

Michigan Air Permits System Renewable Operating Permit Program

ROP Document Naming Conventions

Files for ROP documents are named according to the Source Registration Number (SRN), which is a unique identifier for each ROP-subject source. These documents are made available as Word documents (DOC) and to view in Adobe Acrobat (PDF) format.

The tables below indicate the current ROP naming convention. The date of the document is included to assure that the most current version is being made available.

The most current Staff Report includes all ROP-related Staff Report Addendums. The consolidated Staff Report provides a complete history of actions (initial issuance, amendments, modifications, reopening, etc.) during the ROP's five-year cycle. Each time an addition is made to a Staff Report, the date on the cover page and in the file name are changed; and the updated Staff Report replaces the previous one.
