U.S. EPA Expectations for Electronic Delivery of CCR

Instead of mailing the entire CCR to all bill paying customers, water supplies may directly deliver the CCR electronically.

U.S. EPA expects water supplies to deliver the CCR to all bill-paying customers using ANY combination of the following direct delivery methods:

- Mail a paper copy of the CCR.
- Mail a notification of CCR availability.  
  Supplies could include a statement on the water bill or bill insert or in a separate mailing such as a postcard or a community newsletter.
- Email a notification of CCR availability.  
  Supplies could include a statement in the text of the email that transmits the water bill or in a separate email message.

The notification of CCR availability:

- Explains the nature of the message.
- Prominently displays an easy-to-type URL that goes directly to the entire CCR. The CCR must be on the Internet when the notification of CCR availability is sent out. A supply that does not have a web site may attach or insert the CCR in the email.
- States how the customer can request a paper copy.

Here's an example that includes all 3 of the above elements …

Delivery methods NOT considered "direct" are the following, though water supplies are encouraged to use any public outreach venue to promote CCR readership:

- A URL that requires a customer to search or look for the CCR – a customer may not reach the CCR. A long, hard-to-type URL may also prevent a customer from reaching the CCR.
- Social media – membership Internet outlets like Twitter or Facebook require a customer to join the website to read the CCR.
- Automated phone calls - the entire content of the CCR cannot be provided in a phone call.

Final Thoughts:

- Customers known to be unable to receive the CCR electronically, must be sent a paper copy.
- Supplies must continue to make a good faith effort to reach non-bill-paying customers.
