Note 20 - Fair Value Measurement

A. Fair Value Measurements at Reporting Date

Accounting standards require certain assets and liabilities be reported or disclosed at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following table presents information about the Plan's assets and liabilities measured at fair value at March 31, 2021, and the valuation techniques used by the Plan to determine those fair values.

In general, fair values determined by Level 1 inputs use quoted prices in active market for identical assets or liabilities that the Plan has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

	Assets measured or disclosed at Fair Value at March 30, 2021			
	Level 1	Level 2	Level 3	Total
Cash, Cash Equivalents, and Short-term Investments	\$268,366,160			\$268,366,160
Mutual funds - Industrial and miscellaneous	\$73,353,237			\$73,353,237
Total	\$341,719,398			\$341,719,398
	Assets measured or disclosed at Fair Value at December 31, 2020			
	Level 1	Level 2	Level 3	Total
Cash, Cash Equivalents, and Short-term Investments	\$234,532,334			\$234,532,334
Mutual funds - Industrial and miscellaneous	\$72,225,594			\$72,225,594
Total	\$306,757,928			\$306,757,928

The following summarizes the valuation methodology used in determining fair value measurements of significant classes of the Plan's financial instruments:

Level 1 Measurements

Cash and Cash Equivalents – the fair value of cash is the Plan's reported cash balances.

Short-term Investments – None.

Mutual Funds – the fair value of these stocks and funds is based upon the unadjusted quoted prices for the identical security in active markets that the Plan can access.

Effective March 31, 2021, the Plan estimated that no amounts will be paid out and no accrual has been recorded as of March 31, 2021.

E. Risk-Sharing Provisions of the Affordable Care Act (ACA)

- Risk adjustment program - Premium adjustments pursuant to the risk adjustment program will be based on the risk scores (health status) of enrollees participating in risk adjustment covered plans, rather than the actual loss experience of the insured. Risk adjustment receivables or payables are estimated based on experience to date and determinations of the Plan's risk score versus the overall market risk score. These amounts represent the estimated amounts receivable or payable for both individual and small group populations, and are based on general demographic data and health status of these populations and data assumptions regarding the general health status of the overall market for which there is limited data. For 2020, the Plan did not write any accident and health insurance premium.
- Risk corridors - The risk corridors program is effective for benefit years beginning in 2015 through 2016. The purpose of the program is to provide limitations on issuer losses and gains for qualified health plans through additional protection against initial pricing risk. The program creates a mechanism for sharing the risk for allowable costs between the federal government and the qualified health plan issuers. Although the risk corridors program provides protection against extreme bounds of experience, there is a substantial corridor in which all variance in experience directly affects the loss experience of the Plan.
 1. Did the reporting entity write accident and health insurance premium that is subject to the Affordable Care Act risk-sharing provisions – No
 2. Impact of Risk-sharing Provisions of the Affordable Care Act on Admitted Assets, Liabilities and Revenue for the Current Year: None.
