1.0 INTRODUCTION

The Mannik & Smith Group, Inc. (MSG) has prepared this *Interim Response Construction Summary for Asbestos Removal and Demolition Debris Capping* (CSR) as part of the Abandoned Mining Wastes – Torch Lake non-Superfund Site (Project) http://www.michigan.gov/deq/0,4561,7-135-3311_4109_9846_76560---,00.html (Site ID: 31000098). This CSR summarizes the asbestos removal and demolition debris capping interim response (IR) completed at the Calumet & Hecla Tamarack City Operations Area (CHTC) Ahmeek Stamp Mill Complex. The IR entailed the removal of asbestos containing building material (ACBM) and capping of a demolition debris pile where ACBM was present near the Tamarack City Park. The Ahmeek Stamp Mill Complex is located in Tamarack City, Houghton County, Michigan. This CSR was prepared in accordance with the *Indefinite Scope Indefinite Delivery (ISID) Discretionary Proposal for FS and Remedial Action Activities* (24 February 2016) prepared by MSG in response to a request from the Michigan Department of Environmental Quality (DEQ), Remediation and Redevelopment Division (RRD), Calumet Field Office under MSG's 2015 Environmental Services ISID Contract Number 00538 with the State of Michigan.

1.1 Project Location

The Project area is located along the shoreline and in Torch Lake, Houghton County, Michigan. Due to the complex nature and very large area RRD subdivided the Project into study areas based on past use and known issues. Depicted on *Figure 1, Project Location Map* are the CHTC and Calumet and Hecla Lake Linden Operations Area (CHLL) areas and their respective former industrial operations.

The CHTC is around Calumet & Hecla's copper mining and processing operations near Tamarack City, Michigan. The CHTC consists of approximately 110 acres of land extending approximately 1.25 miles along the shoreline of Torch Lake, and incorporates over 187 different parcels with multiple property owners.

The CHTC Ahmeek Stamp Mill Complex is located in Tamarack City along the east side of Highway M-26 and generally characterized as former industrial operations area and an in-lake stamp sand deposit associated with the industrial operations in the Ahmeek Mill Processing Area. Residential (single-family residences), industrial ruins, industrial (capped stamp sands) properties, and Torch Lake border the Ahmeek Stamp Mill Complex. The ACBM removal and demolition debris pile capping IR was located across Spruce Street immediately southeast of the Tamarack City Park. *Figure 2, Ahmeek Stamp Mill Complex Features Map*, depicts the site features and the ACBM removal and demolition debris pile capping area.

1.2 Project Background

Copper mining was extensive in the Keweenaw and formed the backbone of the regional economy and society. Copper ore milling and smelting operations conducted from the mid-1860s to the 1960s, including the importation, reprocessing, and smelting of various scrap metals in the later years of operation. Consistent with past industrial practices, Torch Lake served as dumping grounds for virtually all mining industry related waste products produced, including tailings, slag, and various chemicals. At least 20 percent of the Torch Lake's volume is estimated to be filled with tailings and other waste products.

The environmental legacy resulting from over 100 years of mining and reclamation led to Torch Lake and its western shoreline to be designated as a Superfund site by the United States Environmental Protection Agency (EPA) <https://cumulis.epa.gov/supercpad/cursites/csinfo.cfm?id=0503034> and a Great Lakes Area of Concern by the U.S./Canada Great Lakes Water Quality Agreement <https://www.epa.gov/torch-lake-aoc>. The EPA undertook cleanup activities to address some of the byproducts of the mining industry while others were not addressed or left to recover through natural processes.

The DEQ Project is addressing some of the remaining concerns in Houghton County not addressed by the EPA. The Project concerns involve groundwater, surface water, sediments, and "upland" media. Known or suspected problems which are being evaluated include: an unidentified, significant in-lake and/or terrestrial

source of polychlorinated biphenyls (PCBs), uncharacterized waste deposits and >750 uncharacterized drums on the lake bottom, slag, landfills, industrial ruins, coal storage areas, underground storage tanks (USTs), residual process materials (RPM), asbestos containing material (ACM), and any other waste materials identified during future investigations.

During 2014 and 2015, RRD conducted Site Investigation (SI) activities and confirmed the remaining concerns in the Project area involve groundwater, surface water, sediments, and "upland" media. Priority concerns which were evaluated and deemed to require IRs include: significant terrestrial source of PCBs; ACM; RPM; abandoned mining era containers; seeps; limited areas of soil in which there are Direct Contact Criteria (DCC) and Particulate Soil Inhalation Criteria (PSIC) exceedances; and, physical hazards.

In the case of the Ahmeek Stamp Mill Complex, the identified risks pose potential threats to human and ecological receptors, including but not limited to human health risks in the event of inhalation of asbestos and physical hazards. The ACBM containing demolition debris pile was located in a publically accessible area adjacent to the Tamarack City Park and a residential area.

Based on these conditions the Upper Peninsula RRD staff prepared an Emergency Procurement Action Form included in *Appendix A, Emergency Procurement Action Form*. Upon authorization, RRD staff completed an IR that removed the observed ACBM and capped the demolition debris pile to reduce potential exposure of the public to residual asbestos and physical hazards.

2.0 OBJECTIVE AND SCOPE OF WORK

The objective of the IR for ACBM removal and demolition debris pile capping was to reduce potential exposure of the public to asbestos in a publically accessible area near the Tamarack City Park and residential area in the Ahmeek Stamp Mill Complex Area. To meet this objective MDEQ developed a Trade Contractor (TC) scope of work and solicited bids in accordance with DEQ RRD Emergency Funding and Procurement Procedures.

