Legend

 High-Risk Erosion Area

These areas are legally defined by Part 323, Shorelands Protection and Management, of the Natural Resource and Environmental Protection Act, 1994 PA 451, as amended, being Great Lakes Shoreland areas documented to recede an average of one foot or more per year.

This number represents, in feet, the 30-year projected recession distance.

This number represents, in feet, the 60-year projected recession distance.

HREA* - Some parcels may be in multiple HREAs due to their large size.

30 yr PRD* is the Projected Recession Distance (feet) landward from the Erosion Hazard Line for readily moveable structures including those structures 3,500 square feet or less and built on a basement, crawlspace or pilings. Additional restrictions may apply per Administrative Rules 281.21-22.

60 yr PRD* is the Projected Recession Distance (feet) landward from the Erosion Hazard Line for non-readily moveable structures such as large structures and septic systems.

Designation runs with the land including subsequent splits. Absence of a property number does not guarantee the property is located outside of an HREA. Contact the Great Lakes Shorelands Unit, Water Resources Division, DEQ in Lansing or the local DEQ field office for assistance.
