

## INSURANCE EXAMINATION CUT SCORES

The cut score for each examination has been established on a criterion-referenced basis. This means that minimal entry-level competence on these exams is based upon a candidate knowing the material necessary for the first day on the job. A minimally competent entry-level individual is one who has just enough knowledge and skill to perform the job and should pose no harm to the public.

During 2019 PSI conducted a job analysis of the industry in Michigan, and test development continued throughout the year. Some of the examination content has changed slightly based upon the data collected through the job analysis. Additionally, the cut scores for each examination may have also changed based upon these data. (To obtain revised content outlines visit [www.psiexams.com/DIFS](http://www.psiexams.com/DIFS), select [Government/State Licensing Agencies](#), then Select Jurisdiction: Michigan; Select Account: MI Insurance. The examination content outlines can be found under Information Links on the right side of the page.)

Subject Matter Experts (SMEs) were asked to review each item and to estimate the proportion of minimally competent licensees who would answer the item correctly. These estimates were accumulated statistically to form an estimate of the level at which the cut score should be set. Every item appearing on our exams was reviewed, approved, and rated by the Michigan SMEs.

The following table shows the number of items on each test and the cut score for each exam. The cut score is based upon the judgments of the experts, incorporating their knowledge and understanding of the industry along with the knowledge needed by a newly licensed individual.

<b>Examination Title</b>	<b>Test Length</b>	<b>Cut Score</b>	<b>Effective date</b>
Accident & Health Counselor	110	82%	5/1/2020
Accident and Health Producer	100	76%	5/1/2020
