MEMORANDUM TO THE NATURAL RESOURCES COMMISSION

Subject: Fisheries Order 200.20  
Statewide Trout, Salmon, Whitefish, Cisco, Grayling, and Smelt Regulations

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, authorizes the Director and the Commission to issue Orders to regulate the taking of fish in the waters of this state.

Discussion and Background:

Fisheries Order 200 covers Michigan's statewide fishing regulations for trout, salmon, whitefish, cisco, grayling, and smelt. The Department recommends several modifications to the Order including:

- adding round whitefish (also referred to as Menominee) to the combined daily possession limit (DPL) with lake whitefish and cisco (also referred to as lake herring),
- change the combined DPL for round whitefish, lake whitefish, and cisco in the Great Lakes, Great Lakes Connecting Waters (Connecting Waters), and Type F inland lakes to 10 fish,
- implement a five fish DPL for the same species on inland waters,
- extend the fishing and possession season through October 31<sup>st</sup> for all Type A and Type D inland trout lakes,
- modify the Pilgrim River (Houghton County) brook trout restoration coverage area,
- remove nine inland lakes from the Order, because of land ownership changes and management goals,
- correct a section number for a Type 4 stream regulation,
- reposition the Great Lake lake trout refuge section from the bottom of the Order along with other Great Lake regulatory information at the top of the Order,
- replace the term "lake herring" with "cisco,"
- reformat the Gear Restricted Streams section,
- and update the Order title.

Combined DPL for Lake Whitefish, Cisco, and Round Whitefish

The Department recommends several regulation changes covering lake whitefish, cisco, and round whitefish possession limits. The current statewide DPL for cisco and lake whitefish is 12 fish per day in any combination; however, round whitefish have not been included in the combined DPL regulation. In contrast, round whitefish have been covered under the "all others" regulation category which has no limit on possession. Given that all three species share similar life history strategies, managers recommend governing these species under one regulatory framework. Additionally, these three species are similar in appearance which has been a cause of confusion for anglers and law enforcement personnel. Therefore,

the Department proposes to add round whitefish to the combined DPL with lake whitefish and cisco which will help resolve the misidentification issue and will result in a simpler regulation.

A second change recommended for the Order involves reducing the DPL for lake whitefish, cisco, and round whitefish from 12 to 10 fish per day in the Great Lakes, Great Lakes Connecting Waters (Connecting Waters), and Type F (drowned river mouth lakes) trout waters. The DPL reduction is recommended as a prudent action to provide greater protection for these species. Survey information shows that lake whitefish recruitment has been declining in some Great Lake waters over the past few years. As a result, managers believe that this would be a good time to implement a DPL reduction.

Managers also recommend reducing the inland combined DPL for lake whitefish, cisco, and round whitefish to five per day in any combination on inland waters. There are some inland populations with modest cisco and whitefish populations, but the typical harvest pattern follows a boom and bust function that may not be sustainable in some waters. Recent climate changes have resulted in higher inland lake water temperatures during the summer which can negatively influence survival of these coldwater species. Fish species like cisco require deep lakes with good water quality with high dissolved oxygen levels. As water temperatures increase, the amount of dissolved oxygen in water declines; therefore, the habitat required by cisco is in decline in some inland waters as these thermal refuges disappear in some years. Managers have been evaluating inland cisco populations comparing historical survey information with recent surveys and there has been a decline in the number of inland waters suitable for cisco primarily due to habitat degradation. Therefore, it is prudent to enact a more restrictive combined DPL for lake whitefish, round whitefish, and cisco of five fish in any combination on inland waters.

The following regulation changes are recommended based on the information above:

1. Add round whitefish to the combined DPL regulation for lake whitefish and cisco.
2. Change the DPL for lake whitefish, round whitefish, and cisco in the Great Lakes, Connecting Waters, and Type F (drowned river mouth lakes) inland trout lakes from 12 to 10 per day combined in any combination.
3. Change the DPL for lake whitefish, round whitefish, and cisco in inland waters from 12 to five per day combined in any combination.

