**1:00 p.m.**  
**(added 2/14/17)**

**NOTICE OF PUBLIC HEARING.** The Michigan Department of Environmental Quality (MDEQ), Water Resources Division, will conduct a public hearing on proposed administrative rules promulgated pursuant to Part 91, Soil Erosion and Sedimentation Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA). The rules are identified as Part 17. Soil Erosion and Sedimentation. This rule change is intended to correct an oversight in the law which prevented a person conducting a transportation related project, authorized by a state or governmental agency within its jurisdiction or easement, from obtaining a soil erosion permit in cases where the state or governmental agency does not control the project. The public hearing will be held on February 16, 2017, at 1:00 p.m., in the Con Con Conference Room located in the Atrium Level of Constitution Hall, 525 West Allegan Street, Lansing, Michigan 48933. Copies of the proposed rules (ORR 2016-037 EQ) can be downloaded from the Internet through the Office of Regulatory Reinvention at [www.michigan.gov/orr](http://www.michigan.gov/orr). Click on “Latest Rules Activity” and then “Pending Rule Changes.” Under “Rules by Department,” click on “Environmental Quality.” Scroll to ORR 2016-037 EQ and click on “Revision Text.” Copies of the rules may also be obtained by contacting the Lansing office at: Water Resource Division, Michigan Department of Environmental Quality, P.O. Box 30458, Lansing, Michigan 48909-7958, Phone: 517-284-6668, Fax: 517-241-9003, Email: [laudazioj@michigan.gov](mailto:laudazioj@michigan.gov). Any interested person is invited to attend and present his or her views. It is requested that all statements be submitted in writing for the hearing record. Anyone unable to attend may submit comments in writing to the address above. Written comments must be received by February 17, 2017. Persons needing accommodations for effective participation in the meeting should contact the Water Resources Division at 517-284-6668 one week in advance to request mobility, visual, hearing, or other assistance. This notice of public hearing is given in accordance with Sections 41 and 42 of Michigan’s Administrative Procedures Act, 1969 PA 306, Michigan Compiled Laws (MCL) 24.241 and 24.242. Promulgation of the rules is by authority conferred on the Director of the MDEQ by Section 9104 of Part 91, Soil Erosion and Sedimentation Control of the NREPA, MCL 324.9104. These rules will become effective immediately after filing with the Secretary of State. Teresa Seidel, Division Director, Water Resources Division.

**AGRICULTURAL PLASTICS RECYCLING FORUM, LANSING COMMUNITY COLLEGE, WEST CAMPUS, LANSING, MICHIGAN.** The MDEQ and the Missaukee Conservation District are hosting the first ever agricultural plastics recycling discussion in Michigan this February. Join us to hear international keynote speakers and representatives of the plastic industry give an overview of successful recycling programs in states such as Wisconsin and Arkansas. Learn how to successfully turn agricultural plastic into a viable commodity that can used to manufacture new products. The Agricultural Plastics Recycling Forum is designed to be a valuable experience in learning and sharing information with the goal of creating connections between generators, collectors, transporters, processors and end users of agricultural plastics. If you are interested in developing a successful Michigan agriculture plastics recycling network, this forum is a great place to start. This Forum is for: farmers, vegetable and dairy producers, nursery and greenhouse businesses, solid waste haulers, transportation/trucking businesses, private and public recycling program operators, conservation and agricultural sector employees, agricultural plastic processors and product producers, entrepreneurs, decision and policy makers, and anyone interested in successfully developing an agricultural plastics recycling program for Michigan. **AIR PERMIT TO INSTALL WORKSHOP, CONSTITUTION HALL, LANSING, MICHIGAN.**

For anyone required to obtain an air permit or who is interested in learning more about the air permit process, the MDEQ’s Air Quality Division offers the Air Permit to Install Workshop. The first part of the workshop will address what constitutes an administratively complete application, explain what must be included in a complete application, and include a question-and-answer session. The second part of the workshop allows attendees to choose between: Learning about “Potential to Emit” – an integral part of every permit application, or; A One-on-One session with a permit engineer if they have project-specific questions. The workshop is designed for businesses with activities that emit air contaminants; e.g., boilers, coating operations, and solvent degreasers. Registration Cost: \$50 – includes the Permit to Install Workbook. More information is available at [MDEQ’s Events Web Page](http://www.michigan.gov/deqevents) (www.michigan.gov/deqevents).

