

Addressing Economy, Energy and Environment In the Supply Chain

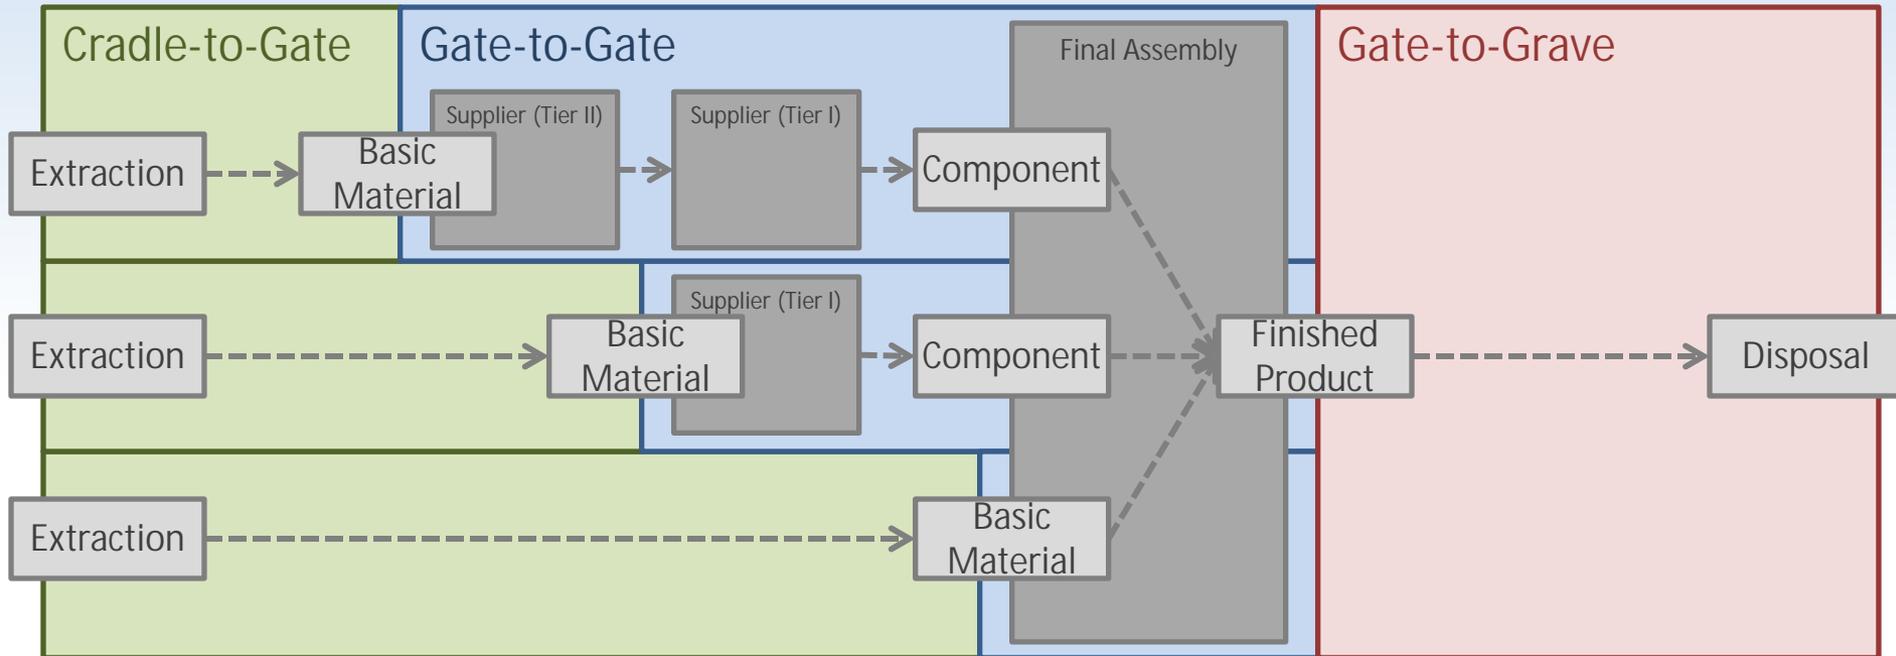

National Pollution Prevention Week

SRG Approach

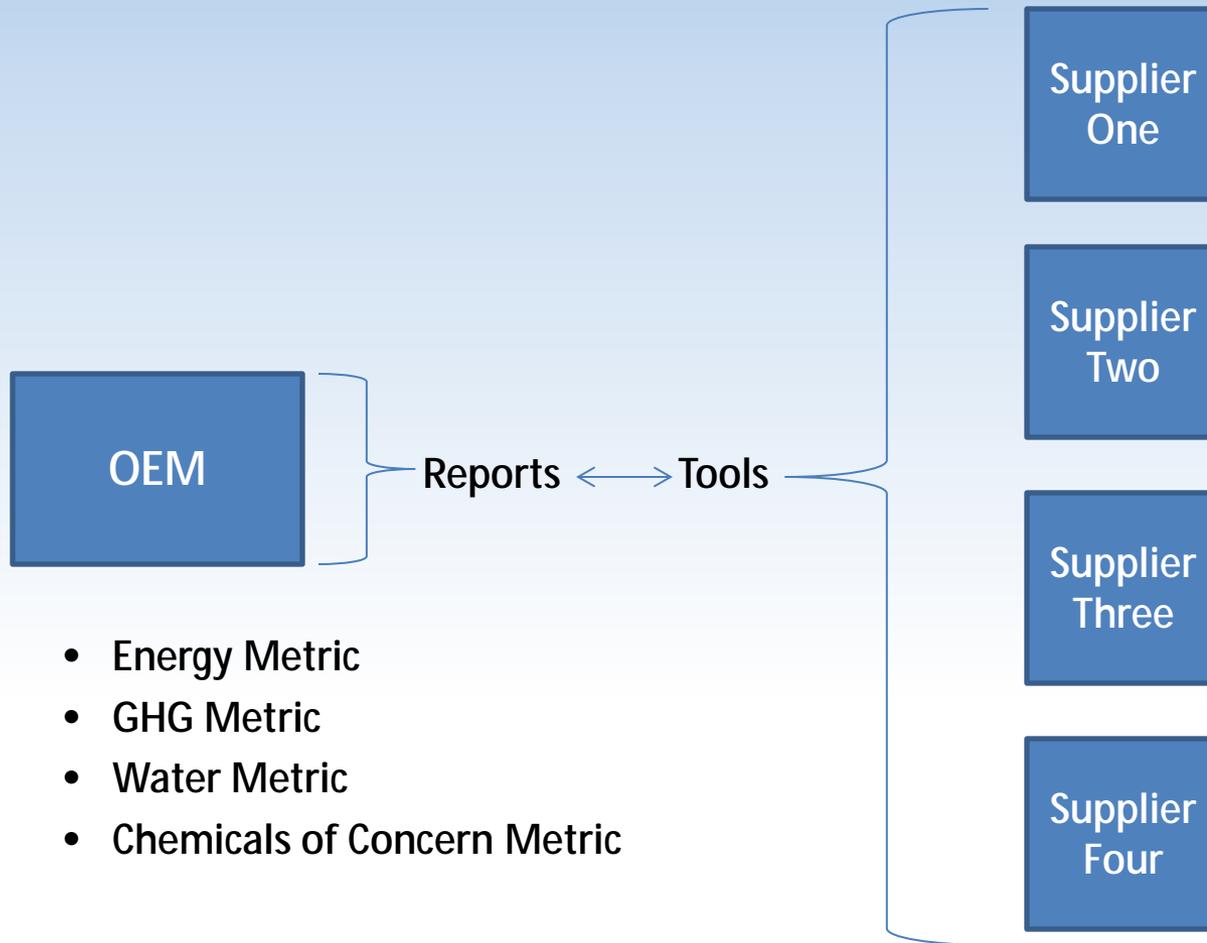

Consider a Life Cycle Supply Chain Collaboration

Determine Complexity

Identify the Common Risks

- Energy Metric
- GHG Metric
- Water Metric
- Chemicals of Concern Metric

SRG Approach

Exchange Standard Information/Data

1. Establish which metric is material for each supplier
2. Settle on common units of measurement
3. Establish reporting deadlines
4. Compile supply chain impacts
5. Report to stakeholders
