C. Accounting Policy

(2) Basis for Bonds, Mandatory Convertible Securities, SVO-Identified Investments and Amortization Method

Investments in bonds are carried at amortized cost. The cost of bonds is adjusted for amortization of premiums and discounts to maturity using a level-yield method. Realized gains and losses are determined using the specific identification method and are included in operations. The fair value of investments is determined based upon quoted market prices.

(6) Basis for Loan-Backed Securities and Adjustment Methodology

Loan-backed securities as well as other asset-backed securities are held and are reported at their amortized cost.

Note 20 – Fair Value Measurements

- A. The Plan's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (now codified under FASB Accounting Standards Codification 820, *Fair Value Measurements and Disclosures*). The hierarchy gives the highest ranking to fair values determined using unadjusted quoting prices in active markets for identical assets and liabilities (Level 1) and the lowers ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

Level 1: Financial instruments with unadjusted, quoted prices listed on active market exchanges.

Level 2: Financial instruments lacking unadjusted, quoted prices from active market exchanges, including over-the-counter traded financial instruments. The prices for the financial instruments are determined using prices for recently traded financial instruments with similar underlying terms as well as directly or indirectly observable inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3: Financial instruments that are not actively traded on a market exchange. This category includes situations where there is little, if any, market activity for the financial instrument. The prices are determined using significant unobservable inputs or valuation techniques.

Description for Each Type of Asset or Liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
Assets at Fair Value					
Common Stock	\$ 46,041,594	\$	\$	\$	\$ 46,041,594

Liabilities at Fair Value
