Mr. Michael L. Caldwell  
Zausmer, Kaufman,  
August & Caldwell, P.C.  
31700 Middlebelt Road  
Suite 150  
Farmington Hills, Michigan 48334-2301

Dear Sirs:

SUBJECT: Gelman Sciences, Inc. Remedial Action  
Final Well Identification Report, March 12, 2010 and Other Related Comments

The Department of Environmental Quality (DEQ) provided detailed comments on the above-referenced report to Pall Life Sciences, Inc. (PLS) in a letter dated October 27, 2010. That letter also included comments on prior well identification issues. On several occasions PLS has provided dates by which a response to the DEQ's October 27, 2010 letter would be provided. All of these dates have passed without PLS providing the promised response.

The DEQ has also recently learned, since the parties last discussion of the issue, that 2550 Dexter (lot 281 Scioto Hills #1), which is in the original PZ, has not been surveyed to determine if there is a well. The house at this address was built in 1930 when municipal water was not required, therefore, PLS must either: 1) provide documentation that this address never had a well; 2) provide documentation that any well has been plugged; or 3) notify and survey the owner of the property as required by the DEQ-approved procedure.

PLS must begin implementing all of the requirements itemized in the DEQ's October 27, 2010 letter (attached), and the requirement discussed above for 2550 Dexter, by September 16, 2011, and provide the DEQ with a schedule for completion of all identified tasks by the same date.

Should you require further information, please contact me at 517-780-7937; [kolons@michigan.gov](mailto:kolons@michigan.gov); or the DEQ Jackson District Office, 301 East Louis Glick Highway, Jackson, Michigan 49201.

Sincerely,

Sybil Kolon  
Senior Environmental Quality Analyst  
Gelman Sciences Project Coordinator  
Remediation Division