3.0 INTERIM RESPONSE ACTIVITIES

The TC selected and retained by the State of Michigan was UP Environmental Services (UPES) of Bark River, Michigan. Refer to *Appendix B, Purchase Order* to conduct the IR. UPES completed the work in accordance with the TC procurement package included in *Appendix C, Ahmeek Mill Processing Area Interim Response Project Scope of Work* during July 2016. Due to the proximity of the work to Dover Creek a Part 91, Soil Erosion and Sedimentation Control (SESC) Permit included in *Appendix D, Soil Erosion and Sedimentation Control Permit*, was required. Approval and documentation of ACBM disposal is included in *Appendix E, Waste Management Records*. Photographs of the IR operations are included in *Appendix F, Photographic Log*.

4.0 SUMMARY AND CONCLUSIONS

IR operations completed at the demolition debris pile in the Ahmeek Stamp Mill Complex included:

- Removal and disposal of approximately one cubic yard of ACBM;
- Installation of SESC best management practices;
- Capping of approximately 2,400 square feet of demolition debris through placement of sand to fill voids and 6-inches of top soil, seeding, and straw mulch blankets; and,
- Removal of SESC measures once a uniform stand of vegetation became established.

The completed IR operations met the objective of reducing potential exposure of the public to asbestos through removal of observed ACBM and capping of the demolition debris pile.

5.0 RECOMMENDATIONS

MSG has the following recommendation:

