The Michigan Department of Environmental Quality (MDEQ) will not discriminate against any individual or group on the basis of race, sex, religion, age, national origin, color, marital status, disability, or political beliefs. Questions or concerns should be directed to the MDEQ Office of Human Resources, P.O. Box 30473, Lansing, MI 48909.

## 2006 TOXIC CHEMICAL RELEASE INVENTORY STATE OF MICHIGAN SUMMARY REPORT

This is a report on the chemical releases and waste management activities of Michigan facilities that are subject to the environmental reporting requirements described in Section 313 of the federal Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986, also known as Title III of the Superfund and Reauthorization Act (SARA Title III), and the Pollution Prevention Act of 1990. A complete list of the 650 reportable toxic chemicals and chemical compound categories are listed in the Code of Federal Regulations, CFR40 372.65.

The data in this summary report are based on chemical reports submitted to the State of Michigan for Report Year (RY) 2006 and verified as of October 17, 2007. Statewide totals are shown in Table 1 below.

**Table 1. Michigan Toxic Chemical Releases and Transfers (lbs./year) – Report Year 2006**

	<i>Totals</i>
<b>Number of Facilities</b>	<b>874</b>
<i>On-site Disposal</i>	
Underground Injection Class I Wells	3,808,589
Land Disposal (RCRA and Other Landfills)	8,039,962
<i>On-site Release or Other Disposal</i>	
Air Releases	48,736,579
Surface Water Discharges	625,278
Land Releases (Surface Impoundment and Land Application)	5,708,674
Total On-site Release and Disposal	<b>66,919,083</b>
<i>Off-site Disposal</i>	
Off-site Disposal (Landfills and Class I Injection Wells)	23,092,187
Other Off-site Release and Disposal	4,559,715
Total Off-site Disposal and Releases	<b>27,651,901</b>
<b>Total On- and Off-site Release and Disposal</b>	<b>94,570,984</b>
POTW Discharges	8,407,934
<i>Waste Managed Off-site</i>	
Energy Recovery	55,188,195
Recycled	100,685,414
Treated	17,113,671
<b>Total Transfers Off-site for Further Waste Management</b>	<b>181,395,214</b>

Facility data in this report are arranged alphabetically by county and city. For each chemical reported by a facility, the amount released to a specific media or transferred is shown. Quantities are reported in pounds per year except for dioxin and dioxin-like compounds, which is reported in grams per year. Part I presents facility chemical data except for dioxin and dioxin-like compounds. Part II presents data on dioxin and dioxin-like compounds.

### **Who must report under TRI?**

All facilities in the U.S. are required to report under Section 313 of SARA Title III if they:

- Are in one of the covered industrial sectors based on Standard Industrial Classification (SIC) codes or a federal facility. Covered industrial sectors include manufacturing—SIC groups 20-39, and non-manufacturing industrial sectors of metal mining—SIC group 10 (except 1011, 1081 and 1094); coal mining—SIC group 12 (except 1241); electrical utilities—SIC 4911, 4931 and 4939; treatment, storage, and disposal facilities—SIC 4953; solvent recovery services—SIC 7389; chemical distributors—SIC 5169, and petroleum bulk terminals—SIC 5171; *and*
- Employ the equivalent of ten or more full-time employees; *and*
- Manufacture (including import) 25,000 pounds or more of a listed toxic chemical, or process 25,000 pounds or more of a listed toxic chemical, or otherwise use in any other manner 10,000 pounds or more of a listed toxic chemical that are not persistent, bioaccumulative or toxic (PBT) during the calendar year,  
Or exceed the lower activity threshold for PBT chemicals (see Appendix A).

### **What is reported?**

- Facility contacts and affiliation;
- Information on releases of TRI chemicals to the environment;
- Information on transport of TRI chemicals in wastes to off-site locations for disposal, recycling, treatment, or to be used for energy recovery;
- Information on pollution prevention activities undertaken by the facility for each reported TRI chemical.

### **What constitutes a TRI release or disposal on- and off-site?**

An *on-site* release or disposal is a release of a listed toxic chemical directly to air, water (surface water, streams), surface impoundment or land application, and disposal to on-site RCRA Subtitle C or other landfill or to Class I underground injection wells. *Off-site* release or disposal is a transfer to other off-site locations for disposal to a RCRA Subtitle C or other landfill or to Class I underground injection wells, or release to surface impoundment, land application, or some other means of disposal or release as a result of treatment.

### **What constitutes a TRI transfer off-site for further waste management?**

Chemicals in wastes transported to facilities for treatment, recycling, or to be used for energy recovery are considered off-site transfers for further waste management. This includes waste materials discharged to publicly owned treatment works (POTWs).

### **How are releases and transfers reported?**

Facilities must submit a Form R (or Form A, if applicable) for each TRI chemical they manufacture, process or otherwise use above the activity thresholds. Form R information includes facility identification, chemical-specific information about releases and disposal, transfers, on-site treatment methods, reuse/recycling efforts and source reduction activities, and off-site locations to which TRI chemicals are transferred. A covered facility that meets the reporting criteria is required to submit a Form R report even if no release or transfer of waste materials occurred. Some facilities may qualify to submit a Form A report, which is an abbreviated version of the Form R report.

### **Form A Report**

The Form A report only requires facility information and chemical name. The Form A does not require the facility to report the amounts released and disposed, and managed as waste through recycling, energy recovery, and treatment. The total use of the chemical in the calendar year cannot exceed 1 million pounds. For non-PBT chemicals, Form A is allowed if the total production related waste does not exceed 5,000 pounds, with no more than 2,000 pounds in releases. For the first time beginning with 2006, Form A is allowed for PBT chemicals where there are no releases and the waste managed does not exceed 500 pounds. Dioxin and dioxin-like compounds must still be reported on the Form R. A chemical submitted on the Form A is represented by an “A” to the left of the chemical name in this report.

### **Availability of Information**

Copies of individual Form R or Form A reports as well as the staff reports on the Michigan TRI data may be requested from the Michigan Department of Environmental Quality, Environmental Science and Services Division, SARA Title III Program, P.O. Box 30457, Lansing, Michigan 48909, or by calling (517) 373-8481. Michigan TRI data is also available on the internet at [www.michigan.gov/deqsara](http://www.michigan.gov/deqsara).

### Appendix A. EPCRA Section 313 Listed PBT Chemicals and Activity Thresholds

Chemical	Threshold (in pounds unless otherwise noted)
ALDRIN	100
BENZO(G,H,I)PERYLENE ♦	10
CHLORDANE	10
DIOXIN AND DIOXIN-LIKE COMPOUNDS ♦	0.1 grams
HEPTACHLOR	10
HEXACHLOROBENZENE	10
ISODRIN	10
LEAD *	100
LEAD COMPOUNDS *	100
MERCURY	10
MERCURY COMPOUNDS	10
METHOXYCHLOR	100
OCTACHLOROSTYRENE ♦	10
PENDIMETHALIN	100
PENTACHLOROBENZENE ♦	10
POLYCHLORINATED BIPHENYLS	10
POLYCYCLIC AROMATIC COMPOUNDS +	100
TETRABROMOBISPHENOL A (TBBPA) ♦	100
TOXAPHENE	10
TRIFLURALIN	100

Note: PBT chemical reporting effective for 2000 reporting year, except lead and lead compounds which were effective for 2001.

♦ New chemical subject to EPCRA Section 313 reporting beginning with Report Year 2000.

+ Two new chemicals added to PAC category; 21 chemicals now included in PAC category.

\* Thresholds effective for 2001 reporting year
