Landfill Disposal by Waste Origin and Type  
22
INTRODUCTION

On July 1, 1996, Governor John Engler signed into law 1996 PA 359 (Act 359). Among other changes, Act 359 amended Part 115 of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451), by the addition of Section 11507a. Section 11507a added a requirement to Part 115 for all landfills in Michigan to “annually submit a report to the state and the county and municipality in which the landfill is located that contains information on the amount of solid waste received by the landfill during the year itemized, to the extent possible, by county, state, or country of origin.”

Act 359 was given immediate effect. Because of the relationship of this information to perpetual care fund reporting, a decision was made by the Department of Environmental Quality (DEQ) to tie the reporting requirement to the State of Michigan’s fiscal year which runs from October 1 to September 30. A Solid Waste Landfill Receipt Report form was developed and was sent to all active landfills in the state requesting that the information be provided for the period beginning October 1, 1995, to September 30, 1996. A reminder letter was sent to non-reporting landfills on November 22, 1996.

It is recognized by the DEQ that a portion of the reporting period predates the passage of the law, so the data recording mechanisms necessary to meet the law’s requirements may not have been in place at each landfill for the entire requested reporting period. Because of this, the first year’s data may include estimations as to volume and point of origin of the waste stream reported by each landfill. Additionally, use of both standard and waste-specific conversion factors between tons and cubic yards may further alter the data accuracy. Because this is the first time such reporting has been done, some confusion as to the proper categories for reporting waste volumes may have occurred and may affect the data to some extent.

The Waste Receipt Reports provided to the landfills provided for breakdown of the waste received into various categories. Besides Type II and Type III wastes, waste types included 1) foundry sand, 2) coal or wood ash, 3) wastewater treatment sludges, and 4) sediments from wood processing or paper manufacturing that are placed in segregated cells or separated from
other wastes in a landfill either independently or in a mixture. Waste types 1-4 are also Type III wastes but are labeled “Mixed Waste” or “Segregated Waste” and may appear listed separately on tables within the report. The accounting of these waste types is primarily used in establishing and maintaining perpetual care funds for those landfill facilities.

Despite the newness of the requirement, most landfills in Michigan were able to complete the report forms with what appeared to be a fairly high degree of accuracy, providing the first comprehensive picture of solid waste disposal in Michigan that has ever been reported. The DEQ expresses its appreciation to those facilities for their efforts and cooperation.

It should be noted that this report addresses waste imported to Michigan landfills from out-of-state locations. It does not address waste originating in Michigan that is transported to locations outside Michigan for disposal. Additionally, this report covers only waste landfilled in Michigan and does not attempt to determine the amount of waste removed from the overall waste stream prior to final disposal by such means as waste reduction and recycling. Incineration in Michigan is also not addressed except for the final landfilling of ash from municipal incinerators.

WASTE DISPOSAL SUMMARY INFORMATION

The following pages detail volumes of waste disposed in Michigan landfills and provide breakdowns of the waste imported into Michigan for disposal for all landfills that reported this information. Tables 1, 2, and 3 display total, in-state, and out-of-state disposal summary information, respectively. It is expected that some of the unassigned waste is from out-of-state sources. However, this figure is unknown, and no reasonable estimates of the origin of unidentified wastes are available.

WASTE IMPORTS

Based on the reported information for Fiscal Year (FY) 1996, the solid waste industry in Michigan imported solid waste from ten other states and from Canada for disposal in Michigan landfills. Table 4 indicates the volume of Type II waste imported and the state or country of origin of the waste. Table 5 indicates the volume of Type III waste imported and the state or country of origin for that waste.

Table 6 shows the total amount of waste imported into each county from all out-of-state sources. Table 7 breaks down those totals by place of origin of the waste imported into each county receiving out-of-state waste.

FACILITY INFORMATION

The combined volume of all waste disposed at each reporting facility is given in Table 8. Tables 9 and 10 list the Type II and Type III disposal volumes ranked in order of volume disposed. It should be noted that the Type III waste has been subdivided into categories of Mixed and Segregated wastes and those landfills are ranked within their categories on the second page of Table 10, but not against the general Type III landfills listed on the first page of Table 10.

APPENDIX - LANDFILL DISPOSAL BY WASTE ORIGIN AND TYPE

The appendix of the report lists every reporting landfill and indicates the amount of waste received at the landfill, the type of waste received, and the place of origin of that waste. As previously discussed in this report, the Mixed and Segregated waste categories describe specific types of Type III waste that are identified in Act 451. These waste types consist of foundry sand, coal or wood ashes, and wood processing or paper sediments or wastewater treatment sludges that are landfilled separate from other wastes; either in a mixture or totally segregated by individual waste type. The accounting of these waste types is primarily used in establishing and maintaining perpetual care funds for those landfill facilities. For additional information on these segregated wastes, see Section 11525(3) and (4) of Act 451.
