The DEQ cautions and recommends hunters and their families follow the Wild Game Advisory (www.michigan.gov/tittabawassee) for any wild game taken in, from or near the Tittabawassee River and its flood plain downstream of Midland.

Sediment and limited soil data suggest similar precautions be taken for game in, from or near the Saginaw River and floodplain.

Because animals range, it is not possible to precisely define the areas of concern. Additional work will be conducted to address these issues.
