

Cover Your Bald Spot

When it rains soil can wash into your lakes and streams. Soil pollution can harm fish habitat and make the water muddy.

There are three basic steps to grow in your bald spots:

- 1) **Plant** – Grass seed, wildflowers, annuals, perennials, shrubs, and trees.
- 2) **Mulch** – Bare soil and seed with grass clippings, bark, pine needles, and leaves. This reduces weeds and keeps seeds moist for germination.
- 3) **Water** – New plants or seeds frequently so they will thrive.

Ready for a rainy day?
