**2000 TOXIC CHEMICAL RELEASE INVENTORY  
STATE OF MICHIGAN SUMMARY REPORT**

This is a report on the chemical releases and waste management activities of Michigan facilities that are subject to the environmental reporting requirements described in Section 313 of the federal Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986, also known as Title III of the Superfund and Reauthorization Act (SARA Title III), and the Pollution Prevention Act of 1990. A complete list of the 650 reportable toxic chemicals and chemical categories are listed in CFR40 372.65.

The data in this summary report are based on chemical reports submitted to the State of Michigan for Report Year (RY) 2000 and verified as of January 31, 2002. For RY 2000, 915 Michigan facilities reported under the Toxic Chemical Release Inventory (TRI). Statewide totals are shown in Table 1.

Facility data in this report are arranged alphabetically by county and city. For each chemical reported by a facility, the amount released to a specific media or transferred is shown. Quantities are reported in pounds per year except for dioxin and dioxin-like compounds, which is reported in grams per year. Part I presents facility chemical data except for dioxin and dioxin-like compounds. Part II presents data on dioxin and dioxin-like compounds.

## **Who must report under TRI?**

All facilities in the U.S. are required to report under Section 313 of SARA Title III if they:

- Are in one of the covered industrial sectors based on Standard Industrial Classification (SIC) codes. Covered industrial sectors include manufacturing—SIC groups 20-39, and non-manufacturing industrial sectors of metal mining—SIC group 10 (except 1011, 1081 and 1094); coal mining—SIC group 12 (except 1241); electrical utilities—SIC 4911, 4931 and 4939; treatment, storage, and disposal facilities—SIC 4953; solvent recovery services—SIC 7389; chemical distributors—SIC 5169, and petroleum bulk terminals—SIC 5171; and
- Employ the equivalent of ten or more full-time employees; and
- Manufacture (including import) 25,000 pounds or more of a listed toxic chemical, or process 25,000 pounds or more of a listed toxic chemical, or otherwise use in any other manner 10,000 pounds or more of a listed toxic chemical during the calendar year. Reporting thresholds for a select group of chemicals that are persistent bioaccumulative and toxic (PBT) are significantly lower (10 pounds or 100 pounds, or 0.1 gram for dioxin and dioxin-like compounds). The EPCRA Section 313 PBT chemicals and thresholds are listed in Appendix A.

\* Federal facilities also must comply with SARA Title III Section 313 reporting requirements by Executive Order 13148.

## **What is reported?**

Facility information reported under TRI includes:

- Facility contacts and affiliation;
- Information on releases of TRI chemicals to the environment;
- Information on transport of TRI chemicals in wastes to off-site locations, including waste treatment;
- Information on pollution prevention activities undertaken by the facility for each reported TRI chemical.

## **What constitutes a TRI release on- and off-site?**

An *on-site* release is a release of a listed toxic chemical directly to air, water (groundwater, streams), underground injection wells (Class I or Class II-V), or land (on-site RCRA Subtitle C or other landfills, surface impoundment, etc.). An *off-site* release is a transfer to other off-site locations for landfill or disposal.

**What constitutes a TRI transfer off-site for further waste management?**

Chemicals in wastes transported to facilities for treatment, recycling, or to be used for energy recovery are considered off-site transfers for further waste management. This includes waste materials discharged to publicly owned treatment works (POTWs).

**How are releases and transfers reported?**

Facilities must submit a Form R for each TRI chemical they manufacture, process or otherwise use above the activity thresholds. Form R information includes facility identification, chemical-specific information about releases, transfers, treatments, reuse/recycling efforts and source reduction activities, and off-site locations to which TRI chemicals are transferred. A covered facility that meets the reporting criteria is required to submit a Form R report even if no release or transfer of waste materials occurred. Some facilities may qualify to submit a Form A report, which is an abbreviated version of the Form R report.

**Availability of Information**

Copies of individual Form R reports as well as the staff reports on the Michigan TRI data may be requested from the Michigan Department of Environmental Quality, Environmental Assistance Division, Technical Support Unit (SARA Title III Program), P.O. Box 30457, Lansing, Michigan 48909, or by calling (517) 373-8481. Michigan TRI data is also available on the internet at [www.michigan.gov/deq](http://www.michigan.gov/deq), *Assistance and Support, Environmental Reporting*.