#### Type A and Type D Inland Trout Lake Season Extension

The Department proposes to modify the fishing and possession season closing dates for all Type A and Type D inland trout lakes by extending the fishing and possession seasons one month. This will result in creating more angling opportunities by extending the seasons through October resulting in an additional 31 days fishing on these waters. The change will result in opening 65 Type A and 25 Type D waters to additional trout fishing activities. Managers have indicated that the cooler months can provide the best fishing of the season for trout in these lakes. During warmer months, anglers typically fish these lakes at night, or they fish in deeper water. As water temperatures cool in the fall, trout become more available in shallow waters, resulting in higher catch rates and better survival of released fish. The trout in these lakes have been stocked and are not reproducing naturally; therefore, protection of spawning stocks is not a concern. Extending the fishing and possession season provides more opportunities for anglers to enjoy the stocked fish in these waters.

The following regulation change is recommended for Type A and Type D inland trout waters:

1. The fishing and possession season on Type A and Type D waters shall be from the last Saturday in April through October 31.

#### Adfluvial Brook Trout Restoration Area Modification

Several years ago, the Department implemented more restrictive fishing regulations on brook trout, lake trout, and splake with a 20-inch minimum size limit (MSL) and DPL of one fish combined to protect brook trout. The special regulations have been implemented on nine streams referred to as adfluvial brook trout restoration areas to try and reestablish coaster brook trout in Upper Peninsula streams. The Pilgrim River has special regulations on brook trout, lake trout and splake across a three-mile section from Paradise Road downstream to the mouth at Portage Lake. Recent surveys conducted by Michigan Technological University researchers have documented large brook trout in the system further upstream of the special regulations. Stream regulations in the upstream portions are covered by Type 1 regulations, which place a 7-inch MSL on the tributaries and headwaters of the Pilgrim River system. Managers indicate that a 7-inch MSL is not protective enough and may lead to over exploitation of large brook trout in the Pilgrim River system. Therefore, the Department recommends extending the Pilgrim River Brook Trout Restoration Area upstream in Houghton County to include the headwaters and tributaries for the greater protection of adfluvial brook trout.

The following regulation change is recommended for the Pilgrim River listing in the Adfluvial Brook Trout Restoration Area:

1. Pilgrim River and tributaries (Houghton County) from the headwaters downstream to Portage Lake (T54N, R33W, S5).

#### Removals

The Department proposes to remove the following list of waters from the Order which will result in each being covered by general statewide recreational fishing regulations:

1. Remove Bedspring Lake (Marquette County) as Type A - private purchase of commercial forest land has led to the loss of public access. Therefore, all fisheries management actions on this water has ended.
2. Remove Clear Lake (Marquette County) as Type A - private purchase of commercial forest land has led to the loss of public access. Therefore, all fisheries management actions on this water has ended.
3. Remove Dillingham Lake (Luce County) as Type A – private purchase of commercial forest land has led to the loss of public access. Therefore, all fisheries management actions on this water has ended.
4. Remove Log Lake (Marquette County) as Type A - private purchase of commercial forest land has led to the loss of public access. Therefore, all fisheries management actions on this water has ended.
5. Remove Spring Creek Pond (Luce and Schoolcraft counties) as Type A – failing infrastructure has led to a drawdown for safety reasons and the impoundment is no longer suitable for stocked trout.
6. Remove Crooked Lake (Marquette County) as Type B – survey information indicates poor survival of stocked trout. Therefore, trout management is no longer warranted here.
7. Remove Long Lake (Iron County) as Type B - survey information indicates poor survival of stocked trout. Therefore, trout management is no longer warranted here.
8. Remove Lake Lavine (Branch County) as Type C - survey information indicates poor survival of stocked trout due to northern pike. Therefore, trout management is no longer warranted here.
9. Remove Trout Creek Pond (Presque Isle County) as Type C - survey information indicates poor survival of stocked trout. Therefore, trout management is no longer warranted here.

#### Various Minor Edits

The Department recommends replacing the term “lake herring” with “cisco” to follow a change by fish taxonomists who changed the official common name of *Coregonus artedii* to cisco several years ago. This was done to clarify that this species is not a close relation to ocean herring. Cisco are members of the family Salmonidae which includes trout, salmon, whitefish, and char. The lake trout refuge information has been moved towards the top of the Order where other Great Lake regulations are listed. The entry for the Type 4 stream section in the Au Sable River from McMaster’s Bridge Road downstream to Rainbow Bend power line has been updated to reflect the appropriate section number for that entry. The Gear Restricted Streams section has been reformatted to improve the organization of the regulations of that section. The “Point aux Barques light” reference has been updated to “Point aux Barques Lighthouse” as a clarification in the Lake Huron Lake Trout Management Unit section.