**CLEAN DIESEL FUNDING WEBINAR: VOLKSWAGEN MITIGATION TRUST REQUEST FOR INFORMATION - QUESTION AND ANSWER.**

This is the third in a series of Webinars to provide further explanation and information regarding clean diesel funding opportunities. The MDEQ recently issued a Volkswagen (VW) Environmental Mitigation Trust Request for Information to solicit input on the State’s plan for funding projects that mitigate oxides of nitrogen (NOx) emissions related to the partial settlement agreed to by VW. The settlement seeks to address concerns regarding emission control equipment in VW and Audi vehicles featuring 2.0 liter, diesel powered engines, model year 2009 to 2015. The VW Environmental Mitigation Trust Request for Information includes a draft Beneficiary Mitigation Plan for the \$60.3 million allocated to fund mobile emission reductions for the improvement of air quality and public health in Michigan. Feedback is requested concerning the draft Beneficiary Mitigation Plan that specifies project types, allocations, and grantee match requirements. Comments on the draft Beneficiary Mitigation Plan, through the VW Environmental Mitigation Trust Request for Information, will be accepted through March 3, 2017. Used Oil**

In this Webinar attendees will learn about how used oil is unique and characterized slightly differently than other wastes due to it historically being common to mixing other toxic solvents with the used oil. It will discuss the management standards that apply to managing used oil, how to find recycling options, and the basic waste requirements for handling used oil.

**NURTURING SUSTAINABLE COMMUNITIES FROM THE GROUND-UP, ROBERT'S RIVERWALK HOTEL, DETROIT, MICHIGAN.** The Southeast Michigan Sustainable Business Forum, in partnership with the MDEQ, is presenting this sustainability event! Don't miss this exciting opportunity to work with others who are passionate about sustainability and the triple bottom line. From businesses, governing agencies, design professionals, non-profits, community groups to citizens at large, stakeholders will find this event invaluable and an excellent opportunity to find sustainable solutions for the region. "Nurturing Sustainable Communities from the Ground Up" will explore the intersection between the physicality of public space, the ways in which we practice commerce, and the ways in which we develop diverse and inclusive communities. What does it take to achieve sustainable, healthy communities, so that our environment, business and culture combine to support human flourishing? The event will follow the three tracks of the triple bottom line – people, planet, and profit – and will include plenary presentations by subject matter experts, a panel question and answer, and breakout discussions using a facilitated small group dynamic. Participants will have the opportunity to reflect on the presentations and panel discussions and then contribute their ideas for achieving sustainable Detroit communities. Watch for details at [www.SMSBF.org](http://www.SMSBF.org).