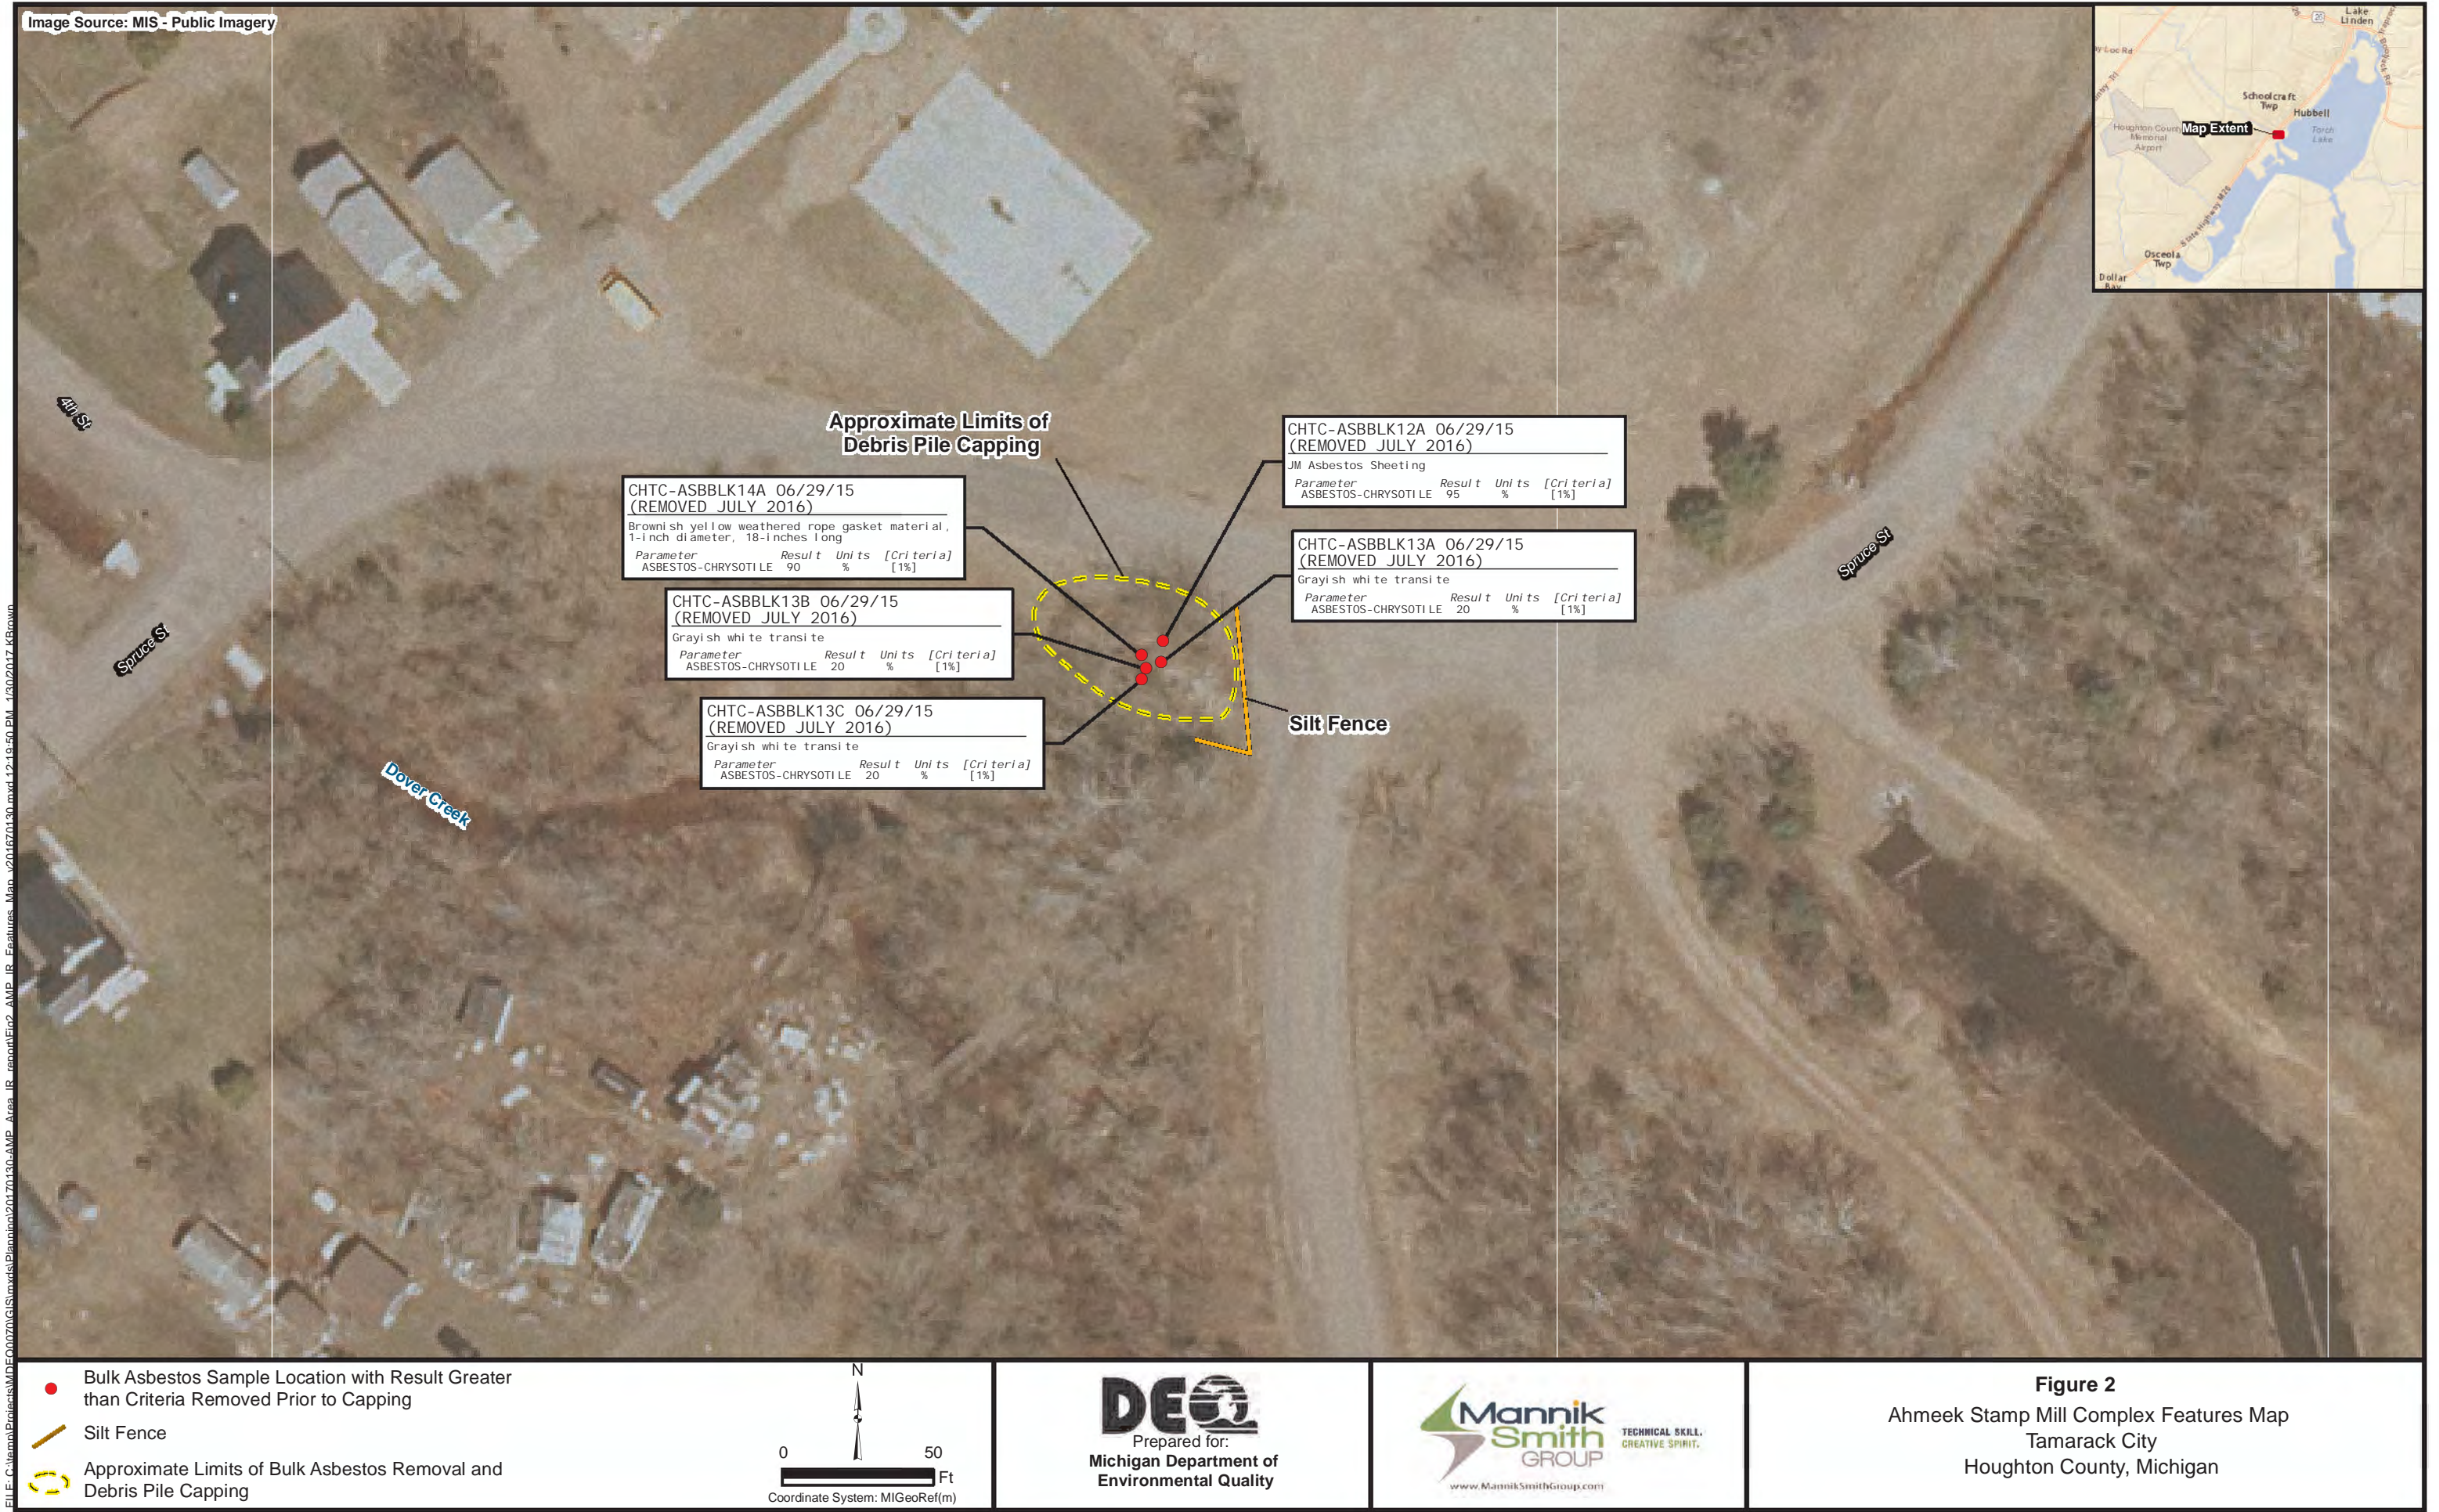

- Periodic monitoring and maintenance as required of the capped area to maintain the IR's effectiveness.

Emergency Procurement Action Form

EMERGENCY PROCUREMENT ACTION FORM

Site Name: Abandoned Mining Wastes County: Houghton

Index: 44251 PCA: 30870 Project #: 456990

ERD Staff Contact: Amy Keranen Date of Emergency: May 2016

Contacted by:

District Supervisor's Signature:

Cliffon Clark

Site Description: A debris pile consisting of waste material containing exposed friable and non-friable asbestos containing building materials (ACBM) is present in the Ahmeek Stamp Mill Complex portion of the Ahmeek Mill Processing Area which is located within the Calumet and Hecla Tamarack City Operations Area (CHTC). The publically accessible debris pile is alongside a residential street and is next to the Tamarack City Park and a residential area. The U.S. Environmental Protection Agency (EPA) Emergency Response Branch previously performed a site assessment and subsequent removal action and capping at the Ahmeek Stamp Mill Complex. Since the completion of those activities, the Michigan Department of Environmental Quality (MDEQ) documented the debris pile and ACBM. Asbestos analytical results for the various ACBM, including but, not limited to transite, sheeting, and rope gasket material indicate ACM are present on the debris pile. Asbestos concentrations in five bulk material samples contained asbestos fibers at concentrations greater than 1 percent (%). The damaged and friable nature of some of these materials pose a potential risk to human health as it relates to the inhalation pathway. Although, asbestos fibers were not detected in a limited number of soil samples collected from the study area, the exposed nature of these material, makes them subject to further degradation that could