#### Order Title Change

The Department recommends modifying the name of the Order to better reflect the fish species covered by the regulations, “Statewide Trout, Salmon, Whitefish, Cisco, Grayling and Smelt Regulations.”

#### *Issue Pros and Cons*

Adding round whitefish to the combined DPL with lake whitefish and cisco removes identification issues and allows for more streamlined management of similar species. Developing an inland DPL provides managers with a new tool to manage harvest for these species which face different threats in inland environments compared to the Great Lake environment. Extending the fishing seasons on Type A and D inland trout lakes increases fishing opportunities on these stocked trout populations. Extending the coverage area for the Pilgrim River will result in more protection of the large brook trout found in that system. Removing waters from the Order which will no longer be managed for trout will allow managers and anglers to focus activities on other waters more suitable for trout.

#### *Biological*

Round whitefish, lake whitefish, and cisco are similar species which will benefit from being managed under the same regulatory framework. There are different environmental threats facing these species living in Great Lakes waters and those found in inland waters. New DPLs are being implemented based upon the risks associated with where the fish populations are located. Extending the Type A and Type D fishing and possession seasons by a month should not have a negative effect on these waters with stocked trout populations. Additional protection of large brook trout in the Pilgrim River system is warranted to help restore coaster brook trout populations there. Removing management of waters when public access has been lost is prudent as limited resources can be used in other locations to benefit anglers.

#### *Social*

Anglers are generally supportive of more restrictive fishing regulations when greater protection of the resource is needed. They support removing confusing regulations as well as unnecessary regulations that no longer benefit public fishing activities.

#### *Economic*

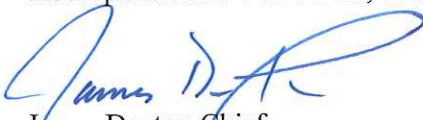

The Department does not expect the proposed changes to have any significant budgetary or personnel implications.

## Statewide Trout, Salmon, Whitefish, Cisco, Grayling, and Smelt Regulations Order 200.20

By authority conferred on the Natural Resources Commission and the Department of Natural Resources by Part 487 and Part 491 of 1994 PA 451, MCL 324.48701 to 324.48740, it is ordered on November 7, 2019, the following section(s) of the Fisheries Order shall read effective April 1, 2020, as follows:

The following regulations are established for trout, salmon, whitefish, Cisco, Grayling, and Smelt:

### LAKE TROUT MANAGEMENT UNITS – Great Lakes

#### Lake Michigan

MM-1 is bounded on the southeast and south by the Michigan-Wisconsin boundary in Green Bay and on the east by a north-south line beginning near Fairport in Delta County at Longitude 086°40'W and extending south to the Wisconsin-Michigan border.

MM-2 is bounded on the west by MM-1, on the east by a north-south line beginning about 4 miles west of Seul Choix Point in Schoolcraft County at Longitude 086°00'W and extending southward to Latitude 45°20'N, and on the south by an east-west line at Latitude 45°20'N that extends west from Longitude 086°00'W to the Michigan-Wisconsin boundary.

MM-3 is bounded on the west by a north-south line from the shore about 4 miles west of Seul Choix Point in Schoolcraft County at Longitude 86°00'W and extending southward to its intersection with Latitude 45°10' N, on the east by the Mackinac Bridge, and on the south by an east-west line from Longitude 086°00'W at Latitude 45°10' N and extending eastward to the shore about 4 miles north of Eastport in Antrim County.

MM-4 includes all waters of Grand Traverse Bay south of Latitude 45°10'N.

MM-5 is bounded on the west by the Michigan-Wisconsin boundary, on the north by an east-west line beginning on the Michigan-Wisconsin boundary at Latitude 45°20'N and extending eastward along said latitude to Longitude 086°00'W, then southward along said longitude to Latitude 45°10'N, then eastward along said latitude to its intersection with the west shore of Leelanau County, and on the south by an east-west line beginning near Arcadia in Manistee County at Latitude 44°30'N and extending west to the Michigan-Wisconsin boundary.

