

# What is a Section 17 Permit?

Only required for water bottlers.

Includes all the requirements of large quantity withdrawals registration.

Includes all the requirements of Part 327 Permits.

# WATER WITHDRAWAL REGISTRATION

- Required of any new or increased withdrawal more than 100,000 gallons per day.
- Must have no adverse impacts on Characteristic Fish Populations in adjacent or nearby streams or lakes.
  - This determination is made through the Water Withdrawal Assessment Tool (WWAT) and/or a Site Specific Review (SSR).

# **PART 327 PERMIT**

- Required of any new or increased withdrawal more than 2,000,000 gallons per day for any reason.
- Must have no adverse impacts on Characteristic Fish Populations in adjacent or nearby streams or lakes.
  - This determination is made through the WWAT and/or a SSR.

#### AND

- No Adverse Resource Impacts to wetlands or other water dependent natural resources.
- Measures to prevent adverse resource impacts with enforceable implementation schedule.
- All water withdrawn, less consumptive use is returned to source watershed.
- Water conservation measures in place.
- Efficient water use.
- Compliance with all applicable local, state, and federal laws; and interstate and international agreements.
- Proposed use won't violate public or private water or common law rights.
- Balance between economic development, social development, and environmental protection.
- Supply potential of proposed source.
- 45 day public comment period.

### SECTION 17 PERMIT

- Required of any new or increased withdrawal of more than 200,000 gallons per day for bottled water only.
- Must have no adverse impacts on Characteristic Fish Populations in adjacent or nearby streams or lakes.
  - This determination is made through the WWAT and/or a SSR.
