## **Aquatic Pesticides and Related Products Currently Approved for Use in Waters of the State**

The following products are currently registered with the U.S. Environmental Protection Agency (USEPA) and the Michigan Department of Agriculture and Rural Development (DARD), and have been approved for use in the waters of the state by the Michigan Department of Environment, Great Lakes, and Energy (EGLE). A permit may be required prior to treatment. Additional products may be approved in the future, pending registration with USEPA and MDARD and satisfactory review by EGLE.

***Reminder: You should confirm that the product you purchase is labeled for your application site.***

***+ Indicates that product is in the process of being discontinued and supplies may be limited.***

## CATEGORY: ALGAECIDES

<sup>1</sup> Maximum rate generally approved by EGLE. Actual rate required for control may depend on the target species and other site-specific conditions. Refer to product label.

<sup>2</sup> Various copper sulfate products registered with the DARD (517-373-9750) may be used.

<sup>3</sup> Granular endothall and granular 2,4-D products may not be applied within 75 feet of any well OR within 250 feet of wells less than 30 feet deep. Isolation distances are measured from the well location, not the shoreline.

<sup>4</sup> Fluridone and penoxsulam use may be subject to Lake Management Plan and/or Evaluation protocols. Contact EGLE for current guidelines.

<sup>5</sup> Only dyes that are labeled as herbicides must be registered with the USEPA and DARD. Dye product labels which claim herbicidal properties cannot be used in waterbodies where there is an outflow.