MM-6 is bounded on the west by the Michigan-Wisconsin boundary, on the north by MM-5, and on the south by an east-west line from Little Sable Point in Oceana County at Latitude 43°40'N and extending westward to the Michigan-Wisconsin boundary.

MM-7 is bounded on the west by the Michigan-Wisconsin boundary, on the north by MM-6, and on the south by an east-west line from the Michigan shore about 4 miles north of Holland in Ottawa County at Latitude 42°50'N and extending westward to the Michigan-Wisconsin boundary.

MM-8 is bounded on the west by the Michigan-Wisconsin boundary and the Michigan-Illinois boundary, on the north by MM-7, and on the south by the Michigan-Indiana boundary.

#### Lake Huron

MH-1 is bounded on the west by the Mackinac Bridge, on the north by an east west line from the village of Detour in Chippewa County at Latitude 46°00'N to the west shore of Drummond Island and an east-west line from the east shore of Drummond Island at Latitude 46°00'N to the international

boundary, and on the east and south by a line beginning where Longitude 083°30'W intersects the international boundary near Drummond Island in Chippewa County and extending southward along said longitude to Latitude 45°30'N, then extending westward along said latitude to Longitude 083°40'W, then extending southward along said longitude to shore about 3.5 miles southeast of Adams Point in Presque Isle County.

MH-2 is bounded on the north by MH-1, on the east by the international boundary, and on the south by an east-west line extending from the shore about one mile north of Black River in Alcona County at Latitude 44°50'N and extending eastward along said latitude to the International boundary.

MH-3 is bounded on the north by MH-2, on the east by the international boundary, and on the south by a line beginning on the shore on Au Sable Point in Iosco County at Latitude 44°20'N and extending eastward along said latitude to Longitude 083°10'W, then southward along said longitude to Latitude 44°10'N, then eastward along said latitude to the international boundary.

MH-4 is bounded on the north by MH-3 and on the east by a north-south line beginning on the shore about 2.6 miles southeast of Point aux Barques Lighthouse in Huron County at Latitude 44°00'N and extending eastward along said latitude to Longitude 082°40'W, then northward along said longitude to the southern boundary with MH-3 at Latitude 44°10'N.

MH-5 is bounded on the west by MH-4, on the north MH-3, on the east by the international boundary, and on the south by an east-west line beginning on the shore in the village of Forester in Sanilac County at Latitude 43°30'N and extending eastward along said latitude to the international boundary.

MH-6 is bounded on the north by MH-5, on the east by the international boundary, and on the south by the Blue Water Bridge in St. Clair County at Latitude 43°00'N.

#### Lake Superior

MI-1 is bounded on the west by the Michigan-Minnesota boundary, on the north by the international boundary, and on the south by a line beginning on the Minnesota boundary at Latitude 47°40'N extending eastward along said latitude to Longitude 088°30'W then northward along said longitude to Latitude 47°50'N then eastward along said latitude to Longitude 088°00'W then northward along said longitude to Latitude 48°00'N then eastward along said latitude to the international boundary.

MI-2 is bounded on the west by the Michigan-Minnesota and the Michigan-Wisconsin boundaries, on the north by MI-1, and on the east by a north-south line extending from the shore about 2.6 miles southwest of Fourteen Mile Point in Ontonagon County northward at Longitude 089°10'W to the southern border of MI-1 at Latitude 47°40'N.

MI-3 is bounded on the west by MI-2, on the north by MI-1, and on the east by a line extending northward from the shore about 1.4 miles east of Copper Harbor in Keweenaw County at Longitude 087°50'W to Latitude 47°30'N then eastward along said latitude to Longitude 087°40'W then northward along said longitude to the international border.

MI-4 is bounded on the west by MI-3, on the north by the international boundary, and on the southeast and east by a line beginning on the shore at Pine River Point in Marquette County at Longitude 087°50'W and extending northward along said longitude to Latitude 47°00'N then eastward along said latitude to Longitude 087°30'W then northward along said longitude to Latitude 47°10'N then eastward along said latitude to Longitude 087°20'W then northward along said longitude to Latitude 47°20'N then eastward along said latitude to Longitude 087°00'W then northward to the international boundary.