potentially impact surface soils in the Ahmeek Mill Processing Area. The identified conditions warrant an emergency response action to mitigate potential risks to human and ecological receptors. Failure to undertake an emergency response action will allow for the on-going potential exposure risk.

Cause of Emergency: The ACBM is present on the debris pile, which is publically accessible, and is next to the Tamarack City Park (which is frequented by children) and a residential area.

Specific Threats: Asbestos is present on the ground surface across from a residential area and readily accessible to children and other recreational users of the adjacent Tamarack City Park. The damaged and friable nature of some of these materials pose a potential risk to human health as it relates to the inhalation pathway.

Action Taken: Because of the imminent threat the emergency procurement process is being utilized to contract removal asbestos and cap the area. Specifications have been developed and a Pre-Bid Meeting was held on June 2, 2016. Bids for the current scope of work were obtained on June 15, 2016. The apparent low bid was by U.P. Environmental Services for \$24,100.00.

Additional Information: Work is to be completed between the local 4th of July celebrations and Tamarack City Daze which is held in early August.

Ahmeek Mill Processing Area Interim Response Project Scope of Work

Ahmeek Mill Processing Area Interim Response

Post-Bid Addendum - Revised Scope of Work

The Michigan Department of Environmental Quality (MDEQ) is issuing this Post-Bid Addendum for the Ahmeek Mill Processing Area Interim Response to add two options to the scope of work. The options include:

Option 1: Pick-up identified asbestos containing materials (ACM) and any observed suspect ACM (SACM), if present, from the pile surface and proper disposal.

