may still operate a "honey wagon" service where they pump RV holding tanks and discharge it to their sanitary dump station per Rule 9.8 of the Campground Act and Rules (Part 125 of Public Health Code).**
- **Campground owners may not pump out portable/vault privy waste – they may only service RV holding tanks.**