MI-5 is bounded on the west and north by MI-4 and on the east by a north-south line beginning on Laughing Fish Point in Alger County at Longitude 087°00'W and extending northward to Latitude 47°20'N.

MI-6 is bounded on the west by MI-4 and MI-5, on the north by the international boundary, and on the east by a north-south line beginning on Au Sable Point in Alger County at Longitude 086°10'W and extending northward to the international boundary.

MI-7 is bounded on the west by MI-6, on the north by the international boundary, and on the east by a north-south line beginning about four miles east of Crisp Point in Luce County at Longitude 085°20'W and extending northward to the international boundary

MI-8 is bounded on the west by MI-7, on the north and east by the international boundary with the easternmost border formed by a line from Brush Point in Chippewa County to Point aux Pins Ontario in the upper St. Marys River.

### **Lake Trout Refuges – Great Lakes**

The following areas are established as refuge areas for Lake Trout rehabilitation and shall be closed to the taking, keeping, and sport fishing for Lake Trout.

1) Lake Michigan (North part)

All waters enclosed within an area bounded by a line commencing at a point (45°30' north latitude, 85°15' west longitude) 7¼ miles due west of the northwest corner of Section 30, T36N, R6W, (Emmet County, Michigan) on the Lake Michigan shoreline; then proceeding due west for 12 miles (to 45°30' north latitude, 85°30' west longitude); then proceeding due north for 6 miles (to 45°35' north latitude, 85°30' west longitude); then proceeding due west for 8 miles (to 45°35' north latitude, 85°40' west longitude); then proceeding due north for 11¼ miles (to 45°45' north latitude, 85°40' west longitude); then proceeding due west 16 miles (to 45°45' north latitude, 86°00' west longitude); then proceeding due south for 40 miles (to 45°10' north latitude, 86°00' west longitude); then proceeding due east for 8½ miles to (45°10' north latitude, 85°50' west longitude); then proceeding due north for 6 miles (to 45°15' north latitude, 85°50' west longitude); then proceeding due east for 7½ miles (to 45°15' north latitude, 85°40' west longitude); then proceeding due north for 6 miles (to 45°20' north latitude, 85°40' west longitude); then proceeding due east 16½ miles (to 45°20' north latitude, 85°20' west longitude) then proceeding due north 6 miles (to 45°25' north latitude, 85°20' west longitude); then, proceeding due east 4 miles (to 45°25' north latitude, 85°15' west longitude); then proceeding northerly to the point of beginning (45°30' north latitude, 85°15' west longitude).

2) Lake Michigan (Mid Lake)

All waters enclosed within an area bounded by a line commencing at a point 15 miles (43°40' north latitude, 86°50' west longitude) due west of the half (1/2) section line of Section 25, T15N, R19W, on the Lake Michigan shoreline (Oceana County); then proceeding 14.5 miles due west to the Michigan/Wisconsin boundary; then proceeding southerly along the boundary line to a point (43°03.5' north latitude, 87°05' west longitude) due west of the mouth of the Grand River (T8N, R16W, S30, Ottawa County) on the Lake Michigan shore; then proceeding due east 14 miles (to 43°03.5' north latitude, 86°50' west longitude); and then northerly to the point of beginning (43°40' north latitude, 86°50' west longitude).

3) Lake Huron (North end)

All waters enclosed within an area bounded by a line commencing at the southwest corner of Section 17, T41N, R5E (Chippewa County) on the Lake Huron shoreline for the point of beginning and proceeding due south 15 miles (to 45°45' North latitude, 83°50' west longitude), then proceeding due east 8 miles (to 45°45' North latitude, 83°40' west longitude); then proceeding 6 miles due south (to 45°40' North latitude, 83°40' west longitude); then proceeding due east to the Michigan-Ontario border; then proceeding northwesterly and then northeasterly along said border to a point due south of the southeast corner of Section 1, T41N, R7E (Chippewa County), on the said shoreline, and westerly along said shoreline to the point of beginning.

