APPENDIX – LANDFILL DISPOSAL BY WASTE ORIGIN AND TYPE	24

INTRODUCTION

Section 11507a(1) of Part 115, Solid Waste Management, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451), requires all landfills in Michigan to “annually submit a report to the state and the county and municipality in which the landfill is located that contains information on the amount of solid waste received by the landfill during the year itemized, to the extent possible, by county, state, or country of origin.” This report covers the period from October 1, 2001 to September 30, 2002, and is the seventh annual report of solid waste landfilled in Michigan as compiled from the information submitted by the individual landfills.

It is recognized by the Department of Environmental Quality (DEQ) that the data may include estimates as to volume and point of origin of the waste stream reported by each landfill. Additionally, use of both standard and waste-specific conversion factors between tons and cubic yards may further alter the data accuracy.

The Waste Receipt Report forms sent by the DEQ to the landfills provided for breakdown of the waste received into various categories. Besides Type II and Type III wastes, waste types included: (1) foundry sand; (2) coal or wood ash; (3) wastewater treatment sludges; and (4) sediments from wood processing or paper manufacturing that are placed in segregated cells or separated from other wastes in a landfill either independently or in a mixture. Waste types 1-4 are also Type III wastes but are labeled “Mixed Waste” or “Segregated Waste” and may appear listed separately on tables within this report. The accounting of these waste types is primarily used in establishing and maintaining Perpetual Care Funds for those landfill facilities.

It should be noted that this report addresses waste imported to Michigan landfills from in-state and out-of-state locations. It does not address waste originating in Michigan that is transported to locations outside Michigan for disposal. Additionally, this report covers only waste landfilled in Michigan and does not attempt to determine the amount of waste removed from the overall waste stream prior to final disposal by such means

as waste reduction and recycling. Incineration in Michigan is also not addressed except for the final landfilling of ash from municipal incinerators.

Total waste disposal in Michigan landfills was reported at 57,540,922 cubic yards, a decrease of 2,709,690 cubic yards or 4.7 percent over the Fiscal Year (FY) 2001 report. Total imports of waste into Michigan landfills also decreased from the previous reporting period from 11,872,507 cubic yards to 11,494,443 cubic yards, a decline of 3.2 percent. The largest source of waste imports to Michigan continues to be from Canada, with total reported imports to landfills of 6,607,856 cubic yards, up 713,118 cubic yards or 12.1 percent from the FY 2001 report. Canadian waste imports equal 11.5 percent of all waste disposed in Michigan landfills. Based on this year's landfill disposal reports, out-of-state waste imports total 20 percent of all solid waste disposed of in Michigan landfills.

Although the volume of waste imports decreased from the previous reporting period, the percentage of out-of-state waste imports rose slightly. The data below outline the out-of-state imports to Michigan over the past seven FYs. The DEQ assumes the high percentage of solid waste imports is likely due to the close proximity of disposal areas to other states and countries and the inability of states to restrict the import of waste from outside of the state.

Solid Waste Disposed of in Michigan Landfills

	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002
	(All Figures in Cubic Yards)

WASTE DISPOSAL SUMMARY INFORMATION

The following pages detail volumes of waste disposed in Michigan landfills and provide breakdowns of the waste imported into Michigan for disposal for all landfills that reported this information. Tables 1, 2, and 3 display total, in-state, and imported waste disposal summary information, respectively. It is expected that some of the unassigned waste is from out-of-state sources. However, this figure is unknown, and no reasonable estimates of the origin of unidentified wastes are available.

Grand Total	11,494,443

WASTE IMPORTS

Based on the reported information for FY 2002, the solid waste industry in Michigan imported solid waste from nine other states and from Canada for disposal in Michigan landfills. Table 4 indicates the volume of Type II waste imported and the state or country of origin of the waste. Table 5 indicates the volume of Type III waste imported and the state or country of origin for that waste.

Table 6 shows the total amount of waste imported into each county from all out-of-state sources. Table 7 breaks down those totals by place of origin of the waste imported into each county receiving out-of-state waste.

FACILITY INFORMATION

The combined volume of all waste disposed at each reporting facility is given in Table 8. Tables 9 and 10 list the Type II and Type III disposal volumes ranked in order of volume disposed. It should be noted that the Type III waste has been subdivided into categories of mixed and segregated wastes and those landfills are ranked within their categories on the second page of Table 10, but not against the general Type III landfills listed on the first page of Table 10.

APPENDIX – LANDFILL DISPOSAL BY WASTE ORIGIN AND TYPE

The Appendix of this report lists every reporting landfill and indicates the amount of waste received at the landfill, the type of waste received, and the place of origin of that waste. As previously discussed in this report, the mixed and segregated waste categories describe specific types of Type III waste that are identified in Act 451. These waste types consist of foundry sand, coal or wood ashes, and wood processing or paper sediments, or wastewater treatment sludges that are landfilled separate from other wastes, either in a mixture or totally segregated by individual waste type. The accounting of these waste types is primarily used in establishing and maintaining Perpetual Care Funds for those landfill facilities. For additional information on these segregated wastes, see Section 11525(3) and (4) of Act 451.