Option 2: Option 2, if selected, will be additive to Option 1 and includes covering the pile with clean soil, but not removing the pile.

Option 3: The originally bid scope of work.

Additional details for Option 1 and Option 2 are provided on the following page. The MDEQ may select Option 1, Options 1 and 2, Option 3 (already bid), or none of the options. All applicable scope of work elements and guidance from the Revised Scope of Work issued on 3 June 2016 remain in effect, this includes but is not limited to:

- Compliance with the National Emission Standards for Hazardous Air Pollutants (NESHAP) for asbestos;
- Providing notice to MDEQ and the Michigan Department of Licensing and Regulatory Affairs (LARA);
- Work practices and engineering controls that may be required;
- All required waste characterization and profiling, including all sampling and analysis that may be required by the disposal facility for waste acceptance;
- The Conditions for Emergency Bids; and,
- The schedule.

Bidders are requested to provide bids for Option 1 and Option 2 using the following page.

Please provide bids no later than 12:00 pm (noon) EDT on Wednesday, 15 June 2016 via email to JChrestensen@manniksmithgroup.com.

Work Item

Contractor Quote

OPTION 1

1. Manually remove all visible ACM and suspect ACM (SACM) from the surface of the pile area. Provide all required notices; pay all fees; characterize and obtain landfill disposal approval; control dust generation; properly handle and contain ACM and SACM; decontamination; transport and properly dispose friable and non-friable ACM and SACM; and provide manifest and landfill disposal tickets. \$ _____

TOTAL FOR OPTION 1 \$ _____

OPTION 2 (Additive to OPTION 1)

2. Obtain a SESC Permit. Install, maintain, and ultimately remove silt fence and/or other measures when the disturbed area has been stabilized and the permit is released. \$ _____
3. Cut trees from atop the pile and the minimum number of trees along the road as needed to access the pile. Leave stumps in-place, cut flush with grade. Place wood to the south of the pile. Place up to 80 loose cubic yards of sand to fill voids, smooth out the pile surface, and cover obstructions jutting from the pile. If equipment traverses the pile, provide decontamination. \$ _____
4. Place a 6-inch thick layer (up to approximately 50 cubic yards) of sandy loam soil suitable for vigorous grass growth over the area and taper to surrounding grades. Hand rake smooth and blend the edges with existing features. \$ _____
5. Place MDOT seed mixture TDS (assuming sandy loam soils) and 100% biodegradable mulch blankets anchored with wood stakes over all disturbed areas per MDOT specification Sections 816 and 917. Guarantee vegetative cover for 1 year**. \$ _____

TOTAL FOR OPTION 2 \$ _____

** = Seeded areas will be accepted when a full uniform stand of grass has become established and maintained for one year. A satisfactory stand of grass is defined as no bare spots larger than one square foot and not more than 10 percent of the area with bare spots larger than 3-inches by 3-inches. 80% of the line item amount will be paid upon completion of seeding with the balance upon acceptance after the following growing season or within one year, whichever occurs first.

Ahmeek Mill Processing Area Interim Response

Revised Scope of Work

The Michigan Department of Environmental Quality (MDEQ) identified the presence of asbestos containing materials (ACM) near the public park in Tamarack City, Michigan. **Figure 1** depicts the location.

To reduce potential exposure to the public, MDEQ will remove and properly dispose a pile of soil and debris containing the ACM. Removal shall consist of manual removal of visible ACM followed by excavation of the entire debris pile area. A 6-inch (in) thick layer of loamy soil shall be placed over the removal area and the edges shall be tapered to match surrounding grades. Following placement of the loamy soil, the Contractor shall place seed and straw mulch blankets. **Figure 2** depicts the approximate limits of the work along with existing sample results.

Due to the proximity of Dover Creek, soil erosion and sedimentation control (SESC) best management practices must be applied and a SESC permit is required. Refer to:

- <http://www.houghtoncounty.net/directory-drain-commissioner.php>; and,
- http://www.houghtoncounty.net/docs/SESC_Email_Att.pdf.

The Contractor is responsible for compliance with the National Emission Standards for Hazardous Air Pollutants (NESHAP) for asbestos. This includes providing notice to MDEQ and the Michigan Department of Licensing and Regulatory Affairs (LARA). It also includes work practices and engineering controls to prevent visible emissions such as using a water spray. Refer to <http://www.michigan.gov/deq/0,4561,7-135-3310-11856--,00.html>. All visible ACM shall be manually removed from the pile prior to starting excavation. Suspect and actual ACM encountered during excavation shall similarly be picked out for disposal such that excavation activities do not crush or pulverize the observed material.

Work and materials shall comply with the referenced Michigan Department of Transportation (MDOT) specifications from the 2012 Standard Specifications for Construction.

The Contractor shall provide all required waste characterization and profiling, including all sampling and analysis that may be required by the disposal facility for waste acceptance.

The MDEQ shall be provided all characterization and disposal documents for review and approval at least two business days in advance of when they are needed. MDEQ will sign all disposal and manifest documents as the waste generator.

40-hour Hazardous Waste Operations and Emergency Response (HAZWOPER) training is required for all on-site persons that may encounter contaminated media. A summary of existing data is provided on **Figure 2**. The Contractor is responsible for their own health and safety,

including compliance with 29 Code of Federal Regulations (CFR) Part 1910 and 29 CFR Part 1926.

