WATER RESOURCES DIVISION	<p>WATER QUALITY AND POLLUTION CONTROL IN MICHIGAN 2018 SECTIONS 303(d), 305(b), AND 314 INTEGRATED REPORT (IR); DRAFT ASSESSMENT METHODOLOGY JUNE 2017. The Michigan Department of Environmental Quality (MDEQ), Water Resources Division (WRD), is accepting written comments on the draft Assessment Methodology for the 2018 IR. Every two years, the WRD prepares and submits an IR to the United States Environmental Protection Agency to satisfy the requirements of Sections 303(d), 305(b), and 314 of the federal Clean Water Act. The IR describes the status of water quality in Michigan and includes a list of water bodies that are not attaining Michigan Water Quality Standards and require the establishment of pollutant Total Maximum Daily Loads. The Assessment Methodology includes a description of the data, information, and decision criteria that are used to determine whether Michigan’s Water Quality Standards are attained. The draft Assessment Methodology is available on the MDEQ’s Web site at: www.michigan.gov/deqwater under “Announcements.” Written comments may be submitted to Kevin Goodwin, MDEQ, WRD, P.O. The draft 2017 Sulfur Dioxide Report satisfies the provisions in the federal Data Requirements Rule that the Department of Environmental Quality show the ambient impacts of large sources of sulfur dioxide (SO₂) by using dispersion modeling. The Report provides an analysis of SO₂ emissions from certain coal-fired electricity-generating facilities. It compares the most recently available two years of annual emissions data (2015 – 2016) with the three years of SO₂ emissions (2012 – 2014) used in earlier modeling of the affected facilities. The Report recommends that no additional modeling is necessary in 2017. The draft 2017 Sulfur Dioxide Report can be viewed at www.michigan.gov/air. Life Cycle Assessments

Join us for a discussion with Rich Helling, Director of Sustainable Chemistry at the Dow Chemical Company, to learn more about Life Cycle Assessments (LCA), including the value proposition of LCA and the first steps to incorporate LCA into your business. The LCA process assesses the potential environmental impacts associated with all the stages of a product's life, and it can be used to help critique product designs and production operations. LCA can help avoid a narrow outlook on environmental concerns by: compiling an inventory of relevant energy and material inputs and environmental releases; evaluating the potential impacts associated with identified inputs and releases; and, interpreting the results to help make better informed decisions.

WEBINAR: CRANKING UP RECYCLING - NEW RESEARCH, FREE COMMUNICATIONS TOOLS FROM THE RECYCLING PARTNERSHIP.

One thing is for sure: It's about the people. Among the many insights gained in the 2016 State of Curbside Report, it is crystal clear that every high performing recycling program in America is run by an engaged staff. What do they do, and what tools can you use to join them? Register for this Webinar to find out. The Recycling Partnership will present key findings from recent national research, share approaches for developing common suites of materials across MRF-sheds, and walk through communications, BMPS, and free tools. AIR PERMIT TO INSTALL WORKSHOP, CONSTITUTION HALL, LANSING, MICHIGAN.

For anyone required to obtain an air permit or who is interested in learning more about the air permit process, the MDEQ's Air Quality Division offers the Air Permit to Install Workshop. The first part of the workshop will address what constitutes an administratively complete application, explain what must be included in a complete application, and include a question-and-answer session. The second part of the workshop allows attendees to choose between: Learning about "Potential to Emit" – an integral part of every permit application, or; A One-on-One session with a permit engineer if they have project-specific questions. The workshop is designed for businesses with activities that emit air contaminants; e.g., boilers, coating operations, and solvent degreasers.

COST: \$50 – includes the *Permit to Install Workbook*. More information is available at [MDEQ's Events Web Page](http://www.michigan.gov/deqevents) (www.michigan.gov/deqevents).

MICHIGAN SUSTAINABILITY CONFERENCE (MISCON), CROWNE PLAZA, DETROIT, MICHIGAN. Building off the DEQ Sustainability Series Webinars and last year's Michigan Sustainability Conference, the second annual MiSCON is designed to promote meaningful engagement with business professionals around the topic of sustainability. By addressing the triple bottom line - environmental, economic, and social issues - your business can achieve cost savings, potential growth, and improve your brand and image to customers. MISCON will help forward-thinking business professionals to develop and strengthen the in-house sustainability tools and communication strategies needed to engage your community and stakeholders. It will provide an opportunity to engage in peer-to-peer ideas through thought-provoking discussions that will identify essential elements for success and inspire ongoing efforts to improve sustainability at your organization. The target audience for this event is businesses and their sustainability professionals, environmental health and safety coordinators, environmental engineers and staff, academics and students studying sustainability related topics, and anyone interested in learning how to advance and communicate their organization's sustainability efforts. More information is available at [MDEQ's Events Web Page](http://www.michigan.gov/deqevents) (www.michigan.gov/deqevents).