## 4) Lake Huron (6 Fathom Bank)

All waters enclosed within an area bounded by a line commencing at a point in Lake Huron at 45°00' north latitude, 82°45' E west longitude; then proceeding due east to the international boundary line between the U.S. and Canada; thence in a southeasterly direction to 44°40' north latitude; thence due west to 44°40' north latitude, 82°45' E west longitude; then proceeding due north to the point of beginning.

### **SECTION I. Seasons--General**

Except as otherwise noted in the following sections of this Order, the fishing and possession seasons on non-designated trout streams and all other inland waters, the Saginaw River, and the Great Lakes and Great Lakes Connecting Waters are open for the entire year for all trout, salmon, whitefish, Cisco (also referred to as Lake Herring), and smelt.

Exceptions to the general possession season:

- 1) The possession season for Lake Trout and Splake shall be January 1 - September 30 in MM-1 through MM-5 in Lake Michigan.
- 2) The possession season for Lake Trout and Splake shall be open for the entire year in MM-6 through MM-8 in Lake Michigan.
- 3) The possession season for Lake Trout and Splake shall be January 1 - September 30 in MH-1 and MH-2 in Lake Huron.
- 4) The possession season for Lake Trout and Splake shall be open for the entire year in MH-3 through MH-6 in Lake Huron.

### **SECTION II. Lake Whitefish, Round Whitefish, and Cisco**

Size and daily possession limits for Lake Whitefish, Round Whitefish (also referred to as Menominee), and Cisco

On all waters, there is no minimum size limit for Lake Whitefish (*Coregonus clupeaformis*), Round Whitefish (*Prosopium cylindraceum*) or Cisco (*Coregonus artedii*). On all Great Lakes, Connecting Waters, and Type F lakes the daily possession limit shall be ten (10) fish in any combination, except the daily possession limit shall be five (5) fish in any combination on inland waters. See FO-205 for inland waters that differ from the five (5) fish daily possession limit.

### **SECTION III. Rainbow Smelt**

Size, daily possession limits, season, and gear for Rainbow Smelt

On all waters, there is no minimum size limit for Rainbow Smelt (*Osmerus mordax*). The daily harvest/possession limit for smelt on all waters of the state shall be 2 gallons. The harvest season is open all year for hook-and-line. See FO-219 for spear, bow and arrow, or crossbow seasons and FO-229 for netting seasons.

### **SECTION IV. Arctic Grayling**

Size, daily possession limits, season, and gear for Arctic Grayling

A person shall not at any time take, attempt to take, or possess any Arctic Grayling (*Thymallus tricolor*) from any waters over which this state has jurisdiction.

**SECTION V. Trout and Salmon—Great Lakes and Great Lakes Connecting Waters****Size limits**

Minimum size limit shall be 10 inches for all species of trout and salmon, except as follows:

## 1) Brook Trout

Lake Superior

- a) MI-1 through MI-8: the minimum size limit for Brook Trout shall be 20 inches.

## 2) Lake Trout

Lake Michigan

- a) MM-1 through MM-8: the minimum size limit shall be 15 inches.

Lake Huron

- a) MH-1 through MH-6: The minimum size limit shall be 15 inches.

Lake Superior

- a) MI-1 through MI-8: The minimum size limit shall be 15 inches, except that the daily possession limit shall not include more than one (1) Lake Trout 34 inches or greater.

## 3) Splake

Lake Michigan

- a) MM-1 through MM-8: the minimum size limit shall be 15 inches.

Lake Huron

- a) MH-1 through MH-6: The minimum size limit shall be 15 inches.

Lake Superior

- a) MI-1 through MI-8: The minimum size limit shall be 15 inches.

**Daily possession limit**

Five (5) trout and salmon in any combination, except that the daily possession limit shall not include more than three (3) Brook Trout, Brown Trout, Rainbow Trout\*, Lake Trout, Splake, or Atlantic Salmon. Additional exceptions are:

## 1) Lake Superior

- a) The daily possession limit may include up to one (1) Brook Trout, except that the daily possession limit shall be zero (0) for Brook Trout within 4.5 miles of Isle Royale (waters of the Isle Royale National Park).
- b) The daily possession limit may include up to five (5) Lake Trout in MI-4, MI-5, MI-6, MI-7, and MI-8.