Refer to **Attachment A** for Conditions for Emergency Bids that will apply to the work. In addition, the selected Contractor must supply the following written information within five business days after receiving a telephone authorization from the MDEQ district Project Manager to start the work:

- Copy of Certificate of Awardability, for contracts over \$100,000.
- Proof of 40-hour hazardous waste safety training for on-site personnel.

Schedule:

- The ACM and debris removal and disposal shall be completed by 15 July 2016.
- Site restoration (seed and mulch blankets) shall be completed by 15 July 2016. Note this does not include release of the SESC permit and the one-year guarantee period for the vegetative cover.
- Waste characterization sampling, analysis, and waste profiling is the responsibility of the Contractor and shall begin immediately upon project award. On-site sampling activities as needed for waste characterization shall be coordinated with MDEQ or its designated representative.
- On-site tree clearing and ACM/debris removal shall not begin prior to 5 July 2016.

The following tasks will be required of the Contractor to complete the work:

<u>Work Item</u>	<u>Contractor Quote</u>
1. Obtain a SESC Permit. Install, maintain, and ultimately remove silt fence and/or other measures when the disturbed area has been stabilized and the permit is released.	\$ _____
2. Manually remove ACM and excavate up to 375 tons of soil and debris containing ACM from the area depicted on Figure 2 . Provide all required notices; pay all fees; characterize and obtain landfill disposal approval; control dust generation; pick-up of all visible ACM prior to excavation; properly handle and contain ACM; and provide manifest copies and landfill disposal tickets.	\$ _____
3. Transportation for friable ACM disposal Unit rate for transportation = \$ _____ per load	\$ _____ (assuming one load*)
4. Transportation for non-friable ACM disposal Unit rate for transportation = \$ _____ per ton	\$ _____ (assuming 375 tons*)
5. Unit rate for friable ACM disposal from Waste Management = \$70.00 per ton with a three-ton minimum per load	\$ <u>210.00</u> (assuming minimum charge*)
6. Unit rate for non-friable ACM disposal from Waste Management = \$40.00 per ton with a three-ton minimum per load	\$ <u>15,000.00</u> (assuming 375 tons*)
7. Budgeted amount for other Waste Management charges of tax at \$0.36 per ton, \$20.00 per load environmental fee, and \$100.00 profile fee.	\$ <u>560.00*</u>
8. Place a 6-inch thick layer of loamy soil suitable for vigorous grass growth over excavated area and taper to surrounding grades.	\$ _____
9. Place MDOT seed mixture TDS (assuming sandy loam soils) and 100% biodegradable mulch blankets anchored with wood stakes over all disturbed areas per MDOT specification Sections 816 and 917. Guarantee vegetative cover for 1 year**.	\$ _____
TOTAL	\$ _____

Ahmeek Mill Processing Area Interim Response
Scope of Work

* = Payment for Items 3 through 6 will be on a per-load basis for friable ACM and a per-ton basis for non-friable ACM. Payment for Item 7 will be for actual taxes and fees. The number of tons is estimated and may be more or less than the estimated value. Payment to the Contractor for transportation and disposal will be at the stated unit rates for the actual quantities disposed to complete the project.

** = Seeded areas will be accepted when a full uniform stand of grass has become established and maintained for one year. A satisfactory stand of grass is defined as no bare spots larger than one square foot and not more than 10 percent of the area with bare spots larger than 3-inches by 3-inches. 80% of the line item amount will be paid upon completion of seeding with the balance upon acceptance after the following growing season or within one year, whichever occurs first.

ATTACHMENT A

**Remediation and Redevelopment Division
Department of Environmental Quality
Conditions for Emergency Bids**

*Printed under the authority of the Natural Resources and Environmental
Protection Act, PA 451, February 1995, as amended*

By your response to the Department of Environmental Quality request for bids on the _____ site, the contractor agrees to provide all labor, materials, equipment, tools and services required to complete the work and comply with the following conditions:

- 1. INSURANCE:** No work connected with this contract shall be started until the contractor has submitted evidence that (a) all workers are insured to protect him/her from claims for damages for personal injury or death which may arise from operations under this contract and that (b) he/she is covered by Property Damage Insurance in the amount of \$100,000 and Public Liability Insurance in the amount of \$100,000-\$300,000. All of the above insurances shall be maintained until final payment is made. The contractor shall assume full responsibility for any damage which may result from any cause including fire or other casualty until completion of the contract and final payment. Any casualties shall not relieve the contractor from performing the contract.
- 2. EMPLOYEES AND SUPERINTENDENT:** Contractor shall enforce good order among his/her employees and shall not employ on the work site any disorderly, intemperate, or unfit person or anyone not skilled in the work assigned to him/her. Contractor or a competent person having authority to act for him/her shall be at the work site at all times.
- 3. PROTECTION:** Contractor shall properly protect all new and existing work from damage. Proper safety provisions shall be made at all times for the protection of all persons.
- 4. ROYALTIES, PATENTS, NOTICES, AND FEES:** Contractor shall give all notices and pay all royalties, building permits, and fees. He/she shall defend all suits or claims for infringement of any patent rights and shall save the state harmless from loss on account thereof. He/she shall comply with all laws, ordinances, and codes applicable to any portion of the work.
- 5. EXAMINATION OF PREMISES:** Bidder shall familiarize himself/herself with local conditions affecting the job. He/she shall take his/her own measurements and be responsible for the correctness of same. Bidder shall be held to have made such examinations and no allowances will be made in his/her behalf by reason of error or omission on his/her part. If any part of the contractor's work depends upon existing work for proper results or the work of another contractor, the contractor shall notify the Department before commencing work of any defects that will affect the results. Failure to so notify will constitute his/her acceptance of the conditions.
- 6. OTHER CONTRACTS:** The state may let other contracts in connection with the work and the contractor shall properly connect and coordinate his/her work with the work of such other contractors. The state shall not be liable for any damages or increased costs occasioned by the failure of other contractors to execute their work as may be anticipated by these documents.
- 7. PAYMENT:** Payment for the work will be made in one sum upon completion of the work. When applying for payment, the contractor shall submit a statement based upon an itemized schedule. The work will not be considered complete until the work has been finally accepted by the Department of Environmental Quality and the contractor has furnished satisfactory evidence that all payrolls and other indebtedness connected with the work have been paid.

