Thank you for participating in today's conference call. PLS will submit its work plan for further investigation of the Unit E aquifer in the vicinity of Wagner Road next Monday, August 2, 2004. This plan will include plans for conducting a pump test in that area and a schedule for performing the work. We agreed to keep the informal negotiating period regarding this dispute (which had previously been extended until July 30, 2004) open indefinitely until the data to be collected through this investigation are obtained and can be discussed by the parties. Having said that, either party is free at its discretion to terminate the informal negotiating period with 5 business days prior notice.