## 2) St. Marys River

- a) The daily possession limit may include up to ten (10) Pink Salmon from the last Saturday in April - September 30.

## 3) Lake Michigan

- a) The daily possession limit may include up to two (2) Lake Trout in management units MM-1, MM-2, MM-3, and MM-5.
- b) The daily possession limit may include up to one (1) Lake Trout in management unit MM-4.

## 4) Lake Huron

- a) The daily possession limit may include up to two (2) Lake Trout and Splake, in any combination in management unit MH-1.

\*Note: For the purpose of this Order Rainbow Trout refers to both Rainbow Trout and Steelhead.

**SECTION VI: Trout and Salmon in Inland Lakes**

On those inland lakes designated below as Types A, B, C, D and E, the minimum size limits for Chinook Salmon, Coho Salmon, Pink Salmon, and Atlantic Salmon shall be as follows:

<u>Species</u>	<u>Minimum size limit</u>
Chinook Salmon	10 inches
Coho Salmon	10 inches
Pink Salmon	10 inches
Atlantic Salmon	15 inches

Notwithstanding any other Order of the Department, for any inland lake not classified below the fishing and possession seasons are open for the entire year to the taking of trout, the minimum size limit shall be 8 inches except, the daily possession limit shall be five (5) trout\*\*, and all types of natural bait and artificial lures may be used.

\*\*Note: The daily possession limit shall not include more than three (3) trout 15 inches or greater.

**Type A Lakes**

- Fishing season: last Saturday in April - October 31.
- Possession season: last Saturday in April - October 31.
- Tackle: natural baits except minnows (dead or alive) and artificial lures may be used.
- Daily Possession Limit: five (5) trout, except that the daily possession limit shall not include more than three (3) trout 15 inches or greater.
- Size limits:

<u>Species</u>	<u>Minimum size limit</u>
Brook Trout	10 inches
Brown Trout	12 inches
Rainbow Trout	12 inches
Splake	12 inches
Lake Trout	15 inches

Following is a listing of Type A lakes. Type A lakes are managed strictly for trout and, as such, are designated trout lakes.

Type A Designated Trout Lakes	
County	Lake Name
Alger	Addis Lakes (T46N, R20W, S33)
Alger	Bette's Pond
Alger	Brian's Pond
Alger	Cox Pond (T46N, R19W, S13)

#### **SECTION VII. Trout and Salmon on Inland Streams**

##### **NOTES:**

- 1) Fisheries Order 210 provides a listing of all designated trout streams in Michigan. Some of the streams listed in FO-210 appear in FO-200 (see section VII) as Types 2, 3, 4 or gear restricted streams. Type 1 streams are not listed in FO-200. If a stream name appears in FO-210, but not in FO-200 (section VII), then Type 1 stream regulations apply to that stream.
- 2) Notwithstanding any other Order of the Department, for any inland stream not classified below the fishing and possession seasons are open for the entire year to the taking of trout and salmon, the minimum size limit shall be 8 inches (except 7 inches for Brook Trout), the daily possession limit shall be five (5) trout and salmon in any combination\*\*\*, and all types of natural bait and artificial lures may be used.
- 3) On all waters open to possession, the daily possession limit may include up to five (5) Chinook Salmon or Coho Salmon, in any combination.
- 4) "Artificial flies" means any commonly accepted single hooked wet and dry flies, streamers, and nymphs without spinner, spoon, scoop, lip or any other fishing lure or bait attached. The fly or leader may be weighted but no weight shall be attached to the fly or to the terminal tackle in a manner that allows the weight to be suspended from or below the hook.
- 5) "Chumming" means luring or attracting or attempting to lure or attract fish by scattering organic material into the water.
- 6) Chumming with organic materials shall be prohibited on all Type 1, 2, 3, and 4 streams.

- 7) On stream Types 1 through 4, size limits for Brook Trout and Brown Trout vary by stream type and may be found in the regulation section for each stream type. For all other species of trout and salmon, size limits shall be as follows:

<u>Species</u>	<u>Minimum size limit</u>
Chinook Salmon	10 inches
Coho Salmon	10 inches
Pink Salmon	10 inches
Atlantic Salmon	10 inches
Lake Trout	10 inches
Rainbow Trout	10 Inches