**WATER INFRASTRUCTURE CONFERENCE: A NATIONAL CONVERSATION IN FLINT, RIVERFRONT BANQUET CENTER, FLINT, MICHIGAN.** Lead in Flint’s drinking water and a sewer line collapse that has driven people from their homes in Fraser has prompted local, state and national conversations about the urgent need for reinvestment in critical water infrastructure. To address this need, the Water Infrastructure Conference is being held March 7-9, 2017 in Flint Michigan. The goal of the Conference is to highlight water infrastructure issues, share lessons learned from the City of Flint and other cities around the country, and present new technologies and innovations to individuals involved in the operation, maintenance, design, management or administration of aging water works infrastructure. Topics include right-sized and flexible water infrastructure to meet the changing needs of communities, as well as incorporating innovative and emerging technologies to solve complex infrastructure issues nationally. The conference will help identify infrastructure solutions that may be applied to address the broad initiatives of Governor Rick Snyder’s 21st Century Infrastructure Commission. By identifying sustainable, strategic, and affordable approaches, conference attendees can help address statewide infrastructure needs. If you are involved in the operation, maintenance, design, management or administration of a municipal water supply, you will want to attend this event. **DUST MANAGEMENT WORKSHOP, LV EBERHARD CENTER, GRAND RAPIDS, MICHIGAN.** Fugitive dust from roads, surface lots, storage piles, and other sources contributes to air pollution. Additionally, asbestos from demolition activities can present environmental concerns if not properly handled. The MDEQ is presenting the Dust Management Workshop to provide information on how to control fugitive dust at public and private facilities, lots, and roads, as well as dust management at demolition sites. To help comply with environmental requirements relating to fugitive dust, attendees will receive an overview of particulate matter and fugitive dust regulations, related health issues, and a profile of dust control methods, approaches for developing solid fugitive dust plans, and success stories on dust management such as the use of Detroit’s wet-wet method. This workshop is recommended for anyone dealing with fugitive dust issues, including municipal, county, or state road repair and maintenance; zoning board or local responsibility for site location, selection, or approval; owner/manager of an unpaved lot or salvage yard; concrete and asphalt crushing operations; trucking business; rail yard operations; sand blasting; building construction or demolition; quarry or mining operations; asphalt or concrete plant or terminal operations; and environmental consultants. **AIR PERMIT TO INSTALL AND POTENTIAL TO EMIT WORKSHOPS, WASHTENAW COMMUNITY COLLEGE, ANN ARBOR, MICHIGAN.** The MDEQ’s Air Quality Division is offering two back-to-back workshops, *Air Permit to Install (PTI)* and *Potential to Emit (PTE)*. The morning *PTI Workshop* is for anyone required to obtain an air permit or who is interested in learning more about the air permit process. This workshop will address what constitutes an administratively complete application, explain what must be included in a complete application, and include a question-and-answer session. A limited number of One-on-One sessions with a permit engineer will be available for attendees with questions regarding an actual, on-going project. Attendees will receive the *Air Permit to Install Workbook*. The afternoon *PTE Workshop* is ideal for those who want to understand why determining PTE is important. PTE can be a confusing topic for all sectors of industry. We will take you step by step through calculating your facility’s PTE. The workshop will also help you evaluate your PTE to determine if you are a major or minor source of air pollution and which options will best lead you to compliance with the regulations. **COST: \$50** for each workshop, or **\$85** (\$15 savings) to attend both. More information is available at [MDEQ’s Events Web Page](#) ([www.michigan.gov/deqevents](http://www.michigan.gov/deqevents)).

**GREAT LAKES AND ST. LAWRENCE GREEN INFRASTRUCTURE CONFERENCE, COBO HALL, DETROIT, MICHIGAN.** The first ever Great Lakes and St. Lawrence Green Infrastructure Conference will draw up to 1,000 engineers, landscape architects, water quality professionals, government officials (local, state, provincial, and federal), developers, planners, academia, drain and road agencies, conservation and non-profit organizations, and interest groups from around the Great Lakes basin in Canada and the U.S. This is the first conference to focus on using green infrastructure across the landscape with a primary goal to protect the surface waters in the Great Lakes region. The conference location is in the middle of the Great Lakes chain, and at the forefront of many innovative green infrastructure projects. Much of Detroit is being recreated from the ground up. They are finding ways to reduce the burden on combined sewers for less than the cost of storing and treating combined effluent. They are making neighborhoods feel safer and more inviting and increasing green acreage over the top of thriving industry. These efforts are clearly linked to the Great Lakes, by reducing nutrient inputs to Lake Erie, and all Great Lakes' and St Lawrence waters downstream. This conference will include over 80 speakers to address topics such as green infrastructure technology, economics, local government/public works, and multi-jurisdictional/regional scale issues. The third day of this conference will offer four concurrent bus tours of local points of interest highlighting what Detroit is doing in terms of Green Infrastructure, Stormwater Management, and CSO Control. The Conference will feature valuable networking opportunities and an exhibitor area as well.