- 8. REGULATIONS:** The contractor shall comply with all authorities having jurisdiction over the work. This includes all applicable federal, state, and local laws, ordinances, rules and regulations.
- 9. PREVAILING WAGES.** The contractor shall comply with Michigan's Prevailing Wage Act, MCL 408.551 et seq. Shall ensure that all employees covered by this act are compensated at a rate not less than those established by the Michigan Department of Consumer and Industry Service as Prevailing Wage and Fringe Benefit rates.

The contractor shall secure all construction permits necessary for proper execution of the work prior to starting work on the project. All fees for securing the permits shall be paid by the contractor, including all inspection costs which may be legally assessed by the Bureau of Construction Codes in accordance with authority granted under 1980 PA 371. All work shall be executed in accordance with the state of Michigan's Construction Codes. If the contractor performs any work knowing it to be contrary to the state of Michigan's Construction Codes, the contractor shall assume full responsibility and shall bear all attributable costs.

The contractor shall conform to the provisions of the Michigan Right to Know law, 1986 PA 80 and all other applicable state and federal health and safety regulations, including U.S. Occupational Safety and Health Administration (29 CFR 1910).

The contractor shall follow all state and federal laws and regulations that govern the handling, transportation, and disposal of material and waste that are deemed part of the work and shall use licensed personnel were appropriate.

RE: Soil Erosion and Sedimentation Control Permit No. 16-910-SE

Dear Mr. Riedy:

Enclosed, please find a Soil Erosion and Sedimentation Control (SESC) Permit for the proposed earth change at the location specified on the permit. The SESC Site Plan that was submitted has been approved and is on file at the Houghton County Drain Commissioner's Office. Please notify my office 48 hours prior to commencing the earth change.

If you have any questions, feel free to contact me.

Sincerely,

A handwritten signature in cursive script that reads "John Pekkala".

Address: see SESC Site Plan

Permit Conditions:

1. The permitted activity shall be completed in accordance with the approved plans and specifications and the attached general and specific conditions.
2. This permit does not waive the necessity for obtaining all other required federal, state, or local permits.
3. Permitee shall notify the permitting agency within one week after completing the permitted activity or one week prior to the permit expiration date, whichever comes first.

Permitting Agent

(906) 482-4491
Telephone Number

THIS PERMIT MUST BE POSTED AT THE PROJECT SITE.

Permit Number: 16-910-SE

General Conditions:

In accordance with rule 1709 promulgated under the authority of part 91, Soil Erosion and Sedimentation Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, and in addition to the information on the attached plan(s) and special conditions, the following general conditions apply to the earth change authorized by this permit:

- Design, construct, and complete the earth change in a manner that limits the exposed area of disturbed land for the shortest period of time.
- Remove sediment caused by accelerated soil erosion from runoff water before it leaves the site of the earth change.
- Temporary or permanent control measures shall be designed and installed to convey water around, through, or from the earth change at a non-erosive velocity.
- Install temporary soil erosion and sedimentation control measures before or upon commencement of the earth change activity and maintain the measures on a daily basis. Remove temporary soil erosion and sedimentation control measures after permanent soil erosion measures are in place and the area is stabilized. (Stabilized means the establishment of vegetation or the proper placement, grading; or covering of soil to ensure its resistance to soil erosion, sliding, or other earth movement.)
- Complete permanent soil erosion control measures for the earth change within five calendar days after final grading or upon completion of the final earth change. If it is not possible to permanently stabilize the earth changes, then maintain temporary soil erosion and sedimentation control measures until permanent soil erosion control measures are in place and the area is stabilized.

SPECIFIC CONDITIONS

48 hours notice prior to earth change

Property located at: Tamarack City, MI

I, Craig Morris, authorized representative for C&J Land Development, Inc (C&J), 100 E. Sharon Avenue, Houghton, Michigan 49931, 905-482-5426, owner of the properties described above (Property), having been informed of the request by the Michigan Department of Environmental Quality (DEQ) to conduct response activities on the Property, hereby voluntarily permit and authorize the DEQ, its employees, contractors, or authorized representatives to enter, and if necessary re-enter, the Property to undertake response activities, including, but not limited to: conduct soil borings, collect soil and groundwater samples, survey, measure static water levels, take photographs and/or video of this facility, and conduct other related field assessment activities

The due care provisions in Section 20107a(1) of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) in part provide that a person who owns or operates Property that he or she has knowledge is a facility shall provide reasonable cooperation, assistance, and access to the persons that are authorized to conduct response activities at the facility, including the cooperation and access necessary for the installation, integrity, operation, and maintenance of any complete or partial response activity at the facility. C&J understands that the access granted herein covers a portion of the due care obligations that it, as the owner, has pursuant to Section 20107a(1) of the NREPA.

