Traverse County, c/o Mr. Tom Menzel, Administrator, 400 Boardman Avenue, Traverse City, Michigan 49684. The applicant proposes permanently drawdown the Sabin Dam impoundment by a maximum of 14.5 vertical feet, remove the Sabin Dam structure, and restore the Boardman River channel to its natural pre-dammed alignment and configuration. The proposed project would include excavation of approximately 103,106 cubic yards of material, including 57,067 cubic yards below the Ordinary High Water Mark (OHWM) and within the 100-year floodplain of the Boardman River; and placement of approximately 77,866 cubic yards of material, including 4,000 cubic yards below the OHWM and 16,415 cubic yards within the 100-year floodplain of the Boardman River. Compensating cut for floodplain fills is not proposed. The project would also include dredging of approximately 57,420 cubic yards of material and placement of approximately 77,886 cubic yards of fill in wetland areas, impacting approximately 10.99 acres of exiting wetlands. Stream flows would be maintained throughout construction via the dam’s existing concrete spillways. Conferences, Workshops, and Training

DATE	CONFERENCES, WORKSHOPS, AND TRAINING
MAY 31 – JUNE 2, 2017	<p>GREAT LAKES AND ST. LAWRENCE GREEN INFRASTRUCTURE CONFERENCE, COBO CENTER, DETROIT, MICHIGAN. The first ever Great Lakes and St. Lawrence Green Infrastructure Conference will draw engineers, landscape architects, water quality professionals, government officials (local, state, provincial, and federal), developers, planners, academia, drain and road agencies, conservation and non-profit organizations, and interest groups from around the Great Lakes basin in Canada and the U.S. This is the first conference to focus on using green infrastructure across the landscape with a primary goal to protect the surface waters in the Great Lakes region. The conference location is in the middle of the Great Lakes chain, and at the forefront of many innovative green infrastructure projects. Much of Detroit is being recreated from the ground up. They are finding ways to reduce the burden on combined sewers for less than the cost of storing and treating combined effluent. They are making neighborhoods feel safer and more inviting and increasing green acreage over the top of thriving industry. These efforts are clearly linked to the Great Lakes, by reducing nutrient inputs to Lake Erie, and all Great Lakes’ and St Lawrence waters downstream. This conference will include over 130 speakers to address topics such as green infrastructure technology, economics, local government/public works, and multi-jurisdictional/regional scale issues. The third day of this conference will offer four concurrent bus tours of local points of interest highlighting what Detroit is doing in terms of Green Infrastructure, Stormwater Management, and CSO Control. The Conference will feature valuable networking opportunities and an exhibitor</p>

Life Cycle Assessments

Join us for a discussion with Rich Helling, Director of Sustainable Chemistry at the Dow Chemical Company, to learn more about Life Cycle Assessments (LCA), including the value proposition of LCA and the first steps to incorporate LCA into your business. The LCA process assesses the potential environmental impacts associated with all the stages of a product's life, and it can be used to help critique product designs and production operations. LCA can help avoid a narrow outlook on environmental concerns by: compiling an inventory of relevant energy and material inputs and environmental releases; evaluating the potential impacts associated with identified inputs and releases; and, interpreting the results to help make better informed decisions.

WEBINAR: CRANKING UP RECYCLING - NEW RESEARCH, FREE

COMMUNICATIONS TOOLS FROM THE RECYCLING PARTNERSHIP. One thing is for sure: It's about the people. Among the many insights gained in the 2016 State of Curbside Report, it is crystal clear that every high performing recycling program in America is run by an engaged staff. What do they do, and what tools can you use to join them? Register for this Webinar to find out. The Recycling Partnership will present key findings from recent national research, share approaches for developing common suites of materials across MRF-sheds, and walk through communications, BMPS, and free tools. More information is available at [MDEQ's Events Web Page \(www.michigan.gov/deqevents\)](http://www.michigan.gov/deqevents).

AUGUST 10, 2017

AIR PERMIT TO INSTALL WORKSHOP, CONSTITUTION HALL, LANSING, MICHIGAN.

For anyone required to obtain an air permit or who is interested in learning more about the air permit process, the MDEQ's Air Quality Division offers the Air Permit to Install Workshop. The first part of the workshop will address what constitutes an administratively complete application, explain what must be included in a complete application, and include a question-and-answer session. The second part of the workshop allows attendees to choose between: Learning about "Potential to Emit" – an integral part of every permit application, or; A One-on-One session with a permit engineer if they have project-specific questions. The workshop is designed for businesses with activities that emit air contaminants; e.g., boilers, coating operations, and solvent degreasers.

COST: \$50 – includes the *Permit to Install Workbook*. More information is available at [MDEQ's Events Web Page \(www.michigan.gov/deqevents\)](http://www.michigan.gov/deqevents).