C&J understands that it is entitled to accompany the DEQ, its employees, contractors, or authorized representatives during these activities; to participate in the collection of any split samples taken as part of these activities; and, if C&J so requests, to receive a copy of any sample analysis results, photographs, or video taken as part of these activities. C&J agrees to comply with the requirements of any DEQ health and safety plan while on the Property during these sampling activities.

C&J agrees that the duration of this entry authorization shall be from April 1, 2015 through December 31, 2016 (although C&J understands that activities on the Property will typically only last a few days at a time) to enable the DEQ, its employees, contractors, or authorized representatives to satisfactorily complete the activities described above. If C&J chooses to revoke this entry authorization, C&J agrees to provide a revocation of entry in writing to Mr. Clifton Clark, District Supervisor, Remediation and Redevelopment Division, Upper Peninsula District Office, DEQ, 1504 West Washington Street, Marquette, Michigan 49855, at least thirty (30) days prior to the effective date of the revocation of entry authorization. C&J agrees that the duration of this entry authorization shall continue until either C&J revokes it, or the activities described above are completed. C&J also agrees that as long as this entry authorization remains in force, C&J will not interfere with, interrupt, change, or otherwise disturb any systems or equipment installed or utilized by the DEQ, its employees, contractors, or authorized representatives.

This voluntary written permission is granted to the DEQ by:

Craig Morris, President
C&J Land Development, Inc

G. GENERATOR CERTIFICATION (PLEASE READ AND CERTIFY BY SIGNATURE)

By signing this EZ Profile™ form, I hereby certify that all information submitted in this and all attached documents contain true and accurate descriptions of this material, and that all relevant information necessary for proper material characterization and to identify known and suspected hazards has been provided. Any analytical data attached was derived from a sample that is representative as defined in 40 CFR 261 - Appendix 1 or by using an equivalent method. All changes occurring in the character of the material (i.e., changes in the process or new analytical) will be identified by the Generator and be disclosed to Waste Management prior to providing the material to Waste Management.

If I am an agent signing on behalf of the Generator, I have confirmed with the Generator that information contained in this Profile is accurate and complete.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
x	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Comments

This report has been revised to correct the sample IDs.

The Asbestos analysis was performed at EMLab P&K - Irvine.

Samples submitted for Asbestos Carb 435 will be reported under separate cover.

Receipt

The samples were received on 7/7/2015 9:40 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 24.6° C.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

TestAmerica Canton

Report for:

Ms. Kris Brooks
TestAmerica-Canton
4101 Shuffel Dr. NW
North Canton, OH 44720

Regarding: Project: 240-52869-1
EML ID: 1390038

Approved by:

Dates of Analysis:
Asbestos PLM: 07-10-2015 to 07-17-2015

Approved Signatory
Noah Lazarle

Service SOPs: Asbestos PLM (EPA Methods 600/R-93/116 & 600/M4-82-020, SOP EM-AS-S-1267)

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. The results relate only to the items tested. The results include an inherent uncertainty of measurement associated with estimating percentages by polarized light microscopy. Measurement uncertainty data for sample results with >1% asbestos concentration can be provided when requested.

EMLab P&K ("the Company") shall have no liability to the client or the client's customer with respect to decisions or recommendations made, actions taken or courses of conduct implemented by either the client or the client's customer as a result of or based upon the Test Results. In no event shall the Company be liable to the client with respect to the Test Results except for the Company's own willful misconduct or gross negligence nor shall the Company be liable for incidental or consequential damages or lost profits or revenues to the fullest extent such liability may be disclaimed by law, even if the Company has been advised of the possibility of such damages, lost profits or lost revenues. In no event shall the Company's liability with respect to the Test Results exceed the amount paid to the Company by the client therefor.

Client: TestAmerica-Canton
C/O: Ms. Kris Brooks

Comments: Large volume of soil received. Analyzed representative subsample.

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. EMLab P&K reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.

† A "Version" indicated by "-x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

Sample Layers	Asbestos Content
White Fibrous Material	70% Chrysotile
Sample Composite Homogeneity:	Good

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. EMLab P&K reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.

‡ A "Version" indicated by "-x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

Lab ID-Version†: 6389183-1

Sample Layers	Asbestos Content
Gray Transite	15% Chrysotile
Sample Composite Homogeneity:	Good

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. EMLab P&K reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.

† A "Version" indicated by -"x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

Non-Hazardous WAM Approval

Requested Management Facility: K&W Landfill

Profile Number: ASB118590MI

Waste Approval Expiration Date: 06/27/2017

APPROVAL DETAILS

Approval Decision: ☒ Approved ☐ Not Approved

Profile Renewal: ☐ Yes ☒ No

Management Method: Direct Landfill - Asbestos

Generator Name: Michigan Department of Environmental Quality

Material Name: Friable Asbestos

Management Facility Precautions, Special Handling Procedures or Limitation on approval:

Generator Conditions

- Shipment must be scheduled into the disposal facility at least 24 hours in advance. Contact information will be provided by your TSR.
- The waste profile number must appear on the shipping papers.
- An asbestos NESHAP waste shipment record (WSR) is required with each shipment and material must be properly packaged per NESHAPs and US DOT.

WM Authorization Name: Ben Dahlby

Title: Waste Approval Manager

WM Authorization Signature: 

Date: 06/27/2016

Agency Authorization (if Required): _____

Date: _____
